I shall now endeavor to give you what I deem to be the law in these cases. This proceeding is a civil action which commences with what is called a libel. The Government has seized under the Food and Drugs Act, commonly called the Pure Food Act, articles of food known as apples and pears, for alleged failure to comply with the provisions of the statute. The purpose of the Food and Drugs Act, or the Pure Food Law so-called, is to conserve the public health by preventing interstate commerce in food containing an added poison which may render the food injurious to health, and in order that this may be effected, the offending food is subject to seizure, as it is here.

Congress on June 30, 1906, acting upon the theory that the evil of adulterated food was of national concern, enacted this statute under which these cases are now being tried, to protect the public health and to keep the purchasers from being defrauded. This statute provides that should it be determined by you that the food in question violates the law, then the Government has the right by a decree of court to

have that article either condemned and destroyed or to have it salvaged and reconditioned under a bond which the claimant is required to give, conditioned that the articles be by such salvage or reconditioning put in a condition to conform to the statute.

I charge you further, gentlemen, that pears and apples are food within the meaning of the Food and Drugs Act. It makes no difference under this act whether the shipper or claimant knew or did not know that the food containing the added poison might injure the health of the consumer. The act forbids the channels of interstate commerce to such adulterated foods. Under the Food and Drugs Act the time when you are to consider whether these apples and pears are in violation of this act is the present. What happened to them before the apples or pears came within the jurisdiction of the Food and Drugs Act when they were introduced into interstate commerce is not of your concern in these cases.

I charge you that the Food and Drugs Act has no control over the growing of apples or pears. Your duty in this case is simply to pass upon the single question of whether the apples and pears seized do or do not comply with the provisions of this Pure Food Act in the manner that I shall hereinafter mention to you.

The suits are brought by the United States against the food itself, but the owner may come in and become a claimant, that is a sort of defendant in the case, and ask that it be not condemned, that the food be returned to him, denying any claim of the Government that it is adulterated. The claimants in these cases that I have mentioned are the Suncrest Orchards, Incorporated, so we have the issues here, the Government alleging certain things, and the claimants having taken the place of the food, becoming in effect a defendant.

The statute forbids adulteration of a food product, and the articles shall be deemed to be adulterated in case of foods for a number of reasons that are set forth in the statute, but the reason in this case is under section 5 of the pure food—of the Food and Drugs Act, which statute is sometimes called the Pure Food Law, and I read as follows from section 5 of the act: "For the purpose of this act an article shall be deemed adulterated in the case of food (5) If it contains any added poisonous or other added deleterious ingredient which may render such article injurious to health."

Now that is the statute that is in issue in this case, and raises the question you are called upon to decide, and that question is simply whether the apples and pears in controversy here contain any added poisonous or other added deleterious ingredient which may render such article injurious to health; so if you find that the articles of food contain added poisonous or other deleterious ingredient which may render such articles injurious to health, you are warranted in finding the issues for the Government and against the defendant.

You are further instructed, gentlemen, that this case must be decided by you on the evidence under the instructions of the court and not upon the statements of counsel outside of the evidence, and unsupported by the evidence, if any such statements have been made. The evidence and the law alone must govern your verdict.

It is not required that the article of food containing added poisonous or added deleterious ingredients must affect the public health, and it is not incumbent upon the Government in order to make out a case

to establish that fact. The act has placed upon the Government the burden of establishing, in order to secure a verdict of condemnation under this statute, that the added poisonous or deleterious substance mentioned must be such as may render such article injurious to health. The word "may" is here used in its ordinary and usual signification, there being nothing to show the intention of Congress to affix to it any other meaning. In thus describing the offense, Congress doubtless took into consideration that foods may be used in many ways. It may be consumed when prepared as a food and as has been spoken of here, by the strong and weak, the old and the young, the well and the sick, and it is intended that if any food because of any added poisonous or other deleterious ingredient may possibly injure the health of any of them it shall come within the ban of the statute. If it cannot by any possibility, when the facts are reasonably considered, injure the health of any consumer, such food may not be condemned under the act.

There is also the question of interstate shipment, but I charge you that the interstate shipment has been admitted in the pleadings and is not controversy.

If you find from the evidence that the apples or pears under the seizure do not contain any poison or other deleterious ingredient that may render the apples or pears injurious to health, the apples and pears will be returned to the claimant.

I charge you that the Government must prove this case by a preponderance of the evidence. When you come to the evidence, you and not the court, are the sole judges of the credibility of the witnesses and the weight and value to be given to the testimony of the witness. You are warranted in taking into consideration their manner and appearance upon the stand, their manner of testifying, the probability or improbability of the testimony which they give, and their opportunity to see and observe and profit by and their ability to correctly relate what they did here or attempted to relate. You may take into consideration their interest in the case for the plaintiff or the claimants.

If you find for the Government it does not necessarily mean that the apples and pears will be destroyed. Under this act if the claimants file a bond that they will clean the apples and pears so that they may not be injurious to people who eat them, the court upon application of the claimants may order these apples and pears returned to the claimants to be cleaned so that they may not be injurious to anyone who eats them.

As I said before, gentlemen, you are to return a different and separate verdict in each case. If your verdict shall be for the plaintiff your verdict shall be, "We, the jury in the above entitled cause find the issues herein in favor of the United States." If your verdict shall be for the claimants, your verdict shall be "We, the jury in the above entitled cause, find the issues herein in favor of the claimants, Suncrest Orchards Company, Incorporated." There are three forms of verdict, and when you arrive at a verdict in either and all of the cases, all of the jury will sign them, returning them into court.

Any exceptions to the charge?

Mr. Adams. May we have the following exceptions to the charge, Your Honor?

The Court. Yes, sir.

Mr. ADAMS. We request that the court instruct the jury that in all cases in this charge that he has just given where he has used the words "added poison" or "added substance," he means by that that the article of food must contain or does contain an added poisonous or other deleterious ingredient. The word ingredient has sometimes been used in the charge and at other times has been spoken of very lightly.

The COURT. The court feels it has been practically covered, but you may preserve an exception.

Mr. ADAMS. Thank you. The next exception which we ask Your Honor for the purpose of saving our record is a charge to the effect that pears and apples shown to have upon them a substance in the manner in which these pears are alleged to have a substance upon them, are not within the meaning of this act.

The COURT. Preserve the exception.

Mr. ADAMS. The next exception and request is that we object to the court's instruction that what happened before these fruits came into interstate commerce is immaterial.

The COURT. Preserve the exception.

Mr. ADAMS. The next request that we desire to make is that the court instruct the jury in words or in substance as follows: That the law does not prohibit the spraying of apples or pears with lead arsenate, and a jury cannot find or should not find for the Government or against the claimant, Suncrest Orchards, Incorporated, even if it be shown that lead-arsenate spraying residue was upon the apples and pears or is upon the apples and pears in question, unless they believe from a preponderance of the evidence that such addition, if any, is an added poisonous or other deleterious ingredient contained in such food, such that it would render such apples or pears injurious to the health of those—or that might be injurious to the health of those——

The COURT. That was all covered, all covered. Save an exception. And now, how many more have you got? I don't like this way of presenting them.

Mr. ADAMS. There are just two or three. I will try to make it as brief as possible, Judge.

The COURT. I don't want any pettifogging here.

Mr. ADAMS. I don't intend to pettifog.

The COURT. Go on, go on.

Mr. ADAMS. I would like an instruction, if the court please, to the effect that the mere fact that the Federal Government has instituted libel proceedings against the apples and pears in question in the case before the jury and that the said apples and pears have been seized under such proceeding, is not to be considered as any indication whatever that the Government is right in its contention.

The COURT. I don't think that is necessary here. Save an exception.

Mr. KELLY. If Your Honor please——

The COURT. Never mind. Go on with your exceptions.

Mr. ADAMS. Now, I would like to ask an instruction to this effect, that if upon any disputed fact or state of facts the evidence in this case, considered in the light of the court's instruction, is evenly balanced or in such a state of uncertainty that the jury are unable to determine in whose favor the evidence preponderates, they have no right to give the benefit of the doubt to the Government.

The COURT. I instructed them on the preponderance of the evidence.

Mr. ADAMS. I have done my best to follow the court's instructions, and I fail to hear that.

The COURT. Save an exception.

Mr. ADAMS. Mr. Kelly has one more.

Mr. KELLY. May I offer this exception, Your Honor: That the claimant excepts to the instruction of the court to the effect that the verdict of the jury against the fruit does not mean that the same will be destroyed but that the same may be cleaned, for the reason that there is no evidence to support such an instruction and no evidence to show that the same may or may not be conditioned to the satisfaction of the Government or the Department.

The COURT. Overruled and exception. Retire with the jury.

UNITED STATES v. BOISE VALLEY COOPERATIVE CREAMERY CO.

(District Court, District of Idaho, Dec. 23, 1926)

N.J. No. 15114

Information alleging violation of section 2 of the Food and Drugs Act. Trial before the court. Judgment of guilty.

Per curiam: In three counts the defendant is charged with violating the Pure Food Law, in that it shipped to Los Angeles, in interstate commerce, on three different occasions, butter, some of the packages of which contained an excess of moisture. Jury trial was waived, and the cause submitted to the court upon a very brief statement of facts, including the findings by Government agents. It is not controverted that some of the packages did contain a small excess percentage of water. The only defense suggested is that the defendant is a cooperative concern, and shipped the butter to another cooperative concern, made up of representatives of numerous local cooperative creameries in different parts of the country. The contention in substance is that the consignee was merely an agent of the consignor, thus bringing the case within the principle of *United States* v. *Sixty-five Cases Liquid Extracts,* 170 Fed. 449, 175 Fed. 1022; but I do not think the facts warrant the conclusion that the consignee was a mere agent. Both consignor and consignee are corporations, and when a shipment was made, such as is here involved, by the defendant to the Los Angeles concern, it was received and commingled with shipments from other concerns and sold upon the market in regular course. Payment for all shipments was made at the end of each week. There was no report of sales, and no accounting for any particular consignment. The butter was paid for at scheduled price, and defendant was never asked to return any of the money so paid and the consignee never accounted for any moneys received for butter in excess of the schedule price paid by it to the defendant. The mere fact that ultimately if any net profit was realized from the conduct of the business by the Los Angeles concern there was to be a ratable distribution of it to the customers of the concern, does not

materially alter the case. I think the shipment of the butter by the defendant, its receipt by the Los Angeles concern, and payment therefor at schedule price, in effect constituted a sale. The shipment was not made by a principal to a mere agent, or by a mere agent to a principal, as was true in the case referred to. It will be necessary, therefore, to find the defendant guilty. As to the amount of punishment, the excess of moisture was very small, and there is no suggestion of any other violation of the law by the defendant, nor is there any evidence of bad faith or willful misconduct. I am therefore inclined to think that justice requires very little more than a nominal fine.

Judgment will be that the defendant pay a fine of $25 upon each count.

UNITED STATES v. 49½ CASES OF BRED SPRED

(District Court, E.D. Michigan, Jan. 6, 1927)

N.J. No. 17351

Libel under section 10 of the Food and Drugs Act. Motion to dismiss libel sustained.

The United States attorney filed a libel for seizure and condemnation of 49½ cases, each containing a number of jars of "Bred Spred", alleging that the article had been shipped and transported from Chicago, Ill., to Detroit, Mich., and remained unsold in the original unbroken packages, and that it was adulterated and misbranded.

The libel alleged that the article was adulterated in that a substance, pectin, had been mixed and packed with the said article so as to reduce, lower, or injuriously affect its quality or strength; in that a substance, pectin, had been substituted wholly or in part for the article; and in that it had been mixed in a manner whereby inferiority was concealed.

Misbranding was alleged for the reason that the article was an imitation of jam; for the further reason that it was offered for sale under the distinctive name of another article; for the further reason that the retail packages containing the article bore labels upon which the statement, "Bred Spred Strawberry [or "Raspberry"] Flavor," appeared, which statement was false and misleading and deceived and misled the purchaser, in that it represented the product to be a pure jam, whereas it was not, but was a compound of pectin, fruit, and sugar; and for the further reason that there appeared on said labels pictorial designs or devices of fruit which deceived and misled the purchaser into the belief that the article was strawberry or raspberry jam, whereas it was not.

SIMONS, *District Judge*. I confess I have been looking at the language of this section 8 here off and on for the last day and a half, and I have not at times been clear as to just what it did mean—whether it meant under the first paragraph "If it be an imitation of another article" or whether it meant, "If it be an imitation of another article under a distinctive name." It would seem to me that, depending somewhat on the attitude of mind you brought to an interpretation of that first clause, you could read it either way.

Reading it, however, in connection with the proviso, it might seem as though the Congress intended that articles that were not labeled with the distinctive name of some other article would come within the exception of the proviso. Now, that is undoubtedly the conclusion that Justice Hughes came to in *Savage* v. *Jones*, and while, of course, this case was not a case involving directly the pure food and drug law, it was a case in which there was considered the constitutionality of a local statute of the State of Indiana, the question there being raised as to whether the State statute invaded the field already occupied by the Federal food and drug law; and in order to determine whether it did invade that field it became necessary for Justice Hughes speaking for the court, to map out or chart the field over which Congress took jurisdiction insofar as interstate commerce was concerned, by this particular section 8 of the Federal statute on behalf of the court. So it is rather more than dictum. Wasn't it necessary to decision that he lay out, define, the limits of the field in which Congress undertook to legislate with respect to interstate commerce, in order to determine whether or not the State statute of Indiana, which was in question, invaded that field? Because the Supreme Court has held that where Congress has taken jurisdiction over commerce that is interstate, so far as it has undertaken to regulate that commerce, its authority is exclusive. That is true.

And so, whatever Justice Hughes had to say on behalf of the court with regard to the interpretation of this section 8 was not dictum, but was necessary for the decision of the case of *Savage* v. *Jones*.

It seems to me that this court is bound to follow the interpretation put upon the section by the Supreme Court of the United States, and even if it be conceded that the interpretation is dictum it is dictum that is certainly highly persuasive as to the real meaning of Congress in the language contained in section 8 of the food and drug law.

Perhaps, in view of what I have said, it would be unnecessary to spend the time to formulate a more formal opinion. The libel and amended libel will be dismissed, the petition of the claimant for the return of the seized property will be granted—the prayer of the petitioner granted. You may take your exceptions.

UNITED STATES v. 630 BASKETS OF APPLES

(District Court, D. Kansas, Mar. 21, 1927)

N.J. No. 17,274

Libel under section 10 of the Food and Drugs Act. Jury trial. Verdict in favor of the United States.

POLLOCK, *District Judge*. Gentlemen of the jury: This case has now proceeded to that point at which it becomes the duty of the court to charge you as to the law that will govern you upon your deliberations upon a verdict in this case. You understand, in our courts of justice in this country, where matters are heard and determined as this case is being tried, the responsibility for the due and proper administration of justice under the law is equally divided between the two bodies. While that responsibility is equal, it is different in kind. It is the duty of the court to declare the law and the duty of the jury to take

the law precisely as declared by the court, and the jury does and must trust the court to correctly declare the law. If any mistake is made in a matter of law, that is the mistake of the court for which the jury is not responsible. On the other hand, the jury and the jury alone is the sole judge of the weight of the evidence, the credibility of the witnesses and what facts are proven in the trial of the case from the evidence that is offered and received in evidence. And, so long as in our courts of justice, the jury takes the law as declared by the court, and takes and finds the true facts in the case and unite the same in their verdict returned, just so long do we have a proper administration of justice under the law.

Again, it is the duty of the court to define the issue or issues in a case being tried. By that I mean to state so clearly that no juror can fail to understand precisely what it is that is to be determined by the verdict when rendered in the case. Now, what is this case? The Government here is proceeding under what is known as the Pure Food and Drugs Act enacted by the Congress of the United States, and enacted, like so many laws are, in pursuance of what is known as the commerce clause of our Constitution. That is, Congress has taken to itself, or was really given by the States in constitutional convention, the power to regulate commerce among the States and with the Indian tribes. Now, the Government contends in this case that the defendant, Judge Martin, shipped from Colorado a certain carload of apples which he had raised out there in his orchard, in interstate commerce into Kansas from the State of Colorado, and that these apples had been by addition thereto of arsenic [arsenate] of lead, I understand a poison, that these apples had been adulterated in such manner that they might be deleterious to human health if consumed as found [food?]. Now this proceeding is what is known under the Pure Food and Drugs Law as a libel. Suit is brought for the purpose of determining whether these apples shall be condemned and destroyed as a food product.

It is under section 10 of this act, as follows:

> That any article of food, drug, or liquor that is adulterated or misbranded within the meaning of this Act, and is being transported from one State, Territory, District, or insular possession to another for sale, or, having been transported, remains unloaded, unsold, or in original unbroken packages, or if it be sold or offered for sale in the District of Columbia or the Territories, or insular possessions of the United States, or if it be imported from a foreign country for sale, or if it is intended for export to any foreign country, shall be liable to be proceeded against in any district court of the United States within the district where the same is found, and seized for confiscation by a process of libel for condemnation.

And that is what we will inquire into here. These apples were found in the jurisdiction of this court and by the Government were libeled for the purpose of having them condemned. Now, the object and purpose of Congress in the enactment of this Pure Food and Drugs Act was the preservation of the health of people, and a very right kind of an act. The defendant in this case admits that he raised these apples in the State of Colorado; that in that climate the apple trees—bearing trees—must be sprayed with some poisonous solution in order that apples may be grown that are fit for use at all. He admits that he did use the material, a liquid compound that is used in that section of the country, sold and used for the purpose of bringing these apples on the trees to maturity, and that he did after these apples had matured on the trees, up until picking time, that he picked them, caused them to be picked, and shipped them to himself in

Hutchinson, Kans., to his warehouse there, and he contends that at that time they were not ready for use as apples. That those apples which he did ship for use or sale that he caused them to be wiped or washed, washing all possible part of this poisonous solution of arsenate of lead off of them so there could be no question in that regard. Now, you will note that the section under which we are proceeding here conditions that these shipments made in interstate commerce shall be for sale, and if there was sufficient poisonous material upon these apples when they were shipped in interstate commerce that it might become deleterious to human health in eating them, if they were shipped for sale or by the shipper intended for sale, or offered for sale, then they ought to be condemned and destroyed. However, there is a provision in regard to this act which has just as much application as the part which I have quoted, and that is what this adulteration is.

Section 7 of the act provides: "That for the purposes of this act an article shall be deemed to be adulterated: In case of drugs" so and so; this is not drugs, not have to read that. "In the case of confectionery, candy" and so on, this has nothing to do with that; but—

> In the case of food: First. If any substance has been mixed and packed with it so as to reduce or lower or injuriously affect its quality or strength. Second. If any substance has been substituted wholly or in part for the article. Third. If any valuable constituent of the article has been wholly or in part abstracted. Fourth. If it be mixed, colored, powdered, coated, or stained in a manner whereby damage or inferiority is concealed.

Evidently it was not under those. But it is, I suppose, the Government proceeding on the idea it was adulterated as provided in the fifth.

> Fifth. If it contain any added poisonous or other added deleterious ingredient which may render such article injurious to health: *Provided*, That when in the preparation of food products for shipment they are preserved by any external application applied in such manner that the preservative is necessarily removed mechanically, or by maceration in water, or otherwise, and directions for the removal of said preservative shall be printed on the covering or the package, the provisions of this Act shall be construed as applying only when said products are ready for consumption.

Now, it is the contention of Judge Martin, while admitting the spraying of these trees with this arsenate of lead, and the statement, that he was not shipping these apples to market, that they were not ready for food; but his contention is that he was shipping them to his own warehouse and to be there kept until they reached that condition when they could be put upon the market for food, and at which time the law, as he says, would apply, but they were not at this time ready for food as an edible.

This is a very practical world. We have to live a practical life. And amidst all of these numerous regulations we have to still live a practical life. If Judge Martin did anything in this case with these apples whereby the health of individuals might be deleteriously affected, then the apples ought to be condemned. But, while these apples were handled in interstate commerce, if they were so treated not as a food product or not with any intent of offering as a food product, if he kept them under his control so they could not go into the hands of others to be used, and affect them injuriously, then he had a right to deal with them in that practical way. For, suppose the Government should admit here that the purpose of shipping them—not only in interstate commerce—that they not only were shipped in that manner but suppose he were shipping them to feed his hogs; it

was not hogs the Government was looking after when it enacted this law and the Government wouldn't have any concern whether they were good for individuals or not if they are shipped and fed to hogs, that would be the individual's business and not the Government's. But if anything is the matter, if it was not in good faith intended that these were not ready for the market and should not go on the market, then you would find the defendant guilty, if you believe the amount of poisonous products added in this case was deleterious to human health. So that is the way I am going to leave that question to you in this case, of which fact you are the sole and exclusive judges. You will take the matter and determine it in the light of the law as I have given it to you.

Mr. McFarland. Your Honor, I would like to make one correction; I think the jury probably gets the wrong interpretation; as I understand, Judge Martin is not the defendant, but the claimant of the apples.

The Court. That is true; for all purposes he is the owner of the apples. This is a proceeding against the apples themselves. There is, I may say, a criminal provision of this law under which, if the Government is correct, defendant Martin might have been prosecuted and punished as a criminal, but that is not relied on in this case.

Mr. McFarland. I would like to save an exception on the instruction, if they were so treated as a food product and remained in the hands of Judge Martin, he would have the right to deal with them in a practical way. And I would like to request Your Honor to give the instruction no. 10 mentioned in my request here.

The Court. I forgot to mention, there have been some requests to charge, but I have embodied what I deem to be the law in what I have given, and therefore have refused the requests made.

Mr. McFarland. Your Honor refuses our requests in toto?

The Court. Yes.

Mr. McFarland. I want to save an exception on that. I think it should be shown to the jury in the event they do find these apples are adulterated, there is a proceeding where——

The Court. The question now is, whether we are going to condemn the apples because adulterated and injurious to human health.

Mr. McFarland. I thought Your Honor's instruction they might be destroyed might be prejudicial. I would like to save an exception on that.

UNITED STATES v. 315 BOXES OF ORANGES

(District Court, Massachusetts, Apr. 6, 1927)

N.J. No. 15199

Libel under section 10 of the Food and Drugs Act. Trial before the court. Decree in favor of claimant.

The United States attorney filed a libel for seizure and condemnation of 315 boxes of oranges, alleging that they had been shipped and transported from the State of Florida into the State of Massachusetts and remained in the original unbroken packages, and that they were

adulterated in that they consisted in whole or in part of a decomposed vegetable substance.

MORTON, *District Judge.* I think I will, after all dispose of the case now, while everybody is here.

As to the question of fact which is involved, it is this: What was the condition, the actual condition, of this car-load of some 300-odd boxes of oranges? As the sampling which is relied upon in the forfeiture proceedings consists of two oranges taken from each of 50 boxes—that is 100 oranges—out of the 300-odd boxes, I think it is a sampling which would hardly be regarded as a sufficient sampling to deal with the shipment as between buyer and seller, and I think it is rather insufficient sampling to deal with the matter on a forfeiture proceeding.

Then there were some samples taken—a very small number too—56 oranges were taken on behalf of the owner of the shipment. Those were taken by Mr. Nevins, who was more or less interested—he said not greatly interested—but representing the owners of the oranges—they certainly did have more or less commercial interest. On those the gentlemen in the fruit business said they found them fit for commercial shipment in general.

At the eleventh hour Mr. Steinbauer comes in, and knows more about it than anybody who has testified. He is a Government inspector. He went over 800 of these oranges, taking 10 half-boxes, and going right through each half-box. I think that is altogether the best evidence there is as to the character of this shipment. If you take his statement, the boxes differ very much. Some were certainly good, and some ran pretty bad. But I don't think that on his testimony the shipment itself is so defective that you can say that the car-load as a whole is subject to forfeiture, and on that ground I dismiss the information.

And I find it unnecessary to pass upon the question of law; but I should perhaps say that I am glad I do not have to pass upon that question, because I think it extremely doubtful whether that statute in fact gives the Department authority to forfeit for a defect of this sort. It is a matter in which as one of the public my sympathy is with Dr. Adams and his officials, but I think the word "decomposed" is a word that is hardly met by a change in condition caused by frost bites; but there is however an opportunity for a difference of opinion on that, because undoubtedly the chemical contents of the oranges change by frost bite. But that I find it unnecessary to decide.

UNITED STATES v. SEACOAST CANNING CO.

(District Court, S.D. Texas, July 27, 1927)

N.J. No. 15342

Suit for forfeiture of a bond given to insure compliance with terms of the decree in a proceeding under section 10 of the Food and Drugs Act. Judgment for the United States for the amount of bond.

HUTCHESON, *District Judge.* This is a suit on a bond given in a forfeiture case authorizing the defendants under certain conditions to take the sardines on their making bond.

The bond was made and the conditions of the bond were violated by putting the sardines into the trade before they had been inspected, and the good ones, if there were any, segregated from the bad. The defense is that there was a misunderstanding on the part of the defendants, they believing that when the marshal delivered the sardines to them, they had been inspected.

I agree with the Government in its position that the terms of the bond are absolute, and whether the defendants acted mistakenly or intentionally is immaterial. They took the sardines under an absolute agreement not to sell them in their adulterated state, and they did sell them. No amount of mistakes can save the fact.

It is my opinion therefore, that judgment should go for the United States for the amount of the bond.

UNITED STATES v. MOREHOUSE

(District Court, N.D. California, Jan. 10, 1928)

N.J. No. 15548

Information alleging violation of section 2 of the Food and Drugs Act. Jury trial. Verdict of guilty.

The United States attorney filed an information against Louis H. Morehouse, a member of a partnership trading as Morehouse & Co., Oakland, Calif., alleging shipment by said defendant from the State of California into the State of Washington, of a quantity of prepared mustard which was adulterated and misbranded.

Adulteration of the article was alleged for the reason that mustard hulls had been mixed therewith so as to lower, reduce, and injuriously affect its quality and strength, and had been substituted in part for mustard, which the said article purported to be. Adulteration was alleged for the further reason that the article was a product inferior to mustard, to wit, a product composed in part of mustard hulls, and was colored with turmeric, so as to simulate the appearance of mustard and in a manner whereby its inferiority to mustard was concealed.

Misbranding was alleged for the reason that the statement "Mustard," borne on the barrels, was false and misleading in that the said statement represented that the article was composed wholly of mustard, and for the further reason that it was labeled as aforesaid so as to deceive and mislead the purchaser into the belief that it was composed wholly of mustard, whereas it was not so composed, but was composed in part of mustard hulls.

The case having come on for trial before the court and a jury, the court, after the submission of evidence and arguments by counsel, charged the jury as follows:

KERRIGAN, *District Judge*. Gentlemen of the jury: The information in this case, as you already know, is based upon what is called the Pure Food and Drug Act of June 30, 1906. You have already been made familiar with the contents of the information, and it will be unnecessary for me at this time even to state the substance of it. I might, however, in this connection, state that at the time of the arraignment the defendant pleaded not guilty, thus putting in issue all the material

elements or allegations of the information, and casting upon the Government the duty of establishing its case against the defendants to a moral certainty and beyond a reasonable doubt. The information will be handed to you by the bailiff when you retire to deliberate upon your verdict.

Under the Pure Food and Drug Act it is provided that any person who shall ship or deliver for shipment from any State or Territory to any other State or Territory, or foreign country, any article of food or drug so adulterated or misbranded within the meaning of this act shall be guilty of a misdemeanor, and the maximum punishment is a fine of $200; and—

> That for the purposes of this act, an article shall be deemed to be adulterated:
> In the case of food:
> First. If any substance has been mixed and packed with it so as to reduce or lower or injuriously affect its quality or strength.
> Second. If any substance has been substituted wholly or in part for the article.
> Third. If any valuable constituent of the article has been wholly or in part abstracted.
> That the term "misbranded," as used herein, shall apply to all * * * articles of food, or articles which enter into the composition of food, the package or label of which shall bear any statement, design, or device regarding such article, or the ingredients or substances contained therein which shall be false or misleading in any particular.
> That for the purpose of this Act, an article shall also be deemed to be misbranded:
> In the case of food:
> First. If it be an imitation of or offered for sale under the distinctive name of another article.
> Second. If it be labeled or branded so as to deceive or mislead the purchaser.

The Secretary of the Treasury, the Secretary of Agriculture, and the Secretary of Commerce and Labor shall make uniform rules and regulations for carrying out the provisions of this act, including the collection and examination of specimens of food and drugs manufactured or offered for sale in the United States. Regulations made by an executive department, in pursuance of authority delegated by Congress, shall have the force and effect of law.

In prosecutions for adulterating and misbranding of food products shipped in interstate commerce under the Pure Food and Drug Act, the knowledge or intent of the shipper is not an element of the offense.

If you find that the food products with which this case is concerned were adulterated or misbranded within the meaning of the Pure Food and Drug Act, and were shipped in interstate commerce by defendant, it is immaterial whether the defendant had knowledge that the particular food or drugs were adulterated or misbranded.

When construing and enforcing the provisions of this act, the act, omission, or failure of any officer, or agent, or other person acting for or employed by any corporation, company, society, or association, within the scope of his employment or office, shall in every case be also deemed to be the act, omission, or failure of such corporation, company, society, or association, as well as that of the principal.

A great deal of stress has been laid upon the age of the case. To my mind, and you are so instructed, that is immaterial to any issue that you are to pass upon in this case. You are to decide upon the evidence in this case whether the defendant is guilty or not guilty, whether the defense stated by him is genuine, or, as has been said, whether it is a fictitious defense. The age of the case, as I say, has no

bearing upon any issue which is to be considered or passed upon by you. It may be true that on account of the long time that this case has been pending, that the facts may have grown dim in the memory of the witnesses; and, of course, in passing upon the question whether or not a witness has told the truth, you have a perfect right to consider the long time that this case has been pending.

This being a criminal case, the defendant is presumed to be innocent. This presumption has the weight and effect of evidence. It may operate to acquit the defendant, and will operate to acquit the defendant unless it is overcome to your satisfaction to a moral certainty and beyond a reasonable doubt.

A reasonable doubt means just what the term implies. It is a doubt based upon reason. It has been defined to be that state of the case which, after an entire comparison and consideration of all of the evidence in the case, leaves the minds of the jurors in that condition that they cannot say that they have an abiding conviction to a moral certainty of the truth of the charge.

UNITED STATES v. ONE BALE OF ALETRIS ROOT

(District Court, E.D. Pennsylvania, Mar. 9, 1928)

N.J. No. 15538

Libel under section 10 of the Food and Drugs Act. Jury trial. Verdict for claimant.

The United States attorney filed a libel for seizure and condemnation of one bale of aletris root, alleging that the article had been shipped and transported from the State of North Carolina into the State of Pennsylvania and remained unsold, and that it was adulterated in that it was sold under a name recognized in the National Formulary, but differed from the official standard of strength, quality, and purity, as determined by the test laid down in said Formulary. The case having come on for trial, after the submission of evidence and arguments by counsel the court delivered the following instruction to the jury.

THOMPSON, *District Judge.* Ladies and gentlemen of the jury: This is a case in which the United States, under the provisions of the Pure Food and Drug Act, seized a quantity of aletris root, which was in the possession of H. K. Mulford Company.

The Pure Food and Drug Act is intended to protect the public against having adulterated drugs transported from one State to another, and it provides standards by a formulary, in accordance with which it may be determined whether or not such drugs are adulterated.

In this case the formulary set 16 percent of ash as the highest quantity of ash which, under that law, could be contained in this drug represented by these roots. In other words, if the aletris roots in the bale, shipped from North Carolina into Pennsylvania, contained over 16 percent of ash on test, then the drugs, under the act, were adulterated. If the roots, as transported, did not contain that much ash upon analysis or test, then it was not adulterated, and the Govern-

ment had no authority or right to seize it; so that it becomes a question of fact for the jury, taking into consideration all the testimony in the case on both sides, as to whether this bale or package of these drugs was adulterated in the sense that the quantity that was transported contained more than 16 percent of ash.

You have heard the testimony of the Government analyst, who testified that from samples taken by the Government inspector he made an analysis from those samples, that it was found in one case the ash content was 23 percent and in the other case 21 percent.

The defendant in the case has called as one of its witnesses its chemist, who testified that he made an analysis or test of samples taken from these roots, and that, under that test, they only showed 5 percent of ash, so that you have here a difference in these tests.

There was a quantity of 416 pounds, I think it was—418 pounds of this root that remained in this bale, and it is a question for the jury to determine whether, taking that whole quantity, the roots or drugs were adulterated in that they contained more than 16 percent of ash.

Of course, you heard the testimony as to the fact that these roots are dug out of the ground, and that the earth necessarily adheres to them, and that they are shipped in interstate commerce without being washed, so that the question would be whether there was enough other matter in those roots at the time they were shipped and while they were being transported, to conclude that the whole quantity was adulterated, or that the whole quantity was not adulterated.

Those are the outstanding points, upon which the jury will have to consider the case.

If, after taking into consideration all the testimony, you believe that when this bale of these roots was transported, they were adulterated in the sense that upon test the quantity transported would have shown an adulteration or an ash of over 16 percent, then your verdict should be in favor of the Government.

If, however, you do not believe the testimony shows that the bale of roots transported did contain on test ash equal to 16 percent or above 16 per cent, then your verdict should be for the defendant.

I do not think that there is anything further I can say to you in the case. You will have to consider the case on all the evidence presented, and determine whether or not the quantity transported, taken from North Carolina and delivered here in Philadelphia in the package, was adulterated when it was transported and delivered.

UNITED STATES v. 3,998 CASES OF CANNED TOMATOES

(District Court, Delaware, June 19, 1928)

N.J. No. 16649

Libels under section 10 of the Food and Drugs Act. Jury trial. Verdict in favor of claimant.

The United States attorney filed libels for seizure and condemnation of 3,998 cases of canned tomatoes, alleging that the article had been shipped and transported from the State of Maryland into the

State of Delaware, and that it was adulterated and misbranded in violation of the Food and Drugs Act.

Adulteration of the article was alleged in the libels in that a substance, water, had been mixed and packed with the article so as to reduce, lower, and injuriously affect its quality and strength. Adulteration was alleged with respect to a portion of the article in that a substance, water, had been substituted wholly or in part for said article.

Misbranding of the article was alleged in that the statement "Tomatoes", and the representation of a red ripe tomato, borne on the labels, were false and misleading and deceived and misled the purchaser; and in that the article was offered for sale under the distinctive name of another article.

MORRIS, *District Judge* (charge to jury). Gentlemen of the jury: After two days I suspect that you need very little instruction from me. However, I shall try to help you somewhat in the analysis of the testimony, but at the outset I want to say to you now that I have no views as to whether your verdict should be for the plaintiff or for the defendant. That is for you to determine. I have no views with respect to the weight to be given to one man's testimony as against another man's testimony. That is your province and not mine. I mention that now so that you will bear that fact in mind with respect to any facts that I may give to you or that have been given in evidence. The facts given to you by me will be merely illustrative in an attempt to help you see, if possible, how to get at and measure the evidence in this case, so as to enable you to return a right and proper verdict.

In the first place, the Government contends, and the defendant concedes, that your verdict may be that the tomatoes in question were adulterated and were misbranded if you find that water was added thereto. Consequently, the only question of fact necessary for you to find is whether the Government has established to your satisfaction by a preponderance of evidence that water was added to any one or more of the four lots in question.

There are two kinds of evidence before you upon which the Government relies to enable you to find a verdict in its favor. The most direct evidence is that given by its inspectors with respect to the trough leading from the bottom of the exhaust box, which is conceded. The Government says it led to the juice tank. The Government inspector said that the trough led to the juice tank. Mr. Cannon told you, and I think Mr. Morrell told you, that the trench from such trough would contain a substantial amount of water. If you are satisfied with that statement by Mr. Cannon and by Mr. Morrell, and you likewise find that the Government's evidence is the correct evidence, namely, that the exhaust, the condensation from the exhaust box, was returned to the juice tank, and if you find that that exhaust, that condensation, was substantial in amount, then your finding may be that water was added to the tomatoes in question, and consequently your verdict may be that the tomatoes were adulterated and/or were misbranded. As to how you shall reconcile that conflicting testimony I cannot help you. It is for you to reconcile it if you can. If you cannot, you are to believe those persons that you deem most worthy of belief and disregard the testimony in whole or

in part of those persons that you deem not so worthy of belief. In determining that question you may take into consideration the opportunity to know the facts and the frailties of human memory and arrive at a conclusion that is satisfactory to yourself.

The other branch of the evidence upon which the Government relies to establish its contention that the goods in question were misbranded and/or adulterated is circumstantial evidence as I understand evidence, and it may be that you understand it better than I do. In any event you are to be bound by your understanding of it. I am going over a portion of it merely to indicate to you how, it seems to me, you can expedite your work or better analyze that testimony.

The Government used the refractometer method of ascertaining the content of the juice of the tomatoes which they examined. You have heard what several witnesses had to say about that method. Let us lay that aside for a moment and deem it for our immediate purposes a proper method. The use of that instrument results in a reading, which reading may be used directly or through the soluble solid content to determine what is the minimum soluble solid content of the material examined.

We have from the testimony of Dr. Tiffany in this case, as I recall it—and whenever I say we have such testimony I am giving my recollection, because I have to use some facts to illustrate. You are not to be bound by my recollection but solely by yours. We have the testimony of Dr. Tiffany in this case that he found no content, solid content, by the refractometer method, as disclosed by the refractometer readings of the Government, less than 3.5 percent. His maximum was 4.38 percent of soluble solids, or an average of 4.02 percent. Now, then, we have the testimony of one of the witnesses for the Government, who was recalled, who has used 5 percent as the minimum content, and on his recall said that the 3.50 percent was the minimum solid for Eastern Shore tomatoes. Consequently, as it seems to me, the Government's contention here is not that the tomatoes here in your charge fell below the minimum for Eastern Shore in soluble solid content for Eastern Shore tomatoes. Let me repeat that so that you may get it as I understand it. You are not bound by that understanding, but, as I understand the case, it is this: Unless you find from the readings of the refractometer, which will go before you—I don't know whether there is in the case a table from which you may convert these refractometer readings into soluble solid content or not—if not, you must take those readings. Dr. Tiffany tells us that those readings do not disclose a solid soluble content for any case of less than 3½ percent. The Government witness tells us that the minimum solid content for Eastern Shore tomatoes is 3 percent to 3½ percent. Consequently, the Government's contention, as I see it, is not that the soluble solid content of these tomatoes falls below 3½ percent, but it is that the soluble solid content of these tomatoes falls below authentic samples at the particular district at about a particular time. Now, unfortunately I don't remember—you may remember—that there is in this case any translation of the refractometer readings of that so-called authentic sample by which you may determine what the solid content of that was. But there is in this case evidence that the Government chemists deduced

from the facts before them that there had been added 10 percent to 15 percent of water. You can't base a verdict upon that deduction. You must base it upon the facts. You may be aided in making use of the facts by the expert testimony, but you cannot take the opinion of another person alone and arrive at a finding of fact upon it that is honest. So that unless you recall some testimony which I do not, though you may, because I freely confess that I might overlook it, you have got to compare and interpret the readings of the refractometer of that sample—of that authentic sample—with the readings of these others, the goods now in your hands, to determine to what extent the solid content of the tomatoes—soluble solid content of the tomatoes now in your hands—is less than the solid soluble content of the authentic sample. If you find that it is any less, your work on the circumstantial part of the case is ended. If, however, you find that the solid soluble content by the refractometer readings of the tomatoes which are now in your charge is less than the solid soluble content of the authentic sample, then your work has probably just begun, because then you must determine as to whether that soluble solid—whether that authentic sample—is a sound basis from which to measure the soluble solid content of these cases, or whether there is a reason to believe that it is not a foundation upon which may be predicated a verdict of adulteration or misbranding, even if the solid soluble content of the tomatoes in question is less than that of the sample.

You may, if you find that the circumstances were identical, and that the probabilities—strong probabilities—are that the solid content of the tomatoes in question may be no less than that of the sample and you can find what the solid soluble content of the sample was, then you may make a finding of the additional water from such circumstantial evidence.

In this case you are to be governed by the preponderance of the evidence. Your findings, as I said at the outset, must be predicated upon your recollection and not upon mine.

The Pure Food Act is not in question. It is an act that has been long in effect; and whether it is good or bad or indifferent, we have to take it as it is. The sole question for you is whether or not that act has been violated by these tomatoes by the addition of water which came from sources other than the tomato.

The jury returned a special verdict that water had not been added to the product.

UNITED STATES v. 94 DOZEN, MORE OR LESS, HALF-GALLON BOTTLES CAPON SPRINGS WATER

(District Court, E.D. Pennsylvania, Jan. 18, 1929, Mar. 11, 1930, Dec. 8, 1930)

48 Fed. (2d) 378 (in part); N.J. No. 19236

Libels under section 10 of the Food and Drugs Act. Demurrer and motion to quash overruled. Trial before the court. Decree in favor of claimant.[28]

[28] Affirmed, *United States* v. *94 Dozen, More or Less, Half-Gallon Bottles Capon Springs Water*, p. 1278, *post*.

The United States attorney, on January 28, 1928, filed a libel for seizure and condemnation of 94 dozen half-gallon bottles, and on November 23, 1928, a libel for seizure and condemnation of 450 five-gallon bottles and 124 cases each containing 12 half-gallon bottles, of Capon Springs water, alleging that the article had been shipped and transported from Capon Springs, W.Va., into the State of Pennsylvania, and remained in the original unbroken packages, and that it was adulterated and misbranded in violation of the Food and Drugs Act.

The Capon Water Co., Capon Springs, W.Va., intervened as claimant and owner in both cases, and filed a motion to quash and a demurrer as to both libels.

DICKINSON, *District Judge.* There are several of these cases but the questions raised are two. One of the questions is the lawfulness of the issue of and return to a search warrant issued by a justice of the peace under the State law; the other is a demurrer to a libel (in the form of a motion to dismiss) upon which an attachment issued and a seizure was made of the property of the claimant under the Pure Food and Drugs Act.

We will dispose of all of the cases by the finding of answers to the two questions raised, leaving to counsel to submit an appropriate order in each case in accordance with the rulings made.

The motion to quash. This is based upon the averment that a search warrant was issued by a justice of the peace under the State law which was irregularly issued, served, and returned. The search warrant was in truth a mere subterfuge device to enable the representatives of the Department of Agriculture to get samples of what the claimant was selling in order to found the libel proceedings next discussed.

We do not see what this court has to do with this search warrant proceeding. If the district attorney seeks to use evidence obtained in an unlawful way, the question whether such evidence can be admitted may be determined when raised in the proper way and at the proper time, but we are unconvinced that we can quash the process of a State court issued under a State law.

The motion to quash is denied.

The demurrer. There are a number of grounds of demurrer specially set forth but we see no need to discuss more than two. The cause is before us following the filing of a libel by the district attorney under the Pure Food and Drugs Act of 1906 (21 U.S.C.A.S. 1, et seq.); the issuance of a writ of attachment thereon; and the seizure of property to which the Capon Water Co. has laid claim. One of the grounds of demurrer is that possession of the property is jurisdictional and that without a prior seizure no libel can be filed. Here the libel was first filed and a seizure under the judicial process of attachment followed. The claimant cites, among others, the two cases following to sustain this ground of demurrer: *The Brig Ann*, 13 U.S. 289; *Brewing Co.* v. *United States*, 8 F. (2d) 1.

It may be premised that the instant cases being in rem possession of the rem is essential to the exercise of effective jurisdiction by the court. The word "jurisdiction" is, however, used in many different senses. Among them is jurisdiction of the subject matter and also

jurisdiction of the person or of the rem. The first is granted by law; the second is acquired by the service of judicial process.

There are likewise two kinds of seizures. One is an executive seizure which is extra judicial or at least the most quasi judicial; the other is a seizure by judicial process. A revenue officer, for illustration, may be authorized to seize for some infraction of the revenue laws, or an officer for a violation of the national prohibition law, and in either case with or without the authority of a search warrant issued by some magistrate. In such cases jurisdiction may be granted to a court to determine that the property thus seized may be confiscated or condemned. Here the seizure is jurisdictional in the sense of the court having jurisdiction of the subject matter. A court may have judicial power over all cases of a given character as, for instance, courts of admiralty over causes maritime. This power can be exercised, however, only when the court has acquired jurisdiction of the person of the defendant or the rem. This it does by issuing its judicial process in the form of a writ of summons or of attachment or otherwise, as the case may be. Here the service or the seizure is not jurisdictional in the sense of the subject matter but only of the person or the rem.

The cited cases belong to the first class. In the *Ann case* a vessel had been seized by a revenue officer and sought to be condemned by a decree of the court. The seizure was abandoned and possession thereunder given up. The court in consequence was without jurisdiction.

In the brewery cases the trial court had held that they belonged to the second class and had proceeded to a decree following a seizure under the judicial process of a writ of attachment based upon a libel. The Circuit Court of Appeals reversed, holding that the trial court had no jurisdiction to proceed by libel unless there had been a previous seizure under a search warrant as the cases were of the first class.

In maritime cases the admiralty courts have jurisdiction of the subject matter and always proceed by issuing a writ of attachment based upon a libel. There is never a first seizure.

The Pure Food and Drugs Act clearly contemplates two things. One is a proceeding in personam under section 2; the other a proceeding in rem under section 10. The latter confers upon the court jurisdiction of the subject matter and hence power to issue judicial process. The procedure is likened to that of proceedings in admiralty.

The pertinent provisions declare that any article of food adulterated or misbranded within the meaning of the act and entering into interstate commerce "shall be liable to be proceeded against in any district court, &c., and seized for confiscation by a process of libel for condemnation." This surely means the conferring of jurisdiction upon the court to entertain condemnation cases upon the filing of a libel and to acquire jurisdiction of the rem by attachment process, as is done in admiralty cases.

The demurrer in consequence cannot be sustained on the ground that a previous seizure under a search warrant is necessary.

The remaining ground of demurrer, which we will discuss, is the broad one that the libel sets forth no cause for the condemnation of the property of the claimant. This is the equivalent of a like demurrer to a statement of claim in an action at law on the ground that no cause of action is disclosed. This calls for a general survey of the act of

Congress. It denounces the manufacture of any article of food or any drug which is adulterated of misbranded, so far as Congress possesses the power to legislate on the subject, and declares any violation of the act to be a misdemeanor. It further provides for the condemnation of the article itself by a proceeding in rem such as the instant proceedings. The term "food" is defined to include drinks and drugs to be "anything intended to be used for the cure, mitigation, or prevention of disease, &c." Any drug is adulterated if in strength or purity below the quality it is represented to have, and any food if it "consists in whole or in part of a filthy, decomposed, or putrid animal or vegetable substance." Any article is misbranded if statements of what it is are "false or misleading in any particular."

The libel is meant to consist, as stated, of what may be called two counts. The first is that of misbranding and the second of adulteration. The misbranding charge is owing to typographical errors rendered unintelligible. The adulteration charge is simply, in the words of the act, that the said product "consists in part of a filthy, decomposed, and putrid animal and vegetable substance." It is often difficult to differentiate an ultimate fact finding from a conclusion of law. An offense consists in the commission of an act and ordinarily would not be sufficiently pleaded in the words of the statute defining the offense without the addition of a statement of the act which is charged to constitute the offense. Here, however, the act is the adulteration which is charged and the words of the act are as descriptive of in what the adulteration consists as any added description could be. There may, it is true, be no information in the libel of the specific act of adulteration meant to be charged but this can be supplied, if need be, through a bill of particulars.

We do not find the libel in this respect to be insufficient in law. Leave is granted the libelant to amend the libel in respect to the charge of misbranding. Assuming this to be done, we are unable to say that the libel does not state a cause of action as a matter of pleading. It may be, for illustration, that the act of Congress condemns only manufactured products and does not apply to natural waters which are in no sense manufactured products. It may likewise be that the label quoted is not false or misleading or that the water is not sold as medicinal. It may of course be also true that the water is not as described in the libel and that there is not even anything to condemn the water as unwholesome or render it unfit for drinking. The water none the less is stated to be in fact a misbranded and adulterated product and a trial must determine the truth.

Upon the allowed amendment of the libel being made orders denying the motions may be entered, the other grounds of demurrer not discussed being overruled.

The libels were amended on January 22, 1929, and on February 28 and March 18, 1929, further amendments were made by stipulations.

The libels as amended charged that the article was adulterated in that it consisted in part of a filthy or decomposed animal or vegetable substance, to wit, organisms of the *Bacillus coli* group of bacteria, to wit, more than one out of five 10 cc portions of samples examined showed (by method of the Public Health Service) the presence of organisms of the *Bacillus coli* group.

It was further alleged in the amended libels that the article was misbranded in that the statements,"'Ca-Ca-Paon' Healing Water", appearing on the labels, were false and fraudulent, since the article would not produce the curative or therapeutic effects which purchasers were led to expect by the said statements, and which were applied to the article with a knowledge of their falsity for the purpose of defrauding purchasers thereof.

The claimant filed a motion to strike the evidence obtained under the seizure of November 23, 1928, and also a motion applicable to both cases, to strike out the testimony of experts as to the composition of the samples of water examined by them, and a motion to dismiss the libels, the first of which was allowed and the second and third of which were denied in the following opinion handed down March 11, 1930:

DICKINSON, *District Judge*. The danger we before remarked of the issues in this cause becoming confused has increased. Paper books pro and con the allowance of the motion first above listed had been submitted and the motion disposed of on opinion filed. Counsel for libelant then called our attention to the expectation of counsel that oral argument would be heard upon the motion. We accordingly withdrew the ruling made, and the oral argument has been had. At the argument the two further motions were made. We discuss them in the order listed.

We feel impelled to apologize in advance for the inordinate length of the discussion in which we have indulged. The only excuse we have to offer arises out of the fullness of the discussion by counsel for the libelant. We have been favored and aided not only by the United States attorney but also by special counsel for the Agricultural Department, whose wide and long experience in cases of this type qualifies him to speak as an expert.

We are proceeding not quite upon the forlorn hope of convincing counsel for libelant that they are wrong but from the motive of offering evidence that all they have had to urge has had our consideration.

The unlawful seizure. In view of the opinion filed the discussion naturally assumed the form of a re-argument. We understand there is now agreement upon the proposition that the allowance or refusal of the motion turns upon a single question. This is whether the right protected by the fourth amendment can be invoked by defendants in other than criminal prosecutions. It is admitted that if the claimants had been indicted, as they might have been and may yet be, the evidence here in question would properly be suppressed and could not be used against them. The proceeding here is however a libel proceeding under section 10 of the Food and Drugs Act and not an indictment for the crime denounced by section 1. Counsel for libelant very earnestly press the argument that notwithstanding that the search and seizure by means of which the evidence in question was obtained was one which would be in violation of the claimants' rights if such rights were asserted in a defense to a criminal indictment, no such rights belong to the claimants here because these proceedings are not criminal but civil, and these rights which arise wholly out of the fourth amendment cannot be invoked because that amendment is limited and restricted to criminal prosecutions. There are, as we think, several subtle fallacies hidden in the argument by which this

proposition is sought to be supported. One is that the right of a person to enjoy freedom from unlawful searches and from seizures of his property by Government officials has its genesis and origin in the fourth amendment. It might as truthfully be said that his right to life, liberty, and property arises out of the fifth amendment. The legislature, it is true, might give legality to an otherwise unlawful search and seizure unless restrained by a Constitutional provision, and the reason for the fourth amendment was not to create or confer the right but to make its violation legally impossible in any manner short of a change in the Constitution.

It is confidently asserted that there is no adjudged case which rules that citizens have the right to be secure in their persons, houses, papers, or effects from unreasonable searches and seizures by Governmental agents. If so, it may be because there was never before need for any such ruling. All the instruments which we venerate, Magna Charta, the Petition of Right, the Declaration of Rights, the Declaration of Independence, and the Bills of Rights made part of our Constitution alike claim and proclaim these rights as preexisting. The right to life, liberty, and property antedates the fifth amendment, and the right to be secure against unreasonable searches and seizures did not begin with the adoption of the fourth amendment.

There is a distinction between power and right. We know that Governments elsewhere having the power have violated these rights. All our constitutions do is to put it beyond the lawful power of our Governments to violate them. The rights are undoubted. All that is needed is to have a judiciary willing and able to enforce them. There is no more warrant for the proposition that the right to protection against unlawful seizures can be invoked only in criminal prosecutions than there would be to assert that the protection of the right against the taking of private property for public use could only be asserted by defendants in criminal cases. There would be no difficulty in finding an expression which refers to the right of protection against unlawful seizures as if it were a right to be invoked in criminal cases, as it surely may be. Judicial opinions, as has often been remarked, can only be intelligently read when read in the light of the fact situation to which they relate. Almost always there is in search and seizure cases the element in practical effect of compelled confession of guilt. The compulsion is as real as that which resulted in the good old days from the rack and the boot. Indeed, the modern methods are but a softened form of the latter, and when to the search and seizure methods are added, as often occurs, the methods of the third degree, the difference is not great.

Underlying the thought urged upon us is one which is an offshoot of that which has a fact basis of truth. This truth is that these safeguards are used to hide guilt and protect malefactors. Such is beyond doubt one result but such is not their purpose. The right to the undisturbed possession of one's property, except only as the right is held in subjection to law, is a near neighbor to the right of personal protection because one cannot be long enjoyed without the other. There is little difference between confiscating a man's property and compelling him to give it up by the imposition of a fine. When, however, as in all the cases cited to us, the feature emphasized is the right to withhold self-incriminating testimony, of course it must be held that this right can be invoked only in criminal prosecutions.

Compelling a witness to give testimony against his own interests is a different thing from compelling him to testify against himself. In a civil proceeding a party defendant may be put upon the rack of cross-examination and subjected to a torture in comparison with which the thumbscrew is a mild instrument without any violation of any of his legal rights. This cannot be done in a criminal case. Why the difference? The answer is that in the latter case he has a right to protection; in the former he has not. *Ita lex scripta est.* Because, however, this particular right recognized by the fifth amendment belongs only to defendants in criminal cases is no reason for concluding that another right recognized in the fourth amendment and declared to be inviolable is likewise so restricted. The notion that is, we suppose is due to the reference in the fourth amendment to the issuance of search warrants following the clause which recognizes the right to protection against unreasonable searches.

We have already pointed out that the first clause condemns unreasonable searches and seizures; the succeeding clause in no respect modifies this condemnation. Why was it added? The condemnation is visited only upon unreasonable searches and seizures; a search and seizure, as we have before remarked, made in obedience to the mandate of a search warrant could not be said to be either unlawful or unreasonable but it might be unjustified in fact, hence the limitation upon the issuance of search warrants. Surely a provision which was clearly intended to buttress a declared right should not be construed to limit or lessen it.

As before stated, *Boyd* v. *United States*, 116 U.S. 616, as we view it, settles the question of right. In that ruling four propositions may be found.

1. Unreasonable searches and seizures are unlawful.
2. A search in aid of a lawful seizure is not unlawful or unreasonable.
3. An exploratory search in the hope or for the purpose of the discovery of evidence upon which criminal guilt may be found or confiscation of property be based is unreasonable and hence unlawful.
4. Congress is without Constitutional power to make a search and seizure of the latter type lawful and an act of Congress which purports to give it the sanction of law is a nullity.

We further think it follows that if an act of Congress could not make lawful what the agents here did, a fortiori, what they did of their own authority without the sanction of a law is likewise unlawful. This, as before stated, settles the question of right. That of which we are in search here is really not the existence of a right but the existence of a policy of the law and a legal method of enforcing that right. It is admitted that in criminal cases there is a recognized practice of refusing to the Government the use of evidence obtained through a violation of the rights of the defendant. This presents the question first propounded. Should the like policy be enforced in forfeiture cases? If the right is restricted to criminal cases, that of course answers the question in the negative, but if there is no such limitation, as we think we have found, then the question recurs. The right is one of protection against the assertion of governmental powers. The policy has for its basis the principle that the Government should not be permitted to take advantage of its own wrong and its own violation of law to enforce another law to the prejudice of one whose rights have thus been violated.

We would keep very far from accusing the agents of the Agricultural Department of indulging themselves in the luxury of the joys of a tyrant because we have always found them to be considerate of the rights of others, but the suggestion that this law can be enforced only by upholding them in the [un]lawful power to search and seize comes perilously near a plea of necessity. Proverbially necessity knows no law, constitutional or otherwise.

We are here and in this case unable to recognize the necessity so urgently pressed upon us. Under section 10 of this act this averred offending shipment might have been confronted with a libel; upon that libel an attachment might have issued; under that attachment these bottles of water might have been lawfully seized, and the condition and composition of the water tested and determined. In truth these very things have been done. The suggestion that a sufficient safeguard of the right in question is afforded by the personal responsibility of the individual agent who abuses the power to seize is not an appealing one. The right is essentially one to protection against the assertion of unlawful power by governmental agencies. As a rule people can protect themselves against trespasses committed by other individuals. They are helpless against inroads upon their rights by Government. They can only look to the law for protection, and that law is a poor protection which the courts do not enforce.

The cases to which we have been referred of the policy enforced in civil cases between private litigants and in deportation cases do not strike us as being in point. We are brought back every time to the question several times presented. Is the right of the people recognized in the first clause of the fourth amendment to be "secure" (mark that word) from unwarranted searches and seizures by governmental agents, limited and restricted to criminal prosecutions, or does it extend to forfeiture cases? The right was enforced in the *Boyd case* (*supra*) in a case which was not a criminal prosecution, and we think a justified corollary is that the same practice which prevails in criminal cases should be extended to forfeiture proceedings.

The motion to strike out the testimony to which the motion is addressed is allowed.

The second motion. It may be when this cause comes to be determined that it will be found that the samples tested by the experts are not shown to be samples of the water sought to be condemned. The condition and qualities of the water tested in that event will be no evidence of the filthiness of the water sought to be condemned.

We are unable to find at this time, however, that the evidence should be struck out.

The motion is denied.

The third motion. This is an effort to import into the trial practice of cases tried under a law of the United States, the statutory compulsory nonsuit practice which pertains in the Pennsylavnia State courts. What it comes to is that a defendant may test the judgment of the trial court upon the question of whether the libelant has by its proofs made out a case. If the judgment is favorable to the claimant he offers no evidence for the defense; if adverse, he then goes into his defense. Whatever may be said (and much may be said) in favor of the State practice, we have two comments to make. One is that this might require us to take two sips of this water; the other is that under the State practice the defendant would be fully protected against the

at least possible error of the trial court because the judgment would be one simply of nonsuit, whereas here the judgment would be one for the defendant. A consequence is that if the judgment were reversed on appeal, final judgment would then go against the defendant. The defendant must decide for himself whether he will offer evidence.

The motion is denied.

On January 8, 1930, it was stipulated by the Government and claimant that a jury trial be waived and the case, involving 94 half-gallon bottles involved in the first libel filed, was set for trial by the court. Evidence was introduced and oral argument heard on behalf of the Government and claimant, the final hearing being had on October 16, 1930. On December 8, 1930, the court handed down the following opinion dismissing the libel:

DICKINSON, *District Judge*. This record will be found to be in a more or less confused state. This is due to the fact that the libel proceedings are directed against a few bottles of no special value in themselves either commercially or with respect to the public interest. The issue in the case is what the condition of the contents of these few bottles were at the time of shipment in interstate commerce. If, for illustration, the wholesomeness of Capon Springs water is not questioned, the fact that a particular shipment of a few bottles of water might be questioned would be of little concern to anyone, especially in view of the fact that even if the shipment was open to complaint at the time it was made, the lapse of time would have a correcting effect so that the shipment would be wholesome at the time of hearing, and indeed before the time the shipment would reach the market. The trial judge in consequence suggested that the issue be broadened so that the question of what we will call the wholesomeness of Capon Springs water as it came from the springs and reached the market might be determined instead of the narrow issue of the wholesomeness of the particular shipment. This suggestion was tentatively accepted and the trial proceeded for a time upon this broader issue, but the tentative acceptance of the suggestion was afterwards withdrawn and the issue confined to the narrow one indicated. The result of it has been that there is in this record evidence bearing upon what we will call the general issue of the wholesomeness of Capon Springs water, with which issue we have in strictness nothing to do. There is an unavoidable embarrassment in dealing with a narrow issue, such as that indicated, because of the indirect consequences and effects of a finding.

The grown or manufactured product of a dealer in a food, for illustration, might be wholesome and nutritious and yet a particular shipment have become unfit for food through what might be called accidental circumstances. The condemnation of the particular shipment might none the less have the effect of the inference drawn by consumers that the consumption of any of the product was harmful and the whole trade of the dealer be thus ruined. There might be no justification for the inference, and yet everyone knows that to condemn any part of what a dealer is shipping causes the inference to be drawn by the consuming public, the prospective purchasers of the product, that it is all bad.

The Food and Drugs Act has a very beneficent purpose, and it is without doubt the duty of the courts to lend their aid to its efficient enforcement. At the same time it would be an unfortunate and unjustified consequence to have the value of the trade in a product wholly destroyed because a small shipment of that product had in some way become contaminated. We are all more or less finicky about the things we take into our stomachs. The slightest suspicion of careless or unsanitary methods in production or distribution might absolutely destroy the value of a large and important trade. The moral to be drawn from this is that a court should declare no condemnation without careful thought being given to the consequences which we have indicated. The wholesomeness of a food or drink cannot even be made the subject of a discussion without the possibility of consequences which would be deplored.

There is one part of the complaint made against this particular shipment which may, however, be freely discussed. The claimant here deals in a drinking or bottled water, which is also possibly bought with the thought that it has likewise some medicinal qualities. The water is known as Capon Springs water, which is taken from a spring in West Virginia. It is charged that the water as put upon the market is misbranded, evidenced by the labels on the bottles in which the water is marketed.

Section 8 of the act defines the meaning of the term "misbranded." The article is misbranded if the package or label "shall bear any statement, design, or device regarding such article, or the ingredients or substances contained therein which shall be false or misleading in any particular."

It is charged that Capon Springs water is marketed under a label which describes it to be "Healing Water", thereby implying that the drinking of it will have curative and therapeutic results, when in fact the water is more accurately described as drinking water having only the properties of what might be called ordinary spring water.

There is no meaner or more despicable fraud than than that of persuading those afflicted with a disease to buy something on the promise that it will cure them or help them when the hope aroused is wholly delusive and the statements made fraudulently misleading. Anyone would feel the call to aid in the suppression of frauds of this character. There is nothing in this case which would justify the finding that Capon Springs water is medicinal in the sense indicated. When one is speaking of a drinking water it is difficult to draw the line between an effect which is merely beneficial and one which is medicinal. Anyone may have a prejudice in favor of the water from some favorite well or spring and believe they are benefited by drinking it. So believing they would not be condemned for recommending it to others nor do we think the commercial exploitation of it would come within the condemnation of this act of Congress so long as the line of fraud was not crossed. One has only need to recur to the literature of his youth to recall the incident of the visit of Leather Stocking to the spring from which the famous Saratoga water is now taken, and to the tribute which is paid in *Westward Ho* to tobacco. There is scarcely any locality in the country in which there is not a spring, about the waters of which there are traditions

more or less well authenticated, that the waters of the spring were a favorite drink of the Indians. The languages of the different tribes of American Indians had this in common that they were figurative and abounded in metaphors. The names given to individuals ascribed to these high sounding qualities. There is said to be such a tradition connected with the Capon Springs. This water was so highly valued by the Indians that it was given the name "Capon", which in the language of the particular tribe which inhabited the surrounding country, is said to have had the meaning of healing or healing water. There is an advertising value in such a tradition, the benefit of which the claimants have undoubtedly sought to get. For some reason, which is inscrutable, many people attach a value to Indian medical lore. Anyone who has a nostrum, for which he desires to create a commercial demand, can do so successfully by panoplying some one in red paint and feathers and proclaiming the nostrum to be a favorite medicine among the Indians. This may be done in such a way as that it is clearly a fraudulent imposition and denounced as an offense against this act of Congress. On the other hand, it may be taken in such a way as to negative the thought of a real fraud and be nothing more than an advertising device to call attention to the thing which is offered for sale.

We see nothing in the label in this case which would justify a finding that it was fraudulent. The form of the label is: "Capon Springs Water, Known to the Catauaba Indians as 'Ca-Ca-Paon' Healing Water, 2 Quarts Net—Bottled at the Springs." [Then follows an analysis in type too small to be conveniently read.] "Natural Mineral Spring Water Famous for Two Centuries. Capon Water Co. Capon Springs, W.Va."

There is doubtless an advertising value in the stuttering orthography given to the words "Catawba" and "Capon", but this label is as close an adherence to the truth as is customary in commercial labels and speaks the truth as nearly as would be expected of any advertiser of a commercial product. We would not find as a fact in what measure of esteem the Capon Springs water was held by the Indians, but there is that in the record of this case which would support the statement that the word "Ca-Ca-Paon" means in the Indian dialect healing water. Whether it does or not we would not find from the evidence, but we do find that there is evidence that the word is said to have this meaning.

The count in the libel of misbranding is not sustained.

Some of the literature put out by the claimants may be characterized as not only florid but is almost laughable in its overstatements. Everyone has heard, however, of extravagant claims made by the advocates of a liberal use of ordinary drinking water. This is epitomized in the slogan "flood your kidneys." This has no reference to any particular drinking water but applies to any water. All the extravagant claims made for drinking Capon Springs water are made for the liberal use of any drinking water. There is no reason to doubt that those who advocate the liberal use of drinking water honestly believe the practice to be beneficial. We are not prepared to make any finding that it is not, and we are far from finding that all the benefits claimed will be conferred. The point we have in mind to make is that the act of Congress does not interdict anyone from advocating the liberal use of drinking water nor from enforcing the

advocacy of it by the extravagant predictions of the benefits which will follow. If this can be done in the case of water as water, we do not see how the claimants can be interdicted from saying the same thing about Capon Springs water.

The next count in the libel is based upon the sixth clause of section 7 of the act. As before stated, this feature of the libel cannot even be discussed without consequences which, although unintended, might none the less be very harmful to the trade of the claimants. As before also stated, we are restricted in any findings which we may make to the few bottles of water which were seized.

We make the finding that this water at the time of the trial was free from the criticisms made of it and will continue to be free. We make this finding because the claimants have introduced evidence through the testimony of experts to this effect, which is uncontradicted, and also because the offer was made by the claimants to submit the water to analysis and microscopical examination for the Government. This offer was declined, and the testimony itself objected to because the question is asserted to be not what the condition of the water now is but what it was at the time of seizure, and it would seem to be an admitted truth that the water would clear itself after a comparatively short time. The claimants assert that in order to assure the wholesomeness of the water it was their practice to keep it in storage for such a length of time as would leave no doubt of its wholesomeness before it was put upon the market. Whether this practice was in all cases followed it would not clear the claimants of the charge of shipping unwholesome water, if it was at the time of shipment unwholesome, even if the unwholesomeness were afterwards removed. Congress evidently had in mind the injustice which might be done through a charge of unwholesomeness of a particular shipment by being extended in the public mind to a condemnation of the entire product. The regulations are also mindful of this. It is, because of this, provided that, before any proceedings of condemnation are instituted, the interested persons shall be notified and given the opportunity to "show cause why the matter should not be referred for a prosecution as a violation of the Federal Food and Drugs Act." The purpose of this procedure is manifest. It was, however, for reasons which, in the opinion of the officers of the Bureau, justified the omission, not followed in the instant case. We think this should have been done, and because of the omission to do it, that this count of the libel cannot be sustained. The purpose of the regulation in consonance with the intent of Congress is that the reputation of a food product shall not be blasted by the institution of proceedings without a full opportunity afforded to the parties concerned to convince the Department, if they can, that such proceedings should not be instituted. If the product be one, the shipment of which in interstate commerce, should be interdicted, proceedings may be instituted and the shipment stopped, but if the condemnation of the product is due to something which may be corrected, and the product itself does not call for condemnation, the proceedings need not be instituted.

This leads to a comment, in the making of which we may be going beyond our judicial duty, but which nevertheless we feel impelled to make. The comment is that the difficulties in which the claimants find themselves are largely of their own making. Apparently, they have failed to appreciate the gravity and importance of the duties which

the officials of this Bureau are called upon to perform. Instead of recognizing that the activities of the officials are not only justified but demanded of them in furtherance of the protection of the public health, the claimants seem to have resented the intervention of the officials as an unwarranted intrusion into the private business of the claimants. Realizing, as of course the claimants did, how much harm to their trade a charge of unwholesomeness against the Capon Springs water would have, whether the charge was well founded or ill founded, they resented the acts of the officials as if this injury was intended. This attitude on their part was wholly unjustified.

The Department needs no vindication at the hands of this court, but we feel free to express our absolute confidence in the good faith of the action taken and that it was done solely in the performance of duty and for the protection of the public health.

The resentment of the claimants against the intervention of the Department and the general attitude of the claimants was interpreted as meaning a defiance of the Department and a challenge to them "to do their worst." Because of this, the authorities felt justified in proceeding without any preliminary hearing. This feeling is natural enough and excusable in itself, but is far from justifying any refusal or failure to give the claimants the preliminary hearing called for by the regulations, and should have induced a careful regard to all the rights of the claimants. The Department doubtless viewed the provision for a preliminary hearing as applying only to criminal prosecutions, but there is the same reason for extending it to proceedings in rem.

Another comment is, we think, likewise within our province to make. It is that many of the claims made of benefit from the drinking of Capon Springs water are so extravagant as to justify the characterization of being ridiculous. No trial judge is in a position to pit his judgment of the benefit to the seller of certain commercial practices against the judgment of commercial men. We venture, however, the statement that those who buy Capon Springs water or other spring water do so because they wish a water to drink which is what is called "pure" and which is palatable. Very few, if any, users of any of the spring waters would be induced to buy them in the hope that they will prove to be the panacea, which in the literature put out by the claimant company, this water is claimed to be.

We are not prepared to say that the tradition that this water was highly regarded by an extinct tribe of Indians in the far distant past may not have some real advertising value, and as we have already observed, we think the claimants can avail themselves of the statement of what some Indian, now dead, for many generations, may have thought of the water from this particular spring, but extravagant claims to a panacea should be dropped.

A final comment is that the parties to this cause, as if upon the preliminary hearing provided by the regulations, should meet and reach a working agreement such as would assure to the authorities a compliance with the law and leave the claimants free to conduct their business undisturbed by any complaints from the Department. We see no difficulty in reaching such a working agreement. The claimants are bound to comply with all the requirements of the law and we know that all the authorities wish is assurance that there will be such compliance. What is called for is a get-together attitude.

The conclusion reached is that the libel should be dismissed, and a form of decree in accordance herewith may be submitted.

We make the following specific findings of fact and conclusions of law:

Findings of fact. 1. The Capon Springs water is a natural water obtained from springs near Capon Springs, W.Va.

2. There is evidence, sufficient to justify the claimants in making reference to it, of a tradition in the neighborhood of the springs that the word "Capon" is a corruption of the word "Ca-Ca-Paon", meaning in the dialect of the Catawba tribe of Indians, "Healing Water." There is no evidence, however, that the word ever had this meaning in spite of the tradition to that effect.

3. No hearing in the nature of a rule to show cause called for by the regulations was given to the claimants, but on the contrary they refused all information and opportunity to correct the information upon which the libelant had based its libel.

Conclusions of law. 1. The label used in this case by the claimants is not a misbranding within the meaning of the act of Congress on the subject.

2. The count in the libel based upon clause 6, section 7 of the act of Congress, is dismissed because of the failure to grant the claimants the preliminary hearing allowed by the regulations.

3. The libel should be dismissed.

UNITED STATES v. JOHN J. FULTON CO.

(Circuit Court of Appeals, Ninth Circuit, July 1, 1929)

33 F. (2d) 506; N.J. No. 16387

Appeal from District Court for the Western District of Washington. Judgment reversed.

Before, RUDKIN, DIETRICH, and WILBUR, Circuit Judges.

DIETRICH, *Circuit Judge.* Appellant filed a libel of information against 48 bottles of an article of drugs labeled in part "Fulton's Compound RX 1", and 24 bottles of another article of drugs labeled in part "Fulton's Compound RX 2", which it alleges were shipped in interstate commerce from San Francisco to Seattle and which it charges were misbranded, in violation of paragraph 3 of section 8 of the Food and Drugs Act, as amended (21 U.S.C. sec. 10). By that provision it is declared that an article of drugs shall be deemed to be misbranded,

> If its package or label shall bear or contain any statement, design, or device regarding the curative or therapeutic effect of such article or any of the ingredients or substances contained therein, which is false and fraudulent.

In the libel are exhibited the labels, wrappers, and attending circulars, followed with the averment that the bottles were so misbranded in that the labels, wrappers, and circulars "are false and fraudulent since the articles contain no ingredient or combination of ingredients capable of producing the effect claimed." Sustaining an exception to the libel upon the ground that it failed to state

sufficient facts to constitute a cause of action, the court below entered a judgment dismissing it, and libelant appeals.

The point ot the exception is that nowhere in the label, wrapper, or attending circular does the proprietor or shipper make any direct statement or representation that the drugs are of curative or therapeutic value. In each case there is the statement "We have received many letters from physicians reporting", followed by what is represented to be the substance of such "reports", which admittedly would tend to engender a belief to persons suffering from diabetes or Bright's disease, that the use of the drugs would likely afford them relief. Unless we discredit their mental competence, such, we must presume, was the intent and expectation of the proprietors. Their contention is that they have such letters or reports and that that fact constitutes a complete defense whatever may be the character of the drugs. But if, as is alleged, the drugs are worthless the proprietors cannot escape responsibility by hiding behind the phrase "the doctors say." Couched in such language undoubtedly the printed matter makes a more persuasive appeal to the credulity of sufferers from these diseases than if the representations thus implied were made directly upon the authority alone of the proprietors, and for that reason they are not less but more obnoxious to the law. The charge is that they are not only false but fraudulent, thus implying bad faith on the part of the appellee, and of course we are presently concerned only with the sufficiency of the charge and not at all with the character or degree of proof required to substantiate it. The point does not require extensive review of the decided cases, for conclusive, we think, is the principle of construction set forth in the following quotation from the opinion of the Supreme Court in *United States* v. *95 Barrels of Vinegar*, 265 U.S. 438:

> The statute is plain and direct. Its comprehensive terms condemn every statement, design and device which may mislead or deceive. Deception may result from the use of statements not technically false or which may be literally true. The aim of the statute is to prevent that resulting from indirection and ambiguity, as well as from statements which are false. It is not difficult to choose statements, designs and devices which will not deceive. Those which are ambiguous and liable to mislead should be read favorably to the accomplishment of the purpose of the act.

Reversed.

NATIONAL REMEDY CO. v. HYDE, Secretary of Agriculture, ET AL.

(Supreme Court of District of Columbia, Aug. 19, 1929)

N.J. No. 16780

Suit by the National Remedy Co. to enjoin the Secretary and officers of the Department of Agriculture from prosecuting libels pending against, and from instituting further libels or seizures of, plaintiff's remedy, under the Food and Drugs Act. Motion to dismiss bill sustained.[29]

---

[29] Reversed, *National Remedy Co.* v. *Hyde et al.*, p. 1272, *post.*

GORDON, *Judge.* This is a suit by the National Remedy Co., a corporation organized under the laws of the State of Massachusetts, and having its principal place of business in Boston, against William M. Jardine, Secretary of the Department of Agriculture, Walter G. Campbell, Director of Regulatory Work of the Food, Drug, and Insecticide Administration of the United States Department of Agriculture, seeking an order to restrain and enjoin the defendants from prosecuting any of the libels mentioned in the bill, except one as a test case as suggested by the plaintiff, and from instituting any further libels or seizures by defendants, and requiring them to dismiss the several seizures and libels as being res adjudicata.

The bill alleges that the plaintiff is the owner of the business and goodwill of the manufacture and sale of a certain proprietary remedy known as B. & M. external remedy as well as the formula and method of preparation thereof, which was purchased in 1913, and has continuously manufactured and sold said medicine to jobbers, to the retail trade, and to consumers for a number of years, and that at the present time the business and goodwill of said corporation is valued at about $100,000; that the statements and representations concerning said medicine in labels upon the bottles containing the same and the cartons, pamphlets, booklets, and circulars accompanying and circulated with respect thereto are made in good faith, and that nothing contained in any of them has been false or misleading; that the medicine is manufactured in Massachusetts and is distributed by the plaintiff not only in said State, but also in interstate commerce to all the other States, the District of Columbia, and to foreign countries; that in the year 1919 the Department of Agriculture filed libels against the plaintiff, the said B. & M. external remedy, and seizures were made in various places, among them at Concord, New Hampshire, where packages of said remedy were seized and a libel filed in the United States court for said district in October 1919 wherein it was charged said remedy was misbranded and that the representations in the circulars and booklets relative thereto contained false and fraudulent statements, and at the trial of which a verdict and judgment were rendered in favor of the claimant January 23, 1923; that since then, until about the time of this proceeding, the said B. & M. external remedy has been distributed in interstate commerce openly and without question, molestation, hindrance, or criticism by the United States or any of its agents or officials; that in December 1928 and January 1929 the Department of Agriculture, acting by and through the defendants, and without notice or hearing, as provided in the said Food and Drugs Act, caused libels to be brought against the B. & M. external remedy, and seizures thereof have been made in New York City, N.Y., Pittsburgh, Pa., Baltimore, Md., Oakland, Calif., Portland, Maine, Albuquerque, N.Mex., Miami, Fla., and elsewhere; and that said defendants are purposing and intending to institute and prosecute libels in numerous other places in the United States; that the statements contained in the labels, booklets, pamphlets, and circulars under investigation in 1919 by the Department of Agriculture are substantially the same as those contained in the present literature accompanying the medicine; and that the allegations of the libel filed in the District Court of New Hampshire aforesaid contained in substance and effect the same or practically the same allegations or

statements set forth in the libels herein mentioned, and that the charges in said last-mentioned libels are of adulteration and misbranding of the B. & M. external remedy; that the several libels already instituted by seizures, as aforesaid, and those threatened are identical and are for the purpose of testing the alleged adulteration and misbranding of said B. & M. external remedy, and that there are no separate issues of fact or of law which necessitate such numerous libels in the several States and that no necessity exists for harassing the plaintiff with these numerous libels and suits; that in spite of the provisions of the Food and Drugs Act the plaintiff has been given no opportunity for a hearing before the Department of Agriculture, and did not prior to the institution of said libels have notice or knowledge that said Department contemplated action against the plaintiff concerning any adulteration or misbranding of the B. & M. external remedy; that the several libels were filed upon reports issued by said Jardine, Secretary of Agriculture, and were not filed or instituted upon information furnished by any health, food, or drug officer or agent of any State, Territory, or the District of Columbia; that the matters and things alleged in the libel in New Hampshire in 1919, are substantially the same as the matters and things set out in the several libels filed in the several States in December 1928 and January 1929 and that the parties are the same and that the verdict of the jury of the Federal District Court of New Hampshire and the judgment entered thereon are conclusive on the present issues and all of the several issues are res adjudicata; that the business and goodwill of the plaintiff are very valuable and threatened with total destruction by the arbitrary and illegal action of the Department of Agriculture acting through the several defendants; and that numerous customers are refusing to buy its product; that if the libels are prosecuted in widely separated parts of the country the plaintiff's business will be wholly broken up, its goodwill and its financial success blasted and its property destroyed; that the plaintiff is willing that a trial of the disputed issues contained in the libels be tried in the State of New York, which is near plaintiff's place of business and the plaintiff should not be compelled to try a test case in a court far removed therefrom; that under the Constitution the Secretary of Agriculture has not the unrestrained right claimed by him to make multiple seizures of shipments made in interstate commerce after investigation and finding by his Department that articles of food and drugs are adulterated or misbranded; and that the plaintiff has no plain, adequate, and complete remedy at law, and that its property, business, and goodwill will be ruined and destroyed unless the defendants are restrained or enjoined; and that the plaintiff will suffer great and irreparable loss, injury, and damage unless the defendants are restrained and enjoined from prosecuting said libels or instituting others.

The case was heard upon a motion of plaintiff for an injunction pendente lite and a motion of the defendants to dismiss the bill.

It is the duty of the defendants to administer the Food and Drugs Act. Under section 4 thereof they are authorized to investigate articles of food or drugs which are being shipped in interstate commerce, for the purpose of determining whether they are adulterated or misbranded within the meaning of other sections of the act. If they

find that such articles are adulterated or misbranded they are required to certify the facts to the proper United States attorney, who is required to institute appropriate proceedings in the proper court of the United States for the enforcement of the penalties prescribed by the statute. By section 2 it is made a misdemeanor for any person, firm, or corporation to ship or deliver for shipment in interstate commerce any article of food or drugs that is adulterated or misbranded.

Section 10 of the act, the interpretation of the provisions of which are directly involved in the present proceeding, is as follows:

> SEC. 10. That any article of food, drug, or liquor that is adulterated or misbranded within the meaning of this Act, and is being transported from one State, Territory, District, or insular possession to another for sale, or, having been transported, remains unloaded, unsold, or in original unbroken packages, or if it be sold or offered for sale in the District of Columbia or the Territories, or insular possessions of the United States, or if it be imported from a foreign country * * * shall be liable to be proceeded against in any district court of the United States within the district where the same is found, and seized for confiscation by a process of libel for condemnation. And if such article is condemned as being adulterated or misbranded, or of a poisonous or deleterious character, within the meaning of this Act, the same shall be disposed of by destruction or sale, as the said court may direct, and the proceeds thereof, if sold, less the legal costs and charges, shall be paid into the Treasury of the United States, but such goods shall not be sold in any jurisdiction contrary to the provisions of this Act or the laws of that jurisdiction: *Provided, however*, That upon the payment of the costs of such libel proceedings and the execution and delivery of a good and sufficient bond to the effect that such articles shall not be sold or otherwise disposed of contrary to the provisions of this Act, or the laws of any State, Territory, District, or insular possession, the court may by order direct that such articles be delivered to the owner thereof. The proceedings of such libel cases shall conform, as near as may be, to the proceedings in admiralty, except that either party may demand trial by jury of any issue of fact joined in any such case, and all such proceedings shall be at the suit of and in the name of the United States.

It is clear from a careful reading of said section that there is no limitation upon the defendants certifying for seizure more than one shipment of an article of food or drugs found by them to be adulterated or misbranded. On the contrary the section directs them in the discharge of their duty to make a certification to the proper United States attorney of any and all shipments found in interstate commerce, which they find to be adulterated or misbranded. The statute is plain in its requirements that any article or shipment thereof shall be liable to be proceeded against wherever found, upon a finding by administrative officers that the same is adulterated or misbranded whether in single or multiple consignments. The purpose of the statute would be frustrated if power to make multiple seizures of different consignments in various sections of the country were denied. Under such a construction the public could be injured and defrauded at will by numerous shipments of adulterated and misbranded articles made after one consignment had been libeled, and litigation with respect thereto delayed or prolonged, for the purpose of enabling the shipper or manufacturer of such adulterated or misbranded articles to distribute them in interstate commerce. Such articles, after investigation by the defendants, that have been found to be either adulterated or misbranded are outlaws of commerce and may be seized wherever found. The number of seizures would necessarily depend on the number of consignments and their location. There is nothing in the act that indicates that one seizure by the Federal authorities

exhausts their power to make other or contemporaneous seizures of the same articles when circumstances require such action in order to prevent traffic in adulterated or misbranded articles.

It is averred in the bill and urged in argument that the seizures now in question are illegal in that the plaintiff before the institution of the proceedings was not afforded a preliminary hearing as provided by the statute.

Section 4 of the act provides for a hearing to the persons from whom a sample has been procured. This provision, however, does not require that a hearing be given to the shipper or manufacturer such as plaintiff before the bringing of seizure proceedings. The provision of section 4 as to hearings has been under consideration by the Federal courts and prior to the decision in *Morgan* v. *United States*, 222 U.S. 274, the decisions of the lower Federal courts were divided upon the question as to whether a preliminary hearing was necessary before the bringing of seizure proceedings under section 10 of the act. But in the *Morgan case* the Supreme Court held that it is not a condition precedent for the prosecution of a violation of the Food and Drugs Act that an investigation be had in the Department of Agriculture and the defendant afforded an opportunity to be heard as provided by section 4 of the act, and that the provision for a hearing was administrative merely and not a jurisdictional requirement for the institution of proceedings under the statute.

The validity or constitutionality of the Food and Drugs Act are [is] not questioned by the plaintiff, and in cases in which the question of whether articles are misbranded or adulterated is raised, such question is for determination by a jury, or by a court if a jury is waived, and not to be determined in equity if the statute is valid, and in such a situation an equity court should not restrain multiple seizure proceedings under the Food and Drugs Act. *Shawnee Milling Co.* v. *Temple et al.*, 179 Fed. 517, 519.

The question as to whether a particular product is or is not subject to the provisions of the Food and Drugs Act should be raised in a proceeding provided for by the statute itself and not in equity.

The allegation in plaintiff's bill that its product is not adulterated or misbranded is in effect a defensive plea in bar. That question ought to be determined in the libel proceedings where they have been instituted against its product and do not seem to me to constitute an equitable cause of action.

It would seem that the defendants in making the seizures and instituting the proceedings complained of exercised a lawful duty in the performance of the ordinary functions committed to them in the administration of the Food and Drugs Act. It seems clear, as herein pointed out, the statute does not limit defendants' actions to one or any other number of seizures, but reposes in them not a mere discretion but a direction to proceed when and where misbranded or adulterated articles are found. The act plainly commits this function to the executive branch of the Government and not to the judicial branch. The judicial function is provided for when proper proceedings are brought to determine the issue of misbranding or adulteration, and the plaintiff's recourse is to test those proceedings where they are brought.

It is pleaded in the bill and urged in argument by plaintiff that the New Hampshire judgment is res adjudicata with respect to the pend-

ing libel proceedings. The averments in the bill are that the libel which was involved in that proceeding is substantially the same as those contained in the present literature accompanying the shipments recently proceeded against. This averment would indicate that the labels were in effect the same, but they were in fact different. Furthermore, according to the averments of the bill, the issue in the New Hampshire case involved only the misbranding of plaintiff's product, whereas the recent libel proceedings and those threatened involved the additional charge that plaintiff's product is also adulterated within the meaning of the Food and Drugs Act.

Furthermore in *Plews* v. *Burrage*, 266 Fed. 347, it was held that a defendant in an action in a Federal court relying upon res adjudicata as a defense has a complete and adequate remedy at law and cannot maintain an action in equity based thereon to enjoin the law action.

It is the view of this Court that this bill in equity cannot be maintained and should, therefore, be dismissed.

UNITED STATES v. B. & M. EXTERNAL REMEDY

(District Court, S.D. New York, Oct. 23, 1929)

36 Fed. (2d) 53

Libel proceeding under section 10 of the Food and Drugs Act for forfeiture of certain bottles of drugs. On motion by the Government for leave to take samples from goods seized, for purpose of making tests. Motion granted.

COLEMAN, *District Judge*. The Government has seized certain bottles of medicine pursuant to the National Food and Drugs Act (21 U.S.C., secs. 1–15), alleging adulteration and misbranding, and the goods are now in the custody of this court in the present condemnation action. The Government desires to take a few small samples for the purpose of making actual tests on animals in order to get evidence to prove the allegations of adulteration and misbranding. The claimant opposes on the ground that it would be deprived of its property without due process of law and that it would be subjected to unreasonable search and seizure and compulsory self-incrimination, contrary to the fourth and fifth amendments.

I am unable to see the slightest merit in the contention that the tests would be compelling claimant to incriminate itself or would subject it to unreasonable search and seizure, even though it be assumed that this is a penal action. The goods are now in the custody of the court, and no complaint is made about the seizure which placed them there. To permit the tests would not require claimant to do anything, nor to suffer any search or examination.

As to its being deprived of property without due process of law, the amount involved is so trivial as to come within the de minimis rule. However, in order to prevent any possible injustice, I will require as a condition to granting the permission that the Government pay the value of the samples taken in case the goods are not condemned. Furthermore, I think it proper to require that claimant be given samples from the same containers and that it be permitted to be present at all the tests. Settle order on notice.

UNITED STATES v. 15 CASES OF BRED SPRED, ETC., ET AL.

(Circuit Court of Appeals, Seventh Circuit, Oct. 25, 1929)

35 Fed. (2d) 183; N.J. No. 17352

In error to the District Court for the District of Indiana. Judgment affirmed.

Before ALSCHULER, EVANS, and PAGE, Circuit Judges.

PAGE, *Circuit Judge*. The Government (appellant) libeled, in the United States District Court for the Southern District of Indiana, under the Food and Drugs Act, a food product called "Bred Spred," manufactured by claimant (appellee) at Chicago, and shipped into Indiana. Appellant abided by its overruled demurrer to each of the two paragraphs of appellee's answer, and the libel was dismissed.

The first paragraph of the answer sets out, as an estoppel by judgment, the complete record, other than the evidence, of a case in a Federal District Court of Michigan, wherein a judgment, unappealed from, was adverse to the Government.

Concerning the second paragraph of the answer, appellant in its brief, makes the admission that it "consists of specific denials of the various averments of the libel and explanations, constituting together a plea of confession and avoidance." It is not a plea of confession and avoidance, but we find that it is a good and sufficient answer to the libel, and that as to that paragraph the court properly overruled the demurrer and dismissed the libel. The propriety of the court's action in that regard is not discussed or questioned by appellant. On the contrary, after the above admission, appellant abandoned the issue on the second paragraph and said: "The contested issues here, then, arise upon the views held and ruling made by the judge of the District Court upon the questions of former adjudication and estoppel raised by the first paragraph of amended answer." That must end the case. With a good defense upon the merits admitted, it cannot matter how many errors may be committed by a trial court on any issue upon which a case cannot be reversed. If we should hold with the contention of the Government on the first paragraph, we could not, for that reason, reverse the judgment. The judgment is affirmed.

AMBRUSTER v. MELLON, SECRETARY OF THE TREASURY, ET AL.

(Court of Appeals of District of Columbia, May 5, 1930)

41 Fed. (2d) 430

Appeal from a decree of the Supreme Court of the District of Columbia dismissing a bill for injunction to restrain the Secretary of the Treasury, the Secretary of Agriculture, and the Secretary of Commerce from permitting importations of certain kinds of a drug. Affirmed.

Before MARTIN, Chief Justice, and ROBB and VAN ORSDEL, Associate Justices.

MARTIN, *Chief Justice.* An appeal from a decree of the lower court dismissing the amended bill of complaint of the plaintiff, upon motion of the defendants.

The plaintiff below sought an injunction to restrain the Secretary of the Treasury, the Secretary of Agriculture, and the Secretary of Commerce, from permitting the importation into this country of certain kinds and conditions of ergot of rye, which plaintiff claims to be under the legal standard, and dangerous to the public health when used, claiming also that such importations resulted in irreparable injury to plaintiff as an importer and owner of large stores of ergot of rye, already imported into this country, of standard character and usefulness.

It is recited in the bill that ergot of rye is a crude drug consisting of grains of rye which have been peculiarly altered in substance by a certain fungus growth. From the crude article is manufactured what is known as "fluid extract of ergot", which is a valuable preparation extensively used by physicians for emergencies in obstetrical cases. Both the crude drug and the extract are listed and described in the United States Pharmacopeia and National Formulary, as well as other works on materia medica. There is practically no crude ergot produced in this country. Importations of a superior class arrive here from Spain, while inferior products come from certain other foreign countries. The latter importations frequently arrive in bad condition and are unfit to be used in the manufacture of the medicinal extract. The plaintiff charges that the defendants, the Secretary of the Treasury and the Secretary of Agriculture, have since September 1, 1927, in violation of section 7 of the Federal Food and Drugs Act (34 Stat. 768 (21 U.S.C. sec. 8)), and of regulation 30, subsection B, of the regulations for the enforcement of the Federal Food and Drugs Act, knowingly admitted through the customs house crude ergot of rye of inferior quality and condition and not fit for use in the manufacture of medicinal extract of ergot; and that the defendants have knowingly and willfully permitted various quantities of substandard crude ergot thus imported, to be sold and shipped in interstate commerce in this country under false and misleading brands, without causing them to be seized by the proper officers for condemnation, destruction, or export. Plaintiff also states that he has lawfully imported into this country and holds in stock large quantities of pure standard ergot of rye of superior quality and value, and that he will suffer great loss if inferior ergot is allowed to be put upon the market under misleading brands and false descriptions.

The plaintiff prayed that the defendants be enjoined from admitting into this country importations of crude ergot of rye which do not, upon proper examination, meet all the requirements of the Federal Food and Drugs Act and the United States Pharmacopeia, and to recall all stocks already admitted which do not comply therewith; and that defendants be required to enforce the act so as to prevent the entry of crude ergot into this country when impure and beneath the standard, and also "be required to act with all due and prompt

diligence in the enforcement of the said act, in the public health interest. * * *"

In our opinion the ruling of the lower court dismissing the bill of complaint was right, for the reason, among others, that the proceedings of the defendants which are challenged by the bill were performed by them in the lawful exercise of their jurisdiction under the statute, and their action is not shown to be capricious or arbitrary, and consequently is not reviewable in a suit for an injunction.

Section 2 of the Federal Food and Drugs Act (21 U.S.C. sec. 2) forbids the importation into this country from any foreign country, of any drug which is adulterated or misbranded within the meaning of the act. Section 3 (21 U.S.C. sec. 3) provides that the Secretary of the Treasury, the Secretary of Agriculture, and the Secretary of Commerce shall make uniform rules and regulations for carrying out the provisions of the act. Sections 7 and 8 (21 U.S.C. secs. 8, 9) define the conditions under which a drug shall be considered as adulterated or misbranded. Section 11 (21 U.S.C. sec. 15) provides for a proceeding whereby the Secretary of Agriculture may examine samples of any drug offered to be imported into the United States, in order to determine whether it is adulterated or misbranded within the meaning of the act, or is otherwise dangerous to health, or is falsely labeled in any respect; and any drug found to be of such description shall be refused admission. In accordance with the provisions of the act the Secretary of the Treasury, the Secretary of Agriculture and the Secretary of Commerce promulgated certain official regulations for the enforcement of the Federal Food and Drugs Act, and the same have been continuously in force under the act.

The statute accordingly invested the appellees with authority to determine whether imported drugs were adulterated or misbranded in the sense of the act, when offered for entry into this country. Such authority is not simply ministerial in character, but calls for a finding of facts and the exercise of judgment upon the facts when found. Accordingly the exercise of this authority by the appellees will not be reviewed by the courts unless it has been capriciously or arbitrarily exercised.

In *Commercial Solvents Corporation* v. *Mellon, Secretary of the Treasury*, 51 App.D.C. 146, 277 Fed. 548, an order of the Secretary was challenged, which provided that fusel oil should not be considered to be a synthetic organic chemical within the meaning of the Dye and Chemical Control Act, approved May 27, 1921 (42 Stat. 18). It was held by the court that the authority given to the Secretary of the Treasury by the act, to administer the same, gave him the implied authority to interpret it, because interpretation was necessary to the performance of his administrative duty; and that the courts cannot review, by mandamus or injunction, a decision of the Secretary of the Treasury, made within his jurisdiction, to interpret the act, if he did not act in a capricious or arbitrary manner. Accordingly the court sustained the dismissal of a bill for an injunction to restrain the enforcement of the Secretary's order.

In support of this ruling, the court cited *New Orleans* v. *Paine*, 147 U.S. 261, 13 S.Ct. 303, 37 L.Ed. 162; *Riverside Oil Co.* v. *Hitchcock*, 190 U.S. 316, 23 S.Ct. 698, 47 L.Ed. 1074; *Ness* v. *Fisher*, 223 U.S. 683, 32 S.Ct. 356, 56 L.Ed. 610; *Duncan Townsite Co.* v. *Lane*,

245 U.S. 308, 38 S.Ct. 99, 62 L.Ed. 309; *Houston* v. *St. Louis Packing Co.*, 249 U.S. 479, 484, 39 S.Ct. 332, 63 L.Ed. 717; *Brougham* v. *Blanton Mfg. Co.*, 249 U.S. 495, 39 S.Ct. 363, 63 L.Ed. 725; *Hall* v. *Payne*, 254 U.S. 343, 41 S.Ct. 131, 65 L.Ed. 295; *Handel* v. *Lane*, 45 App.D.C. 389; *United States ex rel. Ashley* v. *Roper*, 48 App.D.C. 69; *United States ex rel. Hall* v. *Lane*, 48 App.D.C. 279.

In our opinion, the bill discloses that the defendants below were invested with authority to pass upon the admission of the importations complained of, and fails to allege facts from which it can be inferred that their action in respect to the present importations was capricious or arbitrary.

The decree of the lower court is therefore affirmed.

UNITED STATES v. SHREVEPORT GRAIN & ELEVATOR CO.

(District Court, W.D. Louisiana, Sept. 16, 1930)

46 Fed. (2d) 354; N.J. No. 18300

Information alleging violation of section 2 of the Food and Drugs Act. Demurrer to information sustained.[34]

DAWKINS, *District Judge.* This is a criminal information, charging the defendant with misbranding certain corn bran, in violation of the Pure Food and Drugs Act of June 30, 1906 (34 Stat. 768, 21 U.S.C. secs. 1–5, 7–15) in that each sack of said product was branded as containing 100 pounds net, whereas in truth they contained a lesser quantity. By amendment it is charged that some of the sacks contained not more than 85 pounds net, and that the average was about 96 pounds.

Defendant moved to quash the information on the ground that said act violates articles 1, 2, and 3 of the Federal Constitution because it attempts "to grant legislative powers to the judiciary and to the executive departments of the Government"; and it violates the fifth amendment to the Constitution, in that it "seeks to deprive of life, liberty, and property without due process of law", as well as the fourteenth amendment, "for the same reason"; and, further, that it violates the sixth amendment because "it is too indefinite, sets up no ascertainable standard of guilt and defendant cannot be informed of the nature and cause of the accusation against it thereunder."

After declaring that sacks or packages containing articles of food shall have the net weight or measure plainly stamped thereon, the third paragraph of section 8 of the act as amended (37 Stat. 732, (21 U.S.C. sec. 10, par. 3) provides as follows:

> Third. If in package form, the quantity of the contents be not plainly and conspicuously marked on the outside of the package in terms of weight, measure, or numerical count. Reasonable variations shall be permitted, and tolerances and also exemptions as to small packages shall be established by rules and regulations made in accordance with the provisions of section 3 of this title.

It must be remembered that this is a criminal action for the alleged violation of this statute, one of the very few that have been brought

---

[34] Reversed by Supreme Court, *United States* v. *Shreveport Grain & Elevator Co.*, p. 1339 *post*.

thereunder, and, while the proceeding is against a corporation, it might easily have been one charging an individual, who in default of payment of fine could be subjected to imprisonment. Hence a much stricter construction is required than if it were merely an act affecting civil rights. I have no doubt that Congress has the power, for the protection of the public, to require that packages containing articles of food shall have stamped thereon the correct weight or number, and that the dealer, without having any fraudulent or criminal purpose, may, in an extensive business, be unable to comply exactly in each instance with this requirement. However, in such circumstances, it would be a question of intent for the court and jury, if there was a variation, but the dealer would have a fixed standard by which to be guided, whereas under the quoted provision of the act, its violation, in large measure, is left either to the discretion of the enforcing department in making rules or regulations, or to the judgment of the court and jury in each instance as to what is reasonable. This might vary according to the views of the particular tribunal, and the dealer could never know whether he was violating the law or not until he was brought into court.

For these reasons, I believe the asserted ground of unconstitutionality under the sixth amendment, is well founded. See *United States* v. *L. Cohen Grocery Co.*, 255 U.S. 81, 41 S.Ct. 298, 65 L.Ed. 516, 14 A.L.R. 1045; *Connally* v. *General Const. Co.*, 269 U.S. 385, 46 S.Ct. 126, 70 L.Ed. 322; *Yu Cong Eng* v. *Trinidad*, 271 U.S. 500, 46 S.Ct. 619, 70 L.Ed. 1059; *United States* v. *Reese et al.*, 92 U.S. 214, 23 L.Ed. 563; *United States* v. *Brewer*, 139 U.S. 278, 11 S.Ct. 538, 35 L.Ed. 190; *Todd* v. *United States*, 158 U.S. 282, 15 S.Ct. 889, 39 L.Ed. 982.

For the reasons assigned the demurrer or motion to dismiss will be sustained. Proper decree may be presented.

UNITED STATES v. 23½ DOZEN BOTTLES, ETC., OF AN ARTICLE OF DRUGS LABELED IN PART "LEE'S SAVE THE BABY"

(District Court, D. Connecticut, Jan. 8, 1930, Oct. 17, 1930)

44 Fed. (2d) 831; N.J. No. 18653

Libel under section 10 of the Food and Drugs Act. Motion to strike out portions of claimant's answer, granted. Trial before the court. Decree in favor of claimant.

THOMAS, *District Judge* (on motion to strike out portions of claimant's answer). The United States filed its libel for condemnation against certain bottles and their contents shipped in interstate commerce and prayed that the same be condemned upon the ground that they were misbranded within the meaning of the Food and Drugs Act. The libel alleges the transportation as of January 15, 1929.

The bottles were labeled "Save the Baby." On the back of the bottle is a label setting forth the following:

For Croup apply with the hand or by saturating * * * cloth and laying it over the throat and chest; also apply over the nose. In severe cases, where relief does not follow in half an hour, give a half teaspoonful internally every half

hour. * * * For Sore Throat apply on the throat; also take one-half a teaspoonful internally. For Coughs * * * apply on the chest, also take one teaspoonful morning and night. For ague in breast, apply to the parts affected. * * *

On the small carton the following legend appears:

Save the Baby * * * croup mixture * * * For Croup, * * * Coughs and Sore Throat * * * used in cases of Grippe, Bronchitis, Laryngitis, Tonsilitis, Pneumonia, etc.

There is considerably more of the same nature on the labels on the large cartons and on the circulars enclosed.

The libel proceeds to charge that the alleged drugs in question were misbranded within the meaning of the Food and Drugs Act of June 30, 1906, as amended, section 8, paragraph third, because they contained "no ingredient or combination of ingredients capable of producing the effects claimed," and that the labels were applied in reckless and wanton disregard of their truth and with intent to mislead purchasers.

The claimant appears to be William W. Lee & Co., a partnership doing business in Watervliet, Albany County, N.Y., in the Northern District of New York. There is nothing to indicate who, at the present time, composes the copartnership. Both the answer and notice of claim are silent on this point.

In their answer the claimants, after entering denial as to the alleged misbranding, set up a separate defense which is contained in paragraph four of the answer to which the motion to strike is addressed, wherein, inter alia, the claimant alleges: That on February 24, 1916, the United States attorney for the Northern District of New York laid an information against this claimant, William W. Lee & Co., and the several copartners thereof, pursuant to the Food and Drugs Act, accusing them individually and as such copartnership of unlawfully shipping and delivering for shipment in interstate commerce articles of drugs identical in kind, nature, and composition with the articles of drugs which are the subject of the present libel, which articles then bore labels, wrappers, and reading matter substantially identical with the labels, wrappers, and reading matter present on the articles seized under this libel; and that said information charged the claimant of violating the identical statute involved in this proceeding in the same particulars as charged in this libel and that thereafter the information was duly dismissed on the merits and an order to that effect entered on or about November 13, 1916, all of which is exhibited in a copy of the information and order annexed to the answer.

The answer then proceeds further to allege that on July 26, 1920, an information was laid by the United States attorney for the Northern District of New York which again charged the claimants with violation of the Food and Drugs Act, in that the claimants shipped, on or about September 17, 1917, articles of drugs identical with those in suit and bearing the identical labels which said articles were claimed to be misbranded, and that on the 16th day of February, 1922, the information was dismissed, or nolle prossed, on motion of the United States attorney, as also appears by a copy of the information and order.

The whole of the information of 1916 is not annexed but merely count 2 thereof, and it discloses that one Charles Samuel Ulcher and Carrie L. Ulcher, trading as William W. Lee & Co., did unlawfully ship and deliver from New York to Boston certain packages labeled

substantially similar to the labels on the packages at bar, and it was charged that those labels constituted a misbranding. The order of the District Court of October 27, 1916, discloses that the defendants then pleaded guilty to the first count of the information (though what that first count was we cannot tell), and were fined on their plea of guilty, $25. The order dismissed the second count.

There is nothing from the nature of the order to indicate just what the reason was for the dismissal. There is no recital that the issues were tried, nor is there anything to indicate whether the dismissal was because of insufficiency in the information or what. I think that a fair interpretation of the order would indicate the second count was dismissed on consent of the United States attorney. Otherwise the dismissal would appear to have been founded on nothing whatsoever. The second information was also against the same defendants and charged a shipment of misbranded articles of the same kind as those involved in the first information and charged the misbranding thereof in the same way. The order which was entered thereon in February 1922 recited the charge involved in the information at length, and that the defendants had entered a plea of former jeopardy and thereupon and on motion of the United States attorney the second information was dismissed.

In the case at bar the Government moves to strike out the matter embodied in the separate defense upon the ground that:

> A, the allegations and matters contained in said paragraph 4 and said annexes do not constitute a valid defense to any matters charged in the libel; and B, the allegations and matters contained in said paragraph 4 and said annexes are incompetent, immaterial, irrelevant, and have no bearing whatever on the issues in this case.

The matters set up as a separate defense can be available only on one theory, and that is, that as to the libel at bar, they are res adjudicata. It is contended by the claimant that the dismissal of the two former informations against them involved an adjudication to the effect that articles so constituted and so labeled, as in the case at bar, are not misbranded and that such an adjudication is binding forever after.

The doctrine of res adjudicata is, like many other legal principles, simple enough in its statement, but difficult, at times, in its application. A former judgment on the merits concludes the parties and their privies as to all matters which were litigated or which should or could have been litigated within the field of the specific controversy. Therefore, in any action between the same parties upon the identical claim or demand upon which a judgment has already been rendered, that judgment is conclusive. Where the action between the same parties is upon a different claim, the former judgment may, nevertheless, operate as an estoppel as to any matter litigated between the parties or actually determined therein.

It is to be noted, then, that a former judgment is conclusive only as to the parties. It binds no one but the parties, or those who derive their interest in the subject matter from the parties. There is nothing in this record which indicates who the claimants are other than that they are persons operating under a partnership name. Whether there are 2 persons or 20 persons, and whether they are the identical persons who operated under the same partnership name in 1916 and 1920 does not appear. While it is true that the United States attorney

has raised no question on this point the court, nevertheless, in its decision on the sufficiency of the answer set forth by defendants, is not restricted to a consideration only of the points made in the brief filed by counsel.

Assuming, however, the identity of the parties, I find no identity of subject matter. In fact, there is no claim that there is an identity of subject matter, except that the claimants allege that the articles charged to be misbranded have the same composition and bear the same labels as the articles charged to have been misbranded in the criminal actions. It is not claimed, however, that the identical articles involved in the criminal proceedings had more than ten years ago are the subject of the seizure in New Haven in 1929. At best they are only similar. They are not the same. It follows, then, that the claim of res adjudicata must rest upon the theory that the dismissals of the two informations involved the determination that articles of the substance of the articles at bar labeled in the same way, are not knowingly misbranded or their transportation in interstate traffic is not made with knowledge that they are misbranded. This brings us to the crux of the matter.

I have been referred to only one type of case where a judgment in a criminal action may, in any sense, be said to be determinative of an issue in a civil action. That is the type of case involved in *Coffey* v. *United States*, 116 U.S. 436. Coffey had been prosecuted on a charge of having manufactured distilled spirits without paying the tax imposed by law. He was acquitted of that charge, and then an information in rem was filed against certain property alleged to have been used by Coffey in the manufacture of the distilled spirits. In his answer in the latter proceedings, Coffey pleaded in bar to the maintenance of the forfeiture proceedings the judgment of acquittal in the criminal case, and it was held by the Supreme Court of the United States that the plea was good. On page 443, Mr. Justice Blatchford, speaking for the court, said:

> Yet, where an issue raised as to the existence of the act or fact denounced has been tried in a criminal proceeding, instituted by the United States, and a judgment of acquittal has been rendered in favor of a particular person, that judgment is conclusive in favor of such person, on the subsequent trial of a suit in rem by the United States, where, as against him, the existence of the same act or fact is the matter in issue, as a cause for the forfeiture of the property prosecuted in such suit in rem. * * * There could be no new trial of the criminal prosecution after the acquittal in it; and a subsequent trial of the civil suit amounts to substantially the same thing, with a difference only in the consequences following a judgment adverse to the claimant.

It will be noted that in the *Coffey case* the information in rem involved a claim to the forfeiture of the identical articles that were the basis for the criminal prosecution. We have no such situation in the case at bar. It must be further noted that in the *Coffey case* there had been a trial on the merits and an acquittal, which facts also are not present in the case under consideration. Later on the Supreme Court had occasion to construe its own decision in the *Coffey case* in the case of *Stone* v. *United States*, 167 U.S. 178, and Mr. Justice Harlan, speaking for the court, on page 184 said:

> But this court held that as the demurrer to the answer admitted that the fraudulent acts and attempts to defraud, alleged in the criminal information and covered by the verdict and judgment in the criminal case, embraced all the acts, attempts, and intents averred in the libel for the forfeiture of Coffey's personal property, the judgment of acquittal in the criminal case was a bar to the proceeding by libel.

It must be obvious that the *Coffey case* did not determine that an acquittal establishes immunity against prosecution for subsequent conduct or misconduct upon a similar charge; no judgment can do that. The *Coffey case* held, merely, that just as the Government would be estopped by a plea of former jeopardy from again prosecuting the defendants for the identical acts charged in the first indictment, so it would be estopped from bringing a proceeding in rem upon such indentical facts. And it seems clear enough that a plea of former jeopardy could hardly be sustained against an indictment charging the commission of acts occurring after the first indictment had been dismissed. And if an acquittal could not be pleaded in bar to such an indictment, on what theory can such acquittal be said to be res adjudicata on such an information in rem?

I think that the essential fallacy of the claimants' position lies in the obvious confounding of two wholly distinct conceptions, namely, that of res adjudicata and that of stare decisis. Res adjudicata constitutes a plea in bar founded upon a specific judgment determinative of a specific controversy. Stare decisis is not a plea at all. It is the rule of precedent. A person who has been indicted for buying intoxicating liquor may be acquitted upon the ground that buying liquor is no crime. If he be again indicted for buying the same liquor he may plead in bar the former acquittal. This would be a plea of former jeopardy and in its civil aspect, it is called res adjudicata. But if he be indicted for buying other liquor, he cannot plead former jeopardy, but he may demur to the indictment upon the ground that it fails to charge a crime, and then, proceeding upon an application of the doctrine of stare decisis, he may urge the former judgment of acquittal as a precedent to guide the court in the disposition of his demurrer. And it may well be that the second court, even though it be a court of coordinate jurisdiction, may disagree with the first and not permit the precedent to rule it. Had, however, the plea of res adjudicata been available then the court, whether of coordinate or of higher jurisdiction, would be compelled to give effect to it.

These considerations apply with peculiar force to the case at bar. Let us assume that ten years ago these claimants were tried upon an indictment charging them with the offense of misbranding and that such charge arose out of conditions similar to those set out in the libel. Let us further assume that they were acquitted after a trial on the merits. The most that could be said of such an acquittal would be that the court, composed of a judge and a jury, determined that the product sold by the claimants was not then misbranded within the meaning of the statute. Such a judgment might have value as a precedent, though even in such a case, the value would be highly doubtful as the court could hardly be said to have established a rule of any kind. For, it is obvious, that in a criminal case, a plea of not guilty offers a traverse to every material allegation of the indictment and an acquittal necessarily follows if the Government fails in its proof on any one essential element in its case. Thus in a criminal trial for misbranding, it may be that the Government is unable to establish the interstate character of the shipment; or that it was the defendants who did the misbranding; or that the articles were shipped at the time charged in the indictment. An acquittal eventuating upon the failure of proof beyond a reasonable doubt of any one of these necessary elements could hardly be said to adjudge that the

labels were not false in fact and fraudulent in purpose. But in the case at bar there was never even any trial and acquittal. At any rate the record discloses none. The first information was dismissed, for what reason does not appear. If there was a trial then the judgment is strangely silent concerning the matter. As for the second information the judgment shows that it was nolle prossed by the United States attorney upon the tender of the plea of former jeopardy. It may be that this record exhibits an adjudication on the merits of something, but of what I cannot tell.

It follows, for the reasons herein given, that the motion to strike out the matters alleged in paragraph 4 of the answer and annexes A, B, C, and D should be granted and an order may be submitted accordingly.

On January 8, 1930, formal order was entered by the court striking portions of claimant's answer in accordance with the memorandum decision above.

On June 24, 1930, a jury having been waived, the case came on for hearing before the court on the issues presented by claimant's remaining defense, a general denial that the product was misbranded. Having heard the evidence and arguments of counsel for the Government and claimant, the court took the case under advisement, and on October 17, 1930, handed down the following opinion sustaining claimant's prayer to dismiss the libel:

THOMAS, *District Judge.* This is a proceeding in rem against a certain drug preparation known as "Lee's Save The Baby," which name is and has been registered in the United States Patent Office for many years. The United States filed its libel for condemnation against certain bottles and their contents, shipped in interstate commerce, and prayed that the same be condemned upon the ground that they were misbranded within the meaning of the Food and Drugs Act of June 30, 1906 (34 Stat. 768), as amended by the act of August 23, 1912 (37 Stat. 416).

The libel charges that:

Said article of drugs * * * is and was * * * misbranded within the meaning of the act, * * * in that the following statements regarding the curative and therapeutic effects of the said article are false and fraudulent, (front bottle label) "Save The Baby," (back bottle label) "For Croup—apply with the hand or by saturating * * * cloth and laying it over the throat and chest; also apply over the nose. In severe cases, where relief does not follow in half an hour, give half teaspoonful internally every half hour. * * * For Sore Throat apply on the throat; also take one-half a teaspoonful internally. For coughs * * * apply on the chest, also take one teaspoonful morning and night. For ague in breast, apply to the parts affected," (carton, small) "Save The Baby * * * Croup Mixture * * * For Croup, * * * Coughs and Sore Throat * * * used in cases of Grippe, Bronchitis, Laryngitis, Tonsilitis, Pneumonia, etc.," (carton, large) "Save The Baby for Croup, Coughs, * * * Etc.," (circular) "Save The Baby * * * For Croup * * * Coughs, Tonsilitis, Bronchitis, Sore Throat and similar ailments. * * * What Mother or Father has not been alarmed when awakened in the night by the childish cry of pain and the dread sound of croup? Or who of us has not shuddered when whooping cough, pneumonia or a hard cold has racked our children with pain and coughing spasms. It was because of a child's suffering that 'Save the Baby' came into being * * * a wee girl lay seriously sick with croup * * * he administered a remedy of his own compounding * * * found * * * child completely out of danger. This physician prescribed the remedy * * * in other cases, always with gratifying results. * * * 'Save the Baby.' * * * by that name it had come to be known. * * * 'Save The Baby' for use in

* * * croup, tonsilitis, bronchitis, sore throat and all similar ailments in children and adults. * * * Use It * * * The result will be beneficial. For Adults—'Save the Baby' works * * * with as good results for adults as it does for children. The * * * relief given in coughs, bronchitis, pneumonia and other congested conditions of the head, throat or lungs * * * 'Save the Baby' * * * effective when used Hot. For Croup: * * * In severe cases, where relief does not follow in half an hour, give a half teaspoonful internally every half hour. * * * For Coughs * * * Apply on chest and throat; also take one teaspoonful morning and night. Influenza, Grippe and Pneumonia: * * * use 'Save the Baby' * * * In severe cases give a half teaspoonful internally every half hour. * * * Use 'Save the Baby' * * * For Sore Throat and Tonsilitis: Apply on the throat and along the cord that runs from behind the ear down the neck; also take one half teaspoonful internally. Take from one half to one teaspoonful internally for all chest congestions and gathering of phlegm,"—in this, that the article contains no ingredient or combination of ingredients capable of producing the effects claimed, and that the same were applied to the said article knowingly and in reckless and wanton disregard of their truth or falsity, so as to represent falsely and fraudulently to the purchasers thereof, and create in the minds of the purchasers thereof, the impression and belief, that the article was, in whole or in part, composed of, or contained ingredients or medicinal agents effective in the diseases and conditions named therein.

The jurisdictional allegations as well as the shipment in interstate commerce are admitted, but the essential and last quoted allegations of the libel as to the product are denied. Certain stipulations were filed eliminating the necessity of proving certain facts as to which it is unnecessary to make reference except as to the ingredients of the product. One of the stipulations sets forth that an analysis was made by an analyst of the United States Department of Agriculture of a sample of the shipment seized in these proceedings which shows that the composition and ingredients of the preparation are: Lard (approximately 70 percent), alcohol (approximately 6 percent), canada balsam (approximately 10 percent), volatile oils including camphor, rosemary oil, and origanum oil (approximately 15 percent).

To establish the fact that this preparation is misbranded within the meaning of the Food and Drugs Act, the Government must prove by a preponderance of the evidence: First, that the label, carton, or circular carries some statement, design, or device regarding the contents of the package or the ingredients in the mixture which is false and misleading in some particular, and second; that the statement made or the design or device carried on the label or carton or in the circular regarding the curative or therapeutic effects of the same are false and fraudulent. Such being the case the fraud alleged must be established by competent proof and by credible and convincing evidence.

The sections of the act here applicable provide as follows:

(Sec. 9, title 21, U.S.C.). "Misbranded;" meaning and application. The term "misbranded" * * * shall apply to all drugs, * * * the package or label of which shall bear any statement, design, or device regarding such article, or the ingredients or substances contained therein which shall be false or misleading in any particular.

(Sec. 10, title 21, U.S.C.) An article shall be deemed to be misbranded: * * * In case of drugs: Imitation or use of name of other article. First. * * * Removal and substitution of contents of package, or failure to state on label quantity or proportion of narcotics therein. Second. * * * False statement of curative or therapeutic effect. Third. If its package or label shall bear or contain any statement, design, or device regarding the curative or therapeutic effect of such article or any of the ingredients or substances contained therein, which is false and fraudulent.

It appears that the Government contends that this product contains no ingredients or combination of ingredients capable of producing the effects claimed for it and that the claims that are made for it are false and fraudulent and were applied by the manufacturers knowingly and in disregard of their truth or falsity, so as to falsely and fraudulently represent to the purchasers and create in their minds the impression and belief that the article was in whole or in part composed of or contained ingredients effective in the diseases mentioned in the carton and circular.

The claimant denies misbranding within the purview of the Food and Drugs Act and particularly denies that the statements regarding the curative and therapeutic effects of this product are false and fraudulent or were made in wanton disregard of their truth. It then affirmatively alleges that this product is capable of producing and has actually produced the curative or therapeutic effects claimed for it, and has offered credible evidence in support of his contentions.

From the quoted allegations of the libel it appears that certain words and directions contained in the circular were omitted from the libel. Under familiar rules of pleading and evidence the Government is precluded from complaining of the omitted words, but it is only fair, in order to reach a proper conclusion respecting the issues presented, that we consider the entire label and all that is contained in the so-called literature and directions which accompany the bottle as bearing upon the good faith of the manufacturer of the product, because if it appears from all the evidence, and I conclude that the claims made for this remedy are true, then it necessarily follows that they cannot be false or fraudulent.

In the use of the words "therapeutic " and "curative", as set forth in the statute, it seems clear that these words were intended by the Congress to be given their ordinarily accepted meaning and while they have a certain meaning to the expert doctor, nevertheless they are a part of the vocabulary of any intelligent person. Therapeutic to the medical world means to heal; to make well; to restore to health. It is that branch of medicine dealing with the proper use of the right medicines in the treatment of diseases. The medical student studies "Therapeutics" for the purpose of learning about different medicines to prescribe for the many ills to which the flesh is heir, in order to assist nature to make a sick patient well. The ordinary definitions found in the dictionaries are as follows: "Having healing qualities; curative; alleviative; a medicine efficacious in curing or alleviating disease." Webster defines therapeutics as "that part of medical science which treats of the discovery and application of remedies for diseases." The word "curative" is not found in the medical dictionaries. The regular dictionaries define the word as "possessing power or tending to cure; relating to the curing of disease; relating to or employed in the cure of disease; tending to cure." In none of the definitions is there a suggestion that the words "therapeutic" or "curative" convey the meaning of absolute cure. The testimony of the experts shows that a therapeutic or curative agent is something which alleviates or tends to cure a disease, and that, except in a few instances, there is no medicine which, of itself, is an absolute cure for disease.

167546—33——79

With these definitions in mind we turn to section 6 of the act (sec. 7, title 21, U.S.C.) which defines "drug" as follows:

The term "drug," as used in * * * this title, shall include all medicines and preparations recognized in the United States Pharmacopoeia or National Formulary for internal or external use, and any substance or mixture of substances intended to be used for the cure, mitigation, or prevention of disease of * * * man * * *

Therefore, "Lee's Save the Baby" is a drug within the provisions of the statute, which is intended by its manufacturers for use in the "cure, mitigation, or prevention of diseases in man."

Before analyzing the testimony it is important to note what the Supreme Court has held as to what are and what are not false and fraudulent statements within the purview of the act. In *Seven Cases* v. *United States*, 239 U.S. 510, Mr. Justice Hughes said, page 517:

Congress deliberately excluded the field where there are honest differences of opinion between schools and practitioners. Cong. Rec. 62d Cong. 2d sess., vol. 48, part 12, Appx., p. 675. It was, plainly, to leave no doubt upon this point that the words "false and fraudulent" were used. This phrase must be taken with its accepted legal meaning, and thus it must be found that the statement contained in the package was put there to accompany the goods with actual intent to deceive—an intent which may be derived from the facts and circumstances, but which must be established. Id. 676. That false and fraudulent representations may be made with respect to the curative effect of substances is obvious. * * * It cannot be said, for example, that one who should put inert matter or a worthless composition in the channels of trade, labeled or described in an accompanying circular as a cure for disease when he knows it is not, is beyond the reach of the law-making power. Congress recognized that there was a wide field in which assertions as to curative effect are in no sense honest expressions of opinion, but constitute absolute falsehoods, and in the nature of the case can be deemed to have been made only with fraudulent purposes.

In the light of this decision it seems clear that if a drug mixture contains certain ingredients which the evidence shows have a therapeutic or curative value in the treatment of the diseases for which it is recommended, then there is no misbranding within the purview of the statute.

Before beginning an examination of the evidence it is important to note that one of the claims made and the arguments advanced by counsel for the Government, both in their opening statement at the trial and subsequently in their brief, are predicated upon a wrong premise. Whether by mistake or design I do not say, but the result must be the same in either instance. If by mistake, it only shows that the preparation of the case was not careful, and the argument set forth in the brief was advanced only after a cursory examination of the evidence and the carton which is in evidence, the wording of which formed part of the basis for the libel. Attention is now directed to what is actually and fully printed in the literature accompanying each bottle.

On the face of the carton we find the words, "Lee's Save the Baby contains 8 per cent Alcohol U. S. P." On the back of it are the words: "Lee's Save the Baby. An Invaluable Croup Mixture Made of Pure Simple Ingredients. Can Be Used Internally Or Externally. Use It Hot." On one side we find the words: "For Croup, Snuffles, Colds, Coughs and Sore Throat. Frequently Used In Cases of Grippe, Bronchitis, Laryngitis, Tonsilitis, Pneumonia, Etc. Absolutely Safe For Children and Adults." While the word "Invaluable" was left out of the libel, the record shows that counsel for the Govern-

ment, in his opening statement as to what he expected to prove, said, inter alia: "The rear label again has the word or the name, 'Lee's Save The Baby' and a pictorial design of a woman holding a baby and following are the words, an 'infallible' croup mixture, etc."

In their brief, on page 3, counsel again quote as follows: "Rear panel: an infallible croup mixture." Further on, in urging the argument, they say: "The sense of the entire labeling 'sounds' the curative idea and is augmented by the use of such terms as 'infallible,' 'miraculous,' 'remedy,' etc., which are to be found in the general language of the circular."

The label shows clearly that the word used by the proprietors is "invaluable" and not as Government counsel asserted "infallible." Invaluable means of great value, very useful, inestimable, and the testimony of the experts leads to no other conclusion than that this mixture is "an invaluable croup mixture." Infallible, as defined by Webster, means indubitable, sure, certain, not capable of erring, entirely exempt from liability to mistake. If that word was used in the literature the Government's argument on this point would be sound, but, as pointed out, "invaluable" is the word actually used and there is nothing synonymous about the two words.

The testimony is conclusive that thyme, Canada balsam, commonly known as turpentine, camphor, and lard used hot, are comforting and beneficial and that they alleviate the pain and the suffering incidental to the diseases mentioned, and that these ingredients do have therapeutic and curative properties which aid nature in overcoming the disease. While it is true that the act was intended to protect the public from deception and fraud in connection with the sale of proprietary medicines, and while it is true that when a preparation is put upon the market which it is claimed has therapeutic and curative value it is equally true that it must appear from the evidence that the product has some beneficial action upon the disease mentioned. The great weight of the testimony of the medical experts shows that each one of the ingredients in this mixture exerts some beneficial influence upon each one of the diseases specified.

It is generally known and the evidence shows that with very few exceptions there is no known cure, using that word strictly, for any disease. Nature, supplemented and aided by proper medicines, careful nursing, and proper diet does the work of curing. It has been clearly established that camphor, thyme, Canada balsam in a base of lard are remedial agents of value in the treatment of croup, coughs, colds, snuffles, sore throat, tonsilitis, bronchitis, and pneumonia, and are used by reputable physicians in the treatment of these diseases. All the experts testify and the counsel for the Government concede that "Save the Baby," when applied externally acts as a rubefacient or counter-irritant, bringing an increased blood supply to the particular area of application, thereby soothing the patient and making him feel more comfortable; and that a further soothing effect, a symptomatic relief is produced by the inhalation of camphor fumes given off by the preparation; that when taken internally it acts as a carminative, giving a feeling of warmth and well being to the stomach, and the camphor present acts a slight cardiac stimulant.

The labels, cartons, and circulars in evidence recommend the use of this compound in the treatment of diseases of the respiratory

system, indicate how it is to be used and assert that its use has been found beneficial. Nowhere is there any claim made that it will cure. There is no language anywhere which could possibly be understood to convey the idea that it will cure. And what to my mind completely refutes the Government's claim of fraud and falsity is the language used by the manufacturer which is directory to the person disposed to use the remedy and is found in that part of the circular headed "Directions for Use." After giving directions as to its use in cases of croup, snuffles, coughs, and colds it says: "Influenza, Grippe and Pneumonia. For these serious illnesses it is wise to call a doctor soon as possible. Pending his arrival use 'Save the Baby,'" and then follows the directions as to the use of the remedy pending the doctor's arrival. Also the words, "Keep a bottle of 'Lee's Save the Baby' handy for Emergencies."

The proof in this case shows that this compound is beneficial and has therapeutic and curative value in cases of croup, coughs, colds, and snuffles. On direct examination one of the medical experts for the libelant testified as follows:

Q. Prior to being asked to appear as a witness in this case, have you ever heard of the preparation known as "Lee's Save the Baby"?

A. I have.

Q. Did you ever administer it to a child that you have been called upon to treat?

A. I have been asked by mothers whether I would give them permission to use it and I have consented.

Q. Do you know in a general way or specifically, the constituent ingredients of "Lee's Save the Baby"?

A. I do.

Q. Do you have any objection to the use of "Lee's Save the Baby" in your own mind?

A. No.

Q. Are preparations containing camphor, Canada balsam, and volatile oils on a greasy base used by physicians in the treatment of pathological conditions of the respiratory system?

A. They are used in the treatment as a soothing treatment, not as a curative treatment.

In other words, conceded as it is by all that there is no cure for these respiratory diseases the best the doctors can do to restore normal health is to aid nature with nursing, diet, and medication, because it is nature that effects the cure. If the above mentioned medicines are those, or some of those used by doctors in the treatment of respiratory diseases, and they are the same ingredients as are found in the product under discussion, how can it fairly be asserted that there is anything false or fraudulent in the statements made by the manufacturer as appears in the labels, cartons, and circulars in evidence in this case? If a Government expert medical witness treating children with the aforementioned diseases allows mothers to use the remedy, knowing the ingredients, and has no objection in his own mind to the use of this product and testifies that camphor, Canada balsam, and volatile oils on a greasy base are used by him and other physicians in the treatment of these diseases, I conclude that the Government has utterly failed to sustain the allegations of its libel.

As further enlightening, let us turn to the testimony of one of the doctors who testified in behalf of the claimant and one who has had thirty years' experience as a specialist in children's diseases and an expert of learning and long experience in the treatment of the diseases under discussion. From his testimony it appears that practically all

of the ingredients in this compound appear in the United States Pharmacopeia and that camphor has a substantial standing in materia medica and is used quite universally; that balsam and thyme oil are used quite commonly in the treatment of the diseases of the respiratory tract; and that camphor is one of our very valuable therapeutic agents. With reference to the value of camphor it appears from the evidence that its action both internally and externally is beneficial. Externally it is rubefacient and produces, when applied to the skin, congestion, redness, and is like a counterirritant bringing the blood to the surface and gives relief from pain as it has the effect of an anesthetic and such is the recognized action of the drug. Internally, it is used as a stimulant for the heart and it is also used a great deal in nose syringes with a base of mineral oil which gives relief. When used externally according to the directions, i.e., put on hot, the volatile part of thyme oil, camphor, and turpentine are inhaled and this action soothes the mucous membrane of the throat and nose. It is difficult to reach the mucous membrane of the larynx when the symptom of cold or croup originates but by inhaling the volatile oils that are accumulated from the external application of this remedy congestion and irritation are relieved and the patient derives a benefit.

After dividing croup into two classes, true and false, we find that cases of true membraneous croup are now rare because of the introduction of antitoxin, so that false croup is a common complaint among children, and the evidence abundantly justifies the conclusion that the compound complained of is in use by doctors, and in the case of one doctor of wide experience and learning who testified here that it is used in his own household.

Dr. Shaw for the claimant, a witness of extended experience in the treatment of children's diseases, testified as follows:

Q. Now, I have the impression from the Government witnesses that there was some distinction, some distinction in the professional vocabulary between the cure so-called, the specific for a disease and the things that alleviated the thing, and tended to recover from it; has this compound here any therapeutic property which would be of value in cases of false croup?

A. Yes, sir.

Q. What are they?

A. The camphor, the turpentine, the hot application of the lard, which is very penetrating, the fumes that come from it.

Q. Have you ever seen or heard of this being used as an emetic in case of false croup?

A. I have.

Q. What was the reaction there?

A. The child would promptly vomit after two or three doses of an internal dose.

Q. And that would be the combination of hot lard and thyme oil and the turpentine, and all that?

A. Yes.

Q. And that vomit tends to bring that gathering or phlegm from around the throat?

A. It relaxes the muscular spasm.

Q. And then the croup is over?

A. Yes.

Q. About the use of this in snuffles in small children, it is recommended for snuffles, I think that is one of the words that are on there. Have you ever had any experience with the product in that way?

A. I never have, although I prescribe a preparation that contains a little menthol and camphor and a little iodine for the inhalation in the nose. It is something I have used for years and years.

Q. And camphor, for instance, rubbed on has a certain therapeutic value for the treatment of colds in the head?

A. Yes.

Q. Not only from the fumes that it gives, but the direct action of the drug on membrane; is not that true?

A. Yes, sir.

Q. And thyme oil and some combinations of turpentine products are recognized in the United States Pharmacopeia, are they not, as therapeutic agents for whooping cough?

A. Yes, sir.

Q. Also for the common cold?

A. Yes, sir.

Q. Taking up the question of pneumonia, pneumonia appears on that. What do you say as to the value of this particular product in the treatment of pneumonia, in the kind of pneumonia 1, 2, 3, and 4?

A. I will answer that negatively. It can do absolutely no harm. It is a self-limiting disease.

Q. And it would not do any harm to put a hot pack on the chest?

A. No.

Q. And that tends to relieve the patient's suffering; is that true?

A. If there is pain, and pleurisy is associated with pneumonia, the use of the counter-irritants, such as mustard or turpentine applied externally, produces this redness of the skin that is spoken of, and that does give decided relief.

Q. Of course, if you can relieve the painful symptons, you are helping the patient to fight the disease, are you not?

A. Yes, sir.

Q. Influenza and grippe are two of the claims here. Does anybody know what influenza is?

A. I do not.

Q. Does anybody know what grippe is?

A. I do not.

Q. But in cases of influenza and grippe, would the turpentine products, Canada balsam, for instance, would that have a tendency to relieve the congested condition of the lungs or the throat or the nose, as the case may be?

A. I believe it would.

Q. Would you call that a therapeutic action or a mechanical action?

A. Therapeutic.

Q. You think it would be therapeutic?

A. Yes.

Q. What do you say in that regard as to camphor, in those diseases; has that any therapeutic value on the painful symptons which accompany what we call influenza and grippe?

A. It would.

Q. Am I right in saying that when I say a thing has a therapeutic value, it means that it relieves some present inward condition?

A. Or symptom, yes.

Q. I want to get straight on the word. Now, what is the usually accepted treatment in pediatrics, for, we will say, a child who shows symptoms of discomfort, which, when you arrive there, you diagnose and say, "I think this child has an attack of the grippe, or 'flu'," or something of that kind. What is the usual treatment in such cases as that?

A. That was outlined very well this morning by—absolute rest in bed, drinking fluids and treating any symptoms as they arise, giving comfort and inhalations and the use of other remedies that are not to be considered here.

Q. And in your opinion, would the use of this compound here tend to mitigate the conditions that are present in these cases?

A. I believe it would.

Q. Or any similar compound or drug?

A. Yes, sir.

Q. Have you ever seen it used when you get to a patient, when you are called; have you ever found this product having been used in cases of "flu"?

A. Very frequently.

Q. What do you find the condition to be when you get there? That is, how were they using it?

A. Usually heavily rubbing on the chest, I think usually the external use is more prevalent than the internal use of it. That has been my experience; that they rub the preparation on the chest or else put a little on a flannel and put it on the upper part of the chest, and put it around the throat and other places.

Q. If they have used this preparation internally, of course a certain amount of camphor has been absorbed into the patient's system?

A. A small amount.

Q. What effect does camphor have on a child's condition; what is the effect of the drug itself; does it stimulate?

A. It is a stimulant. The word as used this morning is a carminative and relieves intestinal conditions.

Q. What about thyme oil present in the origanum oil; is that indicated as a therapeutic agent in some cases?

A. Thyme oil is an antiseptic. It is rather soothing if taken internally and inhaling it relieves the congestion of the mucous membrane on account of its soothing effects.

Q. Now, the Canada balsam, we will call it turpentine for short; has that a certain well-recognized therapeutic value in cases of that kind?

A. Yes, that comes under the term of turpentine. There are two classes of that, and that is recognized, and it is the basis of a good many remedies.

Dr. Schroeder, of New York City, who prior to this case had never heard of this remedy, has had a large and extended practice for many years in the treatment of children's diseases and occupies a prominent place in the medical profession. After learning of the ingredients and the proportions he testified that it

Is a very good remedy. * * * There is not a substance in it which is not used in medicine or which is not recognized, and you not only find it in the American Pharmacopeia, but find most of them in the French and Italian and German. The Canada balsam or turpentine has long been recognized as being distinctly helpful in all respiratory infections. * * * A great many cough expectorants have Canada balsam in them and it is distinctly useful as an expectorant. So far as camphor is concerned, everybody knows it is valuable. It depends chiefly on this fact, that it is volatile, and everything that can diminish the choking up of the nose so that you breathe more easily, makes you feel better and when you feel better you cure your disease faster.

Regarding the therapeutic effect of this remedy the doctor testified as follows:

Q. Of course this compound here in and of itself is not a cure for anything, there is no such claim; but I want to know from you whether it has the ingredients in it which will have some curative effect and some therapeutic effect on the condition that you describe as the inflammation of the larynx?

A. There is not a single solitary thing in that mixture that does not serve a useful purpose, so far as I can judge from its make-up, and everything in there seems to have been worked out with a nicety. Since I have learned how long this stuff has been used, that is quite amazing to me. I think it is an unusually nice preparation; and I am particularly pleased to see lard used as a base, because most people use petroleum, which is the basis of Vick's, and lard is the best emollient we have. You have gone all over various substances which have in them thyme; and of course so far as whooping cough is concerned, I do not believe anybody in New York City at least has not used or uses mixtures for whooping cough, diatussin pertussin, and both of these are extracts from thyme or oil of origanum; so nobody claims that thyme is a specific for whooping cough; but so far as anybody can judge, it will serve a very useful purpose, and I have been absolutely amazed at some cases that were very much helped.

Doctor Mullins, another expert, confirms the views expressed by Doctors Shaw and Schroeder, and testified that he has used this product in his own family and on his own children for 14 years, and that in his opinion, "Its use shortens the course of some of the respiratory diseases," and that "It might shorten the course even of pneumonia by using the percent of thyme oil, being a respiratory antiseptic; by its carminative action and the sterling effect of the camphor."

In addition to all this, a number of nurses testified to its use over a period of years with successful results.

I see no merit in the attack on the trade name. There is nothing misleading about it. The title is "Lee's Save the Baby." Its use is not limited to babies. Reading the labels and circulars and directions it is clear that the remedy is equally beneficial for adults as for

children or babies. The descriptive matter says so. Its use is recommended for any person young or old who may be afflicted with any of the diseases of the respiratory tract. The picture on the label and the carton offend no Federal statute. While it is true that the mere fact of trade mark does not take the product out of the operation of the act, nevertheless, when it appears that the product does not in any way violate any of the provisions of the statute, the rights of the owners of the trade mark must have consideration and they may not be deprived of their property rights in order to meet some untenable position taken by some one in authority to whom is delegated the power to invoke the aid of the statute.

In conclusion we revert to the allegations of the libel. They charge that there is a misbranding in that this article

> contains no ingredient or combination of ingredients capable of producing the effects claimed, and that the same were applied to the said article knowingly and in reckless and wanton disregard of their truth or falsity, so as to represent falsely and fraudulently to the purchasers thereof, and create in the minds of the purchasers thereof, the impression and belief, that the article was, in whole or in part, composed of, or contained, ingredients or medicinal agents effective in the diseases and conditions named therein.

The Government has failed to prove that the allegations of its libel are true. On the other hand the evidence abundantly shows that every ingredient in this mixture has some therapeutic or curative value in connection with the treatment or mitigation of the ailments and diseases in which the use of this remedy is indicated or recommended on the label and in the circular contained within the package. Nor is there proof that the package or circular contains any statement, design, or device regarding the curative or therapeutic effect either of the compound itself or any ingredients therein contained which is false or fraudulent. As the name is distinctive and not descriptive it does not offend the statute.

While not exactly in point, the opinion written by Judge Denison, speaking for the Circuit Court of Appeals of the Sixth Circuit in *Raladam Co.* v. *Federal Trade Commission*, decided June 28, 1930, is interesting and bears out in a general way the argument herein advanced and the conclusions reached.

The libel is dismissed and the seized goods are ordered returned.

Submit decree accordingly.

On February 21, 1931, a decree was entered by the court ordering the libel dismissed. On April 19, 1931, the court made the following findings of fact and conclusions of law:

THOMAS, *District Judge.* After filing the opinion deciding this case adversely to the plaintiff, both sides submitted requests for special findings of fact and conclusions of law in accordance with the new admiralty rule 46½.

On February 6, 1931, this court filed a memorandum of decision denying the requests for special findings of fact and conclusions of law for the reasons therein stated.

While this court was sitting in New York City in March 1931, counsel for the Government, together with special counsel for the Department of Agriculture, appeared ex parte before the court and strenuously urged that this court file special findings of fact and conclusions of law because of the importance of the case, and assured the

court at that hearing that the plaintiff intended in good faith to appeal to the Circuit Court of Appeals from the decision of this court handed down on October 17, 1930.

Therefore the court has consented to file special findings of fact and conclusions of law, and they are as follows:

1. That the subject matter of this proceeding is a number of bottles of a preparation known as "Lee's Save The Baby", which is a mixture or compound manufactured, sold, and distributed by William W. Lee & Co., a copartnership composed of Samuel C. Ulcher and Carrie L. Ulcher, residing and doing business in Watervliet, Albany County, N.Y., all of whom intervened as claimant of the seized goods and defended against the libel.

2. That said bottles were, on or about the 15th day of January, 1929, shipped by William W. Lee & Co., from Troy, State of New York, to New Haven, State of Connecticut, and while they remained unsold and in the original unbroken packages in the possession of the Charles W. Whittlesey Co., at New Haven, Conn., 31½ dozen small-size bottles and 12⅔ dozen large-size bottles were seized by the United States marshal pursuant to a libel filed by the United States of America and process duly issued out of this court.

3. That the preparation or substance contained in said bottles, seized as aforesaid, consisted of the following ingredients in the following proportions: Lard (approximately 70 percent), alcohol (approximately 6 percent), canada baslam (approximately 10 percent), volatile oils including camphor, oil of rosemary, and oil of origanum (approximately 15 percent).

4. This product is packed, sold, and shipped in interstate commerce in bottles to which is affixed a label composed to two printed sheets. The front sheet of the label reads:

"Lee's Save The Baby." Reg'd U.S. Patent Office. Trade Mark. Contains 8% Alcohol U.S.P. ——Size. Copyright 1914 by William W. Lee & Co. N.Y.C.R. No. 297, Troy, N.Y., and this sheet of the label also contains the facsimile signature of William W. Lee, together with a picture of a woman with a baby in her arms.

The rear sheet of the label on the bottle reads as follows:

Directions. For croup, apply with the hand, or better, by saturating a flannel cloth and laying it over the throat and chest; also apply over the nose. In severe cases, where relief does not follow in half an hour, give a half teaspoonful internally every half hour. For snuffles, apply over the nose. For sore throat, apply on the throat; also take one-half a teaspoonful internally. For coughs and colds apply on the chest, also take one teaspoon morning and night. For ague in breast, apply to the parts affected. Shake well before using, and keep in a warm place, as it solidifies when cold. In all cases apply hot.

5. This bottle is wrapped in a circular containing directions for use of the mixture or compound in English as well as in six foreign languages, and reads as follows:

"Lee's Save The Baby" Reg'd U.S. Patent Office Trade Mark For Croup, Colds, Coughs, Tonsilitis, Bronchitis, Snuffles, Sore Throat and similar ailments. [Facsimile signature of William W. Lee, together with a picture of a woman with a child in her arms]. * * * Dear Parent: What Mother or Father has not been alarmed when awakened in the night by the childish cry of pain and the dread sound of croup? Or who of us has not shuddered when whooping cough, pneumonia or a hard cold has racked our children with pain and coughing spasms. It was because of a child's suffering that "Save The Baby" came into being more than fifty years ago. In a village near Troy, N.Y., a wee girl lay seriously sick

with croup. The doctor, who had done his best to relieve her, had given up hope for her recovery. The father, Mr. William W. Lee, refused to admit defeat. In desperation, he administered a remedy of his own compounding * * * the doctor on his morning call to his surprise found a happy child completely out of danger. This physician prescribed the remedy for both children and adults in other cases, always with gratifying results. Soon its reputation spread through the community. Neighbors came repeatedly to Mr. Lee for "some of that medicine to save the baby." He gave it freely to all comers. Soon it became necessary to mix it in larger quantities to supply the demand. In a short time the calls became so many and from such distant points that Mr. Lee made up a quantity and bottled it, placing it in a few drug stores in convenient locations. The bottles bore only a handwritten label with just the words "Save The Baby," for by that name it had come to be known. Such was the beginning of "Save The Baby." By sheer force of merit alone, just by one mother telling another, has the business grown so that thousands of bottles are used each year by mothers to help their suffering children. "Save The Baby" is now sold in every State of the Union and exported to foreign countries. The voluntary testimonials Mr. William W. Lee received during his life, and which the present manufacturers (his children) continue to receive, fully warrant us in recommending "Save The Baby" for use in cases of colds, croup, "snuffles," tonsilitis, bronchitis, sore throat and all similar ailments in children and adults. "Save The Baby" always has been a family product. For more than half a century it has been compounded and still is being made by members of Mr. Lee's family from his original formula, the ingredients are simple and the purest and best money can buy. "Save The Baby" is harmless. It can be used externally and internally. Use It Freely And Use It Hot. The results will be beneficial. For Adults—"Save The Baby" works just as fast and with as good results for adults as it does for children. The quick relief given in coughs, colds, bronchitis, pneumonia and other congested conditions of the head, throat, or lungs often seem miraculous. Use it freely as directed and always Use It Hot. Directions for use. Shake well before using and keep in a warm place as "Save The Baby" solidifies when cold. This does not impair it but "Save The Baby" is most effective when used Hot. For Croup: Heat a flannel cloth, saturate it with hot "Save The Baby" and lay over throat and chest or rub the remedy in with the hand. Also apply over nose and back. In severe cases, where relief does not follow in half an hour, give a half teaspoonful internally every half hour. Keep patient warm and away from drafts. For Snuffles: Apply over nose and sniff a little into nostrils. For Coughs and Colds: Apply on chest and throat; also take one teaspoonful morning and night. Influenza, Grippe and Pneumonia: For these serious illnesses it is wise to call a doctor as soon as possible. Pending his arrival use "Save The Baby." Heat a flannel cloth, saturate it with hot "Save The Baby," and lay over chest and back, or rub the hot remedy in by hand. In severe cases give a half teaspoonful internally every half hour. Keep patient warm and protected from drafts. After doctor arrives use "Save The Baby" as directed by him. For Sore Throat and Tonsilitis: Apply on the throat and along the cord that runs from behind the ear down the neck; also take one half teaspoonful internally. Take from one half to one teaspoonful internally for all chest congestions and gathering of phlegm. Keep a bottle of "Save The Baby" handy for emergencies. Use it freely and use it Hot. Made only by William W. Lee & Company, Troy, N.Y. For sale at All Retail Drug and Country Stores. Small Size, 35 Cents Per Bottle. Large Size, 70 Cents Per Bottle. The 70¢-size is more economical to buy, as it contains 2½ times as much as the 35¢-size. Beware of Imitations: The genuine "Save The Baby" is always sold in bottles with labels bearing the facsimile signature ff William W. Lee across the face. Accept No Substitute. Any infringement of the copyrighted label or our trade mark will be vigorously prosecuted. Contains 8 Per Cent Alcohol By Volume As a Solvent and Preservative.

6. The bottle is wrapped in the circular and packed in a carton upon the front panel of which appears a facsimile of the front label on the bottle.

On the left side panel of the carton the following words appear:

For Croup, Snuffles, Colds, Coughs and Sore Throat. Frequently Used in Cases of Grippe, Bronchitis, Laryngitis, Tonsilitis, Pneumonia, Etc. Absolutely Safe for Children and Adults.

On the right side panel of the carton the following words appear:

The genuine "Save The Baby" Bears the Facsimile Signature of William W. Lee across the face of the label. Accept no substitutes.

The rear panel of the carton bears a facsimile of the label described above, with the following words:

Established 1875. An invaluable Croup Mixture made of Pure Simple Ingredients. Can be used Internally or Externally. Use it Hot.

The top panel of the carton bears the words:

Save The Baby. For Children and Adults.

The bottom panel bears the words:

Announcement. We knew of no way to improve "Save The Baby" itself, but we have adopted this new form of packing to make our package more attractive, and for the convenience of our dealers. Wm. W. Lee & Co.

7. The single bottles containing the mixture or compound after being packed in the circular and carton just described, are placed in larger cartons containing 1 dozen bottles each, and the four side panels of this container read:

One Dozen Lee's Save The Baby. For Croup, Coughs, Colds, Etc. William W. Lee & Company, Troy, N. Y. Large Size [or Small Size, as the case may be].

8. The cartons containing a dozen bottles are then enclosed in a larger carton, the front and rear panels of which read as follows:

12 Dozen Large Size [or Small Size, as the case may be], Save The Baby, Manfd. By Wm. W. Lee & Co., Troy, N. Y.

One side panel reads:

Glass, Handle With Care.

The other side panel reads:

Samson Sixty Five. Buffalo Box Factory, Buffalo, N. Y. Certificate of Box Maker. This Box Conforms to all Construction Requirements of Consolidated Freight Classification. Resistance 200 pounds per Square Inch (Bursting Test) Dimension Limit 65 inches. Gross weight Limit 65 pounds. This Box exceeds 250 lbs. test!

9. The name "Lee's Save The Baby" is and has been registered and copyrighted in the United States Patent Office for many years last past, and that trade mark and trade name is a property right belonging to these claimants.

10. The mixture or compound itself is an article of drugs within the purview of the food and drugs act, and all the ingredients contained in it have some curative and therapeutic effect in the treatment or mitigation of the diseases and ailments mentioned on the label and on the carton or cartons and in the circular wherein the product is packed for shipment and sale.

11. The labels on the bottle itself, the circular wherein it is wrapped, and the cartons wherein it is packed, and shipped, contain no statement, design, or device regarding the curative or therapeutic effect either of the compound itself or any ingredient therein contained, which is false or fraudulent.

Conclusions of law: 1. The product contained in the bottles seized as aforesaid is a drug within the meaning of the act of Congress of June 30, 1906, as amended by the act of August 23, 1912.

2. The bottles seized in this proceeding are not misbranded within the purview of the act ot Congress mentioned in paragraph 1.

3. The name "Lee's Save The Baby" is a distinctive and not a descriptive name and offends no Federal statute.

4. The statements appearing on the carton, bottle label, and circular accompanying each of the bottles of "Save The Baby", seized as aforesaid concerning the curative or therapeutic effect of the article, are not false and fraudulent within the meaning of the Act of Congress of June 30, 1906, known as the "Food and Drugs Act", as amended by the act of August 23, 1912.

5. The libel is dismissed and the seized goods are ordered returned to the claimant.

CHICHESTER CHEMICAL CO. ET AL. v. UNITED STATES

(Court of Appeals of District of Columbia, Apr. 6, 1931)

49 Fed. (2d) 516

Appeal from the Supreme Court of the District of Columbia. Libel by the United States for condemnation of certain drugs as misbranded in violation of the Food and Drugs Act. From an adverse judgment, libelees appeal. Reversed.

GRONER, *Associate Justice.* This is a libel filed by the United States August 20, 1920, to condemn certain drugs, known as "Chiches-ters, Diamond Brand, New Style Pills", as misbranded, in violation of the Food and Drugs Act. There was a trial to a jury in the court below, and a verdict and judgment in favor of the Government. An amended libel was filed November 28, 1921, which charged that the drug was misbranded in that the booklet placed in each package of pills contained statements which were false and fraudulent within the intent and purpose of section 8, paragraph 3, of the act (act of June 30, 1906, ch. 3915, sec. 8, 34 Stats. 771, as amended by act of Aug. 23, 1912, ch. 352, 37 Stats. 416, 21 U.S.C. sec. 10). The statements which the libel charges were false and fraudulent are as follows:

> Relief for Ladies. * * * Worth proved * * * Reliable. Effective * * * a standard, reliable remedy for functional derangements of the female organism. * * * a standard and reliable remedy * * * for Amenorrhoea (Suppression of the menses, due to colds, ill-health and other morbid causes). * * * For Dysmenorrhoea (Painful or scanty menstruation). The intensity of suffering varies. In some, the pain is moderate, continuing only a few hours, or it may be agonizing as to cause fainting, and undermine the patient's health. In all such cases, we earnestly recommend that a regular course of treatment with Chi-ches-ters Diamond Brand Pills be taken at each period for three or four months, when our remedy will be found to give lasting benefit and genuine relief * * * To prevent difficult, painful, over profuse and other morbid menstrual conditions, and to keep this important function normal, take one pill three times daily for a few days before the expected re-appearance of the menstrual flow. Our Diamond Brand Pills can be confidently be depended upon * * * Worth any money to suffering females. * * * No lady should think of being without this valuable remedy, and avoid long suffering. * * * Can not be surpassed * * *. For severe pain they cannot be surpassed for relief given * * * they are truly wonderful. * * *

Section 8 of the Drugs Act, as amended (21 U.S.C.A. sec. 10), provides:

> That for the purposes of this Act an article shall also be deemed to be misbranded: In case of drugs: * * * If its package or label shall bear or contain any statement, design, or device regarding the curative or therapeutic effect of such article or any of the ingredients or substances contained therein, which is false and fraudulent.

The assignments of error on this appeal relate, first, to the refusal of the trial court to permit to be read in evidence letters of instruction and directions from appellant to his attorney, written between the years 1908 and 1920, and a certain other letter from appellant to Drug Inspector Kathe, the purpose in offering the letters being to show appellant's good faith in the preparation of its advertising literature; second, the admission in evidence by the court, over the objection of the company, of a certified copy of a record of the Department of Agriculture containing an alleged formula, or list of ingredients entering into the composition of the pills; third, that the court erred in so broadening the inquiry before the jury as to permit the Government to show that the pills were useless in cases of menstrual trouble caused by cancer, tuberculosis, and other diseases, notwithstanding a fair construction of the language used in the pamphet confined its claims to value as a cure for amenorrhoea due to colds, anemia, and other like causes; and, finally, that the court erred in submitting the case to the jury at all because the evidence failed to show intentional fraud.

The pills were first put on the market in 1881, and were manufactured for the then owner of the formula by Parke, Davis & Co. Since 1915 they have been manufactured by Arner & Co., who are said to be the largest manufacturing chemists in the United States. The challenged literature was changed from time to time, but had been used as it was when suit was brought for several years. The pills are said to contain 4 ingredients, namely: 2 grains of extract of cotton-root bark, one fourth grain of extract of hellebore, one half grain of iron sulphate, one-half grain of aloes.

Since, after careful consideration, we have reached the conclusion that the court erred in rejecting the letters from appellant which were offered in evidence, we shall discuss the other assignments only as they relate to the first.

The rejected correspondence between Chichester, who then owned the formula, and his counsel began in February 1908—12 years before the institution of the suit in this case. The first letter in the correspondence directed counsel to deliver to the head of the Bureau in Washington copies of the decisions in three Federal cases involving infringements in which the Chichester Company had been successful, and directed him to go over these decisions with the law officers of the Government. The letter also noted an enclosure of advertising matter which had been revised by counsel, and requested that counsel would confer with the Department and obtain its directions so that all necessary changes in its printed matter could be made. Another letter was dated in 1915, in which attention was called to the fact that new booklets were being gotten out, and requesting that these be gone over carefully to "see whether there is anything in any of it that might for any reason be regarded as 'repugnant' to the Federal or State officials within whose purview such matters come", and in-

structing counsel to "go over it again and strike out or change or modify any part of it that in your best judgment might be open to criticism." And again in the latter part of 1915 a letter to the effect that "in view of increasing strictness of the censorship of all such matter in connection with proprietary or patent medicines it may be well for us to have you go over them again and eliminate anything and everything that in your judgment might be in any way repugnant to the powers that be." And still again in 1916, instructions that you again scan carefully to see if anything should be taken out or added to in order to make sure that nothing in either piece will conflict with any existing laws, regulations, or decisions"; and, at a later date in the same year, "we are very glad * * * that it will not be necessary * * * to throw away the printed matter which we have gotten out." And in 1917, the excluded letter to the Government inspector, after noting the enclosure of advertising matter, labels, etc., stated: "If there is anything further you would like from us in regard to our business or any of our preparations, please let us know and we shall be glad to furnish it."

It is quite true that the court permitted the letters of counsel in response to the excluded letters to be introduced in evidence, but the admission of the latter gave only half of the picture, and tended to confuse, rather than to explain, the issue, which was, as we shall see, whether appellant was guilty of fraudulent intent in the advertisement and sale of its drugs.

We think the fact that the obligation imposed by the act on the Government involved proof of actual intent to deceive—an intent which may be derived from the facts and circumstances, but which must be established (*Seven Cases* v. *U.S.*, 239 U.S. at page 517, 36 S.Ct. 190, 60 L.Ed. 411, L.R.A. 1916D, 164)—takes the question of the admissibility of the letters out of the established rule that the statements of a party, oral or written, which are self-serving, are not admissible in his favor. In such circumstances, it is not unusual or improper to admit evidence of his declarations or acts fairly indicative of the existence of the mental state in which he did a particular thing. "Whenever the intention is of itself a distinct and material fact in a chain of circumstances, it may be proved by contemporaneous oral or written declarations of the party" (*Connecticut Mut. Life Insurance Co. of Hartford Connecticut* v. *Hillmon*, 145 U.S. 295, 295, 12 S.Ct. 909, 912, 36 L.Ed. 706. See, also, *Butler* v. *Watkins*, 13 Wall. 456, at page 464, 20 L.Ed. 629).

If it be conceded, as apparently the trial court thought, that the test of the good faith of the advertising literature, which the Government declares is fraudulent, embraces the question whether the advertisement held out the pills as a "cure-all" for amenorrhea, obviously little, if any, evidence would have been necessary to prove the falsity of such a representation, for it may be assumed that the most ignorant person would know that no medicine which science has discovered is capable of relieving a disease, or sympton, whichever it may be called, produced sometimes by cancer, tuberculosis, pernicious anemia, lead poisoning, or induced by misplaced organs, or no organs, but in the view we think may be taken of the fair import of the advertising language which the Government points to as the head and front of the

offending—namely, "a standard and reliable remedy for amenorrhea (suppression of the menses due to colds, ill-health, and other morbid causes"—the language "other morbid causes", when read in connection with the preceding language, may fairly be construed to mean "other *like* causes", that is to say, other irregularities of the menstrual function of the same general nature as those particularly specified. "When an author makes use, first, of terms, each evidently confined and limited to a particular class of a known species of things, and then, after such specific enumerations, subjoins a term of very extensive signification, this term, however general and comprehensive in its possible import, yet, when thus used, embraces only things 'ejusdem generis'—that is, of the same kind or species—with those comprehended by the preceding limited and confined terms" (3 Words and Phrases, 1st Ser., p. 2328).

And, since the advertising matter does not guarantee a cure but is held out only as a remedy, and since the evidence unquestionably shows that several of the ingredients contained in the drug are prescribed and used by reliable physicians and chemists in amenorrhea and dysmenorrhea resulting from trivial causes rather than organic diseases, and that the authors of well-recognized medical textbooks agree that some, at least, of the ingredients forming the composition of the pills are useful in relieving such temporary menstrual disorders, the question of the good faith of the language used, as well as the significance which ordinarily would attach to it, was properly one for the jury. In saying this, however, we do not wish to be understood as approving the challenged language of the booklet as it was. Enough, we think, is shown in the record to convince us that the remedy is at best confined to those causes which are in their nature ephemeral, and a broader claim than this may well subject it to the condemnatory provisions of the statute. But, notwithstanding this, it was important in the protection of appellant's rights that its good faith in so advertising its drug should be tested by its motives and actions in the preparation thereof, and in the absence of any suggestion or evidence of any kind that the rejected letters were written for the purpose of making a case, or in anticipation of a prosecution, or for any other purpose than an honest desire to obey the law, we think their rejection was error. "When the good faith or the intent of a party in a given affair is in issue, his acts and sayings in relation to it at about the time of the transaction generally constitute the best evidence of the fact, and are always competent" (*U.S.* v. *Gentry* (C.C.A.), 119 Fed. at p. 73).

In that view, we think it important that a manufacturer of patent drugs should, on the issue of his good faith, be permitted to show, if it is a fact, that he sought the advice of counsel, who in turn had consulted the proper officers of the Government in an effort to bring his advertising matter within the terms of the law, and this appellant sought to do in his tender of the letters.

In these circumstances, the rejection of the letters was material, and makes it our duty to send the case back for a new trial, for it is only when it is certain that the error assigned could not have prejudiced the complaining party that the rule—that it is no ground for a reversal—is applicable (*Choctaw, O. & G. R. Co.* v. *Holloway* (C.C.A.), 114 Fed. 458, 465,

Reversed.

UNITED STATES v. TEN CASES, MORE OR LESS, BRED SPRED, ETC., ET AL.

(Circuit Court of Appeals, Eighth Circuit, Mar. 25, 1931)

49 Fed. (2d) 87; N.J. No. 18426

Appeal from the District Court for the Southern District of Iowa. Judgment affirmed.

Before KENYON and BOOTH, Circuit Judges, and REEVES, District Judge.

BOOTH, *Circuit Judge.* This is an appeal from a judgment after a directed verdict in favor of claimant, Glaser, Crandell Co., intervener, in a libel by the United States against Ten Cases, More or Less, of Bred Spred, Strawberry Flavor, and other articles of food of similar character.

The libel proceedings were brought by virtue of the Food and Drugs Act, 21 U.S.C. sec. 1 et seq. (34 St. 768). The libel contained 3 charges of adulteration and 5 charges of misbranding. The product involved was a food product, its use being indicated by its name.

The libel alleged a shipment in interstate commerce of the Bred Spred by the Glaser, Crandell Co.; and prayed for a seizure of the product for condemnation and confiscation.

The provisions of the statute here deemed material are set out in the margin.[35]

The answer set up an estoppel by reason of the record of a similar suit in the United States District Court for the Eastern District of

---

[35] SECTION 8. Adulterated articles. For the purposes of sections 1 to 15, inclusive, of this title, an article shall be deemed to be adulterated * * *

Food. In the case of food:

Injurious mixtures.—First. If any substance has been mixed and packed with it so as to reduce or lower or injuriously affect its quality or strength. * * *

Damage or inferiority concealed.—Fourth. If it be mixed, colored, powdered, coated, or stained in a manner whereby damage or inferiority is concealed. * * *

SECTION 9. Misbranded; meaning and application. The term "misbranded", as used in sections 1 to 15, inclusive, of this title, shall apply to all drugs, or articles of food, or articles which enter into the composition of food, the package or label of which shall bear any statement, design, or device regarding such article, or the ingredients or substances contained therein which shall be false or misleading in any particular, and to any food or drug product which is falsely branded as to the State, Territory, or country in which it is manufactured or produced.

SECTION 10. Misbranded articles. For the purposes of sections 1 to 15, inclusive, of this title, an article shall be deemed to be misbranded; * * *

Foods. In the case of food: *Imitation or use of name of other article.*—First. If it be an imitation of or offered for sale under the distinctive name of another article. * * * *False or misleading statements on package or label as to ingredients or substances.*—Fourth. If the package containing it or its label shall bear any statement, design, or device regarding the ingredients or the substances contained therein, which statement, design, or device shall be false or misleading in any particular. An article of food which does not contain any added poisonous or deleterious ingredients shall not be deemed to be adulterated or misbranded in the following cases:

Mixtures or compounds under distinctive names.—First. In the case of mixtures or compounds which may be now or from time to time hereafter known as articles of food, under their own distinctive names, and not an imitation of or offered for sale under the distinctive name of another article, if the name be accompanied on the same label or brand with a statement of the place where said article has been manufactured or produced.

Articles labeled, branded as compounds, imitations, or blends; construction of term "blend"; disclosure of trade formulas of proprietary foods.—Second. In the case of articles labeled, branded, or tagged so as to plainly indicate that they are compounds, imitations, or blends, and the word "compound", "imitation", or "blend", as the case may be, is plainly stated on the package in which it is offered for sale. The term blend as used herein shall be construed to mean a mixture of like substances, not excluding harmless coloring or flavoring ingredients used for the purpose of coloring and flavoring only. Nothing in sections 1 to 15, inclusive, of this title shall be construed as requiring or compelling proprietors or manufacturers of proprietary foods which contain no unwholesome added ingredient to disclose their trade formulas, except insofar as the provisions of such sections may require to secure freedom from adulteration or misbranding.

Michigan, including a judgment of dismissal on the merits and a dismissal of an appeal by the United States, said record being set out at length in the answer. Denials of the charges of adulteration and misbranding were also set up in the answer.

On motion of the United States, the trial court, in the case at bar, struck out all that part of the answer relating to the alleged estoppel based on the record of the Michigan case.

A trial was had on the merits and at the close of the evidence introduced by the United States, on motion of the claimant, Glaser, Crandell Co., a verdict was directed in its favor and judgment entered dismissing the libel for want of proof of adulteration or misbranding.

The present appeal followed.

The facts, either admitted or shown by the testimony, are, as appears from the record, substantially as follows: Bred Spred, Strawberry Flavor, contains 17 parts of strawberries, 55 parts of sugar, 11½ parts of water, ¼ part of pectin, and 0.04 of a part of tartaric acid. Pectin is a fruit product found in considerable quantities in apples, and in different amounts in different fruits. It has the effect, if there are proper amounts of water, sugar, and acid present, to form a jelly. In a product such as Bred Spred, it forms a jelly with the water, sugar, and acid present, and keeps the fruit distributed—keeps it from floating to the top. Tartaric acid is a natural fruit acid and has nothing harmful in it. There is nothing harmful or deleterious in the product Bred Spred. It has some food value and some nutritive value. The label on the jars containing Bred Spred was in part as follows: "Bred Spred [pictorial design of fruit] Strawberry * * * Flavor, Glaser, Crandell Co., Chicago, Net weight 4 pounds." There were other flavors such as peach, pineapple, blackberry, etc.

The jars of Bred Spred here in controversy had been shipped in interstate commerce.

Jam is considered by manufacturers as not less than 45 parts of fruit to 55 parts of sugar. Housekeepers usually make jam of 50 percent fruit and 50 percent sugar.

In addition to the foregoing facts, appearing in the record, there were introduced exhibits, about eight in number, consisting of jars of jam and jars of Bred Spred, the latter being part of those seized and sought to be condemned and confiscated. None of these exhibits have been brought before this court.

The main contentions of appellant in this court are that the trial court erred in not submitting the questions of adulteration and misbranding to the jury.

The claimant not only opposes these contentions, but urges affirmatively that both questions were res adjudicata by reason of the Michigan judgment, and asks that this court so hold.

We take up first this request of the claimant.

It is to be noted that the claimant made no cross-assignments of error, and took no cross-appeal. Perhaps this was not feasible, inasmuch as the judgment was in claimant's favor and was not divisible into parts (Zoline's Fed. App. Juris. & Proc. [3rd ed.] sec. 138). However, claimant contends that inasmuch as the record of the Michigan case is in the record of the present case, this court should examine the same and pass upon the question of res adjudicata.

That the Supreme Court of the United States would have power so to do, if the appeal were pending before it, appears to be settled (*Langnes* v. *Green*, 282 U.S. 531; *Story Parchment Co.* v. *Paterson Parchment Paper Co.*, 282 U.S. 555).

Whether this court has such power, we need not decide. Even conceding the existence of the power, we think it should not be exercised in the instant case.

It has long been the general rule of practice in law cases in the Federal courts that questions decided adversely to the defendant in error (now the appellee), in the course of the trial in the lower court, will not be considered in the appellate court, in the absence of a cross-appeal (*Cleary* v. *Ellis Foundry Co.*, 132 U.S. 612; *Bolles* v. *Outing Co.*, 175 U.S. 262, 268; *Pauly, etc. Co.* v. *Hemphill County*, 62 Fed. 698, 703; *Guarantee Co. of N.A.* v. *Phenix Ins. Co.*, 124 Fed. 170 (C.C.A. 8); *Aetna Ind. Co.* v. *J. R. Crowe, etc. Co.*, 154 Fed. 545, 567 (dissenting opinion) (C.C.A. 8); *Midland Valley R. Co.* v. *Fulgham*, 181 Fed. 91, 95 (C.C.A. 8); *Philadelphia Gas Co.* v. *Fechheimer*, 320 Fed. 401, 418; see *Peoria Ry. Co.* v. *United States*, 263 U.S. 528, 535, 536; *The Maria Martin*, 12 Wall. 31, 40; *Board of County Comm'rs* v. *Hurley*, 169 Fed. 92 (C.C.A. 8); *O'Neil* v. *Wolcott Min. Co.*, 174 Fed. 527, 535 (C.C.A. 8); *Swig* v. *Tremont Tr. Co.*, 8 Fed. (2d) 943, 945).

While libel proceedings such as the one in the case at bar are likened in the statute (21 U.S.C.A., sec. 14) to proceedings in admiralty, yet this similarity is largely confined to the seizure of the property by process in rem. The method of review follows the practice in law actions (*443 Cans of Egg Product* v. *United States*, 226 U.S. 172, 183; *United States* v. *779 Cases of Molasses*, 174 Fed. 325 (C.C.A. 8); *United States* v. *Hudson Mfg. Co.*, 200 Fed. 956; *Lexington, etc. Co.* v. *United States*, 202 Fed. 615 (C.C.A. 8)).

In view of these considerations, we think the question of res adjudicata presented by the claimant should not be reviewed by us.

We turn to the questions presented by the appellant.

The purpose of the Food and Drugs Act is well established. In *United States* v. *Lexington Mill Co.*, 232 U.S. 399, the court, in its opinion, used the following language (p. 409):

> The statute upon its face shows that the primary purpose of Congress was to prevent injury to the public health by the sale and transportation in interstate commerce of misbranded and adulterated foods. The legislation, as against misbranding, intended to make it possible that the consumer should know that an article purchased was what it purported to be; that it might be bought for what it really was and not upon misrepresentations as to character and quality. As against adulteration, the statute was intended to protect the public health from possible injury by adding to articles of food consumption poisonous and deleterious substances which might render such articles injurious to the health of consumers.

The position of the appellant is thus stated by its counsel in their brief:

> In the instant case there is no charge against the name "Bred Spred" as such, but against the adulteration of the article because it was mixed so as to conceal its inferiority, and the misbranding of the article because it was an imitation of another article, jam.

The statutory provision relied upon as to adulteration reads:

Damage or inferiority concealed.—Fourth. If it be mixed, colored, powdered coated, or stained in a manner whereby damage or inferiority is concealed'

It is apparent that two things were required to be proven in the case at bar, as respects adulteration: First, that Bred Spred was a damaged or an inferior food product, because one or more of its constituents was damaged or inferior; second, that it was mixed in a manner whereby the inferiority was concealed. There was no proof of either of these matters. There was no proof that Bred Spred contained any damaged or any harmful or deleterious substance. The word "inferiority" in the statute raises the question, what is the other member of the comparison; or, in other words, the question, "Inferior to what?" The use of the word "damage" in connection with the word "inferiority" is significant. The word "damage" in this connection means that an ingredient has suffered a loss of strength or quality; the word "inferiority" means that an ingredient is, in the first instance, of low grade or quality. Nothing of this kind is shown by the evidence as to the elements going to make up Bred Spred. The strawberries, the sugar, the pectin, the tartaric acid, the water, were none of them, so far as the evidence shows, either damaged or of low grade; nor was the resulting product either damaged or of low grade quality. The mere fact that the product contained fewer strawberries than some other product, e.g., jam, does not show that Bred Spred was inferior to jam; nor does it show that a comparison with jam was called for by the statute unless Bred Spred was being palmed off on the public as jam. No showing of this kind was made.

As to the matter of misbranding, the evidence clearly shows that the label contained no false or misleading statements; and, therefore, did not come within that definition of misbranding contained in section 10 of the statute. But the Government contends that misbranding, under section 10, includes imitation of some other article, and that, in this case, Bred Spred was an imitation of jam. Conceding, but without deciding, that the construction of the statute contended for by the Government is correct, yet there is no evidence in the case that Bred Spred was an imitation of jam. Such imitation would, naturally, be disclosed by the tests of appearance, of taste, of smell. But, although there were introduced in evidence, in the trial court, physical exhibits consisting of jars of Bred Spred and jars of jam, these physical exhibits have not been brought by the Government to this court. Nor is there other evidence in the case showing imitation. On such a record, we cannot hold that the ruling of the trial court was error.

One other matter is called to our attention by appellant. The Government offered to show by one of its witnesses, a grocer, "that a product consisting of 17 parts of strawberry, 55 parts of sugar, 11½ parts of water, one-fourth part of pectin, and a small amount of tartaric acid, is an imitation of strawberry jam." Objection was made to this offer and the objection was sustained. We think there was no error in the ruling. The matter was not one calling for expert testimony, and especially so when the physical articles themselves were present in court.

We find no error in the record, and the judgment is accordingly affirmed.

UNITED STATES v. SOUTH PEACHAM CREAMERY CO.

(District Court, District of Vermont, May 19, 1931)

N.J. No. 18233

Information alleging violation of section 2 of the Food and Drugs Act. Jury trial. Verdict of not guilty.

The United States attorney filed an information against the South Peacham Creamery Co., a corporation, South Peacham, Vt., alleging shipment by said company, from the State of Vermont into the State of Massachusetts, of a quantity of butter which was adulterated and misbranded, in violation of the Food and Drugs Act.

It was alleged in the information that the article was adulterated in that a substance containing less than 80 percent by weight of milk fat had been substituted for butter, a product which must contain not less than 80 percent by weight of milk fat as defined and required by the Act of Congress of March 4, 1923, which the article purported to be.

It was alleged that the article was misbranded for the reason that the statement "Butter", borne on the cartons containing the article, was false and misleading in that it represented that the article was butter, a product which should contain not less than 80 percent by weight of milk fat; and for the further reason that the article was labeled as butter, so as to deceive and mislead the purchaser into the belief that it contained not less than 80 percent of milk fat; whereas the article contained less than 80 percent of milk fat.

The case having come on for trial before the court and jury, the court delivered the following charge to the jury.

HOWE, *District Judge.* Gentlemen of the jury: The first count in this information is the only one submitted to you. There are two charges in it for violations of the Pure Food and Drug Law, but there is only evidence as to one, that is the first count or charge. There is only one principal question of fact in the case for you to decide, that is, whether the South Peacham Creamery, on the 27th day of May, shipped butter into Massachussetts which contained less than 80 percent of milk fat—on the 27th day of May. If the creamery company shipped into Massachusetts from Vermont a quantity of butter which contained less than 80 percent of milk fat, if you are satisfied beyond a reasonable doubt that they did ship butter on the 27th day of May from Vermont into Massachusetts, and you are satisfied beyond a reasonable doubt that it contained less than 80 percent milk fat, you will find the defendant guilty. Your verdict, Mr. Foreman, will be oral and will be guilty or not guilty.

There has been no evidence in the case what the effect of time, if any, has on the percentages of milk fat. Of course, in order to find the defendant guilty, you must be satisfied that on the 27th day of May this butter contained less than 80 percent of milk fat. The defendant, under the law, is not required to guarantee that it continued to contain more than 80 percent of milk fat after the shipment is completed.

The burden of proof, in this case, is on the Government. To begin with, gentlemen, the defendant is presumed to be innocent. This is a criminal case. If your verdict is guilty, the defendant will be obliged to pay a fine—can't send the defendant to jail, because it is a corporation. In a criminal case the only punishment that can be dealt out to a corporation is to make them pay a fine. What is the presumption of innocence in a criminal case? What does it mean? It means that the jury start in the trial of a case and continue the trial of a case with the thought and the belief uppermost in their minds that the defendant did not ship in interstate commerce butter containing less than 80 percent milk fat. You should have that uppermost in your minds, verily believe that, and continue to believe that throughout the trial until the Government has introduced sufficient evidence to convince you that the defendant did ship butter containing less than 80 percent milk fat beyond a reasonable doubt—convince you of that fact beyond a reasonable doubt—that's the presumption of innocence. It's a very old law and a very sound law. It is, in fact, evidence in the defendant's favor which protects the defendant throughout the trial until sufficient evidence has been introduced to prove that the defendant is guilty beyond a reasonable doubt.

And then, the next question you want to know is what is a reasonable doubt? A reasonable doubt does not mean beyond all doubt, but it means beyond such a doubt as a reasonable man would have after considering all the evidence in the case, beyond a doubt based on reason, beyond a doubt for which you cannot give a good reason. If, after an impartial consideration of all the evidence in the case, you can candidly say that you are not satisfied with the defendant's guilt, you have a reasonable doubt and you should find the defendant not guilty. If you can candidly say that you are not really and truly satisfied with the defendant's guilt, you should find the defendant not guilty. But if, after such impartial consideration of all the evidence, you have an abiding conviction of the defendant's guilt, and that abiding conviction is so strong that you would be willing to act upon it in deciding a very important matter relating to your own affairs, such as the welfare of your family, your daughter, your son, a very important matter relating to your own affairs, if you are sure of the defendant's guilt to that extent, then you have no reasonable doubt and you should find the defendant guilty.

The mere fact that the Government has instituted this case, commenced this prosecution; you shouldn't infer from that fact that the defendant is guilty or draw any unfavorable inference whatever against the defendant because it is being prosecuted here.

If you can reconcile the testimony on any reasonable basis consistent with the defendant's innocence you must do so and in that case find the defendant not guilty. This is a very old law and a very sound law and it means that if there are two or more theories in the case—in a criminal case—two or more theories, and they are each equally reasonable, one theory leads to guilt, and the other theory leads to innocence, the jury must adopt the theory leading to innocence instead of the theory leading to guilt, because it is safer and

better to believe good of a person rather than to believe evil of him—believe good of a corporation rather that to believe evil of it, believe good of a company or association instead of believing evil of it—if you can do so on a basis consistent with reason and which is reasonable in view of all the evidence in the case.

As to the credibility of the witnesses and the weight to be given to their testimony, the law is that you are not bound to give the same credit or the same weight or have the same faith in the testimony of each witness, but you should give their testimony just such weight, give it just such credit, have just such faith in it, as you think it is fairly entitled to receive. Consider their appearance upon the stand, their candor or lack of candor, their feelings or bias, if any, their interest in the result of the prosecution, if any, and the reasonableness of the testimony which they give, and believe as much or as little of the testimony of each witness as you think you ought to.

If you are satisfied beyond a reasonable doubt that the butter that was analyzed was butter made by this defendant, the South Peacham Creamery, and that when it was shipped in interstate commerce on the 27th day of May it contained less than 80 percent of butterfat, if you are satisfied of those facts beyond a reasonable doubt, as defined, your verdict should be guilty. If you are not satisfied of those facts beyond a reasonable doubt, if you are not satisfied with the identity of the butter, if you are not satisfied that it contained less than 80 percent milk fat on the 27th of May, the date it was shipped and delivered at Boston, if you are not satisfied of those facts beyond a reasonable doubt, then your verdict will be not guilty. You won't need the complaint because there is just one charge.

UNITED STATES v. NINE PACKAGES OF CRISP'S TUNG-TONE ET AL.

(District Court, E.D. Louisiana, May 19, 1931)

N.J. No. 18501

Libels under section 10 of the Food and Drugs Act. Jury trial. Verdicts for the Government.

BORAH, *District Judge*. These proceedings bearing docket nos. 19626 and 19763 are in rem against certain articles of drugs known as Crisp's Tung-Tone, Crisp's Distemperte, Crisp's Black Tongue Remedy, and Crisp's Hot Shot. The United States is the libelant in these proceedings and is seeking a condemnation of the aforementioned drugs on the ground that they are misbranded within the meaning of the Food and Drugs Act of June 30, 1906, as amended.

The S. A. Crisp Canine Co., of Blacksburg, S. C., is the manufacturer and shipper of the drugs in question and is the claimant in these proceedings.

You will recall that by stipulation of the parties and with the consent of the court these proceedings have been consolidated for the purpose of trial; however, you will be required to render separate

verdicts in each case—the forms of verdicts I shall hereinafter indicate. Before directing your attention to the issues in the case I shall apprise you briefly of your duties as jurors. The sole function of a jury in the national courts is to determine facts. You are the sole, final, and exclusive judges of the facts in this case, of the credibility of the witnesses and of the weight that is to be attached to their testimony though you are obliged, under your oaths, to accept the law as it shall be given to you by me in charge. In considering the weight that you will give to the testimony of the various witnesses you should have in mind their intelligence or the want of it, their interest, if any, their experience or the want of it, and their knowledge or lack of knowledge of the subject matter concerning which they have testified. In this case, as indeed in all cases, it is not the number of witnesses that controls but rather it is the quality of the testimony that demands your consideration. There is one other observation that I desire to make in passing and that is this: that the rule of law here applicable is that the burden of proof is upon the United States to prove the justice of its claim by a fair preponderance of the evidence and by preponderance is meant that which is entitled to the greatest weight. Having in mind what I have just said to you, let us see what the libels charge so as to get at the questions you are to consider in the light of the evidence. The libels, after setting forth the jurisdictional allegations as well as the shipments in interstate commerce, allege in article 5 that each of the aforesaid articles is misbranded in violation of the Food and Drugs Act as amended, section 8, paragraph 3, in the case of drugs, in that certain statements borne on the package, bottle, and carton labels and appearing in circulars accompanying the articles, regarding the curative and therapeutic effect of the articles are false and fraudulent, in this, that the articles contain no ingredient or combination of ingredients capable of producing the effects claimed, and that the same were applied to the said articles knowingly and in a reckless and wanton disregard of their truth or falsity, so as to represent falsely and fraudulently to the purchasers thereof the impression and belief that the articles were, in whole or in part, composed of, or contained, ingredients or medicinal agents effective in the prevention of and treatment of the diseases and conditions named therein. Articles 6 of the respective libels charge that the aforesaid product was at the time of the shipment aforesaid and are subject to seizure, condemnation, and confiscation under section 10 of the aforesaid Food and Drugs Act.

The answers of claimant admit the jurisdictional allegations as well as the shipments in interstate commerce, but they deny that said articles and drugs are and were misbranded within the meaning of the Food and Drugs Act and deny that the statements regarding the curative and therapeutic effect of the articles and drugs set forth in the libels are false or fraudulent or that they were made in reckless or wanton disregard of their truth or falsity. The answers likewise affirmatively allege in substance that the drugs in question are capable of producing and have produced the curative and therapeutic effects claimed for them, and, believing in the verities of each and every statement made, claimant alleges that each and every statement

made is true and that these statements were made in good faith and after years of experimentation. Claimant denies the allegations of the sixth article of the libels and on the contrary alleges that the aforesaid products were and now are legitimate articles of shipment in interstate commerce, that it never was and is not now subject to seizure, condemnation, and confiscation, and that it in no way violates the aforesaid Food and Drugs Act. And this presents the issues you must decide in the light of the evidence, all other material facts being either admitted or covered by stipulation.

Now in arriving at your findings you should bear in mind that from the allegations of the libels it appears that certain words and directions contained on the bottle label, carton label, and circular were omitted from the libels. There was no obligation on the part of the Government to set forth this information but, by well-accepted rules of pleading, the Government is precluded from the complaining of the omitted words. I therefore charge you that it is only fair in order to reach a proper conclusion respecting the issues presented that you consider the labels in their entirety and all that is contained in the circulars which accompany the bottles as bearing upon the good faith of the manufacturer of the product.

With this information before you it is for you to say whether or not these preparations are misbranded within the meaning of the Food and Drugs Act and whether or not the Government has proven to your satisfaction by a preponderance of the evidence that the statements made or the design or device carried on the label or carton or in the circular regarding the curative or therapeutic effects of the same are false and fraudulent, and the fraud alleged must be established by competent proof and by credible and convincing evidence.

I further charge you that certain sections of the act are here applicable and demand your consideration.

Section 9 (title 21, U.S.C.):

Misbranded; meaning and application.—The term "misbranded", as used in sections 1 to 15, inclusive, of this title, shall apply to all drugs, * * * the package or label of which shall bear any statement, design, or device regarding such article, or the ingredients or substances contained therein which shall be false or misleading in any particular * * *.

Section 10 (title 21, U.S.C.):

Misbranded articles.—For the purposes of sections 1 to 15, inclusive, of this title, an article shall be deemed to be misbranded; In the case of drugs: * * * If its package or label shall bear or contain any statement, design, or device regarding the curative or therapeutic effect of such article or any of the ingredients or substances contained therein which is false and fraudulent.

I charge you in this connection that the words "therapeutic" and "curative," as set forth in the statute, were intended to be given their ordinary accepted meaning and that while they have a certain meaning to the expert doctor, nevertheless they are a part of the vocabulary of any intelligent man. Therapeutic to the medical world means to heal, to make whole, to restore to health. To the lay mind it means having healing qualities; curative, alleviative, a medicine efficacious in curing or alleviating diseases. The word "curative" is not found in the medical dictionaries and may be defined as possessing power or tending to cure; or relating to the cure of diseases. In none of the definitions have I been able to find the suggestion that the words "therapeutic" and "curative" convey the meaning of absolute cure. Having these definitions in mind, I will

now direct your attention to section 6 of the act which defines drugs as follows:

> The term "drug" as used in this Act, shall include all medicines and preparations recognized in the United States Pharmacopœia or National Formulary for internal or external use, and any substance or mixture of substances intended to be used for the cure, mitigation, or prevention of disease of either man or animals.

Now again reverting to the issues in the case, the Government contends that these products contain no ingredients or combination of ingredients capable of producing the effects claimed for them and that the claims that are made for them are false and fraudulent and were applied by the manufacturer knowingly and in disregard of their truth or falsity, so as to falsely and fraudulently represent to the purchasers and create in their minds the impression and belief that the articles were in whole or in part composed of or contained ingredients effective in the diseases mentioned in the cartons and circulars or in the prevention thereof.

In this connection I charge you that the words "false" and "fraudulent" as used in the statute must be taken in their accepted legal meaning and that before you will be justified in finding for the libelant it must be found that the statements contained in the labels or circulars were put there to accompany their goods with actual intent to deceive—an intent which may be derived from the facts and circumstances but which must be established. It was the claimant's duty, however, to make such investigation as was necessary to enable him honestly to make statements concerning the curative or therapeutic effect of his preparations. If he did not do this, and he says that he did, but acted with such gross carelessness and indifference to the truth of the representations contained in the statements as to warrant the conclusion that he acted fraudulently, you are at liberty to so find, and in that event, should return a verdict that the drugs are misbranded.

If you find it as a fact that the statements were false, and known to be false, then, of course, your verdict would be for the Government. If you find as a fact that they were not false, or that, being false, there was no intent on the part of the defendant, whether actual intent or implied intent, to defraud, then your verdict would be for the claimant.

If you believe from the evidence that any one of the therapeutic claims as to the effect of these drugs upon black tongue, running fits, pneumonic distemper, or as a preventative of black tongue was false, and was made by the claimant with a reckless and wanton disregard as to whether it was true or false, you may find a verdict for the Government. The form of your verdict will simply indicate whether or not the four preparations here on trial were misbranded within the meaning of the Food and Drugs Act, and you will be required to render separate verdicts in each case. All twelve of you must agree in order to arrive at a proper verdict and the form of your verdict will be, "We, the jury, find that the drugs, naming them—in one instance there are three drugs covered by the libel and in the other there is only one, the Hot Shot—are or are not misbranded", which verdict will be written on the record and be dated and signed by your foreman.

I have been requested to give certain special charges by both the Government and the claimant. I have not had opportunity to examine these charges as closely as I would like to have, due to the

fact that closing arguments were waived in this case and I shall therefore refuse said charges, being of the opinion, from the examination I have made of them, that they are thoroughly covered by the general charge, or in some other particular (are) improper. * * *

Gentlemen, you are instructed that in considering the evidence in this case you should not take the view that this is a controversy between the veterinary medical profession and the manufacturers of proprietary or veterinary remedies. It is your duty under the statute to determine only whether or not the articles in question are misbranded within the meaning of the act, and in which determination you should wholly disregard personalities or other extraneous issues.

In other words, gentlemen, you are not concerned with the fact that the Government is the libelant in this case and that the claimant in this case is concerned with the manufacture of these drugs except insofar as they are litigants, each having the right to have their case determined in a court of law, and so far as you are concerned it is a case of "A" against "B." * * *

Gentlemen, certain depositions have been offered in evidence. Provision is made by law to take the testimony of persons who reside over 100 miles from the place of trial by means of depositions and interrogatories. I charge you that you should receive and consider the testimony of each witness where his testimony has been taken by either deposition or by interrogatory the same as though the witness were present and took the stand before you, giving to the testimony such weight as in your judgment you think it was entitled to. The Government was given notice of the taking of these depositions and interrogatories. It is admissible in evidence and there can be no question about that, as it is one of the methods and manner in which the testimony may be taken.

Charge No. 12. Under the rules which govern cases of this character a number of letters have been offered in evidence in the form of testimonials. Before admitting the letters and under the law, it had to be shown that these letters came to the defendant in the due course of mails; that the defendant believed in the genuineness of the letters; and that these letters related to the matters in controversy in this suit. I have ruled that these letters are competent for you to consider as bearing on the question of intent. If the defendant made the statements contained on the cartons, labels, and circulars believing in the truth of the statements made in these letters, and believing that they told the truth, then I charge you that there can be no fraud on the part of the defendant. * * * You may now retire gentlemen.

NATIONAL REMEDY CO. v. HYDE, SECRETARY OF AGRICULTURE ET AL.

(Court of Appeals, District of Columbia, June 1, 1931)

50 Fed. (2d) 1066; N.J. No. 16780

Appeal from Supreme Court of District of Columbia. Suit by the National Remedy Company against the Secretary of Agriculture, and others. From an adverse decree, plaintiff appeals. Reversed and remanded.[36]

[36] Reversing decree in *National Remedy Co.* v. *Hyde et al.*, p 1230, ante.

Before MARTIN, Chief Justice, and ROBB, HITZ, and GRONER, Associate Justices.

ROBB, *Associate Justice.* Appeal from a decree in the Supreme Court of the District sustaining a motion to dismiss appellant's bill to enjoin appellees from causing to be made so-called "multiple seizures" of appellant's "B. & M. External Remedy" until such time as the disputed questions of law and fact can be judicially determined in some one of the several libels already filed against the remedy.

The averments of the complaint, stated in narrative form, are substantially as follows: Appellant, the National Remedy Company, is a Massachusetts corporation, with its principal place of business in Boston, in that State. In 1913 it commenced and has since continued to manufacture and sell the above proprietary remedy. This enterprise has prospered to such an extent that the business and goodwill now "amount to the sum of $100,000."

The remedy is not a nostrum but is of value in the treatment of diseases of the human body, as has been demonstrated by practical experience and also by scientific, laboratory, and clinical research, experimentation, and study. It is intended, as its name signifies, solely and only as an external remedy. "The statements contained in and upon the labels, pamphlets, booklets, circulars, and other printed matter have been prepared with care, under scientific direction, and in the utmost of good faith." No representations have been made which appellant and its officers and agents did not believe, and have reason to believe, were and are true, and the medicine never has been, and is not now, adulterated.

The medicine is manufactured in the State of Massachusetts and distributed not only in that State but also in interstate commerce to practically all the other States of the Union, to the District of Columbia, and also to foreign countries.

During the year 1919, at the instance of officials of the Department of Agriculture of the United States, a hearing was had in that Department at which appellant appeared and presented evidence in support of the claims made in the labels, circulars, pamphlets, and booklets advertising the remedy. The representations made at that time in the labels, books, pamphlets, etc., were substantially the same as those contained in the present literature accompanying the remedy. Appellant being unable at that time to satisfy the Department as to this advertising matter, the Department caused seizures of the remedy to be made under libels filed by the United States in various jurisdictions, and among other places in the city of Concord, N.H., in October 1922. Trial was had before a jury in the District Court of the United States for the District of New Hampshire, at which it was contended by the Government that the statements in the advertising matter of appellant regarding the curative and therapeutic effects of its remedy were false and fraudulent. A verdict was rendered for the claimant, appellant here. Judgment was entered on this verdict.

For a period of 6 consecutive years following the judgment in the New Hampshire District Court appellant continuously sold and distributed its remedy in interstate commerce and in the State of Massachusetts without molestation or criticism. The remedy is now carried

in stock and sold by many thousand drug dealers in practically all of the States of the Union and the District of Columbia.

In December 1928 and January 1929 the Department of Agriculture caused libels to be brought against appellant's remedy, and seizures thereof to be made in the following cities: New York, N.Y.; Pittsburgh, Pa.; Philadelphia, Pa.; Baltimore, Md.; Oakland, Calif.; Portland, Maine; Miami Fla.; and elsewhere.

Appellant avers, upon information and belief, that the Secretary of Agriculture, acting through subordinates, is purposing and intending to cause to be instituted and prosecuted libels in numerous other places in the United States, all arising out of and based upon the same general allegations and statements so contained in the circulars, pamphlets, booklets, and cartons of appellant. The several libels already instituted contain identical statements and allege the adulteration and misbranding of appellant's remedy. So far as appellant is advised, the specifications and details of the charges made against appellant's remedy in the several States where the libels have been filed are identical. If the appellees proceed with other seizures in other places, as they have threatened to do, the entire output of appellant's factory and workshop could be seized and held for an indefinite period of time.

The prosecution of libels in various courts in widely separated parts of the United States is unnecessarily oppressive and causing appellant great and unnecessary expense, and is ruining, and will ruin and destroy, its business and goodwill.

Appellant does not seek to restrain appellees from obtaining, "by the due and proper method provided by law, a decision upon the disputed questions of law and fact involved, but merely wants to prevent irreparable injury to itself arising out of the multiplicity of such libels in widely separated jurisdictions." Appellant has no plain, adequate, and complete remedy at law, and its property, business, and goodwill will be ruined and destroyed unless relief is granted herein.

The motion to dismiss admits all material facts averred in the bill. *American School of Magnetic Healing* v. *McAnnulty*, 187 U.S. 94, 103, 23 S.Ct. 33, 47 L.Ed. 90.

Under the Pure Food Law (act of June 30, 1906, 34 Stat. 768 (21 U.S.C. secs. 1–5, 7–15), as amended by the act of August 23, 1912, 37 Stat. 416 (21 U.S.C. secs. 9, 10)) it is the duty of the Department of Agriculture (sec. 4 (sec. 11)) to make examination of specimens of certain foods and drugs for the purpose of determining whether such articles are adulterated or misbranded within the meaning of the act, and, if it shall appear from such examination that any of such specimens is adulterated or misbranded, to "certify the facts to the proper United States district attorney", who (under sec. 5 (sec. 12)), without delay, must institute "appropriate proceedings", by indictment or libel for condemnation, or both, as the facts may warrant. *United States* v. *Morgan*, 222 U.S. 274, 280, 32 S.Ct. 81, 56 L.Ed. 198.

It is conceded by appellees that the determination of the question whether a given product is adulterated or misbranded is for the court, and that "the function and duty of appellees under section 4 of the Food and Drugs Act is one of investigation. Their findings and conclusions in respect of adulteration and misbranding are merely tentative, and have no binding or obligatory force in themselves. They are not a regulation or an order but are merely the assertion of an opinion that the law has been violated and that proceedings in the

name of the United States as directed by statute should be instituted for this alleged violation." Indeed, such was the conclusion of the court in the *Morgan case*. Due process of law required this. *Ohio Valley Water Co.* v. *Ben Avon Borough*, 253 U.S. 287, 40 S.Ct. 527, 64 L.Ed. 908.

Inasmuch as every district attorney to whom the Department makes certification must institute appropriate proceedings, by indictment or libel for condemnation, or both, it is evident that, even though the findings of the Department are merely administrative, nevertheless, if such certification should be made to the district attorney in every district where a product might be found, the manufacturer would be crippled or ruined long before the final adjudication in the court could be had. Such a result, we think, was not contemplated by Congress, except possibly in unusual cases where drastic action would be necessary for the immediate protection of the public. Is this a case of that character? We think not.

Appellant's remedy is for external use only. Its business was started in 1913. In 1919 the Department caused seizures to be made in various jurisdictions, and at the trial in the United States District Court for the District of New Hampshire the issue whether the advertising matter constituted misbranding was submitted to the jury, and resulted in a verdict and judgment for the defendant (appellant here). We must assume, therefore, that the department at that time was mistaken, and that the remedy was not misbranded within the meaning of the law. The remedy was the same and the advertising was substantially the same as it is now. The contention then was that the remedy was misbranded. It is now contended that it is not only misbranded but adulterated. If it is adulterated now, it must have been then, yet the analysis at that time failed to disclose adulteration. We may assume, therefore, that the adulteration (if any) is not of such a character as to endanger the public. This assumption is justified, not only because of the failure to detect adulteration in the analysis of 1919, but because for a period of 6 years after the judgment in the District Court for New Hampshire appellant was unmolested in the conduct of its business.

In *Ex parte Young*, 209 U.S. 123, 28 S.Ct. 441, 52 L.Ed. 714, 13 L.R.A. (N.S.) 932, 14 Ann. Cas. 764, it was held that, while there is no rule permitting a person to disobey a statute with impunity at least once for the purpose of testing its validity, when such validity can only be determined by judicial determination and construction, a provision in the statute which imposes such severe penalties for disobedience of its provisions as to intimidate the parties affected thereby from resorting to the courts to test its validity practically prohibits those parties from seeking such judicial construction and denies them the equal protection of the law. In the present case, the action and proposed action of the Department would, under the averments of the bill, in effect deprive appellant of its property through the destruction of its business before the issues involved could be determined by the court. The result, therefore, would be little different than as though no provision had been made for judicial review. Such a course of conduct on the part of the Department amounts to arbitrary exercise of power, and is a deprivation of due process of law. It is not, therefore, a suit against the United States. *Philadelphia Co.* v. *Stimson*, 223 U.S. 605, 620, 32 S.Ct. 340, 56 L.Ed.

570; *Heath & Milligan Co.* v. *Worst*, 207 U.S. 338, 28 S.Ct. 114, 52 L.Ed. 236.

A court of equity has jurisdiction to restrain by injunction the institution of a multiplicity of suits under such circumstances as are here present. In *Third Ave. R.R. Co.* v. *Mayor, etc., of N.Y.*, 54 N.Y. 159 (cited with approval in *Cave* v. *Rudolph*, 53 App. D.C. 12, 15, 287 Fed. 989), the municipal authorities had commenced 27 actions against the railroad company to recover penalties prescribed and imposed by city ordinances for running cars without a license. The railroad company brought an action to restrain the prosecution of more than one until that one could be finally heard and determined. The Court of Appeals ruled that, as the prosecution of all the suits would be unnecessarily oppressive, the interference of a court of equity was properly invoked and exercised. But it is contended that, "if appellees should be enjoined in this case no practical relief would be afforded appellant, since under section 5 of the act the United States Attorney could proceed against various shipments of the product throughout the country when any health, food, or drug officer or agent of any State, Territory, or the District of Columbia should present satisfactory evidence of such violations." This contention is without merit. The relief prayed for is against appellees to prevent them from causing seizures of practically all of appellant's product, and to this relief, under the admitted facts, appellant is entitled.

The decree will be reversed and the cause remanded for further proceedings not inconsistent with this opinion.

KNAPP ET AL. v. CALLAWAY ET AL.

(District Court, S.D. New York, Aug. 5, 1931)

52 Fed. (2d) 476; N.J. No. 20149

In equity. Suit by George S. Knapp and others, copartners doing business under the firm name and style of Paterson, Boardman & Knapp, against Joseph Callaway, Jr., as Chief of the New York Station of the Department of Agriculture, and others. On motion for preliminary injunction. Motion denied.

BONDY, *District Judge*. This is a suit to enjoin officers of the Department of Agriculture from detaining certain shipments of dried egg yolk belonging to the plaintiffs and from basing the standard of dried egg yolk, for purposes of admissibility into the United States, upon the Department's fatty-acid test.

Section 2 of the Food and Drugs Act (21 U.S.C. sec. 2) prohibits the importation of any article of food which is adulterated, and section 7 (21 U.S.C. sec. 8) provides that an article shall be deemed to be adulterated in the case of food if it consists in whole or in part of a filthy, decomposed, or putrid animal or vegetable substance.

Section 3 (21 U.S.C. sec. 3) provides that the Secretary of the Treasury, the Secretary of Agriculture, and the Secretary of Commerce shall make uniform rules and regulations for carrying out these provisions

Pursuant to this authority a rule was adopted (Regulation 4b of the Regulations for the Enforcement of the Federal Food and Drugs

Act) providing that all foods shall be analyzed by the methods prescribed by the Association of Official Agricultural Chemists, when applicable, provided, however, that any method of analysis or examination satisfactory to the Food and Drug Administration may be employed.

It is contended by the plaintiffs that the new test which was recently put into effect in place of the organoleptic tests—appearance, taste, texture, solubility, viscosity and odor—theretofore used by the Department of Agriculture and still used by the trade to determine the merchantable quality and fitness of dried egg yolk for human consumption, is unfair and enforces an unauthorized standard which is arbitrary and capricious, citing *Waite* v. *Macy*, 246 U.S. 606, 38 S.Ct. 395, 62 L.Ed. 892; *Lynch* v. *Tilden Produce Co.*, 265 U.S. 315, 44 S.Ct. 488, 68 L.Ed. 1034; *Ambruster* v. *Mellon*, 59 App.D.C. 341, 41 Fed. (2d) 430.

The plaintiffs urge that the decomposition detected by the Department's test is chemical decomposition of the fat into its component parts and not the bacterial decomposition resulting in staleness or rottenness intended by the statute, citing *A. O. Andersen & Co.* v. *United States* (C.C.A.), 284 Fed. 542.

The plaintiffs concede that the test is a fair and scientific test to determine the percentage of fatty acid contained in dried egg yolk.

They assert that whether or not such yolk consists in whole or in part of a filthy, decomposed, or putrid animal substance, can be adequately determined, as it always has been, by the organoleptic test, and that the test of lipolytic decomposition adopted by the Government does not show whether such egg yolk consists of decomposed animal substance, and that decomposed dried egg yolk often shows a lower percentage of fatty acid than the standard fixed by the Department.

The test required by the statute is not whether the food is unwholesome or injurious to health. See *United States* v. *Two Hundred Cases of Adulterated Tomato Catsup* (D.C.), 211 Fed. 780, 783; *A. O. Andersen & Co.* v. *United States* (C.C.A.), 284 Fed. 542.

That such a test has never been used or heard of before is immaterial. See *United States* v. *One Hundred Barrels of Vinegar* (D.C.), 188 Fed. 471, 473, 474. The fact that the trade does not use it is immaterial. See *W. B. Wood Mfg. Co.* v. *United States* (C.C.A.), 292 Fed. 133, 134.

It appears by the Government's affidavits that the fat or ether extract of fresh eggs passes practically unchanged from the liquid egg into the dried egg; that the acidity of a strictly fresh liquid egg has never been found to be higher than 1.72 cubic centimeters N/20 sodium ethylate per gram and never higher than 1.99 cubic centimeters for any egg of edible commercial quality; that in no case were good shell eggs or frozen eggs ever found the acidity of the ether extract of which exceeded 2.5 cubic centimeters per gram; that the acidity of this ether extract is always low when fresh sound eggs are used and high when decomposed or unsound eggs are used, and that the acidity of dried egg yolk prepared from sound fresh eggs was found to increase so slowly under ordinary conditions of storage that at the end of 3 years it does not equal 5 cubic centimeters, whereas egg products from decomposed eggs exhibit high acidity and a marked tendency for this acidity to increase rapidly; that, accordingly, sound eggs properly stored and shipped would show on arrival in the

United States from China an acidity of from 2 to 3 cubic centimeters; and that the acidity of the ether extract of dried egg yolk made from decomposed eggs often exceeds 5 cubic centimeters at the time of drying, and, if not, it increases rapidly and soon exceeds that figure.

From these scientific facts the Department concludes that when dried egg yolk shows an acidity of 5 cubic centimeters or more on arrival in the United States that indicates that it was made from eggs which would have shown, if tested in the liquid state, the characteristics of such decomposition as amounts to staleness or rottenness clearly within the meaning of the word decomposition as used in the statute, but which cannot be detected by the organoleptic test after drying because the volatile products of decomposition are driven off by drying, or else that such a percentage of acidity shows that the egg yolk was improperly dried or stored and thus became decomposed after drying.

The acid test seems to be a good test of whether the fatty part of the egg has been attacked by decomposition. Eggs may have a bad odor and show a low acidity, for it is conceded that the test does not detect protein decomposition, but eggs with a bad odor would be excluded as putrid. Thus, eggs may be filthy, decomposed, and putrid, and they may not have a high acidity, but, if they have a high acidity, that shows that the fatty part of the egg has been affected by decomposition. Many tests may be required to show that an egg is good in all respects, but any one of a number may suffice to show that it is bad in a certain respect. Though the affidavits of chemists, dealers, and dietitians used in support of the motion deny that the Government's acid test shows that dried egg yolk is decomposed, or that decomposed liquid eggs were used in making it, it cannot be said, in view of the statements set forth in defendants' affidavits, that the test adopted by the Government is arbitrary or capricious (see *United States* v. *Bartram Bros.* (C.C.A.), 131 Fed. 833; *Commercial Solvents Corp.* v. *Mellon*, 51 App.D.C. 146, 277 Fed. 548), or that the complainant shows reasonable probability of ultimate success. Where the facts are disputed, a preliminary injunction will not issue. *Cumberland T. & T. Co.* v. *Stevens* (D.C.), 274 Fed. 745; *Wisconsin-Minnesota L. & P. Co.* v. *Railroad Commission of Wisconsin* (D.C.), 267 Fed. 711.

The motion for a preliminary injunction is denied. However, in view of the sharp conflict in the opinion of experts and the desirability of an early determination of the issue, the action will be given a preference, if desired.

UNITED STATES v. 94 DOZEN, MORE OR LESS, HALF-GALLON BOTTLES CAPON SPRINGS WATER

(Circuit Court of Appeals, Third Circuit, Aug. 19, 1931)

51 Fed. (2d) 913; N.J. No. 19236

Appeal from decree of the District Court for the Eastern District of Pennsylvania dismissing libel brought under section 10 of the Food and Drugs Act. Decree dismissing libel affirmed.[37]

[37] Affirming *United States* v. *94 Dozen, More or Less, Half-Gallon Bottles Capon Springs Water*, p. 1216, *ante*

Before BUFFINGTON, DAVIS, and THOMPSON, Circuit Judges.

DAVIS, *Circuit Judge.* This is an appeal from a decree dismissing the libel in the above stated cause.

On January 28, 1928, the United States filed a libel under section 10 of the Food and Drugs Act and prayed for seizure and condemnation of 94 dozen half-gallon bottles of Capon Springs water, which had been shipped on January 20, 1928, from Capon Springs, W.Va., to Philadelphia, Pa., on the grounds that the water was adulterated and the bottles in which it was contained were misbranded.

An article is adulterated within the meaning of the act, "if it consists in whole or in part of a filthy, decomposed, or putrid animal or vegetable substance."

An article is misbranded within the meaning of the act, "if the package containing it or its label shall bear any statement, design, or device regarding the ingredients or the substances contained therein, which statement, design, or device shall be false or misleading in any particular."

The learned trial judge in his second conclusion of law dismissed the count in the libel based upon clause 6, section 7, "because of the failure to grant the claimants the preliminary hearing allowed by the regulations." The regulation to which the court referred was regulation 5 (a) which provides as follows:

> (a) Whenever it appears that an article is adulterated or misbranded within the meaning of the act, and proceedings are contemplated under sections 1 and 2, notice shall be given to the party or parties against whom prosecution is under consideration and to other interested parties, and a date shall be fixed at which such party or parties may be heard. The hearing shall be held at the office of the Food, Drug and Insecticide Administration most convenient to the parties cited, and shall be private and confined to questions of fact. The parties notified may present evidence, either oral or written, in person or by attorney, to show cause why the matter should not be referred for prosecution as a violation of the Federal Food and Drugs Act.

This regulation refers to sections 1 and 2 of the act which provide the penalty for conviction in criminal proceedings under section 4. It does not refer to proceedings in rem as provided in section 10 of the act. This section does not require that a preliminary hearing be given to claimants of the articles alleged to be adulterated or misbranded. *United States* v. *50 Barrels of Whiskey*, 165 Fed. 966; *United States* v. *65 Casks of Liquid Extract*, 170 Fed. 449; *United States* v. *9 Barrels of Olives*, 179 Fed. 983; *United States* v. *100 Barrels of Vinegar*, 188 Fed. 471; *United States* v. *75 Barrels of Vinegar*, 192 Fed. 350. But section 4 does require that when on examination the Board of Chemistry finds an article to be adulterated or misbranded, notice be given the party from whom the sample was obtained and an opportunity to be heard. But under section 5 of the act which also relates to criminal proceedings, it is the duty of the district attorney to whom satisfactory evidence of any violation of the act is reported by the Secretary of Agriculture or by any health officer of any State, to begin proceedings against the offender without notice or an opportunity to be heard. So even in criminal proceedings notice is not always necessary. *United States* v. *75 Boxes of Alleged Pepper*, 198 Fed. 934; *United States* v. *Morgan, et al.*, 222 U.S. 274.

The Government charged in its libel that the water was misbranded in that the labels on the bottles and circulars contain statements,

designs, and devices regarding the ingredients and substances in the water to the effect that it is a "healing water" and possesses curative and therapeutic properties, which, it alleges, are false and fraudulent. It further charged that the water was adulterated in that it "consists in part of a filthy, decomposed, and putrid animal and vegetable substance." These allegations were earnestly denied by the appellee. It appears that several hundred pages of testimony were taken to establish and rebut these allegations. The court made the following general finding: "We make the finding that this water at the time of the trial was free from the criticisms made of it and will continue to be free." The "criticisms made" were that the water was adulterated and misbranded. But the Government has not brought any of the testimony here to establish these allegations. The record before us consists of the pleadings, the opinion, decree, exception, assignment of errors, petition for appeal, order allowing appeal, and citation. These alone are open for consideration. *Reilly* v. *Beekman*, 24 Fed. (2d) 791, 795.

The third conclusion of law is: "3. The libel should be dismissed." The decree is: "And now, to wit, this tenth day of December, 1930, it is ordered that the libel in the above-entitled case be dismissed."

The general finding, the specific conclusion of law, and decree are based upon the evidence which is presumed to support them and there is nothing in the record before us to rebut this presumption. *Southern Railway* v. *Lester*, 151 Fed. 573, 575; *Bankers Trust Co.* v. *Missouri K. & T. Railway Co.*, 251 Fed. 789, 798; *Arena* v. *Delaware, Lackawanna & Western Railway Co.*, 292 Fed. 1, 4; *Coldwell* v. *United States*, 256 Fed. 805; *Clarke* v. *United States*, 255 Fed. 546; *Samuel Olson & Co.* v. *Voorhees*, 292 Fed. 113, 115.

It is true that in the second conclusion of law, which the Government says is predicated upon the third finding of fact, the dismissal of the count based upon clause 6, section 7, of the act may have been put upon the wrong ground. This clause and section refer to paragraph 6 only of the libel which charges adulteration. With this paragraph eliminated, the rest of the libel is left standing. The third conclusion of law, that "the libel should be dismissed," is based upon the evidence as a whole and dismisses not only the sixth paragraph but the entire libel. While the record does not disclose any exceptions taken at the trial, embodied in a formal bill, presented to and signed by the trial judge within the term as required by the decisions generally, it is true, as the Government here contends, that in trials by the court without a jury the sufficiency of facts specially found to support the judgment or decree may be reviewed without a bill of exceptions. *Sloss-Sheffield Steel Etc. Co.* v. *Stover Mfg. Etc. Co.*, 37 Fed. (2d) 876; *General Motors Co.* v. *Swan Carburetor Co.*, 44 Fed. (2d) 24; *Seeberger* v. *Schlesinger*, 152 U.S. 581; *Lewellyn* v. *Electric Reduction Co.*, 275 U.S. 243, 248. But this does not materially help, for as above stated, there is nothing in the record open to us that justifies a reversal. There are 23 assignments of error, but they are not contained in any special finding and there is no bill of exceptions bringing up those portions of the record upon which they are predicated. If we are free to consider them, they show findings against the Government presumptively on sufficient evidence or a refusal to find for the Government on insufficient evidence.

It follows that the decree dismissing the libel must be affirmed.

UNITED STATES v. 620 CASES OF CANNED TUNA FISH

(District Court W.D. Washington, Aug. 25, 1931)

N.J. No. 19023

Libel under section 10 of the Food and Drugs Act. Trial before the court. Decree in favor of the United States.

The United States attorney filed a libel for seizure and condemnation of 620 cases of canned tuna, alleging that the article had been transported from the State of California into the State of Washington and remained in the original unbroken packages, and that it was adulterated in that it consisted in whole or in part of a decomposed animal substance.

NETERER, *District Judge.* Libelant seeks to condemn 620 cases of canned tuna, labeled "Tuna for pets not intended for human consumption * * *." The libelant's expert testified that he examined 96 cans in San Francisco of the quantity in issue by opening the cans, testing the contents for firmness, and smelling to determine the condition; that 21 percent were in advanced stage of decomposition, the remaining were in satisfactory condition. At trial 12 cans were opened, selected at random. One was shown to be decomposed by the same test. The same standards were applied as applied to tuna consigned for human consumption. The claimant's expert at trial agreed with libelant's witness that the cans examined at trial, one of which was condemned, were not in a state of decomposition; but he stated that the condemned can is fit for the purposes for which it was intended, and that he had fed a number of like cans to his own cat and the cat thrived.

From all the evidence presented the conclusion is inevitable that some of the canned product was decomposed and others tainted. 21 percent of the 96 cans examined were somewhat decomposed, and between 8 and 9 percent of the remaining portion was tainted to the extent that it was susceptible to smell, making practically one third of the product open to criticism and imposing upon the public a canned product, of which one third was unsound.

The act is broad in its provision, and section 6 provides the term "food", as used, shall include food for man or other animals. The intent of the act, no doubt, was to prevent imposition of fraud upon the public by canning and commercializing a product which was decomposed and not in a healthy, normal condition. The provisions of the act are broader than its title, which shows the object to be against adulterated, misbranded, poisonous, and deleterious food, drugs, etc. The act, no doubt, was primarily in the interest of humanity and against fraudulent practices.

The product by its label, presumably, is for dogs and cats. As to that, however, there is no evidence. The same standard of test was applied as for human consumption. Common sense enters into and becomes a part of every law, in the absence of explicit enactment. The same standard—test and strictness—applied to food for human consumption may not be applied to food branded for animals other than man—"Man, the autocrat among animals"—Heine. "Man",

said Thomas Browne, "is a noble animal, splendid in ashes, and pompous in the grave. A dog is never offended at being pelted with bones," although a man's best friend is his dog, who often has more trouble to get food than to digest it. The old maxim, "Who will not feed cats must feed mice and rats", may be contemplated. But with all considerations and tests, there are other pets than dogs and cats, and in view of the broad scope of the act and of the large percentage of decomposed and tainted commodity (practically one third), the seizure is confirmed, and an order of condemnation is directed.

UNITED STATES v. CATZ AMERICAN CO., INC.

(Circuit Court of Appeals, Ninth Circuit, Nov. 2, 1931. Rehearing denied Dec. 7, 1931)

53 Fed. (2d) 425; N.J. No. 19276

Appeal from decree of the District Court of the United States for the Northern District of California dismissing a libel by the United States against certain sacks of cull figs. Decree affirmed.

Before WILBUR and SAWTELLE, Circuit Judges, and JAMES, District Judge.

JAMES, *District Judge.* Appellant brought its libel in the district court seeking a decree condemning approximately 2,000 sacks of "cull" dried figs which were found at the dock in San Francisco ready to be loaded aboard ship, with initial destination Trieste, Italy. It was charged in the libel that the shipment consisted partly of "filthy, decomposed, or putrid vegetable matter", and was subject to seizure under the Food and Drugs Act.

The answer of appellee admitted that the figs were "culls", and that without further segregation or processing they were not fit to be used as food. It was further alleged in the answer that the figs had actually been placed in transit, consigned to a buyer in Austria.

Trial was had, and there was no conflict in the evidence as to matters material to the issues. In brief, appellee, a dealer in dried figs, had prepared the fruit to meet an order for that particular kind and quality of figs; the order being received from an Austrian manufacturer who processed like fruit to make a coffee flavoring. The figs were wormy in part. Appellee had made shipments of many tons of the same kind of figs to the same buyer during the preceding four years. The district court found that the facts, under the law appealed to, did not show a cause for the decree demanded. This decision, we believe, was right.

The Food and Drugs Act (21 U.S.C. secs. 1–25) contains many provisions respecting adulteration and misbranding of articles of food and drugs, and the shipment of the same in interstate commerce. Section 2 forbids the introduction into any State or Territory from another State or Territory, or from a foreign country, or the shipment to a foreign country, of any article of food or drugs adulterated or misbranded within the meaning of the law. This section provides that the offender shall be guilty of a misdemeanor and subject to a fine

for the first offense, and fine or imprisonment, or both, for a subsequent offense. The concluding portion of the section reads as follows:

> No article shall be deemed misbranded or adulterated within the provisions of said sections when intended for export to any foreign country and prepared or packed according to the specifications or directions of the foreign purchaser when no substance is used in the preparation or packing thereof in conflict with the laws of the foreign country to which said article is intended to be shipped; but if said article shall be in fact sold or offered for sale for domestic use or consumption, then this proviso shall not exempt said article from the operation of any of the other provisions of the sections hereinbefore enumerated.

Section 8 provides that:

> For the purposes of sections 1 to 15, inclusive, of this title, an article shall be deemed to be adulterated: * * * Sixth. If it consists in whole or in part of a filthy, decomposed, or putrid animal or vegetable substance. * * *

Section 8, in the part quoted, furnishes the definition of an "adulterated" article of food. The exception is, as is specified in that portion of section 2 quoted, that articles of food shall not be deemed "adulterated" when intended for export to a foreign country, and prepared or packed according to directions of the foreign purchaser, and where no substance is used in the preparation or packing which is in conflict with the laws of the country to which the article is intended to be shipped. Construed together, these provisions seem intended to allow the shipment to a foreign country of products which are not up to the requirements imposed upon interstate shipments where the foreign purchaser has ordered the precise kind and quality which the exporter designs to send to him, so long as the law of the country to which they are being sent does not impose similar restrictions as to substances "used in the preparation or packing thereof." The words "prepared or packed" should be held to mean any condition or grade of the merchandise, including any deteriorated state of the goods, considering the class to which they belong. The law thus interpreted (and we feel that the language used is fairly expressive to the intent indicated), the libel did not show that the merchandise seized was subject to forfeiture.

The certificate introduced by appellant in the trial court, showing the provisions of an Austrian law as prohibiting certain impure materials being used in coffee admixtures and coffee substitutes, could not have the effect to put the shipper here out of the excepted class, as showing that he had used a substance in the preparation and packing of the fruit "in conflict with the laws of the foreign country to which said article is intended to be shipped" (sec. 2 above cited). The manufacturer, upon receiving the figs, might well free them from all the deleterious matter before converting them into coffee flavoring, or he might divert them to other proper uses if they were unfit for such purpose. In the absence of evidence to the contrary, it will be assumed that he will comply with the law of Austria.

The decree is affirmed.

SAWTELLE, *Circuit Judge* (dissenting). I am unable to agree with the majority in the view that the saving provision of section 2 of the Food and Drugs Act protects from seizure shipments of decayed food in its "natural condition", to use the expression reiterated by the appellee. The saving provision relates solely to articles "prepared or

packed" according to the directions of the foreign purchaser; it does not authorize shipment of food inherently "adulterated" by being, according to section 8, "filthy, decomposed, or putrid." That section defines the word "adulterated" as follows:

> For the purposes of sections 1 to 15, inclusive, of this title, an article shall be deemed to be adulterated; * * *
> Sixth. If it consists in whole or in part of a filthy, decomposed, or putrid animal or vegetable substance, or any portion of an animal unfit for food, whether manufactured or not, or if it is the product of a diseased animal, or one that has died otherwise than by slaughter.

The Government is not quarreling with the method either of "packing" or "preparing" the figs; it is censuring a vice that inheres in the food itself, regardless of its "packing" or "preparation"; namely, its essential putridity.

The word "prepare" implies the intervention of human agency. It does not mean the mere permission that nature take its course. Shipping rotten figs in their "natural condition" is not "preparing" or "packing" them.

The test seems to be: Did the "preparing" or the "packing," of itself, cause the condition to which the Government is objecting?

In other words, did the "preparing" or the "packing"of the fruit result in its adulteration or decay? We are assuming, for the sake of the argument only, that such preparing and packing were done according to the instructions of the foreign purchaser.

If it should be found that the putrid condition of the figs was due to the method used in packing or preparing them, the saving provision referred to above applies, and the shipment is not subject to condemnation.

If, on the other hand, it is ascertained that the fruit was "adulterated" because of natural decay—in which the hand of man had no part—then the vice complained of may be said to be inherent, and to render the shipment subject to seizure by the Government.

In *Thomas and Wife* v. *Winchester*, cited by the appellee itself, 6 N.Y. 397, 411, 57 Am. Dec. 455, the court thus defined "prepared":

> The word "prepared" on the label, must be understood to mean that the article was manufactured by him, or that it had passed through some process under his hands, which would give him personal knowledge of its true name and quality.

It may well be asked here, What "process" was used by the appellee to cause the figs to become decayed? The answer is found in the appellant's own statement, that the fruit was shipped in its "natural condition." Therefore there was no "preparation" on appellee's part.

Whatever might be the Government's action against the shipper, its suit here is against the shipment; and in such a case the construction is strict as against the shipment:

> The rule of strict construction (in favor of the allegedly offending shipper) invoked by the defendant in error has little or no application to statutes designed to promote the public health or public safety. *A. O. Andersen & Co.* v. *United States* (C.C.A. 9), 284 Fed. 542, 543.

Finally, the record shows that the law of Austria does "impose similar restrictions as to substances 'used in the preparation and packing'" of "products which are not up to the requirements imposed upon interstate shipments", even if the foreign consignee "has

ordered the precise kind and quality which the exporter designs to send to him": "Other ground coffee admixtures and coffee substitutes. These products must contain no coarse fragments, coming from stems or cores and the like of the products used for this purpose, and must be free from molds, insects, and their maggots" (Official Compilation of the Regulations of the Republic of Austria on Alimentary Foods, published by the Austrian Federal Ministry of Social Administration, Public Health Office, in Vienna).

The majority of the court seeks to answer this objection, at the conclusion of its opinion, by assuming that the "manufacturer, upon receiving the figs, might well free them from all the deleterious matter before converting them into coffee flavoring, or he might divert them to other proper uses if they were unfit for such purpose."

I do not think that the jurisprudence under the statute authorizes such an assumption. It is true that the cases that I am about to cite deal with interstate and not foreign shipments; but, since it is admitted that this is a case of first impression, the reasoning in those cases can properly, by analogy, be extended to the case at bar.

We are here concerned with the condition of the shipment as it leaves our shores, and not with what may be done to the merchandise after it has arrived at its foreign destination.

In *United States* v. *Thirteen Crates of Frozen Eggs* (C.C.A. 2) 215 Fed. 584, 585, the court said:

> The question of intent of either the shipper or the consignee has nothing to do with the question.

In the lower court, in that case, the "intent" of both the shipper and the consignee was clearly shown but such intent did not prevent the condemnation of the shipment:

> Eggs in this condition may be sold and used as an article of food, or for tanning purposes (that is, for use in the tanning of leather), and claimant had sold eggs of this description, selected and segregated at the same time as these, to a tannery or tanning firm located and doing business at a point not far distant from Chicago for tanning purposes. It had not shipped or sold any of its eggs of this description to be used and consumed as an article of food and did not contemplate doing so. 208 Fed. (2d) 950, 951.

As was said by the District Judge in that case,

> the purpose of Congress was to prohibit the transportation of articles in interstate commerce which come within the definition given in the statute and make them subject to seizure and condemnation if so transported.

See, also, *United States* v. *Two Barrels of Desiccated Eggs* (D.C.), 185 Fed. 302; *Union Dairy Co.* v. *United States* (C.C.A. 7), 250 Fed. 231, 233; *United States* v. *Ninety-four Dozen, More or Less, Half-Gallon Bottles Capon Springs Water* (D.C.), 48 Fed. (2d) 378, 379, 381.

In *Hipolite Egg Co.* v. *United States*, 220 U.S. 45, 52, 55, 31 S.Ct. 364, 55 L.Ed. 364, the Supreme Court branded as "untenable" the egg company's contention that "section 10 of the Food and Drugs Act (21 U.S.C. sec. 14) does not apply to an article of food which has not been shipped for sale, but which has been shipped solely for use as raw material in the manufacture of some other product."

"The object of the law", the court said, "is to keep adulterated articles out of the channels of interstate commerce, or, if they enter such commerce, to condemn them while being transported or when they have reached their destination, provided they remain unloaded, unsold, or in original unbroken packages."

On page 58 of the opinion in 220 U.S., 31 S.Ct. 364, 367, the Supreme Court brands articles debased by adulteration as being "outlaws of commerce."

This apt characterization fits a shipment of wormy figs, and the fact that such shipment is destined for a foreign port does not divest it of its outlaw nature.

Accordingly, I am of the opinion that the decree should be reversed.

UNITED STATES v. AMERICAN MAID FLOUR MILLS

(District Court, S.D. Texas, Nov. 5, 1931)

N.J. No. 19646

Information alleging violation of section 2 of the Food and Drugs Act. Motion to quash granted; demurrer overruled.

The United States attorney filed an information against the American Maid Flour Mills, a corporation, Houston, Tex., alleging shipment by said company, from the State of Texas into the State of Louisiana, of quantities of flour and corn meal which were misbranded, in violation of the Food and Drugs Act as amended. It was alleged in the information that the articles were misbranded in that the statements "24 Lbs." and "24 Lbs. Net", borne on the sacks containing the articles, were false and misleading, and in that the articles were labeled as aforesaid so as to deceive and mislead the purchaser, since the sacks did not contain each 24 pounds of the articles, but practically all of the sacks contained less than 24 pounds of the articles. It was alleged that the articles were further misbranded in that they were in package form and the quantity of the contents was not plainly and conspicuously marked on the outside of the package, since practically all of the packages contained less than 24 pounds, the quantity indicated thereon.

KENNERLY, *District Judge* (on motion to quash and on demurrer). This is a criminal information filed by the United States District Attorney against the American Maid Flour Mills, charging in six counts, under sections 1 to 15, of title 21, U.S.C.A., and particularly under paragraph 3 of section 10 of such title, the misbranding of certain sacks of flour, meal, etc., shipped in interstate commerce. It is alleged that such sacks were branded as containing each twenty-four (24) pounds, when in truth and fact they contained less, etc.

(1) Defendant moves to quash the information, upon the ground, among others, that the statute under which the prosecution is brought violates the Fifth and Sixth Amendments of the Federal Contitution, in that such statute, and particularly the provision as to "reasonable variations", constitutes a fixing by Congress of an unascertainable standard of guilt, and is inadequate to inform persons accused of criminal violations thereof, of the nature and cause of the accusation against them. That such motion is in that respect well taken, I entertain no doubt. *United States* v. *Shreveport Grain*, 46 Fed. (2d) 354, and cases there cited, including *United States* v. *Cohen*, 255 U.S. 93. Counsel for the Government strongly press upon me that the line of decisions represented by *Waters-Pierce Oil Co.* v. *Texas*, 212

U.S. 86, is controlling. In disposing of this contention, I cannot do better than to point to the language of Chief Justice White in *United States* v. *Cohen, supra,* as follows:

> But decided cases are referred to which, it is insisted, sustain the contrary view. *Waters-Pierce Oil Co.* v. *Texas*, 212 U.S. 86, 53 L.Ed. 417, 29 Sup. Ct. Rep. 220; *Nash* v. *United States*, 229 U.S. 373, 57 L.Ed. 1232, 33 Sup. Ct. Rep. 780; *Fox* v. *Washington*, 236 U.S. 273; 59 L.Ed. 573, 35 Sup. Ct. Rep. 383; *Miller* v. *Strahl*, 239 U.S. 426, 60 L.Ed. 364, 36 Sup. Ct. Rep. 147; *Omaechevarria* v. *Idaho*, 246 U.S. 343, 62 L.Ed. 763, 38 Sup. Ct. Rep. 323. We need not stop to review them, however, first, because their inappositeness is necessarily demonstrated when it is observed that, if the contention as to their effect were true, it would result, in view of the text of the statute, that no standard whatever was required, no information as to the nature and cause of the accusation was essential and that it was competent to delegate legislative power, in the very teeth of the settled significance of the Fifth and Sixth Amendments and of other plainly applicable provisions of the Constitution; and second, because the cases relied upon all rested upon the conclusion that, for reasons found to result either from the text of the statutes involved or the subjects with which they dealt, a standard of some sort was afforded. Indeed, the distinction between the cases relied upon and those establishing the general principle to which we have referred, and which we now apply and uphold as a matter of reason and authority, is so clearly pointed out in decided cases that we deem it only necessary to cite them. *International Harvester Co.* v. *Kentucky*, 234 U.S. 216, 221; *Collins* v. *Kentucky*, 234 U.S. 634, 637; *American Seeding Machine Co.* v. *Kentucky*, 236 U.S. 660, 662; and see *United States* v. *Pennsylvania R.R. Co.*, 242 U.S. 208, 237–238.

(2) Defendant, in like manner, attacks the information because of the provisions of paragraph 3 of section 10, permitting the fixing of tolerances and exemptions (and possibly of variations) by rules and regulations promulgated by the Secretaries of the Treasury, Agriculture, and Commerce under section 3 of title 21. There is no allegation in the information of the promulgation of, nor the violation by defendant of, any such rules and regulations. The only charge is a violation of the statute. Defendant, therefore, cannot raise this point on motion to quash.

(3) Defendant also demurs to the information, upon the ground that it is vague, indefinite, insufficient and fails to state an offense under the laws of the United States. I think if the statute in question is valid, the information is sufficient. If defendant desired more detailed information regarding the offense with which it is charged, its remedy was to call for bill of particulars.

It seems unnecessary to discuss the other questions raised. The motion to quash will, for the reason stated, be granted.

UNITED STATES v. 17 BOTTLES, LARGE SIZE, AND 65 BOTTLES, SMALL SIZE, OF AN ARTICLE OF DRUGS LABELED IN PART "B. & M."

(District Court, D. Maryland, Jan. 5, 1932)

55 Fed. (2d) 264; N.J. No. 19651

Libels under section 10 of the Food and Drugs Act. Exceptions to libels sustained in part and overruled in part. Jury trial. Verdict in favor of the United States.

These cases involved shipments of a drug preparation labeled "B. & M. Formerly Called B. & M. External Remedy." The cartons, the

bottle labels, and a booklet shipped with the article bore extensive curative and therapeutic claims. Investigation showed that the article contained no ingredient or combination of ingredients capable of producing the curative and therapeutic effects claimed. On the cover and first page of the booklet the article was described as an "Antiseptic." The booklet also contained statements supported by tables and plates purporting to prove its penetrating and germ-destroying properties. Tests showed that it would not destroy germs in the tissues and organs when used externally or by inhalation in accordance with instructions contained in the booklet.

Adulteration of the article was alleged in the libel for the reason that it was sold under its own standard of strength, to wit, (booklet cover) "For External Applications, Inhalations, Antiseptic," (booklet, p. 1) "An Antiseptic * * * Application, For Antiseptic Applications," and the strength of the article fell below such professed standard, in that it was not antiseptic when used as directed in the labeling.

Misbranding was alleged for the reason that certain statements appearing in the booklet were false and misleading, since the article fell below the professed standard of strength set forth in said statements. Misbranding was alleged for the further reason that certain statements borne on the cartons and bottle labels and appearing in the booklet, regarding the curative and therapeutic effects of the article, were false and fraudulent, since it contained no ingredients or combination of ingredients capable of producing the effects claimed.

The F. E. Rollins Co., Boston, Mass., entered an appearance as claimant and filed a motion to consolidate the cases, which motion was allowed, and claimant filed exceptions to the adulteration and misbranding charges contained in the libels. Thereupon, claimant's bill of exceptions having been heard on briefs and oral argument, the court handed down the following opinion sustaining claimant's exceptions to the adulteration and misbranding charges based on the claims as to the strength of the article, and overruling the exceptions based on the false and fraudulent therapeutic claims.

CHESNUT, *District Judge*. In these consolidated cases the Government seeks to condemn under the act of Congress known as the Food and Drugs Act of June 30, 1906, as amended in 1912 (U.S.C., title 21, secs. 1–15), certain cartons containing bottles of a proprietary drug arbitrarily called "B. & M." It is alleged in the libels that this drug is (1) adulterated and (2) misbranded, within the meaning of the act. The act is operative, so far as the States are concerned, only to interstate commerce, and it is alleged in the libels that the offending packages were shipped from Massachusetts to Baltimore.

Section 14 of title 21 of the United States Code provides that the procedure in such cases shall begin by a process of libel for condemnation, and that the procedure shall conform as near as may be to proceedings in admiralty, except that either party may demand trial by a jury of any issue of fact. In accordance with this procedure the manufacturer of the drugs, the F. E. Rollins Co., a corporation of the State of Massachusetts with principal office in Boston, has appeared as claimant of the seized articles and has filed exceptions to the legal sufficiency of the libels. It is admitted by the claimant that its preparation is a drug subject to the provisions of the act. It is

sold to the consumer in paper cartons containing bottles. The outside of the cartons contain certain printed matter descriptive of the drug and the uses for which it is recommended. The bottles also contain labels with similar information and directions for use. Inside the cartons, but not physically annexed thereto or to the bottles, is a printed booklet of 32 pages containing much more extensive information and description of the drug and its properties and its claimed effects. It is stated to be "for external use" and "for application and inhalation in the treatment of tuberculosis, influenza, pleurisy, bronchitis and other respiratory diseases" and "for application and relief of inflamed muscles, rheumatism, neuralgia, neuritis, sciatica, lumbago," and other diseases and injuries.

Three questions of law are presented as follows: (1) Is the drug "adulterated" within the meaning of the act; (2) is it "misbranded" within the meaning of the act in that certain of the statements in the booklet referred to are false and misleading; (3) is it misbranded because certain other statements in the booklet are false and fraudulent within the meaning of the act?

These questions will be discussed in the order stated.

Adulteration. It is, of course, clear enough that in the construction of language upon the cartons or bottle labels or in the booklet the meaning given to the language is that ordinarily conveyed by it to purchasers. *Libby* v. *United States* (C.C.A. 4th), 210 Fed. 148; *Hall* v. *United States*, 267 Fed. 795 (C.C.A. 5th); *United States* v. *150 Cases*, 211 Fed. 350 (D.C.Mass.); *Chichester Chemical Co.* v. *United States*, 60 App.D.C. 134, 49 Fed. (2) 516. But the term "adulterated" is given a special definition by the act, title 21, U.S. Code, section 8. In the case of drugs the term as thus defined means (1) when it is sold under a name recognized by the United States Pharmacopœia or National Formulary, that it differs from the standard of strength, quality, or purity as determined by those publications, and (2) were not sold under such a standard name, "if its strength or purity fall below the professed standard or quality under which it is sold."

Paragraph 2 of the libels alleges that this drug is adulterated "in this, that said article is sold under its own standard of strength", to wit, "for external application, inhalations, antiseptic" and "an antiseptic * * * application", "for antiseptic applications", while in truth and fact the strength of said article falls below such professed standard in that the article is not antiseptic when used as directed in the labeling thereof.

This statement appears on the cover and on the inside of the "booklet", which, as stated above, is enclosed in the carton but not physically annexed thereto, or to the label on the bottle. The label on the bottle, however, contains the following reference to the booklet: "For full directions and information please read the booklet which accompanies this bottle." It is objected by the claimant that the contents of the booklet are to be disregarded because they do not appear on the outside of the package. The same point is made and hereafter more fully discussed in connection with the charge of misbranding. It is sufficient to say that this point is, in my opinion, not sound with respect to the charge of adulteration because the statements in the booklet are, I think, quite clearly within the mischief aimed at, and are not excluded by the language of the act as to adulteration. It is also to be noted that the wording of the first paragraph defining "adulteration" is,

"difference from recognized standards; explanatory statement on or in container."

There is, however, another objection made by the claimant in answer to this charge of adulteration which is more meritorious, and, in my opinion, sound. This objection is that the statement or claim that the drug is "antiseptic", although in fact not antiseptic, is not within the definition of adulteration as contained in the act. The drug is not sold under a name recognized in the United States Pharmacopœia or National Formulary and therefore the charge of adulteration, if it can be sustained at all, must fall within the second paragraph of the definition which reads as follows:

> Below Professed Standard.—Second, if its strength or purity fall below the professed standard or quality under which it is sold.

The argument on behalf of the Government is that the statement by the manufacturer that the article is "antiseptic", professes a standard of strength for the article to which it does not conform. But I am unable to accept the view that the use of the word "antiseptic" is a profession of standard of strength within the meaning of the definition. The word "antiseptic" does not of itself convey the idea of any particular strength or degree. The primary meaning of "antiseptic" is "tending to prevent putrefaction or decay." It is said that the word was in common use long before the bacteriological discoveries of Pasteur and Koch. The word is not equivalent in meaning to the word "germicide"; that is to say, an antiseptic substance is not necessarily one that kills germs. It is probably true that the most common use of the word "antiseptic" is in relation to antiseptic surgery, but the term is, in its dictionary meaning, and I understand also in its scientific meaning, much broader than its special application to antiseptic surgery. And, as I understand it, the word does not import or imply or "profess" any particular standard of strength or quality with respect to germs or bacteria. Different antiseptic substances vary in the degree of their strength or effectiveness in killing or tending to prevent the formation of bacteria, and probably vary also with the conditions and duration of application. Therefore, to say that a substance is "antiseptic" is merely to affirm that it has a tendency to prevent putrefaction, decay, or the development or increase of bacteria; and not to affirm any particular potency in connection therewith.

Then again it is to be noted that, to be within the definition, there must be not only a professed standard asserted or implied, but the "strength or purity" of the article must fall below the professed standard. The construction contended for by the Government, would, I think, introduce forbidden elements of vagueness and uncertainty into the definition. *Small* v. *American Sugar Refining Co.*, 267 U.S. 237; *Cline* v. *Frink Dairy Co.*, 274 U.S. 445, 453, 454.

Even if the claim that the article is antiseptic, when in fact it is not, could be brought literally within the wording of the definition, yet, in my opinion, it is clearly not within the intent of the act when we look to the context of the whole definition of the word "adulterated", and also to the structure of the whole Food and Drugs Act. The obvious purpose of Congress in defining the word "adulterated" was to cover cases where a drug recognized in the United States Pharmacopœia or National Formulary is sold under its established name but does not conform to the standard of strength, quality, or

purity as determined in that official publication; and when not sold under such an established name, the second paragraph of the definition applies where the manufacturer professes a particular standard of "strength or purity" to which the article does not conform. In one case the drug fails to conform to its official recognized standard; in the other to its particular professed standard. If the drug does not profess a particular standard of strength or purity, it is not "adulterated" by reason of a falsely asserted quality, which would be a "misbranding" under the act.

The claim that the drug is "antiseptic" is a profession of quality rather than of strength or purity. It would at least be inapt to say that the "strength or purity" of a drug "falls below the professed quality" of the drug because "strength" and "purity" are ideas that cannot readily be stated in comparison with or in proportion to "quality"; and it is to be noted that while the first paragraph of the definition of "adulterated" condemns a drug which falls below the standard of "strength, quality, or purity", yet the second paragraph (with which we are concerned) comprehends a case where only the "strength or purity" falls below a professed standard. A simple illustration of the application of this second paragraph of the definition, with respect to purity, is afforded by the well-known instance of an article that is widely advertised as "99$^{44}/_{100}$ percent Pure." If, on analysis, such an article proves to be only 90 percent pure it would obviously fall below a professed standard of purity. And so with respect to "strength." If a manufacturer represents that a drug contains 50 percent formaldehyde when in fact it contains only 5 percent, it falls below the professed standard of strength.

Apart from this merely verbal analysis of the definition, I have the conviction that the sense of the definition as a whole excludes its application to the case under consideration. A sentence from the opinion of Justice Holmes, speaking for the Supreme Court of the United States in the case of *United States* v. *Johnson*, 221 U.S. 488, 496, construing a clause of the same act, aptly expresses my view. He there said:

> It seems to us that the words used convey to the ear trained to the usage of English speech a different aim; and although the meaning of a sentence is to be felt rather than proved, generally and here the impression may be strengthened by argument.

Counsel for the Government are not able to point to any precedent for similar application of the act although it has now been in force for 25 years, and it would seem highly probable that instances must have heretofore arisen in which a similar application could and should have been made if justified. The absence of such prior application seems to me to be not without significance in interpreting the true intent of the act.

The claimant's exceptions to the second paragraph of the libel will therefore be sustained.

Misbranding. The libels allege that the booklet in the carton contains some statements which are (*a*) false and misleading, and other statements which are (*b*) false and fraudulent, and that they both constitute "misbranding" within the definition contained in the act (U.S. Code, title 21, secs. 9, 10). By section 9 "misbranding" covers, as to drugs, cases where "the package or label of which shall bear

any statement, design, or device regarding such article, or the ingredients or substance contained therein which shall be false or misleading in any particular", and in section 10, there are included three additional classes of misbranding, the third of which reads as follows:

> If its package or label should bear or *contain* any statement, design, or device regarding the curative or therapeutic effect of such article or any of the ingredients or substances contained therein, which is false and fraudulent.

It is apparent from this that statements which are false or misleading are hit by the act only when the package or label bears the statement; but if the statement is both false and fraudulent, it is covered by the act if the package or label bears or contains the statement. In this case all the alleged offending statements are contained in the booklet which, as has already been stated, is enclosed within the enveloping carton but it is not physically attached thereto, and is not a part of the printed matter on the label on the bottle, although referred to thereon. It is clear enough and is indeed conceded by the claimant, that the word "contain" aptly covers the statements in the booklet, and that therefore statements therein which are false and fraudulent are reached by the act, but claimant also contends that the narrower language of section 9 with respect to statements which are only "false or misleading" exclude the consideration of statements in the booklet because the word "bear" is limited to statements which appear on the outside of the package as sold to the customer. If this were a case of first instance, bearing in mind the obvious and indeed oft-stated beneficient purpose of the act and the mischief it was designed to prevent, I should be inclined to hold that the construction was perhaps unnecessarily narrow, although it must be conceded that the word "bear" is more aptly used with reference to descriptive matter on the package or label than with reference to a nonattached booklet of advertising matter regarding the drug contained within the package. It is, I think, true that false and misleading statements in the booklet are quite as much within the mischief aimed at by the act as statements on the outside of the carton or on the label on the bottle. It is a matter of common knowledge that many proprietary medicines are sold in carton form with booklets or paper wrappers within the carton which give much fuller information regarding the article than is possible in the limited space provided by the outside of the carton or the label on the bottle. A careful user of articles will read the fuller statements in the booklet and probably rely upon them as much, if not more, than the more condensed reading matter on the outside of the carton or label. Emphasis is placed by counsel for the claimant on the proposition that the article is bought by the purchaser principally on the strength of the statements appearing on the outside cover of the package, and that it must be supposed that Congress, acting only on the power to regulate interstate commerce, must have intended to limit its regulations to conditions applicable to the sale in the original package and not to have intended to extend its regulatory power beyond this to the opening of the original package by the purchaser. But certainly this is too narrow a view of the power of Congress. *Seven Cases* v. *United States*, 239 U.S. 510.

However this may be, I find that the claimant's contention with respect to the construction of the act relating to statements which are merely false or misleading, including the unattached booklet, is

supported by authority. The original act became effective June 30, 1906. In 1911, the Circuit Court for the Eastern District of New York held in the case of *United States* v. *American Druggists' Syndicate*, 186 Fed. 387, 389, 391, that this section of the act under consideration did not cover false or misleading statements in a separate circular enclosed with the article in the enveloping package. And a similar holding was made very briefly in the Southern District of Ohio, in *United States* v. *Newton Tea & Spice Co.*, in 1920, 275 Fed. 384, affirmed on other grounds in 288 Fed. 475. In 1911, in the case of *United States* v. *Johnson*, 221 U.S. 488 (above cited), the Supreme Court held that this section of the act was aimed at false statements as to the identity of the article, possibly including strength, quality, and purity, and not at statements as to curative effects. Promptly thereafter, pursuant to recommendation by President Taft, Congress in 1912 amended what is now section 10 of title 21 of the act by adding the paragraph to cover false and fraudulent statements regarding the curative or therapeutic effect of the article. And the legislative history of the act tends to indicate that the word "contain" in the amendment was inserted by reason at least of existing doubts as to whether a circular or booklet within the carton would otherwise be covered. But still more importantly the Supreme Court in the case of *Seven Cases* v. *United States*, 239 U.S. 510, speaking by Mr. Justice Hughes (who had written the dissenting opinion in the Johnson case above cited), at least impliedly approves the limited effect of the word "bear" in the earlier section of the law. At page 515, in contrasting the significance of the words "bear" and "contain", he said:

> It appears from the legislative history of the act that the word "contain" was inserted in the amendment to hit precisely the case of circulars or printed matter placed inside the package, and we think that is the fair import of the provision. Cong. Rec. 62d Cong., 2d Sess., vol. 48, part 11, p. 11, 322. And the power of Congress manifestly does not depend upon the mere location of the statement accompanying the article, that is, upon the question whether the statement is *on* or *in* the package, which is transported in interstate commerce. The further contention that Congress may not deal with the package thus transported, in the sense of the immediate container of the article as it is intended for consumption is met by *McDermott* v. *Wisconsin*, 228 U.S. 115, 130.

The claimant's contention is that no merely false or misleading statements can be construed as covered by the act unless they appear on the outside of the package. And the contention so expressed would seem to exclude even statements on the label on the bottle contained within the package. It is true that this contention finds support in the dictum rather than in the decision in 186 Fed. 386, 391. But the broad language there used was not necessary to the decision either in that case or in this and finds no support in the Supreme Court cases above referred to. In that case the expressed view that the statements are limited to the outside of the package is based largely on the consideration of the wording of other sections of the law, which, in my opinion, are not controlling or even persuasive on the particular point because they relate to different conditions. The sounder rule of construction is to limit the consideration to the language of the particular section, and when so limited, we find that statements on the label of the bottle are expressly included.

I reach the conclusion that in dealing with false or misleading statements the booklet is to be excluded, on the authority of the judicial

and legislative history of the act. But before finishing the discussion on this point I think some attention may possibly at some later stage of this case be given to the effect, if any, of the legend on the label of the bottle reading as follows: "For full directions and information please read the booklet which accompanies this bottle." The significance, if any, of this notation on the bottle has not been set up in the pleadings or referred to in the written or printed arguments of counsel. As the subject is not covered by the libels as now drawn it is not before me for consideration at the present time and I, therefore, express no opinion upon it.

This particular point as to false and misleading statements is set up in paragraph 3 of the libel, and refers to certain statements appearing in the printed booklet as false and misleading, "in that the article falls below the standard of strength set forth in said statement." The claimant also excepts to the sufficiency of this averment on the ground that statements which are only false or misleading are not condemned by the act unless they relate to the identity of the article; and that the statements referred to in the libel do not relate to the identity of the article or its constituents but at most only to its quality. In this connection it is to be noted that the Supreme Court in the *Johnson case*, speaking by Mr. Justice Holmes, said:

> But we are of the opinion that the phrase is aimed not at all possible false statements, but only at such as determine the identity of the article, possibly including its strength, quality, or purity.

Justices Hughes, Harlan, and Day dissented on the ground that the section also covered false statements of fact as to the curative properties of the article. In the opinion by Mr. Justice Hughes, page 506, he says:

> I take it to be conceded that misbranding may cover statements as to strength, quality, and purity.

In the later case of *Seven Cases* v. *United States*, 239 U.S. 510, Mr. Justice Hughes, writing the opinion for the court, said at page 517:

> The fact that the amendment is not limited, as was the original statute, to statements regarding identity or composition (*United States* v. *Johnson*, 221 U.S. 488) does not mark a constitutional distinction.

As a result of these judicial expressions it is at least doubtful whether statements merely false or misleading are prohibited by the act if they relate to matters other than identity or composition. But it is unnecessary to decide this point in this case, in view of the conclusion above reached which excludes consideration of the booklet with respect to merely false or misleading statements. The exceptions to the third paragraph of the libels must also be sustained.

False and fraudulent claims. The fourth paragraph alleges that certain statements on the cartons and labels of the bottles and also in the booklet regarding the curative and therapeutic effect of the drug are:

> false and fraudulent, in this, that the article contains no ingredients or combination of ingredients capable of producing the effects claimed, and that the same were applied to said article knowingly or in reckless and wanton disregard of their truth or falsity; so as to represent falsely and fraudulently that the article was in whole or in part composed of or contained medicinal ingredients effective for the diseases and conditions named therein.

The exception to this paragraph is based on the contention that the term "fraudulent" as contained in section 10 of the Code, title 21 (above quoted), means "actual intent to deceive"; and although the libel alleges the statements are both "false and fraudulent", yet it nevertheless narrows the statutory phrase by the expression "or in reckless and wanton disregard of their truth or falsity," and that as so narrowed they are not within the act which, as construed by the Supreme Court, requires "an actual intent to deceive", and therefore it is argued that this paragraph of the libel is legally insufficient. On this point the court in the case referred to, *Seven Cases* v. *United States*, 239 U.S. 510, 517, said:

> It was, plainly, to leave no doubt upon this point that the words "false and fraudulent" were used. This phrase must be taken with its accepted legal meaning, and thus it must be found that the statement contained in the package was put there to accompany the goods with actual intent to deceive—an intent which may be derived from the facts and circumstances, but which must be established.

The point here presented is, I think, a nicety in pleading rather than one of substantial trial importance. The jury in this case would, of course, be instructed that the false and fraudulent statements relied on by the Government must be of such character that the jury could infer from them an actual intent to deceive. It is to be noted that the libels do expressly allege that the statements were false and fraudulent (in the language of the statute), and also allege that the false and fraudulent statements made in reckless and wanton disregard of their truth or falsity were effective to represent falsely and fraudulently that the article was "in whole or in part composed of or contained ingredients or medicinal agents effective for the diseases and conditions named therein." The narrow question of pleading thus presented is whether false and fraudulent statements made "in reckless and wanton disregard of their truth or falsity", and with the effect of false and fraudulent representation in fact, are within the act. As said by the Supreme Court, "the phrase 'false and fraudulent' must be taken with its accepted legal meaning." The accepted legal meaning of the term "fraudulent" includes false statements made in reckless and wanton disregard of their truth or falsity. *Cooper* v. *Schlesinger*, 111 U.S. 148; *Lehigh Zinc & Iron Co.* v. *Banford*, 150 U.S. 665; 26 C.J. Title "Fraud", section 40 bb., page 1112. Under this act libels or informations or indictments similarly worded have been held sufficient. *Eleven Gross Packages* v. *United States*, 233 Fed. 71 (C.C.A. 3d); *Simpson* v. *United States*, 240 Fed. 841, 843 (C.C.A. 6th); *United States* v. *23 1/12 Dozen Bottles*, 44 Fed. (2d) 831 (D.C.Conn.), except that the libels in those cases alleged that the false and fraudulent claims were made "knowingly and [instead of "or"] in reckless and wanton disregard of their truth or falsity." But the approved charge in 233 Fed. page 74, was: "If you believe from the evidence that any one of the therapeutic claims * * * was false and was made by the claimant with a reckless and wanton disregard as to whether it was true or false, you may find a verdict for the Government." The use of the word "or" instead of "and" in the libels in this case is emphasized as a defect by the claimant. As a matter of pleading, I think it would have been preferable in this case to use "and" instead of "or", in which event the proof would have been sufficient if it had shown the statements were made knowingly and recklessly, etc., or knowingly or recklessly, etc. Clearly, if false and fraudulent statements were made

knowingly, which I interpret to mean with knowledge of their false and fraudulent character, there could be no question of the sufficency of the proof. And likewise, the accepted legal meaning of "fraudulent" includes statements not based on knowledge and made with reckless and wanton disregard of their truth or falsity, for statements so made necessarily exclude the idea of good faith, or honest belief in the truth of the statements, or any reasonable ground for believing them to be true. See also *Erwin* v. *Jackson* (C.C.A. 4th) 22 Fed. (2d) 56, 57; *Knickerbocker Merchandising Co.* v. *United States* (C.C.A. 2d) 13 Fed. (2d) 544, 546; *Fidelity & Deposit Co.* v. *Drovers State Bank* (C.C.A. 8th) 15 Fed. (2d) 306, 308.

For these reasons, the exceptions to the fourth paragraph of the libel are hereby overruled.

The cause having come on for trial, the court, at the conclusion of the testimony, delivered the following instructions to the jury.

CHESNUT, *District Judge.* Mr. Foreman, and Gentlemen of the Jury: I congratulate you that you have now reached the final stages of this long litigation. You have been listening, I have noted, very attentively to the testimony in this case for the past 3 weeks. You may have found some compensation for your arduous public service in the interest of the subject matter covered by the testimony and in the consciousness that you are dealing with a case which involves very important issues. The direct effect of your verdict will relate only to the condemnation or release of the particular bottles of the proprietary medicine labeled "B. & M." which the Government is seeking to condemn in this proceeding. But, according to the contentions of both parties respectively, although for widely different reasons, your verdict will probably indirectly affect the health and possibly even the lives of many persons. Therefore, the verdict that you render in this case is one of considerable importance and is worthy of your very best consideration in order that you reach a right conclusion.

In order to be of what assistance I can to you in reaching your verdict, it now becomes my duty to instruct you as to the law of the case and to make some summation of the testimony submitted by the adversary parties in support of their respective contentions. At the outset, let me make it plain to you what are the respective duties and responsibilities of the judge and the jury in the case. It is my responsibility to state to you the governing and controlling law of the case. It is your duty and responsibility to determine the facts of the case. What I say to you as to the law should be accepted by you as controlling, as that is my responsibility only. On the other hand, the determination of the facts is solely your responsibility and anything that I may say in this charge with respect to the facts is to be regarded by you as purely advisory and not in any way controlling of your own determination of what are the facts of the case. In other words, but more briefly, the court determines the law for you, and you determine the facts for yourselves. The summation of any reference to the testimony by me are merely as an aid or assistance to you in a review of the case. If I express any view as to the facts or as to any part of testimony or seem to do so, you are entirely at liberty to reject that view and substitute your own determination of the facts. But when you have determined for yourselves what are the controlling facts in

the case, your verdict is properly arrived at by applying the law which I determine, to the facts which you determine. This is the usual and obligatory practice of this court in all cases, including this one.

Now first let me explain to you the nature of this proceeding. It is brought under the statute passed by Congress originally in 1906, based on the power of Congress given by the Constitution of the United States, to regulate commerce between the States. The law is known as the Federal Food and Drugs Law and is to be found in title 21 of the United States Code. This act was passed by Congress after many years of public discussion and the underlying purpose was to make unlawful interstate transactions in impure foods and drugs, and incidentally the scope of the law included a prohibition of the facilities of interstate commerce to food and drugs which were "misbranded" and thereby tended to mislead or deceive the public. The section of the statute with regard to misbranding as originally included in the act of 1906, as construed by the Supreme Court of the United States in the case of *United States* v. *Johnson* (221 U.S. 588), was aimed only at false statements as to the identity of the article, possibly including its strength, quality, and purity, and not at statements as to its curative effect. In consequence of this decision it was felt that the law was not sufficiently broad to protect the public, and therefore on June 21, 1911, President Taft (afterwards Chief Justice of the Supreme Court) sent a message to Congress advising an addition to the law in which he said in part:

> In my opinion the sale of dangerously adulterated drugs, or the sale of drugs under knowingly false claims as to their effect in diseases, constitutes such an evil and warrants me in calling the matter to the attention of Congress. Fraudulent misrepresentations of the curative value of nostrums not only operate to defraud purchasers, but are a distinct menace to public health. There are none so credulous as sufferers from disease. The need is urgent for legislation which will prevent the raising of false hopes of speedy cures of serious ailments by misstatement of facts as to worthless mixtures on which the sick will rely while their disease progresses unchecked.

I take this quotation from the charge of Judge Morris in the New Hampshire case.

As a result of this message Congress passed an amendment to the original Food and Drugs Act, known as the Sherley Amendment, so that the law (U.S.C.A., title 21, sec. 10) in this respect now reads as follows:

> An article shall be deemed to be misbranded * * * in case of drugs * * * if its package or label bear or contain any statement, design, or device regarding the curative or therapeutic effect of such article or any of the ingredients or substances contained therein, which is false and fraudulent.

Other provisions of the act authorize proceedings by the Government to seize and condemn misbranded drugs which have been shipped in interstate commerce. The proceeding is called a libel for condemnation of the offending article.

In these particular cases which you are now trying, the Government seized certain bottles of an article of drugs, labeled in part "B. & M.", here in Baltimore and on August 21, 1931, filed in this court its libel to condemn the articles, in which it is alleged in paragraph 4:

> That certain statements borne on the labels of said cartons and borne in the labels of said bottles and certain further statements appearing in said printed booklet regarding the curative and therapeutic effect of said article are false and

fraudulent, in this, that the article contains no ingredients or combination of ingredients capable of producing the effects claimed, and that the same were applied to said article knowingly or in reckless and wanton disregard of their truth or falsity so as to represent fraudulently and falsely that the article was in whole or in part composed of or contained ingredients or medicinal agents effective in the diseases named therein.

The particular statements complained of are set out in an exhibit marked "B" filed with the libel and consisting of labels on the bottles and the cartons containing them, and also for the most part, of the statements in the booklet which was enclosed in the carton around the bottle.

When you retire to consider your verdict you will receive from the clerk, and take with you to your jury room the libel papers filed by the Government in the two consolidated cases which are now on trial. I call to your attention that paragraphs 2 and 3 of the libel set out additional grounds for the claim of condemnation of the drugs, based on other alleged violations of the act but you should give no consideration to these paragraphs 2 and 3 of the libels because after argument of counsel I have determined as a matter of law that the grounds alleged in paragraphs 2 and 3 are insufficient in this case and therefore, these particular grounds of condemnation are out of the case and are not submitted in any way for your consideration. You are to limit your consideration to the ground of condemnation set up in paragraph 4 of the libels which I have already read to you.

After the bottles of "B. & M." involved in these cases were seized by the Government, the manufacturer, the F. E. Rollins Co., a corporation of the State of Massachusetts, intervened in the case as claimant and filed an answer in opposition to the condemnation in which it stated that it was the manufacturer, the shipper, and the owner of the bottles of "B. & M." and of the containers thereof, that it denied that the drug is misbranded and denies that the statements on the labels of the cartons and on the bottles and in the booklets are false and fraudulent. The answer admits that the articles were transported in interstate commerce.

The nature of this proceeding is not exactly like the ordinary case, either civil or criminal, which juries are called upon to try. The ordinary civil case tried by a jury is one where the plaintiff is seeking to recover a sum of money or other property from the defendant. The ordinary criminal case is one where the Government proceeds by indictment or information against the defendant and where, in the event of a conviction, there is a penalty by way of fine or imprisonment imposed. But the proceeding in this "B. & M." case differs from the ordinary civil or criminal case tried by a jury in that it is not a proceeding to impose any monetary damages as in a civil case or any fine or imprisomnent as in a criminal case, but only a proceeding to condemn and forfeit the particular articles seized. The manufacturer of these articles, in accordance with the established practice, is permitted to, and in this case has, come into court and claimed the articles and denied that they are subject to forfeiture or condemnation. It results, therefore, that in this particular case the two parties to the case are not called plaintiff and defendant but one party is the Government of the United States seeking to condemn the articles, and the other party is called the claimant who is opposing the condemnation. The nature of the case, therefore, is a civil case

between these two adversary parties. If you should find for the Government, your verdict would so state and the direct effect is the condemnation of the articles and their destruction or other disposition in accordance with the provisions of the statute. And if your verdict should be in condemnation of the articles, they might, upon order of court and the payment of costs of these proceedings and the execution and delivery of a good and sufficient bond to the effect that the articles shall not be sold or otherwise disposed of contrary to the provisions of the Food and Drugs Act, or the laws of any State or Territory, be delivered to the owner thereof. You will see, therefore, that the main purpose of this proceeding on the part of the Government is not primarily to acquire any property but to prevent the sale of bottles of "B. & M." contrary to law. The essential nature of the case, therefore, is that this is something in the nature of a test case in which the Government is seeking to condemn the practice on the part of the manufacturer of selling this drug in interstate commerce under the alleged misbranding. But from the standpoint of the claimant the case is also indirectly of much greater importance to it than the mere condemnation of the particular bottles of "B. & M.", in that it is said the condemnation of these bottles would in principle establish a decision which would in substance destroy the life of the business.

Now to come more directly to the exact issues of fact which you are to decide in this case, I point out to you that to establish its contention the Government must prove to your satisfaction by a preponderance of the evidence, that is, by the more weighty evidence looking both to quantity and quality thereof, two things, as follows: (1) That the articles were shipped in interstate commerce. This is admitted by the claimant so that it need give you no further concern. (2) That the representations contained on the labels of the cartons and on the bottles and in the booklets, or some essential part thereof, as contained in exhibit B filed with the libel and above referred to, are false and fraudulent.

The exact issue of fact, therefore, that you have to determine in this case, and the only issue of fact so to be determined, is whether these bottles of "B. & M." are falsely and fraudulently misbranded. But I call to your particular attention that the Government does not establish its case here unless they prove to you that the alleged misbranding is both false and fraudulent. It is not sufficient for the Government merely to prove that the branding is false. It must also prove that it is fraudulent because that is the requirement of the Sherley amendment to the Food and Drugs Act which I have above quoted to you with respect to misbranding which relates to the curative and therapeutic effects of the drugs.

Now you should separately consider in this case all the testimony submitted both for the Government and for the claimant with respect to these two questions as to whether, first, the branding is false, and secondly, if so, is it also fraudulent. Somewhat different considerations apply to these two alleged facts. It is possible that you may reach the conclusion that the branding is false but not fraudulent. If so, then your verdict should properly be for the claimant. But if you reach the conclusion of fact that the branding is both false and fraudulent, then your verdict should be for the Government.

I will make some reference to the testimony in the case dealing on the question as to whether the branding in this case, or some essential part thereof, is false—that is to say, is the representation made to the public on the labels of the bottles and cartons and in the booklets, incorrect and erroneous? Here the matter is to be considered apart from the question as to whether it is also fraudulent. A misrepresentation may be made either innocently or fraudulently; that is, it may result from misinformation or accidently or inadvertently or even from negligence. It may be false but nevertheless honest. It is in this sense that we are dealing with the word "false" as applied to the subject matter.

Now the first thing for you to determine is what, in substance, is the claim or representation made for "B. & M.", prominently displayed on the labels of the bottles and the cartons containing them and on the outside cover of the booklet in the following: "B. & M. Formerly called B. & M. External Remedy For External Applications, Inhalations Antiseptic, Stimulative, Soothing, Penetrative, Volatile, Alkaline In the treatment of Tuberculosis, Pneumonia, Bronchitis, Influenza, Colds, Croup, Rheumatism, Lumbago, Acute and Suppurative Skin Infections."

It is entirely clear, therefore, that "B. & M." is conspicuously recommended to the public as a remedy for all these numerous diseases. The question at once arises as to what is the fair meaning of this representation. The word "remedy" as thus used is to be taken in its common and ordinary meaning—that is to say, in the meaning that would naturally be attributed to it by the public and particularly those persons who whould be inclined to purchase and use it if they were suffering, or thought they were suffering, from any of the diseases mentioned. The primary signification of the word "remedy" as defined in Webster's New International Dictionary, edition of 1932, is as follows:

> That which relieves or cures a disease: any medicine or application which puts an end to disease and restores health.

The word "remedy" does not import a guarantee of a cure but it does necessarily imply as here used a substantial curative tendency with respect to the diseases mentioned. The interior text of the booklet, on page 5, states as follows, under the caption of "What we claim for 'B. & M.' "

> We claim that B. & M. alleviates much suffering and that it has remedial and therapeutic effect in appropriate cases of various afflictions in which we recommend its use. * * * We do not claim that B. & M. will make anyone live forever or that it will have remedial effect in every case.

In other places the booklet, in support of the recommendations of "B. & M." cites numerous specific instances of cures or substantial recoveries of patients suffering from the diseases mentioned as a result of the use of "B. & M." Taking the booklet as a whole and bearing in mind the nature of the subject matter and the purposes for which the booklet is written, it seems entirely reasonable to conclude that the recommendation of "B. & M." as a remedy for these diseases was designed to be understood by the public and would naturally be understood by the public in the ordinary meaning of the word "remedy" which, as already defined, is that it has curative tendencies for the diseases for which it is recommended. I have been asked by the claimant

in this case to instruct you that the recommendation of "B. & M." as a remedy means no more than that it has some palliative or alleviative effect in the treatment of the diseases; that is to say, the word "remedy" as here used implies no more than that "B. & M." will do some good in the use of the diseases, as, for instance, by relieving or abating some of the symptoms accompanying the disease, such as pain and physical suffering from the disease. But I think you can very reasonably find from the booklet that the representation to the public goes beyond this and is, in effect, a representation that "B. & M." has a substantial curative effect or tendency towards arresting the disease and restoring the patient more or less fully to normal activity. However, you have each received and read, or will have opportunity to read, the booklet as a whole and to the extent, if any, that the representations made on the labels and in the booklet as a whole are uncertain or doubtful you can draw your own conclusions as to what is the substantial representation therein made to the public reading and interpreting the language used in its ordinary and common acceptation.

Now when you have determined what is the fair meaning and import of the representations made with respect to the use of "B. & M." for the diseases mentioned, you should ask yourselves whether, as a result of consideration, of all the testimony in the case, the representations so made to the public are true or substantially false. For your convenience only, I will now make, as far as I possibly can in view of the great volume of the testimony in this case, a succinct summary of the more important testimony submitted on both sides bearing on this issue of fact. On behalf of the Government you have heard the testimony of numerous medical and scientific witnesses, which in effect purports to give you practically the whole field of knowledge and scientific and professional consensus of opinion on this issue, and in substance it is that there is no basis in medical or other pertinent science in support of the claim that "B. & M." is a remedy for the diseases mentioned, or any of them. And the opinions and information thus given to you are supported by the respective witnesses from the fullness of their knowledge and personal experience, and the reasons for their statements have been given to you at great length. These witnesses include experienced analytical chemists, a competent and experienced doctor of medicine who is specializing in the field of pharmacology, which is the science or profession dealing with the effect of drugs upon animal and human bodies, physicians in general practice, and specialists in the study and treatment of tuberculosis. Most of these witnesses are graduates of, and some are now professors in their respective subjects in, the best known medical colleges and universities of this country, including the Harvard Medical School, the Johns Hopkins University, and the University of Maryland. To recall to your recollection only a few, these witnesses included, among others: Dr. Geiling, professor of pharmacology in the Johns Hopkins Medical School; Dr. Grollman, assistant professor of physiology, Johns Hopkins University; Dr. L. L. Barker, former professor of medicine, Johns Hopkins University, and for many years widely engaged in consulting and bedside practice of general medicine in Maryland and elsewhere; Dr. James H. Sever, professor of orthopedic surgery, Harvard University; Dr. Victor F. Cullen, superintendent

Maryland State Tuberculosis Sanitarium, Sabillasville, Md.; Dr. John B. Hawes, graduate of Harvard Medical School, specializing in tuberculosis; Dr. Floyd, also of the Harvard Medical School, specializing in tuberculosis and connected with the Boston Health Department; Dr. Lawrason Brown, graduate of Johns Hopkins University, for many years superintendent of Tuberculosis Hospital, Saranac, N.Y.; Dr. Gordon Wilson, professor of medicine, University of Maryland; Dr. Samuel Wolman, graduate of Johns Hopkins Medical School, and for many years specializing in tuberculosis.

The substance of the testimony of these witnesses, if believed by you, is that there is no known medicine which has or could possibly have the substantial curative effect claimed for "B. & M." for the numerous and several diseases recommended or for any of them, and in many cases the witnesses testify that they are not giving merely their individual opinions based on their own scientific and professional knowledge and experience, but are stating the consensus of medical opinion upon the subject. The chemical analysis of B. & M. shows that it contains 50 percent water, 40 percent of turpentine oil, 5 percent ammonia gas, and small quantities of proteins (egg), carbolic acid, thiosinamine, and some salicylates. These witnesses were informed of the constituent element or drugs composing "B. & M." and were familiar with the several drugs and the effect thereof as applied and used for the various purposes in medicine, and expressed the opinion that the drugs either separately or in the combination in which they are found in "B. & M." could not possibly have the effect claimed. Two of the witnesses specializing in tuberculosis, Dr. Cullen and Dr. McMurray, of the Davidson County Tuberculosis Hospital at Nashville, Tenn., testified that at the request of the Department of Agriculture a year or two ago they experimented with the use of B. & M. in the treatment of patients suffering from tuberculosis at their hospitals and found no beneficial effects whatever in any of the cases. Counsel for the claimant criticizes the adequacy and sufficiency of the use of B. & M. as actually used in these experimental cases. You have heard the testimony of these witnesses and will yourselves be the judges of the fairness and sufficiency of the tests made by them of B. & M.

The testimony submitted on behalf of the claimant in this case in support of the remedial effect claimed for B. & M. consists of the testimony of Dr. Martin, who is the only physician testifying for the claimant, and the testimony of Mr. Rollins, chief executive officer of the claimant, and of Mr. Johnson, the president and counsel in this case for the B. & M. company, the latter testifying to personal experience of B. & M. as to a few of the less serious diseases mentioned, and the testimony of certain laymen who were suffering from, or thought they were suffering from, some of the diseases mentioned. The reports and studies of Fenwick and Pease are not to be considered in this connection, as they are not supported by any legal evidence as to the statements or conclusions therein. You should carefully consider all this testimony submitted on behalf of the claimant and give to it such weight as you think it is entitled to in view of all the testimony in the case. You have seen and heard Dr. Martin testify. He is not a specialist in tuberculosis but is a Boston physician engaged in general practice. For many years he has been regularly on an annual salary of, at first, $600, and now $900, a year from the claimant corpora-

tion for medical advice which is given mainly in the form of correspondence with customers using or proposing to use B. & M. Dr. Martin testified to numerous and very remarkable cures effected by B. & M. in his personal practice. You heard his testimony as to what knowledge he had of the constituent drugs used in B. & M. You may have thought it was not very full or accurate. He was unable to submit any definite statement of how B. & M. accomplishes the results which he says he has noted. He submits a tentative theory of his own which finds no support in the whole field of medicine and scientific knowledge as testified to by the Government witnesses. He is the only medical witness who undertakes to justify the claims made for B. & M. You should carefully consider his testimony and give it such weight as you think it is entitled to. You should also consider the testimony of Mr. Rollins, bearing in mind that he is, of course, the most directly interested party in this controversy and the fact that he has had no scientific or medical education. He testifies to very many remarkable cures made by B. & M. according to his own personal observation. He has also submitted his theory and belief as to how B. & M. works and accomplishes the wonderful results claimed by him for it. It is fair to him that you consider that as a layman he has, of course, had the greatest opportunity to observe the use of B. & M. in actual experience. He, more than anyone else, is in direct contact with the users of B. & M. Whether he is competent to diagnose and correctly interpret the diseases which he has mentioned in the cases of various patients and to reasonably interpret the effect of the use of B. & M. in the several cases, is to be determined by you and you can also consider, in weighing his testimony, the fact of his great personal interest in this controversy. You should also consider for whatever weight you think it may have, the testimony of the other laymen who, as witnesses, have testified to the effect they have noted in the personal use of B. & M. in various diseases from which they were suffering or thought they were suffering. About 20 lay witnesses testified for the claimant in this case as to various beneficial and curative effects from the use of B. & M. In connection with their testimony you can properly consider whether, in view of their lack of medical knowledge, they were competent to properly diagnose their own cases and to correctly interpret the effect of the use of B. & M. You can also consider the testimony submitted by the Government in rebuttal with respect to many of these cases in which tuberculosis was the disease dealt with, which is to the effect that the witnesses referred to, who thought they had been cured from tuberculosis by the use of B. & M., according to the testimony of Dr. Wolman, the tuberculosis expert who examined them during the trial, are still suffering from tuberculosis; and in some cases the Government has offered death certificates showing that persons said to have been cured of tuberculosis have shortly thereafter, in fact, died from tuberculosis.

Very shortly summarizing the effect of the conflicting testimony on this issue, it is that the whole consensus of medical opinion is that B. & M. is substantially worthless in the treatment of the diseases mentioned; and as against this consensus of medical opinion the testimony of the claimant in support of the claims made for the remedy consists only of the testimony of Dr. Martin and the lay witnesses who testified from personal experience. This latter testi-

mony the claimant refers to as empirical knowledge as contrasted with the scientific knowledge on the part of the Government. The claimant seeks to justify its representations to the public principally on this empirical knowledge. But you may consider that this so-called empirical knowledge with respect to tuberculosis is contradicted by some empirical and scientific knowledge contained in the testimony of Drs. Cullen and McMurray who used B. & M. in some 40 cases of tuberculosis without beneficial result. You may consider that the results of the use of B. & M. as observed by a competent and experienced specialist in tuberculosis are more valuable than the testimony of laymen based on their own untrained experience. And in this connection reference be made to the statement in the claimant's booklet on page 5 as follows:

> We expect better results invariably where the use of B. & M. is combined with other care and treatment by a skillful, conscientious, and open-minded physician.

You can, of course, consider whether Drs. Cullen and McMurray are skilled, conscientious, and open-minded physicians.

In reaching your determination on the issue of fact as to whether the claims made for B. & M. are false, you are, of course, not bound to accept the consensus of medical opinion as stated by the Government's witnesses. And you are not to be governed in any way in your decision by the fact that the United States, as represented by the Department of Agriculture, has decided to prosecute this proceeding. On the contrary, you are entitled fully to consider what weight the claimant's testimony on this issue has with you. If you reach the conclusion that the matter is one really of two schools of thought and that there is very substantial basis for the claims made and that the whole matter at issue is really one of controverted opinion, then you should properly find for the claimant on this issue because where there is a substantial difference of opinion between people who on reasonable bases think differently about a matter, that difference of opinion only cannot be made the basis of a finding that the claims for remedy are false. In any event the Government having brought the charge has the burden of proving to your satisfaction by a preponderance of the evidence that the representations made are in fact false. I point out to you, however, on this issue, that there is here no mere conflict of opinion between two schools of medicine. The difference of opinion here is not between two groups of scientists holding opposing views, but (with the exception of the testimony of Dr. Martin for what value you attribute to that) the difference is between a practically nation-wide scientific knowledge on one side, and personal observation of a comparatively few laymen on the other side. I think you can very reasonably reach the conclusion in this case on this issue that after making all allowance for the good faith of these lay witnesses (which on this issue for the sake of the particular inquiry may be assumed) there still remains a field in which statements as to curative properties may be downright falsehoods and in no sense mere expressions of judgment. But however that may be, the issue is for you to determine from all the testimony in the case, giving the respective contentions such weight as you think they are entitled to.

If you reach the conclusion that the representations as to B. & M. are substantially true, then your verdict should properly be for the

claimant. But if you reach the conclusion that these claims are substantially false, then your next inquiry must be whether, in addition to being false, they are also fraudulent, because it is only in the event you find that the claims as made are both false and fraudulent that you can properly find a verdict for the Government and against the claimant.

And here I must instruct you further as to what is the legal meaning of the word "fraudulent" as here used. I have pointed out to you that the Food and Drugs Act as originally passed and as construed by the Supreme Court did not prohibit even false branding of drugs in matters relating to their curative or therapeutic effects, and to repair this omission Congress in 1912, by what is known as the Sherley amendment, amended the law to prohibit misbranding of drugs with respect to their curative or therapeutic effects, and prohibiting such misbranding in interstate commerce if the misbranding was false and fraudulent. This amendment of the law came before the Supreme Court of the United States for consideration in 1915 in a case entitled "*Seven Cases* v. *United States*," reported in 239 U.S. 510. The Supreme Court, by Mr. Justice Hughes (now Chief Justice), sustained the validity of the amendment and in discussing the law plainly explained the effect of the amendment and the force of the word "fraudulent" as therein contained. It was there said:

> This phrase must be taken with its accepted legal meaning, and thus it must be found that the statement contained in the package was put there to accompany the goods with actual intent to deceive—an intent which may be derived from the facts and circumstances, but which must be established. That false and fraudulent representations may be made with respect to the curative effect of substances is obvious. It is said that the owner has the right to give his views regarding the effect of his drugs. But state of mind is itself a fact, and may be a material fact, and false and fraudulent representations may be made about it, and persons who make or deal in substances, or compositions, alleged to be curative, are in a position to have superior knowledge and may be held to good faith their statements. * * * It cannot be said, for example, that one who should put inert matter or a worthless composition in the channels of trade, labeled or described in an accompanying circular as a cure for disease when he knows it is not, is beyond the reach of the law-making power. Congress recognized that there was a wide field in which assertions as to curative effect are in no sense honest expressions of opinion but constitute absolute falsehoods and in the nature of the case can be deemed to have been made only with fraudulent purpose.

It is clear from this pronouncement of law by the highest authority that to find the actions of the claimant fraudulent in this case you must find that they involved bad faith. And it is equally true that bad faith may be inferred from all the circumstances in evidence. In this case the claimant is a corporation. As such it is, of course, an artificial being created by the law. But in determining whether its representations to the public are fraudulent you must look to the knowledge or lack of knowledge of its several officers who acted in the matter of making these representations to the public. If some of these officers knew, or must be held from the circumstances to have known, that the representations were substantially untrue, then the corporation has acted in bad faith and you can find in that event that the representations were both false and fraudulent. It is not a sufficient defense to the claimant in this respect to establish merely that one or more of these officers has an honest opinion as to the truth of the representations. If any of them who acted in the matter within the scope of their authority and who had a substantial part in the mak-

ing of the representations to the public did not honestly believe in the representations and had information and knowledge that the representations were untrue, you may find that the claimant corporation did not act in good faith but fraudulently. Now it is a sufficient defense to the corporation to show that one of the officers, to wit, Mr. Rollins, alone had a bona fide opinion as to the representations; nor is it a conclusion on this issue that Mr. Rollins states that he does not believe in the claims as made. You have a right to look at all the facts and circumstances in the case to determine whether the representations as made were in fact known to be false or if not actually positively known to be false, then were made in reckless disregard of the truth which could have been ascertained upon reasonable inquiry from authoritative and reliable sources. Fraud in its very nature is difficult to define in any all-inclusive way. Here we are dealing with fraud in its relation to the state of mind of the officers of this claimant corporation. The fact that they say they were acting in good faith does not conclude the matter. You have a right to examine and determine from all the circumstances whether their statement as to their opinion is to be accepted and believed by you. If you find that they were in fact acting in good faith and with no intention to deceive the public, then you should find for the claimant in this case. If, however, you find that the statements made by them were made with knowledge of their falsity, or recklessly made without reasonable grounds for making them, in defiance of known authoritative information which was reasonably available to them and the failure on their part to make said reasonable inquiry, then you may find that they were acting in bad faith and fraudulently. The claimant should not be convicted of fraud merely because it advocates the theory of medicine which is not endorsed by the medical profession but it is equally true that when he fraudulently represents a medicine as a remedy he cannot escape the consequences of his fraud by the mere fact that someone may honestly believe in the theory that he fraudulently and dishonestly exploits. The fact, therefore, if you find it to be so, that numerous persons who are laymen believe in the efficacy of this remedy is not a justification for the claimant in this case if its officers did not act in good faith. It is for you to determine from all the evidence in the case whether the statements of [or] any of them are false and fraudulent. If you believe that the drug is so absolutely worthless, for example, for tuberculosis, pneumonia, bronchitis, influenza, or any of the diseases for which it is recommended to have a curative effect and that the claimant must have known it, then you would be justified in finding that the statement with reference to such disease or diseases is both false and fraudulent.

The accepted legal meaning of the term "fraudulent" includes false statements made in reckless and wanton disregard of their truth or falsity. Therefore if you believe from the evidence that any one of the therapeutic claims made for B. & M. was false and was made by the claimant with a reckless and wanton disregard as to whether it was true or false, you may find a verdict for the Government.

As I have said, you are to determine in the light of these principles of law whether the claimant has acted fraudulently or in good faith in the matter of these representations. You must consider all the testimony in the case on this point. It has taken a very wide range and comprehends the whole history of the relation of Mr. Rollins and the

claimant corporation to this medicine. It is impossible to review it in detail but I shall endeavor to make a condensed summary or outline of the more important facts of the case bearing on this issue of fraud or good faith. And I think they will be clearer in perspective if they are stated largely chronologically.

Mr. Rollins had no relation to B. & M. until after about 1913. For some years prior thereto he had been a court stenographer in Massachusetts. He knew a man named McClelland who owned the formula for B. & M. McClelland invited Rollins to become treasurer for his company. From McClelland, Rollins learned that in McClelland's association with the race track he had met a Dr. Burns (whether Burns was a doctor of medicine or a veterinarian is not entirely clear from the evidence), from whom he obtained the formula. Mr. Rollins understood that Burns was a medical man, a Cleveland doctor, and had two formulas for liniment, one for horses and one for men. Apparently B. & M., which is a coined phrase named after McClelland and Dr. Burns, was being sold by McClelland to the public as a liniment and possibly for other purposes. Mr. Rollins says he used it on his hand for rheumatism which aided him in his court work as a stenographer. Later he used it on a member of his family for tuberculosis with very effective results. This member of his family was his daughter who has not testified in the case nor has there been any medical testimony as to her condition. I think that is true, although I am not absolutely certain about it. Mr. Rollins said he was impressed with the efficacy of the medicine and learned from personal experience of its beneficial effects in very serious cases of tuberculosis, rheumatism, pneumonia, etc. He thereupon began to acquire stock in McClelland's corporation and in a few years had bought out all the stock. The sale of the preparation to the public for a wide variety of diseases, including all those mentioned in this case and numerous others, principally including infantile paralysis, was continued. In 1920 Mr. Rollins' company, then known as the National Remedy Co., was prosecuted for false statements or misbranding in the Boston municipal court and found guilty on two counts out of many, and fined $10. The opinion of the municipal court judge has been produced in evidence and found in effect the good faith of Mr. Rollins in that case. The quotation from the opinion in that case is carried on page 22 of the booklet in this case. Reference was made by the judge to the testimony of a Mr. Philbrick as justifying the claimant in some of its statements in that case, with regard to the effect of the use of B. & M. by Mr. Philbrick for a disease with which he was alleged to be suffering. The Government offers evidence in this case that about a year later Mr. Philbrick died from another disease which is among those for which B. & M. is recommended. Mr. Rollins knew of this fact. The quotation from the opinion is still carried in the booklet without reference to the specific cause of death of Mr. Philbrick. In 1919 the Government filed a condemnation proceeding similar to this against B. & M. in the District Court of New Hampshire. The case was tried in December 1922. The jury found a verdict for the claimant. For reasons to be hereinafter stated, I must instruct you that the finding in this case is not conclusive in this present case nor a bar to its maintenance by the Government. It was, however, a finding that as of that date, to wit, 1919, the goods were not subject to condemnation either because the representations at that time were not false or fraudulent or neither

false nor fraudulent. The result of this decision was perhaps naturally to fortify Mr. Rollins's belief that he had been vindicated. He continued to sell the preparation to the public and while the financial returns had been smaller up to that time, they shortly thereafter very materially increased. In recent years the gross sales of the business have amounted to $130,000 to $140,000. In 1931 the amount was $110,000. The net profits have been approximately as follows: 1923, $5,000; 1924, $5,000; 1925, $10,000; 1926, $22,000; 1927, $7,200; 1928, $22,000; 1929, $8,000; 1930, $6,000; 1931, a loss of $13,000. If these figures are not accurate they can be corrected by counsel. That is in accordance with my notes.

In addition to this, Mr. Rollins' personal salary has varied from $1,200 to $10,000, and still in addition to this, since 1924, or 1925, the corporation has paid out extraordinary expenses for scientific investigations of nearly $100,000, and for legal expenses approximately $25,000.

In 1929 the Government filed another libel condemnation proceeding against B. & M. in this District Court of Maryland. After the case had been set for trial the Rollins company, which had intervened as claimant similarly as in this present proceeding, withdrew its claim and consented to a judgment of condemnation which was accordingly entered. At that time the claimant was represented by Mr. Johnson, now acting with Mr. Yost as trial counsel for the Rollins company. It was stated by Mr. Johnson that the reason for abandoning the test in that case was due to an unexpected discovery that there was a misstatement in the booklet, or claimant's literature, with regard to the percentage of the phenol coefficient (carbolic acid) present in the preparation and that this was due to an error made by one Fenwick, who was a pharmacist advising the Rollins company. It was, however, at that time pointed out to claimant's counsel that if the only change that was to be made was to correct this relatively minor error, another proceeding would promptly be brought and tried out on the full merits. Mr. Johnson then stated that it was the intention of his client to substantially revise its literature and claims so that there could be no cause for complaint by the Government and that steps would immediately be taken to accomplish this. Thereafter the Rollins company engaged the services of the Pease Laboratories at New York, a commercial laboratory said to be headed by Dr. Pease who is said to be a doctor of medicine and who has wide experience in dealing with the Department of Agriculture in matters of this kind. Claimant contends that it has substantially altered its literature and that the present booklet is very different in the claims made from that previously made. On the other hand, the Government contends that there is little substantial change in the claims as made in the respective booklets. You have both booklets before you and can consider this point for whatever value it may have to you in determining this issue of fraud or good faith. Mr. Johnson also had various interviews with representatives of the Department of Agriculture in which he endeavored unsuccessfully to obtain their approval of the new literature. They warned him before its publication that it would be unsatisfactory and that anyone issuing it would have heavy responsibility to justify it. Nevertheless new literature having been prepared or editorially supervised by Mr. Pease, was published and this proceeding has followed.

You are also to consider on this issue of fact that Mr. Rollins testifies that he endeavored in good faith in the early days of his relationship with B. & M. and his control of the preparation, to have it adopted by the medical profession and have it used in various hospitals and sanitariums. He says it was refused by practically all for different reasons but mostly he attributes the refusal to use it to the fact that it was a proprietary medicine and therefore he charges in substance prejudice or lack of good faith of the medical profession in not adopting it. And you should also bear in mind the testimony of Mr. Rollins that during all the years he has been selling B. & M. he has had numerous testimonials from people suffering with tuberculosis and other diseases testifying to the efficacy of B. & M. This, he contends, has fortified his own opinion as to its usefulness. During the New Hampshire trial of 1922 Mr. Rollins was fully advised from the testimony of numerous scientists and doctors that in their view the remedy was worthless. There was also testimony in the case from certain laymen as to its efficacy. In addition to this testimony, medical and lay, Mr. Rollins admits that he was generally advised by physicians from time to time that the remedy was worthless. He discredited their opinion as of no value because he contends that it was based on prejudice against proprietary medicines or ignorance as to what B. & M. would actually do. He has steadfastly maintained his own opinion about the matter. He reluctantly accepted some diminution of the extent of his claims as set out in the booklet now on trial as compared with previous editions. He maintains vigorously that he is entirely right in his claims for B. & M. and that the medical profession as a whole is entirely wrong. He refuses to give any weight to their views. He maintains his own opinion despite practically universal medical opinion to the contrary, seeking to justify his opinion of what he calls empirical knowledge that is derived from actual experience from the use of a drug.

You should also consider what is the weight and effect, if any, as bearing on this issue of good faith due to the fact that the Rollins company has in recent years paid nearly $100,000 for alleged scientific investigations to demonstrate the efficacy of B. & M. in accordance with Mr. Rollins' own views, or to establish scientifically similar views. In 1924 Mr. Rollins employed a man named Fenwick, now recently dead, who was a pharmacist, to study the effects of B. & M. scientifically. And it is said that Fenwick performed various experiments on animals and devised a special apparatus for the purpose of testing the germicidal effects of B. & M. This apparatus has been shown to you by one of the witnesses. It is referred to in the present booklet. Mr. Rollins states that he received voluminous reports from Fenwick from time to time and these reports, or some of them, have been offered in evidence. Mr. Rollins contends generally that his opinion is to some extent confirmed or justified by these reports. Mr. Rollins says that his company paid Fenwick for compensation and for disbursements over a period of several years, about $80,000 for this work. Mr. Rollins further admits that these scientific investigations as reported by Fenwick were not clearly understood by him. Some of the reports, or what purport to be copies thereof, have been offered in evidence. Their genuineness and other effect in this case, bearing on the issue of good faith alone, can be considered by you. It is not claimed that Fenwick had any medical experience or that

he experimented with the drug on human beings. The Government contends that Fenwick's experimental data is of no value whatever and could not reasonably have been relied upon by the Rollins company. While Fenwick was originally said to have been employed merely as a chemist by the Rollins company, it also appears that later he was called by the company its Director of Research, and the large sums of money paid him would seem to indicate that he was in a very substantial sense an employee and agent of the corporation. Whether, under all the circumstances, Mr. Rollins or his corporation was substantially justified in making their statements in reliance upon anything Fenwick had said or done is for your determination, bearing in mind all the circumstances of the case including those already specially referred to.

You will also bear in mind that the present booklet is said to have been prepared by Dr. Pease and a large amount of it, and particularly all of it under the head of scientific evidence, is the work of his laboratories based in part upon Fenwick's work and apparatus and that other parts of the booklet were under the editorial supervision of Dr. Pease. You can also consider the form and arrangement of the booklet in this case with respect to the matter in large type with reference to the treatment of various diseases and the so-called scientific evidence in small type. You can consider whether this scientific data thus arranged was for the purpose principally of being superficial impressions to the laymen or whether it has any real value to B. & M. with regard to the diseases for which it is recommended. In this connection you can bear in mind the testimony of Dr. Martin, claimant's medical adviser, that he does not understand the purport of the so-called scientific data and that in substance it was placed in the booklet, as he understood it, merely for advertising purposes and in effect that it really means nothing substantially to the laymen. You may possibly conclude that the effect of this arrangement of the booklet with reference to the so-called scientific evidence is to be impressive, rather than really informative. In this connection you can consider the testimony of the Government's witness to the effect that the scientific data is of no value as applied to the effects of B. & M. on the human being in view of entirely different conditions. All this has some bearing on the question of the good faith of the claimant in publishing the booklet. As to its weight in this connection you must be the judge of it.

Another consideration of possibly even greater importance in this case is the nature of the claim made for B. & M. and the suggestion, at least, in the booklet as to the belief of Mr. Rollins as to how it works. You should consider this as bearing on the issue of good faith and real belief on the part of Mr. Rollins in the light of much common knowledge with respect to tuberculosis which is one of the diseases prominently and conspicuously mentioned in the booklet and as to which much of the testimony has related. You have been told that the tuberculosis germ was discovered about 1881 and as applied to tuberculosis of the lungs, this germ fastens itself within the lungs and becomes encased in a waxy capsule. Medical testimony is all to the effect that there is no known drug which, taken either externally or internally, can penetrate within the lung encased as it is, in sufficient quantities to destroy it. And that therefore, there is no medical

remedy having any substantial curative effect for tuberculosis. The disease is widespread, is a great scourge, many people are infected with it, it is itself infectious and a great danger to the world. In recent years it is common knowledge that many millions of dollars have been spent in the treatment and cure of tuberculosis. Many hospitals have been established for the care of its patients. Much of this work has been charitable and philanthropic as well as governmental. Hundreds and thousands of physicians have been seeking for the best method of cure. Complete rest, nourishing food and similar treatment is the only effective remedy according to the established medical opinion. Now in the light of all this knowledge, you should consider what is the claim that is made by Mr. Rollins as to how B. & M. works as bearing on his good faith. He says in the booklet that he cannot prove how it works but that he believes it works by penetrating through the skin and to some extent by inhalation through the mouth and that it reaches the germs encased within the lungs and draws the poisonous bacilli out through the body and through the skin in the form of eruptions or blisters, from which the poisonous matter is discharged. He contends further that B. & M. is a remedy for any germ disease within the body except possibly brain diseases and that the remedy if used long enough and as directed and applied to the skin will penetrate through the skin and in some way reach the germs wherever they are in the body. But that this cannot be accomplished with diseases of the brain on account of the thickness of the skull. Furthermore, he says the eruptions on the body will appear only over the seat of the poisonous infections even though B. & M. is applied to other parts of the body. Medical testimony is to the effect that blisters on the body from the use of B. & M. result from the constituents of turpentine and ammonia in the substance. Now you will consider as bearing on the issue of good faith whether Mr. Rollins under all the facts and circumstances of the case honestly believes that the medicine will work this way. It is not sufficient for him or for other agents of the corporation merely to say that they believe it. The question is whether to find that they do honestly believe it. The theory advanced by Mr. Rollins is characterized in substance by medical witnesses as practically impossible. Dr. Geiling, eminent pharmacologist, testifying for the Government, says it is pure nonsense. Dr. Barker said the idea was purely medieval. Even Mr. Rollins admits he has no knowledge that the medicine does work in this way or what properties of the combination known as B. & M. are causative of this alleged result. He says it is a pure mystery to him but he knows it does so work. You will consider whether this claim which, after all, is the one that Mr. Rollins originally had and which he has persisted throughout the last 15 years, is made honestly by him and is honestly believed in by other agents of the corporation with regard to the claims made to the public, or whether under all the facts and circumstances the idea is so fanciful, unsubstantial, unsupported by known scientific information, that it is incredible that any reasonable man should actually believe it in the face of the fact that he also is perfectly well-informed as to the practically unanimous medical and scientific opinion to the con-

trary. In this connection you should also bear in mind, as said by the Supreme Court in the case from which I have quoted, that:

> Persons who make or deal in substances or compositions alleged to be curative are in a position to have superior knowledge and may be held to good faith in their statements.

You can also consider the fact that it is, of course, to the financial advantage of Mr. Rollins to make these representations to the public and that sufferers from diseases that are hard to cure naturally look for help from any source from which it is thought obtainable but they are naturally credulous and generally hopeful and eagerly receptive to suggestions as to cures when their doctors cannot themselves give them much hope.

You can also consider testimony in specific cases offered by the Government tending to show a lack of good faith with respect to certain particular points or statements in the booklet. Time will not permit an enumeration of these particular instances which the Government sets up as specific badges of fraud. The testimony with regard to most of them is conflicting and you should consider the testimony of the claimant with regard thereto as well as that of the Government. Reference may be made particularly to one conspicuous illustration involving the relations between Mr. Rollins and a Mrs. Merchant, to which several hours of testimony were devoted. Mrs. Merchant, you will recall, was a sufferer from tuberculosis and claimed to have been cured by the use of B. & M. Her testimony was included in one of the booklets and continued until 1927. It is a very comprehensive and thorough testimonial. Many people who were presumably prospective customers for B. & M. wrote to her about it. She replied to them. The correspondence consisted of possibly an average of several letters a day over a period of several years. Mr. Rollins was advised of this correspondence. During this time from time to time, he made presents to her aggregating in all over $1,100. He says that much of this was given purely as charity in her later years or when she again became ill and destitute. While she claims to have been cured of tuberculosis by the use of B. & M., the Government offers in evidence a death certificate showing that she died from pulmonary tuberculosis. Mr. Rollins disputes the accuracy of this cause of her death and attributes it to cancer of the rectum. He says her attending physician told him that that was the cause or one of the causes of her death. In the close of the correspondence Mr. Rollins suggested to Mrs. Merchant's son that he supposed the cause of death was cancer of the rectum and that it would be detrimental to his company if the real cause of death was tuberculosis. He enclosed a check to the son as a gift. The implication from all this should have your consideration. Mr. Rollins contends he was acting throughout in entire good faith.

Another case that has been specifically mentioned by the Government as indicative of fraud but denied in testimony submitted by the claimant, is that of Agnes Lovejoy who was referred to by name in some of the earlier booklets as cured of tuberculosis of the joints by the use of B. & M., which disease is also referred to specifically in the present booklet, and Mr. Rollins says that the Lovejoy case, although not specifically named in the booklet, was in his mind as a basis for that recommendation. But the Government contends that the Love-

joy case was the one which was involved in the Boston trial and the claimant continued to make statements of the case after Dr. Sever testified that Agnes Lovejoy was cured before discharge from the hospital and before the use of B. & M. The present booklet refers to certain cures of tuberculosis treated with B. & M. by Mrs. Hammond. The Government has offered testimony tending to show that B. & M. had no substantial part in the treatment of the majority of these persons so referred to. This again is disputed by the claimant and the testimony is conflicting. The method of treating customers of B. & M. by correspondence is advanced by the Government as indicative of reckless actions in the treatment of diseases by the claimant and as suggestive of lack of good faith by reason of its recklessness. You can also consider that in the early days around 1915, Mr. Rollins stated that B. & M. was cordially recommended for various diseases by three doctors whom he named. Two are now dead and one called as a witness by the Government has testified that Mr. Rollins has either grossly exaggerated or entirely misstated the effect of his statements to him, Mr. Rollins, as to the effect of the use of B. & M. His testimony is categorically denied by Mr. Rollins. The case of a Mrs. LaPierre as alleged to have been cured of tuberculosis by the claimant is cited despite the fact that her death certificate shows she died of tuberculosis May 3, 1914. Mr. Rollins disputes this.

You can also consider the fact that Mr. Rollins and Mr. Johnson, to a lesser extent, after hearing all the medical testimony in this case maintain their position and their opinions and in substance give no weight or effect whatever to the Government's testimony as affecting their views. Arguments in favor of their respective positions over this are made by both parties. The Government contends that such an attitude is evidence of reckless disregard of the very highest and most authoritative and informed medical opinion without adequate basis for rejection of it. The claimant relies on the circumstance as indicative of their persistent and consistent good faith. The jury can make their own inferences in this respect. The jury may also consider what inferences are to be drawn from the failure of the claimant to call Dr. Pease as a witness in this case. As he has not been called as a witness it is clear that the jury cannot consider the scientific work that he is said to have done in support of the claimant's position. The fact that he did the work and made the reports and was paid $15,000, for the work by the claimant is relied upon as showing their good faith with respect to the claims contained in the booklet. While Dr. Pease has not in fact been called as a witness, claimant's counsel states that he was in court during the taking of the Government's testimony for a week or more and that they fully expected to call him as a witness in this case. They expressed great surprise and disappointment that he refused to stay and testify. The Government in the closing days of the trial upon learning definitely that the claimant did not expect to call Dr. Pease as a witness, obtained a special order for him to be summoned. His business is in New York and his home is nearby. It is reported that the summons has not been served on him. In the absence of any other testimony with regard to Dr. Pease the jury fairly cannot consider anything other than the bare fact that he is not called as a witness for the claimant. This fact is a matter of argument and possibly inference which may be addressed to you by counsel for

the parties respectively. In connection with the good faith of the claimant in relation to Dr. Pease and whether the claimant was justified in relying upon his reports and experimental work, you can consider all the facts and circumstances in the testimony. It appears that Dr. Pease was first employed by Mr. Johnson as an expert witness to testify in court in support of the claim. Later, after the claimant determined to change its literature, Mr. Johnson says he employed Pease to advise them generally with regard to what claims they could justly make. Claimant contends that as a result of this it substantially changed this booklet. The Government contends there is no substantial change. You have both booklets to compare in this respect. You may bear in mind that the essential nature of the claims for B. & M. was advanced many years ago by Mr. Rollins, and his company, long before their contact with Dr. Pease.

There are some other matters in this connection that you should bear in mind, particularly in weighing the testimony offered by the claimant in support of its good faith. The law does not presume that statements, even though extreme, are fraudulently made. The burden of proof is on the Government to show that they were fraudulent by a preponderance of the evidence. The claimant has spent large sums of money for laboratory work and scientific investigations. This has already been mentioned in another connection and is possibly susceptible of different interpretations as applied to the results of the work in this case. Claimant contends that the large sums paid for this work indicate its right to substantially rely thereon and that it would not pay such large sums for work if they did not believe the work honestly represented results of bona fide work done by those who submitted the reports. You can also consider on behalf of the claimant for whatever you may think they are worth in the testimony, the large number of testimonials received by the claimant as to favorable results from the use of B. & M., and you may consider the results of personal use by Mr. Rollins of the drug upon himself for various ailments, some of a virulent nature, and in which he says B. & M. has cured him and that he relied upon B. & M. for this purpose without calling in any specialist to treat him for the infections, consulting only Dr. Martin. During the progress of the trial the Government has called for numerous papers from the claimant and the latter contends it has supplied any and all data from its files so called for. Certainly it has supplied a great deal of such information voluntarily. You may also consider that one of the agents of the corporation, Mr. Rollins, is not a highly educated professional man but is a person of only ordinary intelligence but in this connection you should also bear in mind that this comment is not applicable to other agents of the corporation whom you may find to have had some substantial part in making the representations to the public. You can also consider in this connection what has already been said on the subject that the claimant says it relies upon what it believes to be competent and outstanding scientific advisers in the preparation of its literature and accepted the advice of such advisers, particularly Dr. Pease, to the extent of subordinating or somewhat abating its views or contentions in statements which Mr. Rollins believed to be true with reference to the merits of the drug.

It is not possible even in this lengthy charge to review all the evidence in this case bearing on the issue of fraud or good faith. In

the last analysis it is a question of fact for you to determine from all the facts and circumstances in the testimony. I again summarize it briefly by saying that if from all the facts and circumstances you determine that the agents of the corporation acted in good faith and with no intention to deceive the public and that the honest conviction that their statements were true and that this conviction is not merely a reckless assertion but a bona fide belief founded on reasonable basis, then you should find that the statements were not made by the claimant and you should find for the claimant. If, on the other hand, you are satisfied by a preponderance of the evidence that the statements as tested by the above principles of law defining fraud were in fact fraudulent and if you have also found the statements to be false, then you should find a verdict for the Government.

I will say a word to you with regard to the effect of the New Hampshire case tried in 1922. I previously stated that you were not to regard that case as a bar to this proceeding. I have, however, admitted the important papers relating to this case into evidence for whatever bearing they might have on the state of mind of the claimant's officers with regard to fraud or bad faith. Ordinarily a case tried between the same parties involving the same subject matter and decided on its merits is a bar to further litigation on that same case. But in my opinion the case now being tried is not the same case as was tried in New Hampshire because the legal issue that was there tried was the relation of the literature then published to the drug and involved, among other issues, necessarily the issue of fraud or good faith as of 1919 on the part of the claimant. This case arises and is tried more than 10 years after the New Hampshire case. It is contended by the claimant in this case that the booklet has been entirely rewritten. Therefore, there has been a change in the subject matter, but perhaps even more importantly in this case, the developments during this period of 10 years may make a very great difference from the standpoint of whether what was claimed in good faith by Mr. Rollins in 1919 can still be said to have been claimed in good faith by the claimant in this case as of 1931. To some extent there has been a change in the officers of the company, many things have happened since 1919, much additional information has been obtained or has been available to the claimant in these 10 years, other cases have been brought and disposed of, including the 1929 case in this court, negotiations have taken place between the claimant and the Department of Agriculture, and generally speaking, it is entirely possible that the facts and circumstances relating to fraud or good faith of the claimant in 1931 may differ vastly from those existing in 1919. And as to the 1929 case disposed of heretofore in this court, it also, in my opinion, is not an estoppel as against the claimant because it appears that although that case was abandoned by the claimant yet there was no trial on the merits.

There are some general considerations which I think are reasonably implied in what I have already said but which it may be just as well to express to you. There has been some testimony in this case on behalf of the claimant and some expressions of counsel for the claimant in which possibly it might be inferred that this is a case of a medical profession against the Rollins company. That is, of course, not true. Anything that has been said along this line is to be properly understood only as in criticism of the testimony of doctors who testified as wit-

nesses for the Government. The proceeding is by the United States Government and not at all by the medical profession. The medical testimony is that of witnesses only.

The proceeding is not for the purpose of completely stopping the sale of B. & M. It is aimed only at the condemnation of B. & M., which is sold to the public under representations that it is a remedy for specific and particular diseases complained of in the Government's libel, which had been heretofore mentioned. It is not contended by the Government that B. & M. may not be properly sold as a liniment and used for such purposes. It is also not contended that it may not be sold for various skin troubles such as athlete's foot, or for sprains, bruises, or insect bites. It is not contended by the Government that B. & M. has no curative qualities in the way of destroying the germs with which it can come into contact. Therefore, your verdict in this case if it should be for the Government will not prevent the sale of B. & M. for the treatment of diseases which are not complained of in the libel. But if you find that the claims are false and fraudulent with respect to any one or more of the diseases so mentioned, then your verdict should be for the Government. It is not necessary for the Government to show that the claims are false and fraudulent with respect to all of the diseases complained of. If it is false and fraudulent as to any one, that is sufficient.

In determining whether the claims are false and fraudulent you may take into consideration the fact that when an individual or company puts out a drug intended for use by persons so credulous as those suffering from disease such individual or company is assuming a great responsibility, and extreme caution should be exercised in informing the public of the curative or alleviating properties of the drug. Great and lasting injury to the health of individuals may result if misstatements are made as to its curative effects by inducing its use in incipient stages of diseases upon which it has no effect, which, if taken in time, might by proper treatment be cured. Knowing and realizing this as every owner of a proprietary medicine must, if he is a person of intelligence, it is for you to say whether or not he should not first ascertain just what its curative and therapeutic effect is upon the diseases for which it is recommended. In this connection and in this case you can consider whether the investigation originally made when the drug was put on the market was sufficient and reasonable or insufficient. You can also consider what has been done in the way of scientific investigations by the claimant in later years in whether the results of this investigation reasonably justified the continuance of the claims as modified and as now made. The testimony shows that large sums of money have in recent years been paid by the claimant for alleged scientific data. You can consider the source from which this information was obtained by the claimant and whether it was selected with reasonable judgment and good faith as authoritative and reliable. It is said by the claimant that the investigations have still not been completed. You can consider whether the claimant has acted reasonably in reference to its claim of good faith in putting out the product before these investigations have been completed, or whether, consistent with its claim of good faith, it should have waited the results of the full investigation before selling the drug to the public under the representations made. In this connection, you may also bear in mind

claimant's testimony to the effect that he believes the investigations that have been made are sufficient to justify the claims as made. This case does not involve in any way the right of any person to buy what medicine he pleases and use it for what he pleases. Or, as expressed by counsel for the claimant, the case does not involve, nor does it deny, the right of self-medication. Nor does the law prohibit a man or corporation from making any medicine he wants to and sell it to the public if he honestly tells the truth about it.

I have been asked by the parties to give you certain specific instructions. In the charge which I have given you I have covered most of the matters about which specific instructions have been asked by the parties, but a few may not have been expressly referred to and I will now cover them.

You are instructed that you cannot infer that a statement is fraudulent merely because it is false. The Government must prove both by a preponderance of the evidence. With reference to statements in booklets other than those involved in this present case, you are instructed that a verdict for the Government must be based only upon false and fraudulent statements contained in or upon the cartons, bottle labels, and booklets involved in the present seizure and complained of in the libel in this case, and particularly exhibit B filed with the libel. Any evidence of statements in the booklet has been admitted only upon the evidence of the intent of the claimant in the issuance of the present booklet and your verdict, if against the claimant, should not be made on the basis of statements in former booklets alone. You should not base a verdict for the Government merely upon your own belief that the statements in the booklet in the present case are false and unfounded. If you believe that the claimant was even grossly in error in making the claims, that is not sufficient. You must find that the statements were made fraudulently within the principles above outlined. The point of time as of which you must find that the statements in the booklet were false and fraudulent is the time of the shipment of the particular articles in interstate commerce which was in this case on or about August 1931. As I have said, the burden of proof is on the Government to establish both the falsity and the fraud claimed, by a preponderance of the evidence. If after considering all of the facts of the case the minds of the jury are in a state of equipoise on either the question of fraud or the question of falsity, then your verdict must be for the claimant; that is to say, if you find the evidence on each side on either of these questions is equally weighty, then the Government has not established the affirmative by a preponderance of the evidence. In considering the preponderance of the evidence you are not limited to the mere number of witnesses on a particular issue, but you may consider the quality and quantity of testimony bearing on the issue. You are instructed that your verdict, if for the Government, must not be based upon false and fraudulent statements in the booklet which do not relate to the curative or therapeutic effects of B. & M. You are also instructed that in determining the question of fraud or good faith the agents and officers of the claimant corporation are not necessarily to be held to the standards of knowledge of a physician, and the question to be determined is not primarily what a physician or scientist would believe but what the claimant's agents having

charge of the matter honestly believe, bearing in mind also, however, as I have said, that the manufacturers of medicine sold for serious diseases are in a position to have and should have superior knowledge upon the subject to that of the general public and must be held to good faith in their statements accordingly. In considering the two issues of falsity and fraud or good faith presented, you are to consider the carton, bottle label, and booklet in their entirety and all that is contained in them as bearing upon the good faith of the representations of the claimant.

In considering whether B. & M. is a remedy as recommended in the treatment of the diseases mentioned and complained of by the Government, you may consider the effect which the different drugs acting together, or in combination with each other, will have on the human body, but you must also consider the effect of the application as a whole and the manner in which the directions call for its application so that its usefulness, if any, of one or more of the ingredients of B. & M. if separated from the other in the treatment of diseases, is no conclusive proof of the remedial value of B. & M. in the treatment unless good derived from the application of the whole is less than the harm caused thereby.

In considering the effect of the reports of Pease and Fenwick, as I have heretofore indicated, they are to be considered by you only on the question whether or not the claimant acted in good faith and you must not accept such reports as any proof whatsoever of the scientific truth or accuracy of the theories or statements made in these reports, Fenwick having died before having testified in this case and Pease not having been called as a witness.

Finally, gentlemen, if your verdict is for the Government, when called upon by the clerk for your verdict, you will be asked, "Who shall speak for you?" and you shall say your foreman, and the foreman will then be asked for your verdict, and if it is for the Government, you will say, "We find for the Government." If, on the other hand, you find for the claimant, then the answer will be, "We find for the claimant."

I am very sorry indeed, gentlemen, to have had to enlist your further attention to this lengthy charge. The case, as you know, is a highly important one. I am sure that you all have but one desire, and that is to render a public service in the interests of impartial justice in accordance with your very best judgment about all the testimony in this case, to which I noted you have listened so very attentively, sometimes under circumstances of not too comfortable conditions as to weather or otherwise.

Gentlemen, and counsel of the bar, to the extent that all requests for instruction submitted by the respective parties are not covered in the charge, they are hereby rejected, and exceptions noted on behalf of the parties respectively.

Of course, it is the usual practice in the Federal courts if counsel desire to take exceptions to the charge as given, they must be specific, that is, to the particular parts of the charge.

Mr. Yost. May we confer just a minute on that question, Your Honor?

The Court. Yes. Gentlemen of the jury, we will take a recess for 10 minutes.

Mr. YOST. Your Honor, there are just two exceptions. While the reference to them may be involved in the prayers, there were so many prayers I should like to make these specific exceptions: In the first place, I should like to except to what we consider the broad definition which the court has given to the words "remedy" and "therapeutic."

Our idea is that they are susceptible, properly, of a narrower construction.

The COURT. Well, is that all you want to say on that?

Mr. YOST. Yes.

The COURT. I have very carefully considered that and I will have to stand by the instruction I gave to the jury on it. Exception noted on that point.

Mr. YOST. Secondly, Your Honor has referred to knowledge of the several officers of the corporation as constituting the knowledge of the corporation, and then you have referred, of course, to the testimony of Mr. Johnson as president. It is undisputed that at the time this literature was issued, and at the time of these seizures, Mr. Johnson was not president of the corporation. The issue in this case is the intent at the time of these seizures, and I think that that fact, as a matter of law, should be pointed out to the jury because I do not think that Mr. Johnson's intent now has anything to do with the question, has any bearing upon the question of the intent of the corporation at the time the literature was issued, and the seizures in this case made.

The COURT. Well, I leave that issue as to who were the officers of the corporation at that particular time entirely to the jury.

Mr. YOST. Of course, there is no evidence to the contrary, Your Honor, I take it.

Mr. SOBELOFF. Yes; there is, and I will point it out.

Mr. YOST. And that is a matter of argument, I assume. I know of no other evidence. Your Honor also uses the phrase at one point that the manufacturer of a drug must use "extreme caution." We think that is further than the decisions go, and that he is only answerable for reasonable care and good faith, rather than extreme caution.

The COURT. Now, let me consider that a moment: I think I would say to the jury on that that the amount of care that must be exercised is, of course, that which is reasonable in the light of the recommendations made, and the nature of the disease for which the recommendation is made, how serious it is, how serious may be the consequences of a mistake, or of a wrongful representation. As applied to some of the diseases in this case, it is clear that they are highly dangerous to the community, to the individual, and the proportion of care that must be exercised must be in proportion to the nature of the thing that is done in the way of representation. From my point of view care which would be reasonable in one connection might be regarded as extreme care in a less important matter. I attach no particular importance to the use of the word "extreme" as used. I think, probably, your view that it must be reasonable, but reasonable in the light of the subject matter to which it is applied, is probably the correct one, and the jury is so instructed.

Mr. YOST. On the question of res adjudicata, I understand Your Honor's ruling to be that while the New Hampshire case established the fact that at that time there was no bad faith, or no falsity, either

one or both, that that did not necessarily conclude the present litigation, because there is a change in the literature and that, therefore, different issues are involved. I take that to be a ruling on Your Honor's part that, as a matter of law, the issues are different. We are of the opinion that the difference in the booklets, as to whether there is any substantial difference in the booklets, and, if so, whether the claims in the 1919 literature are broader than the claims in the present literature, and, therefore, substantially cover the present claims, should be left as a question of fact to the jury. I am not quite certain whether, under Your Honor's instructions, you meant to leave that open to the jury or not, or whether you have ruled on it as a question of law.

The COURT. Well, at the earlier stages of this case I suggested, for consideration of counsel, possibly, the testimony could be limited on the issue of good faith, particularly as to matters arising since 1919. Apparently, counsel for the claimant did not take that view of it, because they themselves decide to put in evidence facts and circumstances prior to 1919. I, therefore, thought it was unnecessary to make any further distinctions about that case except to say that in my opinion it is not res adjudicata as to this.

Mr. YOST. And there was one further extract from the charge: Your Honor emphasized, I thought somewhat negatively, from the claimant's standpoint, to the jury that they might consider that as the result of their finding, or, should they not find for the Government, they might consider the dilemma in which sufferers from certain diseases might be left by being misled into using something that would not be of any help to them, without in any way offsetting that by a positive statement that, of course, if the remedy has any therapeutic value, in the minds of the jury, and they find for the Government, they might at the same time be depriving the public of a remedy that might be helpful to them. In other words, I think the negative emphasis was placed on that matter.

The COURT. I think whether the matter is affirmatively indicated is dependent on the view that the jury takes of the facts. In the first part of the charge I said that the case, in my opinion, is a very important case, according to both the contentions of the Government and of the claimant, that the result would be likely to affect, importantly, the health, if not the lives of a great many people. The Government's contention is that the continued sale of this preparation to the public under the recommendations made tends to induce sufferers from some very serious diseases, particularly tuberculosis, to rely upon the remedy, which the Government says is of no value, and to neglect proper medical advice which might be of real help, while the claimant's contention in this case is that the remedy is so wonderfully efficacious that it ought to be used by every physician for the treatment of these major diseases, including tuberculosis, and if the B. & M. company cannot sell it for use in the treatment of tuberculosis the public will be deprived of a very valuable remedy. Now, whether those two things are true is an issue in this case.

Mr. YOST. That is all I have, Your Honor.

Mr. SOBELOFF. The charge is satisfactory to the Government. We have no exceptions, and in view of the very complete review of testimony which is contained in Your Honor's charge, at the request of both the Government and the claimant, a good part of what I

would have said in my opening argument becomes unnecessary to say. I am perfectly willing, if it is agreeable to the court and the claimant, to waive my opening argument.

The COURT. Whatever counsel for the claimant desire to say as to that is, of course, agreeable to the court. I am rather disposed myself to suggest that in a case of this importance, which has taken so long to try, probably it would be more satisfactory both to the jury and to counsel for the claimant, to have the Government make at least some opening argument. You do not waive your concluding argument?

Mr. SOBELOFF. No, sir.

The COURT. I think it is better to have the opening argument made to the jury. Now, gentlemen, as to the practical question of time: The case has taken so long to try, there has been so much testimony, that I am in no disposition at all to unreasonably, if at all for that matter, limit counsel, but I have indicated that I thought that three hours on each side, is, perhaps, enough for counsel to cover the case in argument. Unless I hear some dissent from that view, I think we can proceed on that assumption, citing quite a legal precedent for similar conditions that, in the appellate courts, while counsel are permitted to take that length of time, they are not obliged to do so. Proceed, Mr. Sobeloff.

Counsel for the Government and claimant thereupon delivered their final arguments, at the conclusion of which the court further instructed the jury.

The COURT. Gentlemen, you are now ready to retire to your room. The clerk will give you, as is customary in all cases, simply the papers in this case, that is, the libel papers. There are two cases consolidated, but they are treated as one, and there is no real difference between them, except they are two different seizures here in Baltimore made at two different times. I think I will not ask the clerk to give you any other papers than that unless you ask for them. If you want other papers, you can ask for them from time to time; but to start with I should think that the request should come from you, if you want anything more than just the ordinary papers. * * *

Of course, you will remember, gentlemen, in addition to this charge as given yesterday morning, there has been one or two things said since then. You will recall them, I think. The principal thing was that this morning I called to your attention that as to Mr. Johnson the evidence showed that he was not president of the company at the time the shipment was made. And it resulted from that, in view of other testimony, that the inquiry particularly with regard to good faith of the officers of the company resolves itself into an inquiry as to Mr. Rollins in that connection, in connection with which, however, you should consider from the standpoint of the claimant corporation as a whole, what information and knowledge and notice it had by virtue of what it learned from Mr. Johnson's activities in the case as its counsel. But in testing the good faith of the individuals, it must ultimately substantially in this case relate to Mr. Rollins.

However, you will bear in mind that the claimant is a corporation, and if the evidence shows the lack of good faith on the whole, you can consider all the evidence with regard to it.

Now, is there any other paper you would like to have, gentlemen?

The FOREMAN. Your Honor, in the matter of rendering the verdict on behalf of the jury, the mere statement of the verdict for or against the claimant or for or against the Government is sufficient for the court?

The COURT. Yes. The procedure will be this: When you have agreed upon the verdict, you will advise the bailiff, who is your officer in charge, that you have agreed. You need not say any more than that. And then the court will be advised, and you will come in court. The clerk then will call off the jury list and see that you are all here. And then he will ask you if you have agreed. If you have, then he will ask, "Who shall speak for the jury?" And the response is, "The foreman." And then he will ask you, "How do you find your verdict in this case, for the Government or for the claimant?" And your reply will be in accordance with your verdict as you have reached it.

The FOREMAN. There is some question relative to the specifications, whether you eliminated two and three. I think you said you did.

The COURT. Yes.

The FOREMAN. I wanted to get clear on that one point.

The COURT. They are out of the case. You need not bother with them at all in the form of your verdict. The only charge that is the basis of the condemnation in this case, as sought by the Government and defended by the claimant, is contained in paragraph 4. And that is the one that you have heard about, the alleged misbranding as false and fraudulent.

On July 19, 1932, the jury returned a verdict for the Government. On July 28, 1932, a motion for a new trial having been withdrawn by the claimant, the court entered a decree ordering the product condemned and destroyed.

UNITED STATES v. W. T. RAWLEIGH CO.

(Circuit Court of Appeals, Tenth Circuit, Mar. 31, 1932)

57 Fed. (2d) 505

Appeal from the District Court of the United States for the District of Colorado. Libel by the United States against the W. T. Rawleigh Company. From an order dismissing the libel, the libelant appeals. Reversed and remanded.

Before PHILLIPS and MCDERMOTT, Circuit Judges, and KENNEDY, District Judge.

KENNEDY, *District Judge*. This is a libel suit brought under the Food and Drugs Act, 21 U.S.C.A. secs. 1 to 26 (act of June 30, 1906, 34 Stats. 768). The libel was directed against certain misbranded drugs found in the possession of the appellee. An answer was filed in which various exceptions to the libel were set forth by the appellee in the court below, among which was the following:

Because it does not appear in and from the averments contained in the said libel that a notice and preliminary hearing by the Department of Agriculture was afforded to the claimant prior to the institution of the libel, pursuant to law in such cases made and provided.

At the hearing the court sustained said exception, overruled all others, and entered an order dismissing the libel and for a return of the property seized under the warrant. From such order of the District Court the Government appeals.

Section 2 of title 21 prohibits the introduction of food or drugs in interstate commerce which are adulterated or misbranded within the scope of the act. Section 14 provides for the seizure of such specified food or drugs. Section 11 provides for the examination of specimens of food and drugs in the Bureau of Chemistry for the purpose of determining whether such articles are adulterated or misbranded, and that the Secretary of Agriculture shall give notice to the party from whom the sample was obtained in the event it is found that there is adulteration or misbranding; and further provides that any parties so notified shall be given an opportunity to be heard, upon which, if it appear that any of the provisions of the act have been violated by such party, then the Secretary of Agriculture shall certify the facts to the proper United States district attorney for appropriate action in the premises. Section 12 provides that it shall be the duty of each district attorney to whom the Secretary of Agriculture shall report any violation, or to whom any health or food or drug officer or agent of any State, Territory, or the District of Columbia shall present satisfactory evidence of such violation, to cause appropriate proceedings to be commenced and prosecuted for the enforcement of the penalties in such case provided. Section 2 also provides that anyone violating the act shall be guilty of a misdemeanor and subjected to certain fines or imprisonment; and section 14 contemplates proceeding against the offending articles through libel.

It does not appear from the record in this case as to how the possession or knowledge of the specimens of alleged misbranded drugs came to the district attorney upon which the libel is based.

By the order of the trial court sustaining the exception of the appellee upon the ground that no notice had been given or opportunity to be heard under the provisions of section 11 as heretofore referred to, it was held that the libel could not be sustained, which raises the question as to whether or not such notice is necessary from a jurisdictional standpoint, and this is the sole point presented upon this appeal.

It appears that there had been a diversity of opinion upon this point among the District Courts and Circuit Courts of Appeals. The matter came to the attention of the Supreme Court in the case of *United States* v. *Morgan*, 222 U.S. 274, 32 S.Ct. 81, 56 L.Ed. 198, where some of the cases of the lower courts involving conflict of opinion are cited. In the Morgan case the high court affirmatively holds that the notice indicated in section 11 is not jurisdictional. The gist of the decision is to the effect that, because under section 12 it is made the duty of the district attorney to institute appropriate proceedings for the enforcement of the penalties prescribed by the act, when reports are made to him by the Secretary of Agriculture or by any health, food, or drug officer in any State or Territory, which latter reports would manifestly not come through the Secretary of Agriculture, it should not be held that it was the intent of Congress that he should only prosecute where notice had been given in the event that the report had come from the Secretary of Agriculture, but could

prosecute without notice where the report had come from the other sources indicated, and that for the reasons stated the preliminary notice could not be held as being a necessary preliminary step to prosecutions for violations of the act either by indictment or by libel. Additional reasons are indicated in the opinion which it will not be necessary here to further set forth. The proceeding in the cited case was in the nature of a criminal prosecution by indictment, while in the case at bar it is by libel, yet we see no distinction to be made in the rule by virtue of these circumstances. We are of the opinion that this decision of the Supreme Court rules this case.

For the reasons stated, the order of the trial court will be reversed, and the case remanded for appropriate action not inconsistent with this opinion, and it will be so ordered.

UNITED STATES v. 60 BOTTLES OF DR. HERMANCE'S ASTHMA AND HAY FEVER MEDICINE

(District Court, S.D. New York, June 3, 1932)

N.J. No. 19476

Libel under section 10 of the Food and Drugs Act. Jury trial. Verdict for claimant.

KNOX, *District Judge* (charge to jury): Years ago, when I was a good deal younger than I am now, newspapers, as I recall them, sometimes carried advertisements of various patent medicines, setting forth list of symptoms of this, that, or the other disease, and stating that the particular medicine advertised would cure all of them. As I say, I occasionally read these advertisements and imagined that I had all the diseases there listed, or symptoms of them.

The world, as time went on, came to know that many of the patent medicine advertisements and representations concerning the therapeutic or curative effects of medicine were fraudulent. It came to understand that many of the medicines were mere nostrums that were put upon the market to deceive the gullible, and to separate such persons from their money, and to place it in the pocket of the producer or manufacturer of the so-called medicine. I think all of us are quite old enough to remember those days.

The Constitution of the United States gave the Congress of the country power to regulate interstate commerce. The patent and proprietary medicine evil became so great that, acting under the power to regulate interstate commerce, the Congress said that medicines and drugs which are misbranded shall not pass across State lines, and that, if they be so passed, certain steps might be taken by the Government to put an end to drugs and medicines which are falsely represented as being capable of curing or alleviating disease. That legislation has come to be known as the Food and Drugs Act, and it is under that act and some of its sections, that this case comes into this court for determination.

None can deny that that act has been extremely beneficial. The ordinary channels of trade, so far as they cross State lines, have been closed to misbranded articles, and all of us, I take it, are the bene-

ficiaries of that act. So you should start your consideration of this case, I think, with no prejudice against the Food and Drugs Act.

At the same time, Congress, by allowing a jury trial in cases of this character, had in mind the feeling, I take it, of the great mass of the country that its membership would practice, to some extent at any rate, self-medication, in an endeavor to alleviate and cure some of the ailments and diseases to which all of us are subject. It was recognized that we have had various medicines and various treatments handed down to us from one generation to another, and that the privilege of self-medication should not be taken away from the public. All of us, I take it, at times in our lives, have doctored ourselves, and it may have been wise or unwise to do it. All of us, I take it, have assumed from time to time to give advice to members of our family, or to our friends, as to what they should do in certain instances, and in most such instances where we, as laymen, attempt to treat ourselves or to treat members of our families or our friends, we ordinarily use what are known as homely and common remedies or medicines.

In the country, where I was born and raised, we made medicines ourselves. Some old woman, perhaps, would gather the herbs and barks from the various fields, and make up a concoction which she and perhaps some of her neighbors thought was good for certain types of disease. She made salve and whatnot. So Congress, having that in mind, said that, in cases such as this, 12 men should pass upon the character of the representations that are made concerning the curative or therapeutic qualities of drugs and medicines which cross State lines before condemnation should rest upon a particular product. That is why you are in the box. In this case, the Government as it had a right to do, believing, and, undoubtedly sincerely, that this medicine of Mr. Bell was false and fraudulent in character, resorted to the provisions of what is known as the Sherley amendment of the Food and Drugs Act, which is in these terms:

> For the purposes of this Act, an article shall be deemed to be misbranded: In case of drugs: * * * If its package or label shall bear or contain any statement, design, or device regarding the curative and therapeutic effect of such article or any of the ingredients or substances contained therein, which is false and fraudulent.

Relying upon that provision of law, the United States filed a libel against this shipment of this medicine, and seized it, and charged that the representations appearing upon the circular contained in the carton, and which accompanies the bottle of medicine, are false and fraudulent. The task that devolves upon you will be to say whether, under the evidence in this case, these representations are false and fraudulent. The Government charges substantially all of the printed matter contained upon the circular, and upon the bottle, and upon the carton, to be untruthful in that this medicine is not of curative or therapeutic value in the treatment of asthma or hay fever.

The claimant, Mr. Bell, came along and said, when he got notice of this seizure, "This is my product. I deny that what I have said as to the curative and therapeutic qualities of this medicine is false and fraudulent." So the issue between the two parties is joined; one claiming that the statute is violated, the other claiming that it is not. In order to enable you to decide which of the contending parties is right, you have heard this evidence for the past 4 days;

and, on the defense, Mr. Bell introduces proof from which he asks you to say that his representations were founded on facts, and that he acted in good faith in making them, even though you should, as a matter of scientific inquiry, reach the conclusion that they are false.

The Government charges, and has sought to establish by its proof, not only that the statements are false, but that they were made by Mr. Bell with an intent to deceive the public.

With that outline of what the issue is, as a preliminary, it is necessary to go a step farther and to speak of what constitutes a therapeutic quality and what constitutes a curative quality; but before I do that, and in order to allow you fairly and properly to consider the case, I desire to make some general observations upon various matters that you should take into consideration.

This is a civil case. The burden of proving its allegations rests upon the Government, and the extent of its burden is that it shall prove, by a fair preponderance of the credible evidence in the case, that its allegations, as contained in the libel, are correct, and that the representations of Mr. Bell are not only false but that they are fraudulent as well.

The Government does not have to prove the case beyond a reasonable doubt, as in a criminal trial, but it does have to produce evidence which, when it is placed in the scale, or the pan of the scale, which represents the Government's side of the case, will outweigh the evidence which is to be placed in the pan of the scale which represents Mr. Bell's side of the case; and a preponderance of evidence is made out if the weight of the Government's case is such as to make its pan of the scale descend below that of Mr. Bell by even a hair's breadth. If it should be that you think the evidence is evenly balanced, upon the contentions that are here made by the parties, then the Government cannot win, and a verdict should be returned for the claimant; or if, perchance, you conclude that Mr. Bell's testimony—speaking of the witnesses who have been brought here to justify his side of the case—outweighs the Government's evidence, then, of course, the Government cannot have a fair preponderance of the evidence, and Mr. Bell is entitled to win.

We have had an interesting lot of testimony, both upon behalf of the Government and upon behalf of Mr. Bell, and you are the judges of the weight to be given the testimony of each and every witness who has testified. You are to say whether they were telling the truth, whether they were competent to speak of the matters concerning which they gave testimony, whether they were ignorant and themselves gullible, or whether what they said was accurate and trustworthy.

If you feel and conclude that any witness in the case falsely testified as to any material matter, you may, if you desire, throw aside the entire testimony of any such witness as being unworthy of belief, or you may give credence to such part of any testimony of any witness, whom you believe to have testified falsely, as you think is true, and cast aside that which you think is false.

You can apply your own tests in passing upon the testimony of the several witnesses, and reach such a conclusion in connection therewith as you think all the facts and circumstances warrant you in doing.

It is needless to tell you, I think—but I shall do so—that this is a case which is entitled to careful attention both from the standpoint of the Government and the claimant.

If this medicine be a mere nostrum, it can do no good to those who, it is hoped, will provide a market for it. The Government, in seeking to protect the public from such products, is entitled to prevail if what has been said about this medicine is, as a matter of fact, false and fraudulent. On the other hand, Mr. Bell, if he has not offended against the statute in putting out this medicine, and if his representations are not false and fraudulent, is entitled under the law to continue to send this medicine across State lines and supply whatever market there is for it. Do not decide the case upon the mere assumption that here is a dozen bottles of a cheap medicine, to sell for the sum of not more than $12, perhaps, but consider where the right is under the law, as I have so far spoken of it, and as I shall endeavor, in the next few minutes, to speak of it.

When a man puts medicine into the market and asserts that it has certain qualities, the public has a right to expect that he shall know something about it, and that he shall not make any false statements concerning its qualities, and also that he will not make reckless statements concerning its qualities.

I may have no intention in the world—certainly I have none now—to kill anybody who may be walking down Broadway. Ordinarily a person has an intent when he shoots a particular person; but if I were to shoot a gun out of this window over towards Broadway, and someone there were to be killed by it, the law would infer me to have had an intent to kill that person, because, as a reasonably intelligent man, I did a thing which might be calculated to kill someone out there on the street. So, if a man willfully and recklessly makes statements without knowing anything about their truth, and those statements are not justified by actualities, he may be charged with intent to deceive those to whom the statements are made.

If Mr. Bell made statements that this medicine would cure chilblains and ague and scarlet fever, and diseases of that nature—take an extreme case—obviously, from the testimony that has been here adduced, his claims would be false and fraudulent. He is charged, as an intelligent person who is asking people to accept his representations, with some knowledge of the disease which he undertakes to provide for, and with the effects of the constituents of the medicine which he offers to the public for the treatment of that disease. So, when you come to hold him to his responsibility, or lack of it, you may take that into account, and, after taking it into account, consider what he has said and then decide, first, if he has made any false statements in these papers which accompany this medicine. If he has made no false statement and everything is the truth, and you are unable to conclude that he has said anything that does not represent the facts, that is the end of the case, and you should come back with a verdict for the claimant.

If you decide that he has made a false statement; that the picture is painted too rosily, and that what he has suggested, if not definitely represented, that this medicine will do, is not justified by the facts as you have heard them, you may conclude that he has made a false statement. But that will not be enough to warrant you in bringing

in a verdict for the Government. It will be necessary for you to go farther and consider whether, in making a false statement, there was an intent to deceive. Then, if you find that he has made a false statement, and that he made it for the purpose of mulcting people of their money, and that he made it in order to sell this medicine, where otherwise he would not have been able to sell it, by practicing a deception upon those who read what he has said, and you find that by a fair preponderance of evidence, then the Government is entitled to a verdict and you should return a verdict in its favor.

The language upon the carton, and the bottle and the circular, is simple, and you are entitled to construe that language as you believe it would be construed by a person who wanted some relief from asthma, and saw this bottle, and the circular, and this carton with its representations. What is the natural construction to be placed upon this language? It is conceded here that there is no out-and-out claim that this medicine will cure asthma. The contention of the defense by Mr. Johnson on behalf of Mr. Bell, is that it is helpful, and it will tend to alleviate some of the attendant physical conditions that accompany asthma and bronchitis. Now does the language in the aggregate, constitute a representation that the medicine will cure asthma and hay fever? Does the language used falsely represent any therapeutic value that the medicine may have, and were the representations, if they falsly represent the real qualities of this medicine, fraudulent, as having been made with intent to deceive? That is the basic question which you shall determine.

Now we get down to a feature of the case which is not quite so simple, perhaps, and that is as to the testimony of the experts and the testimony of the claimant's witnesses, as to what constitutes asthma.

We have heard from the pharmacist, or the analyst from the Department in Washington, his version as to what the contents of this medicine are—and the man who gave the testimony has no reason to be ashamed of it. He made his analysis and it seems to me, from the developments in the case, his analysis was pretty accurate. He found a quantity of water, got some lobelia, some potassium iodide, some licorice, some alcohol—I guess that is about all, with the exception of this much-discussed rosinweed.

The Government's witnesses could not tell us much about rosinweed. Certainly the claimant's witnesses told us nothing about it, or what its curative effects may be. Juror No. 5 contributed the most information we have as to the characteristics of rosinweed. This morning one of the scientists from the Department said that when tincture of rosinweed was injected into the veins of a cat it did not increase its blood pressure; thus tending, I take it, to prove that the substance was inert.

We have heard a good deal as to the therapeutic effect of potassium iodide and lobelia. The licorice seems to have been forgotten, save as it may tend, perhaps, to make the concoction palatable, or halfway so, if you like licorice.

Alcohol is one of the constituents of most medicines that we get, or a great many of them. I suppose it tends to preserve, perhaps, some of the ingredients that may be in the medicine—I do not know, but it is there—not enough of it to cause intoxication, I suppose, in small doses, at any rate; but it is there; and so far as asthma goes,

standing alone, there has been no testimony that alcohol would have much effect upon the treatment for that ailment.

Potassium iodide, it is admitted by the very learned experts who testified on behalf of the Government, will tend to liquefy the heavy mucus that sometimes characterizes the bronchial tubes, both in asthma I suppose, or certainly in bronchitis, and in that sense this ingredient may be of aid in allowing a patient, who has experienced difficulty in breathing, to raise and expectorate this mucus, and thus allow the bronchial tubes to function, and to have air pass through them.

Lobelia, it seems, from the medical testimony, has from time to time been used by the medical profession in treating or prescribing for those suffering from asthma. I do not recall specifically what it was said that lobelia would do, but, as I do remember, it has some therapeutic value in treating some of the ailments which manifest themselves by clogging up of the bronchial tubes, and which make it difficult for one to breathe.

It seems also to be a part of the medical testimony that certain types of heart disease will produce a pressure on the bronchus that will occasion shortness of breath in the individual who thus suffers. I take it that all of us will probably conclude that a condition of this kind is not real asthma. Some of us have irritation of the bronchial tubes which occasions mucus to be produced, and sometimes the tubes clog up, and it is difficult to remove the mucus. So when we begin to discuss this feature of the case, we get into a good deal of confusion of thought, particularly upon the part of the layman, and possibly upon the part of some physicians, as to the classification of ailments and diseases into which asthma should be placed and you must have that in mind in considering this case, and as bearing upon the truth or falsity of the representations that were made.

Medicine advances as the years go by, and we owe much to the medical profession. Certainly it has done enough for me that I take off my hat to it most of the time. I have great respect for it. I was much impressed by the learning of the two expert witnesses who were called here yesterday or the day before, and who testified concerning asthma. But we must also understand, as these gentlemen admit, that medicine is far from being an exact science. The views of the medical profession change from time to time, and it has come, apparently, to give rather a narrow definition to asthma, particularly, the allergic type of asthma, as being that condition which grows out of the action upon the human system of certain proteins, which will bring about a congestion of the bronchial tubes, and produce shortness of breath.

I think I speak a truism when I say the public does not ordinarily keep fully abreast of the advances of medical science. It is very natural that it should not do so, because we lack the opportunity and inclination to do so. We follow along like a wagon behind a tractor. So, most of us, perhaps, as members of the public, will have a wider impression of what constitutes asthma than will the skilled scientist. We speak in looser terms, more generic terms; and, in considering these representations of Mr. Bell, you should bear that in mind.

Some of the witnesses yesterday who were called by the claimant said they were suffering from bronchial asthma congestion, perhaps an

irritation of the bronchial tubes which may have been occasioned by some other cause than that of proteins. They said they got relief, were able to raise mucus, and felt better after taking this medicine.

When you come to reach a decision as to what asthma is, it is only right and proper that you should consider not only what the physicians said in connection therewith, but as to what the public believes asthma to be, because those who get relief from this medicine, if they do, take it for the condition which they describe or which they think is asthma, although it may not be true asthma within the definition of these physicians.

Was there an intent to deceive? Has this medicine any therapeutic effect which would justify these representations, or were they false and fraudulent?

"Curative" is itself not easy to define. Funk & Wagnalls Dictionary defines it as an agency possessing power or the tendency to cure. "Therapeutic" is defined as an agency having healing qualities, as an alleviator of a diseased condition.

When one suffers from a disease and has physical distress as a result of it, one of the things, naturally and humanly, that that person wants to accomplish is to relieve his physical distress and, if there is something which will enable the distress to be relieved, and if it does so without harming him, and brings about a beneficial and therapeutic effect, that person is entitled to the relief he may thus obtain. He is also entitled not to be deceived as to the quality of some agency which he would like to use to relieve him of his physical distress. I may go over to a druggist, if I have a cavity of the tooth or an exposure of the nerve, which occasions pain. I will tell the drug store man, "I have a toothache," or perhaps I have some remedy in mind, and I ask him if [he] has it in stock. If so, I will purchase it and put it in my tooth. Perhaps it will deaden the pain so as to enable me to get to a dentist, and have the toothache cured by removing its cause. If the remedy does that and gives me a bit of ease, and it does not injure me otherwise and destroy the gums in my mouth, or the structure of the tooth, it is a therapeutic agent, and I am entitled to use it.

This brings me to another feature of this case. It is said that potassium iodide, in some cases of tuberculosis, may break down the enclosing structure of tubercular sections of one's lungs and enable a latent case of tuberculosis to become active. Is that true? Is the quantity of potassium iodide that one is likely to get in treating himself with this medicine of sufficient size and power to make that a real risk? If it is a real risk, has the claimant fraudulently put this destructive agent on the market without notifying people of the danger that may follow from its use? What I mean to say is that if potassium iodide is a dangerous element and agency, then this medicine is not, without more than appears upon this carton and advertising matter, may not be benign and helpful product for the use of those who may be suffering not only from latent tuberculosis, but also from asthma and hay fever. In that respect, a statement that this concoction is an appropriate medicine for asthma, hay fever, catarrhal conditions, and head colds, may be said to be false. If it is false in that respect, was the false statement made by Mr. Bell with an intent to deceive? We have here also "catarrhal conditions

and head colds." Is there anything beneficial in this medicine and of therapeutic value for the treatment of those ailments?

It will be necessary, as I have indicated several times, for you to consider the falsity or the alleged falsity of the statements. If you find there are false statements, or even one, then you should go farther and consider whether there was an intent to deceive. If Mr. Bell acted in good faith, if he had a desire to be of service to his fellow man, and honestly believing these statements, made them, then, even though the statements are false, the Government should not prevail.

As bearing upon his good faith, you may take into consideration what he was heard from his father and mother about this medicine, about its reputation, if it has any. He has a right to his ideas as they may be formed from what the users of the medicine have said to him. He says that his wife takes it, and if she does, and he knows it, that is entitled to be considered by you as bearing upon his own good faith in the matter.

When you have given thought to all of these questions, it will be your duty to find a verdict which shall be fair to Mr. Bell and to the Government. He has a right to express his honest opinion. His opinion may be erroneous; it may even be false; but if he honestly and sincerely entertains his opinion, even though based upon insufficient evidence, he has a right to express it, just the same as you and I and all of us, about important matters from time to time, form our judgment upon what we see, upon our personal experiences and upon what people tell us; and it is no different with him in connection with this medicine.

A person can tell half-truths; what he says may be true in every syllable but his statement, nevertheless will convey a false impression. If he does this, deliberately tells half-truths, which, even though literally true, are false, in that they engender wrong inferences, he may be charged with falsity in that respect. A person making or dealing in substances, alleging them to have therapeutic or curative value, should be in a position to have superior knowledge of what he has said. Otherwise, his statements may be considered to have been recklessly and inconsiderately made. You may consider whether he has done all that a reasonably prudent man, desiring to act in good faith, would have done in the way of acquainting himself with the effect of this medicine—his education, his training, all those are matters to be considered.

I think I have charged you, in substance, that if you find from the evidence that this preparation is dangerous to entrust in the hands of a layman, without medical supervision, and if the label bears no adequate statements as to such danger, then you may find that the statements as to the therapeutic value of the medicine are false. But even if you find that, you should go farther and consider whether they were made with an intent to deceive.

I think I have substantially covered the various requests to charge that have been made by the parties, although I have not done so in the language of the requests.

JUROR NO. 5. Would you kindly state, sir, in what form you would wish the verdict announced?

THE COURT. Either in favor of the Government or in favor of the claimant.

JUROR No. 5. Suppose, on the other hand, there are certain qualifications. Do you wish them—as, for instance, you announced that we must consider whether the statement is true; but suppose we conclude that it is not true but that, as far as we know, he thought it was true; I am taking a suppositious case.

The COURT. Well, then, if you find that any particular statement is false, you may state separately what statement or statements you believe to be false; but if you do not find that a statement was made fraudulently, that is with intent to deceive, your verdict nevertheless should be for the claimant.

JUROR No. 5. Then it is proper, if we so see fit, to announce a verdict in favor of either one of the parties, but make certain additional statements?

The COURT. You may make a statement, you may make a special finding, if you desire to, upon any particular part of the matter which is false. Is there anything else?

Mr. JOHNSON. Will Your Honor look at requests 8, 9, and 10 of mine, and see if you think you have given them fully?

The COURT. I think I have covered them substantially.

Mr. JOHNSON. I am inclined to think you have.

The COURT. Any special requests that you have, Mr. De Koven?

Mr. DE KOVEN. I was considering whether No. 8 of our requests to charge was covered.

The COURT. I think I have covered that. All right, gentlemen, you may take this [indicating Government's exhibit 1] with you, if you want to.

The following verdict was returned by the jury: "We find for the claimant. We recommend that the claimant insert in his literature a warning against its use by persons having tubercular tendencies."

UNITED STATES v. ELEVEN CARTONS OF DRUG LABELED IN PART "VAPEX"

(District Court, D. Maryland, June 7, 1932)

59 Fed. (2d) 446

Libel for condemnation of article of drug. On demurrer to claimant's second special amended plea. Demurrer sustained.

CHESNUT, *District Judge*. In this proceeding at law (by the applicable statute called a libel) the Government seeks to condemn a quantity of "Vapex", shipped in interstate commerce, on the ground that it is misbranded under section 8, paragraph 2, of the Food and Drugs Act of Congress (U.S.C., title 21, sec. 10). The misbranding is alleged to result from the failure of the package

> to bear a statement on the label of the quantity of proportion of any alcohol * * *, or any derivative or preparation of any such substances contained therein.

By its second special amended plea filed February 12, 1932, the claimant, E. Fougera & Co., Inc., admits all the allegations of fact contained in the libel but, in opposition to the claimed condemnation, sets up the following contentions, in substance: (1) that the "Vapex"

as shown by the labels on the packages is "a pure inhalant generally indicated in the treatment of head colds"; (2) that the directions for using it are to place a drop or two in the center of a folded handkerchief and inhale the vapor therefrom; (3) that the alcohol contained in the article "has no office or property therein other than as a diluent or solvent of the essential oils contained therein." From these facts in the plea the legal conclusions are drawn that (a) Vapex is not a drug within the meaning of the act; (b) the act properly construed does not apply to Vapex; (c) that if construed to apply to Vapex the act is unconstitutional in the absence "of a showing that the alcoholic content of said article renders the same noxious or harmful to the public health."

The Government challenges the sufficiency of the plea to establish these conclusions.

After a study of the excellent briefs submitted by counsel, I have reached the conclusion that the demurrer should be sustained for the following reasons:

The term "drug" as used in the act is defined to include "all medicines and preparations recognized in the United States Pharmacopœia or National Formulary for *internal* or *external* use, and any substance or mixture of substances intended to be used for the cure, mitigation, or prevention of disease of either man or other animals." U.S.C., title 21, sec. 7. The definition so clearly includes the substance "Vapex" (as it is described in claimant's plea) that discussion seems unnecessary. The labels on the bottles as quoted in the plea state that the inhalation of the vapor from a drop of Vapex on a handkerchief is effective to relieve a head cold instantly and that its use will stop a cold at the start. It is further described as a new method of treatment for colds. The labels also assert that its use is both curative and preventative, and that breathing the vapor is inimical to the germs of common colds. It is clearly, therefore, a substance "intended to be used for the cure, mitigation, or prevention of disease", unless it were denied, as it is not, and as I think it could not be, that a head or common cold is a disease. See *United States* v. *23½ Dozen Bottles*, 44 Fed. (2d) 831 (D.C.Conn.).

The more substantial contention of the claimant is that Vapex, by reason of its nature and use, is without the substantial intent although within the literal content of the wording of the act. It is urged that the purpose of Congress in requiring preparations containing alcohol to state the percentage thereof on the label was to prevent the user of medicine from unconsciously acquiring a taste for alcohol disguised as medicine; and a comparative reference is made to the section of the same law relating to food preparations which omits any requirement that food products containing alcohol (often contained therein, it is said, as preservatives) must state upon their labels the quantity contained. It is argued for the claimant that a medicine or drug used only for inhalation and not otherwise for internal use could not reasonably be within the substantial intent of Congress in requiring the percentage of alcohol to be stated on its label. The substance of this contention is that inhaling vapor from alcohol is harmless and not habit-forming and therefore could not have been within the intent of the act as to misbranding. But this contention is only a restatement of the claimant's first contention which was that an inhalant is not a drug which, as above noted, is

I think not tenable. And if an inhalant is covered by the definition of a drug, then the misbranding section is expressly applicable to it. The statute makes no exception and I do not think the court is at liberty to read an exception into the act even though if the matter had been brought specially to the attention of the Legislature it might have done so in the original enactment. See *United States* v. *Sixty-five Casks*, 170 Fed. 449 (D.C.N.D.W.Va.), affirmed (C.C.A.) 175 Fed. 1022.

It is a well-settled principle of statutory construction that the intention of the Legislature is to be sought primarily in the language used, and where this expresses an intention reasonably intelligible and plain, it must be accepted by the courts without modification by resort to construction or conjecture. *Thompson* v. *United States*, 246 U.S. 547, 38 S.Ct. 349, 62 L.Ed. 876.

In support of its contention the claimant relies upon the cases of *United States* v. *Antikamnia Chemical Co.*, 231 U.S. 654, 34 S.Ct. 222, 58 L.Ed. 419; *Hall-Baker Grain Co.* v. *United States*, 198 Fed. 614 (C.C.A. 8th); *McDermott* v. *Wisconsin*, 228 U.S. 115, 33 S.Ct. 431, 57 L.Ed. 754, 47 L.R.A. (N.S.) 984, Ann. Cas. 1915A, 39. But I find nothing in these cases which, in my opinion, gives any substantial support to the contention. And it may also be said that the question as to whether the inhaling of alcohol is habit-forming and consequently harmful is hardly raised by the pleadings. In any event it is hardly within the scope of judicial knowledge that alcohol as an inhalant is necessarily harmless; and I do not feel warranted in determining that Congress could not have intended that preparations for inhalation only should be required to bear a statement of alcoholic content on the label. Assuming that the matter is debatable, it seems entirely clear that Congress was entitled to exercise its own judgment, not to be superseded by the verdict of a jury or the personal opinion of a judge. *Hebe Co.* v. *Shaw*, 248 U.S. 297, 303, 39 S.Ct. 125, 63 L.Ed. 255.

Finally, it is contended for the claimant that if "Vapex" is within the language of the act as properly construed, it is nevertheless without the power of Congress to prohibit its transportation in interstate commerce, because, as directed to be used, it is a harmless substance in no way detrimental to the public health. Emphasis is laid on the wording of the opinions in many of the cases in the Supreme Court dealing with the Food and Drugs Act to the effect that the primary purpose of Congress was to prevent injury to the public health and that the prohibition was only against *impure* food and drugs. See *Hipolite Egg Co.* v. *United States*, 220 U.S. 45, 31 S.Ct. 364, 55 L.Ed. 364; *Seven Cases Eckman's Alterative* v. *United States*, 239 U.S. 510, 36 S.Ct. 190, 60 L.Ed. 411, L.R.A. 1916D, 164; *Hoke* v. *United States*, 227 U.S. 308, 322, 33 S.Ct. 281, 57 L.Ed. 523, 43 L.R.A. (N.S.) 906, Ann. Cas. 1913E, 905; *McDermott* v. *State of Wisconsin*, 228 U.S. 115, 33 S.Ct. 431, 57 L.Ed. 754, 47 L.R.A. (N.S.) 984, Ann. Cas. 1915A, 39. And importantly reference is made to the Child Labor case (*Hammer* v. *Dagenhart*), 247 U.S. 251, 38 S.Ct. 529, 62 L.Ed. 1101, 3 A.L.R. 649, Ann. Cas. 1918E, 724, where the Supreme Court held invalid an act of Congress which prohibited interstate commerce in articles manufactured by child labor under certain conditions. But in that case the articles themselves were the ordinary and usual subjects of commerce, entirely

harmless in themselves, and the aim of the statute was thought to be to equalize labor conditions in the several States rather than protect the public against the use of harmful articles. For this reason the legislation was held beyond the powers of Congress under the interstate commerce clause of the Constitution.

It is true that the Food and Drugs Act does forbid interstate commerce in impure food and drugs, but the scope of the act is not limited to that subject alone. It also includes the regulation of interstate commerce in drugs and food that are not impure and not of themselves harmful, including the requirement that the articles shall not be misbranded. In the judgment of Congress consumers of articles, harmless in themselves when used as directed, are entitled, nevertheless, to be advised of the existence in the articles of ingredients belonging to classes of articles which were regarded as potentially harmful of themselves, even though contained in harmless quantities in the articles as designed for consumption. To this end Congress provided that the package must contain a statement on the labels of the quantity of alcohol, morphine, opium, cocaine, heroin, alpha or beta eucaine, chloroform, cannabis indica, chloral hydrate or acetanilide, or any derivative or preparation of any such substance contained therein. Such substances classified as "narcotics" are obviously harmful when used in excessive quantities. Within the prescribed class is alcohol. Drugs containing such narcotics when properly labeled are not forbidden the facilities of interstate commerce. The effect of the act with regard thereto is to regulate rather than prohibit and it can no longer be doubted that such regulation is within the power of Congress. *United States* v. *Antikamnia Chem. Co.*, 231 U.S. 654, 34 S.Ct. 222, 58 L.Ed. 419; *Glaser, Kohn & Co.* v. *United States*, 224 Fed. 84, 89 (C.C.A. 7th). As Vapex is a drug containing alcohol, it comes clearly within the prescribed class even though the article as designed and directed to be used by the consumer is itself innocent and innocuous. The controlling principle applicable to the case is to be found in *Purity Extract Co.* v. *Lynch*, 226 U.S. 192, 201, 33 S.Ct. 44, 46, 57 L.Ed. 184, where Mr. Justice Hughes, speaking for the Supreme Court, said:

> It does not follow that because a transaction, separately considered, is innocuous, it may not be included in a prohibition the scope of which is regarded as essential in the legislative judgment to accomplish a purpose within the admitted power of the government.

And again at page 204 of 226 U.S., 33 S.Ct. 44, 47, he continued as follows:

> The statute establishes its own category. The question in this court is whether the legislature had power to establish it. The existence of this power, as the authorities we have cited abundantly demonstrate, is not to be denied simply because some innocent articles or transactions may be found within the proscribed class. The inquiry must be whether, considering the end in view, the statute passes the bounds of reason and assumes the character of a merely arbitrary fiat.

The question in that case was whether a substance called "Poinsetta," itself entirely innocuous but containing an ingredient forbidden by the statute of Mississippi, was prohibited by the act which, as construed by the State court, forbade the sale of all malt liquors. The court held that the article in question was within the act,

The same principle has been subsequently applied by the Supreme Court to other analogous situations. As in *Hebe Co.* v. *Shaw*, 248 U.S. 297, 39 S.Ct. 125, 126, 63 L.Ed. 255, a similar situation, Mr. Justice Holmes, speaking for the court, said:

> The power of the legislature "is not to be denied simply because some innocent articles or transactions may be found within the proscribed class. The inquiry must be whether, considering the end in view, the statute passes the bounds of reason and assumes the character of a merely arbitrary fiat." *Purity Extract & Tonic Co.* v. *Lynch*, 226 U.S. 192, 204, 33 S.Ct. 44, 47 (57 L.Ed. 184). If the character or effect of the article as intended to be used "be debatable, the Legislature is entitled to its own judgment, and that judgment is not to be superseded by the verdict of a jury," or, we may add, by the personal opinion of judges, "upon the issue which the Legislature has decided." *Price* v. *Illinois*, 238 U.S. 446, 452, 35 S.Ct. 892, 894 (59 L.Ed. 1400); *Rast* v. *Van Deman & Lewis Co.*, 240 U.S. 342, 351, 357, 36 S.Ct. 370, 60 L.Ed. 679, L.R.A. 1917A, 421 Ann.Cas. 1917B, 455. The answer to the inquiry is that the provisions are of a kind familiar to legislation and often sustained and that it is impossible for this court to say that they might not be believed to be necessary in order to accomplish the desired ends.

And the same principle was again applied by the Supreme Court in the cases of *Pierce Oil Corporation* v. *City of Hope*, 248 U.S. 498, 500, 39 S.Ct. 172, 63 L.Ed. 381, and *Euclid* v. *Ambler Co.*, 272 U.S. 365, 368, 47 S.Ct. 114, 71 L.Ed. 303, 54 A.L.R. 1016.

If we assume that the inhalation of Vapex is innocuous, nevertheless it is within the category of articles which, by the act, are required to contain a declaration on the label of the alcoholic content. And it cannot be said at this time that a statute which merely regulates interstate commerce in drugs containing alcohol, passes the bounds of reason or assumes the character of an arbitrary fiat. It is, therefore, not permissible for the court to make an exception where Congress had made none, and thus to withdraw from the operation of the statute an article which, even though harmless itself, is otherwise within the proscribed class.

The demurrer is, therefore, sustained.

UNITED STATES v. CENTRALIA DAIRY CO.

(District Court, W.D. Washington, July 16, 1932)

60 Fed. (2d) 141; N.J. No. 20139

Information alleging violation of the Food and Drugs Act. On demurrer to the information. Demurrer to all counts overruled.

CUSHMAN, *District Judge.* The information is for violation of the Food and Drug Acts, more particularly sections 2, 6, 8, 9, and 10, title 21, U.S.C.A.

One set of counts in the information accuses the defendant of unlawfully shipping and delivering for shipment from the city of Centralia, in the State of Washington, to cities in the territory of Alaska, an article of food, adulterated within the meaning of the act of Congress, in that a product which contained less than 80 per centum by weight of milk fat had been substituted for butter.

Title 21 U.S.C. section 8, provides:

> Sec. 8. Adulterated articles. * * * An article shall be deemed to be adulterated: * * * In the case of food: * * * If any substance has been substituted wholly or in part for the article.

Section 6 of the Food and Drug Act of 1906, as amended by the act of March 4, 1923 (42 Stat. 1500, title 21, U.S.C. sec. 6), provides:

> Sec. 6. Same; "butter." For the purposes of sections 1 to 15, inclusive, of this title, "butter" shall be understood to mean the food product usually known as butter, and which is made exclusively from milk or cream, or both, with or without common salt, and with or without additional coloring matter, and containing not less than 80 per centum by weight of milk fat, all tolerances having been allowed for

The demurrer to this set of counts will be overruled.

In another set of counts the defendant is accused of misbranding such shipments, it being alleged that the packages were misbranded, in that the statements "butter" and "one pound net" were false and misleading in that they represented the article was butter, to wit, a product which should contain not less than 80 per centum by weight of milk fat and that each of said packages contained 1 pound net of the article, whereas in truth and in fact said article did not contain 80 per centum by weight of milk fat but did contain a less amount, and each of said packages did not contain 1 pound net of the article but did contain a less amount, and that said article was further misbranded in that it was labeled as aforesaid so as to mislead and deceive the purchaser into the belief that it was butter, to wit, a product which should contain not less than 80 per centum by weight of milk fat and that each of said packages contained 1 pound net of the article. These counts are, in part at least, under that part of section 8 of the act of June 30, 1906 (34 Stat. 771, as amended by act Mar. 3, 1913, 37 Stat. 732), now appearing as title 21, U.S.C. section 9. This section, in part, provides:

> Sec. 9. Misbranded; meaning and application.
> The term "misbranded", as used in sections 1 to 15, inclusive, of this title, shall apply to all drugs, or articles of food, or articles which enter into the composition of food, the package or label of which shall bear any statement, design, or device regarding such article, or the ingredients or substances contained therein which shall be false or misleading in any particular, and to any food or drug product which is falsely branded as to the State, Territory, or country, in which it is manufactured or produced.

As these counts clearly allege that the statement that the packages contained "butter", as the same is defined by section 6, was false and misleading in the particular therein pointed out, the demurrer to these counts will be overruled and it is not necessary to consider whether these counts are also under that part of section 8 of the original act as amended now appearing as title 21, U.S.C. section 10, third paragraph.

In a third set of counts shipments and deliveries for shipment such as described in the first considered counts are alleged. In these last-mentioned counts the marking, in part, is alleged to have been "one pound net" and that it was food in package form and that the quantity of the contents was not plainly and conspicuously marked on the outside of the package.

These counts are under section 10, title 21, U.S.C., and more particularly the third paragraph thereof. This section, insofar as applicable, provides:

> Misbranded articles. For the purposes of sections 1 to 15, inclusive, of this title, an article shall be deemed to be misbranded; * * *
> Foods. In the case of food: * * *
> Packages not marked with weight; variations and exceptions permitted. Third. If in package form, the quantity of the contents be not plainly and conspicuously marked on the outside of the package in terms of weight, measure, or numerical count. Reasonable variations shall be permitted, and tolerances and also exemptions as to small packages shall be established by rules and regulations made in accordance with the provisions of section 3 of this title. The word "package" as used in this paragraph shall include and shall be construed to include wrapped meats inclosed in papers or other materials as prepared by the manufacturers thereof for sale.

The question presented concerning these counts is as to the validity of the third paragraph of section 10, supra. In *United States* v. *Shreveport Grain & Elevator Co.* (D.C.),46 Fed. (2d) 354, 355, this part of the act was, under the sixth amendment, held unconstitutional; the court citing, in support of the ruling: *United States* v. *L. Cohen Grocery Co.*, 255 U.S. 81, 41, S.Ct. 298, 65 L.Ed. 516, 14 A.L.R. 1045; *Connally* v. *General Const. Co.*, 269 U.S. 385, 46 S.Ct. 126, 70 L.Ed. 322; *Yu Cong Eng.* v. *Trinidad*, 271 U.S. 500, 46 S.Ct. 619, 70 L.Ed. 1059; *United States* v. *Reese et al.*, 92 U.S. 214, 23 L.Ed. 563; *United States* v. *Brewer*, 139 U.S. 278, 11 S.Ct. 538, 35 L.Ed. 190; *Todd* v. *United States*, 158 U.S. 282, 15 S.Ct. 889, 39 L.Ed. 982.

In construing a statute the first duty of the court is to ascertain the legislative intent. *Ebert* v. *Poston*, 266 U.S. 548, 45 S.Ct. 188, 69 L.Ed. 435.

If an act of Congress cannot, upon a fair construction, be reconciled with the Constitution, it is the duty of the court to give effect to the Constitution rather than to the statute. *Hepburn* v. *Griswold*, 8 Wall 603, 19 L.Ed. 513. Acts of Congress must, however, be regarded as constitutional unless clearly shown to be otherwise. *Hepburn* v. *Griswold*, 8 Wall. 603, 19 L.Ed. 513. A court should declare an act of Congress unconstitutional only where the repugnancy is clear and the conflict irreconcilable. *Nashville* v. *Cooper*, 6 Wall. 247, 18 L.Ed. 851. See, also, *Trade-Mark Cases*, 100 U.S. 82, 95, 96, 25 L.Ed. 550; *United States* v. *Harris*, 106 U.S. 629, 635, 1 S.Ct. 601, 27 L.Ed. 290; *Close* v. *Glenwood Cemetery*, 107 U.S. 466, 475, 2 S.Ct. 267, 27 L.Ed. 408. Acts of Congress should be construed so as to avoid grave doubts as to their constitutionality. *Lewellyn* v. *Frick*, 268 U.S. 238–251, 45 S.Ct. 487, 69 L.Ed. 934; *Panama R. Co.* v. *Johnson*, 264 U.S. 375–390, 44 S.Ct. 391, 68 L.Ed. 748; *United States* v. *Jin Fuey Moy*, 241 U.S. 394–401, 36 S.Ct. 658, 60 L.Ed. 1061; *United States ex rel. Attorney General* v. *Delaware & Hudson Co.*, 213 U.S. 366, 408, 29 S.Ct. 527, 53 L.Ed. 836; *Baender* v. *Barnett*, 255 U.S. 224, 41 S.Ct. 271, 65 L.Ed. 597.

In *United States* v. *Shreveport Grain & Elevator Co.*, *supra*, the court held the clause of paragraph third of section 10, quoted above, unconstitutional because of the following contained therein:

> Reasonable variations shall be permitted, and tolerances and also exemptions as to small packages shall be established by rules and regulations made in accordance with the provisions of section 3 of this title.

Section 3, to which reference is made in the third paragraph of section 10 provides:

> Sec. 3. Regulations for carrying out food and drug laws.
> The Secretary of the Treasury, the Secretary of Agriculture, and the Secretary of Commerce shall make uniform rules and regulations for carrying out the provisions of sections 1 to 15, inclusive, of this title, including the collection and examination of specimens of foods and drugs manufactured or offered for sale in the District of Columbia, or in any Territory of the United States, or which shall be offered for sale in unbroken packages in any State other than that in which they shall have been respectively manufactured or produced, or which shall be received from any foreign country, or intended for shipment to any foreign country, or which may be submitted for examination by the chief health, food, or drug officer of any State, Territory, or the District of Columbia, or at any domestic or foreign port through which such product is offered for interstate commerce, or for export or import between the United States and any foreign port or country (21 U.S.C.A. sec. 3).

This reference to section 3 shows that the sentence last quoted from paragraph third of section 10 is no part of the definition of the offense but is a direction as to the exercise of administrative power. The court is only concerned with whether the offense is described with such reasonable certainty as to be valid and is not, in a case such as the present, concerned with those parts of the law having to do with its administrative features.

The demurrer to these counts will likewise be overruled.

The clerk will notify the attorneys for the parties of the foregoing ruling.

UNITED STATES v. SHREVEPORT GRAIN & ELEVATOR CO.

(United States Supreme Court, Nov. 7, 1932)

287 U.S. 77

Appeal from the District Court of the United States for the Western District of Louisiana. Judgment reversed.[38]

Mr. Justice Sutherland delivered the opinion of the court.

The defendant (appellee) was charged by indictment, returned in the court below, with misbranding certain sacks, containing corn meal, an article of food, by labeling each of the sacks as containing a greater quantity by weight than in fact was contained therein, contrary to the provisions of the Food and Drugs Act of June 30, 1906, c. 3915, 34 Stat. 768, U.S.C., title 21, section 2, which makes it unlawful to ship in interstate or foreign commerce any article of food or drugs which is adulterated or misbranded, within the meaning of the act. The penalty prescribed is a fine of $200 for the first offense, and for each subsequent offense, not exceeding $300, or imprisonment not exceeding one year, or both, in the discretion of the court. Section 8, as amended by the act of March 3, 1913, c. 117, 37 Stat. 732, provides that an article of food shall be deemed to be misbranded—

> Third. If in package form, the quantity of the contents be not plainly and conspicuously marked on the outside of the package in terms of weight, measure,

[38] Reversing *United States* v. *Shreveport Grain & Elevator Co.*, p 1239, *ante*.

or numerical count: *Provided, however,* That reasonable variations shall be permitted, and tolerances and also exemptions as to small packages shall be established by rules and regulations made in accordance with the provisions of section 3 of this Act.

A motion to quash the indictment was interposed by the defendant upon the grounds that the act of Congress relied on is unconstitutional, because (1) the offense is not defined with certainty and therefore the act violates the due process clause of the Fifth Amendment, and the requirement of the Sixth Amendment that the accused shall enjoy the right "to be informed of the nature and cause of the accusation"; and (2) it is in conflict with Articles I, II, and III of the Federal Constitution which separate the Government into legislative, executive, and judicial branches.

The court below sustained the motion and dismissed the proceedings. The case comes here by appeal under the provisions of section 238 of the Judicial Code, as amended by the act of February 13, 1925. U.S.C., title 28, sec. 345; U.S.C., title 18, sec. 682.

First. The contention seems to be that the proviso makes it necessary to read section 8 as substantively prohibiting unreasonable variations in the weight, measure, or numerical count of the quantity and contents of any package from that marked on the outside of the package; and that the test thereby indicated is so indefinite and uncertain that it fails to fix any ascertainable standard of guilt, or afford a valid definition of a crime. In support of the contention *United States* v. *Cohen Grocery Co.*, 255 U.S. 81, *United States* v. *Brewer*, 139 U.S. 278, *Connally* v. *General Const. Co.*, 269 U.S. 385, and other decisions of this court are relied upon.

We are of opinion that the construction thus sought to be put upon the act cannot be sustained; and, therefore, other considerations aside, the cases cited do not apply. The substantive requirement is that the quantity of the contents shall be plainly and conspicuously marked in terms of weight, etc. We construe the proviso simply as giving administrative authority to the Secretaries of the Treasury, Agriculture, Commerce and Labor to make rules and regulations permitting reasonable variations from the hard and fast rule of the act and establishing tolerances and exemptions as to small packages, in accordance with section 3 thereof.[39] This construction avoids the doubt which otherwise might arise as to the constitutional point, and, therefore, is to be adopted if reasonably possible. *United States* v. *Standard Brewery,* 251 U.S. 210, 220; *United States* v. *La Franca,* 282 U.S. 568, 574. We find nothing in the terms of the act to require a division of the proviso so that the power of regulation will apply to the establishment of tolerances and exemptions, but not to reasonable variations. We think both are included. As to this there would be no room for doubt if it were not for the presence of a comma after the word "permitted", or the absence of one after the word "established." Inserting the latter, the proviso would read, "That reasonable variations shall be permitted, and tolerances and also exemptions as to small packages shall be established, by rules and regulations * * *." Punctuation marks are no part of an act. To determine the intent of the law, the court, in construing a statute, will disregard the punctuation, or will repunctuate, if that

[39] Sec. 3 provides that the Secretaries named "shall make uniform rules and regulations for carrying out the provisions of this act * * *."

be necessary, in order to arrive at the natural meaning of the words employed. *Hammock* v. *Loan and Trust Co.*, 105 U.S. 77, 84–85; *United States* v. *Lacher*, 134 U.S. 624, 628; *United States* v. *Oregon &c. Railroad*, 164 U.S. 526, 541; *Stephens* v. *Cherokee Nation*, 174 U.S. 445, 480; *Chicago, M. & St. P. Ry. Co.* v. *Voelker*, 129 Fed. 522, 526–527.

Our attention is called to the fact that the House Committee on Interstate and Foreign Commerce, in reporting the bill which afterwards became the act in question (H.R. 850, 62d Cong., 2d Sess., pp. 2–4), agreed with the view that the authority to make rules and regulations was confined to the establishment of tolerances and exemptions; and that the Senate Committee on Manufactures (S.R. 1216, 62d Cong., 3d Sess., pp. 2–4) reported to the same effect. In proper cases, such reports are given consideration in determining the meaning of a statute, but only where that meaning is doubtful. They cannot be resorted to for the purpose of construing a statute contrary to the natural import of its terms. *Wisconsin R.R. Comm.* v. *C., B. & Q. R.R. Co.*, 257 U.S. 563, 588–589; *Penna. R.R. Co.* v. *International Coal Co.*, 230 U.S. 184, 199; *Van Camp & Sons* v. *Am. Can Co.*, 278 U.S. 245, 253. Like other extrinsic aids to construction their use is "to *solve*, but not to *create* an ambiguity." *Hamilton* v. *Rathbone*, 175 U.S. 414, 421. Or, as stated in *United States* v. *Hartwell*, 6 Wall. 385, 396, "If the language be clear it is conclusive. There can be no construction where there is nothing to construe." The same rule is recognized by the English courts. In *King* v. *Commissioners*, 5 A. & E. 804, 816, Lord Denman, applying the rule, said that the court was constrained to give the words of a private act then under consideration an effect which probably was "never contemplated by those who obtained the act, and very probably not intended by the legislature which enacted it. But our duty is to look to the language employed, and construe it in its natural and obvious sense." See also *United States* v. *Lexington Mill Co.*, 232 U.S. 399, 409; *Caminetti* v. *United States*, 242 U.S. 470, 485.

Moreover, the practical and long continued construction of the executive departments charged with the administration of the act and with the duty of making the rules and regulations therein provided for, has been in accordance with the view we have expressed as to the meaning of the section under consideration. The rules and regulations, as amended on May 11, 1914, deal with the entire subject in detail under the recital, "(i) The following tolerances *and variations* (italics supplied) from the quantity of the contents marked on the package shall be allowed: * * *." Then follows an enumeration of discrepancies due to errors in weighing which occur in packing conducted in compliance with good commercial practice; due to differences in capacity of bottles and similar containers, resulting from unavoidable difficulties in manufacture, etc.; or in weight due to atmospheric differences in various places, etc. These regulations, which cover variations as well as tolerances and exemptions, have been in force for a period of more than 18 years, with the silent acquiescence of Congress. If the meaning of the statutory words was doubtful, so as to call for a resort to extrinsic aid in an effort to reach a proper construction of them, we should hesitate to accept the committee reports in preference to this contemporaneous and long continued practical construction of the act on the part of those charged with its administration. Such a construction, in cases of doubtful meaning,

is accepted unless there are cogent and persuasive reasons for rejecting it. See, for example, *United States* v. *Johnson*, 124 U.S. 236, 253.

Second. The contention that the act contravenes the provisions of the Constitution with respect to the separation of the governmental powers is without merit. That the legislative power of Congress cannot be delegated is, of course, clear. But Congress may declare its will, and after fixing a primary standard, devolve upon administrative officers the "power to fill up the details" by prescribing administrative rules and regulations. That the authority conferred by the act now under review in this respect does not transcend the power of Congress is not open to reasonable dispute. The effect of the provision assailed is to define an offense, but with directions to those charged with the administration of the act to make supplementary rules and regulations allowing reasonable variations, tolerances and exemptions, which, because of their variety and need of detailed statement, it was impracticable for Congress to prescribe. The effect of the proviso is evident and legitimate, namely, to prevent the embarrassment and hardship which might result from a too literal and minute enforcement of the act, without at the same time offending against its purposes. The proviso does not delegate legislative power, but confers administrative functions entirely valid within principles established by numerous decisions of this court, of which the following may be cited as examples. *Buttfield* v. *Stranahan*, 192 U.S. 470, 496; *Plymouth Coal Co.* v. *Pennsylvania*, 232 U.S. 531, 542; *United States* v. *Grimaud*, 220 U.S. 506, and authorities reviewed.

Judgment reversed.

Mr. Justice BRANDEIS, Mr. Justice STONE and Mr. Justice CARDOZO concur in the result on the ground that the statute, as punctuated, reads as its legislative history shows Congress intended it to read, and that, so read, it is sufficiently definite to satisfy constitutional requirements.

UNITED STATES v. 186 BOXES OF WHOLE TULLIBEES AND 116 BOXES OF DRESSED TULLIBEES

(District Court, S.D. New York, Feb. 21, 1933)

Two suits by the Government to forfeit certain lots of tullibees received in foreign and interstate commerce, upon the ground that they were adulterated within the meaning of the Food and Drugs Act of June 30, 1906 (21 U.S.C. secs. 1 to 15). By stipulation the suits were tried together before a jury of one and both sides moved for a direction of a verdict; the court thereupon orally stated the specific facts proved by the evidence and at the request of counsel reserved decision upon the motions so as to give opportunity for the submission of briefs. Verdict directed for the Government.

COLEMAN, *Judge*. Without repeating the statement of specific facts made by the court at the close of the trial, the question presented is whether under the Food and Drug Act of June 30, 1906 (21 U.S.C. secs. 1 to 15) raw fish infested with parasitic worms should be condemned and forfeited in the absence of proof that the parasites would be injurious to the consumer or would impair the taste of the fish,

but where it appears that an ordinary person would have a strong revulsion against eating such fish if aware of the presence of the worms, and where it further appears that only an experienced person would discover them. The worms themselves are threadlike structures difficult to identify, but they are surrounded by a quantity of thick, greenish yellow fluid unpleasantly suggestive of pus, which consists of broken-down fish tissue and to some extent the excreta of the worms. This fluid would readily be observable by anyone eating the fish; but unless he knew its origin, it would probably be unobjectionable.

The Food and Drug Act (title 21, U.S.C.) bans adulterated foods in foreign and interstate commerce, and section 8, subdivision 6 provides that food shall be deemed adulterated—

> if it consists in whole or in part of a filthy, decomposed, or putrid animal or vegetable substance, or any portion of an animal unfit for food, whether manufactured or not, or if it is the product of a diseased animal or one that has died otherwise than by slaughter.

It seems to me that the fish in question come within the scope of that subdivision and are not excluded by the absence of proof that their condition would impair the health of the consumer or the flavor of the fish. The subdivision does not expressly prescribe such requisite and the courts have held that it does not imply one (*Knapp* v. *Callaway*, 52 Fed. (2d) 476; *A. O. Andersen & Co.* v. *United States*, 284 Fed. 542). While the statute is primarily concerned with the health of the consumers, it might well ban " filthy " or " decomposed " animal matter or the " product of a diseased animal " without direct or scientific proof of danger to health. The æsthetic guide frequently precedes the scientific one and the Government might wisely ban food which runs counter to it in the categories mentioned.

The fact that most consumers would not discover the worms and would, therefore, not have their feelings affronted is of no consequence because were it otherwise, the statute would not be needed. The statute is largely intended to protect those consumers who would not be in a position to observe the defect in the food.

Verdict is directed for the Government. Settle order on notice.

167546—36——85

DIGEST OF COURT DECISIONS

ABBOTT BROS. RHEUMATIC REMEDY: Page

A drug labeled "Abbott Bros. Rheumatic Remedy" *held* misbranded in that the package and label contained statements regarding the curative or therapeutic effect of the article with respect to certain diseases, which were false and fraudulent. *United States* v. *Abbott Bros. Co*---------- 722
Affirmed, *Abbott Bros. Co.* v. *United States*---------- 831

ACETANILID:

Where a derivative of acetanilid, such as acetphenetidin, contained in a drug product, is declared on the label by its proper name, it is unnecessary to state on the label that such derivative substance is derived from acetanilid. *United States* v. *100 Packages of Antikamnia Tablets*---------- 178
Judgment affirmed, *United States* v. *Antikamnia Chemical Co*--- 260
Judgment reversed, *United States* v. *Antikamnia Chemical Co*--- 552

It is a violation of the act and regulations to label a drug as containing acetphenetidin without stating that acetphenetidin is a derivative of acetanilid. *United States* v. *Antikamnia Chemical Co*---- 552

ACETPHENETIDIN.

See Acetanilid.

ADDED POISONOUS AND ADDED DELETERIOUS INGREDIENTS:

Under the act, sections 7 and 8, an article of food other than confectionery is not deemed to be adulterated merely because it contains a poisonous or deleterious ingredient unless such ingredient has been "added", that is, unless it is foreign to the natural or normal composition of the article. *United States* v. *40 Barrels and 20 Kegs of Coca-Cola*---------- 239
Judgment affirmed, *United States* v. *40 Barrels and 20 Kegs of Coca Cola*---------- 606
Judgment of C. C. A. reversed, *United States* v. *Coca Cola Co*--- 741

The word "added", in the act, section 7, declaring an article of food adulterated if it contains any added poisonous or other added deleterious ingredient which may render the article injurious to health, implies the existence of a standard, and an element necessarily used to create a standard is not "added", and caffeine, forming a valuable constituent of Coco Cola, made up of water, sugar, caffeine, phosphoric acid, glycerine, lime juice, coloring, and flavoring matter, is not "added", where for 15 years before the act the article containing all the ingredients had been widely used. *United States* v. *40 Barrels and 20 Kegs of Coco Cola*---------- 606
Affirming judgment in *United States* v. *40 Barrels and 20 Kegs of Coca-Cola*---------- 239
Judgment of C. C. A. reversed, *United States* v. *Coca Cola Co*--- 741

The court, in construing the act, section 7, clause 5, declaring an article of food adulterated if it contain any added poisonous or other added deleterious ingredient which may render the article injurious to health, must give effect to the word "added", and not construe the clause in the same way that an almost identical clause relating to confectionery with the exception of the omission of the word "added" must be construed, for the court must give effect to all the words of a statute in their ordinary sense. *United States* v. *Coca Cola Co*---------- 741

ADDED POISONOUS AND ADDED DELETERIOUS INGREDIENTS—Continued. Page

The test whether a deleterious ingredient is *added* to an article of food, within the act, section 7, clause 5, declaring an article of food adulterated if it contain any added poisonous or deleterious ingredient, depending on whether the ingredient is in its natural or in an artificial form, may often be a useful aid in applying and interpreting the statute, but it cannot be applied where artificially compounded foods are under consideration. Id.

The court, in construing the phrase "added poisonous or added deleterious ingredient", in the act, section 7, clause 5, declaring an article of food adulterated if it contain any added poisonous or other added deleterious ingredient, must consider section 8, providing that an article of food which does not contain any added poisonous or deleterious ingredient shall not be deemed to be adulterated or misbranded in specified cases, and when so construed, the act requires a standard before there can be any added ingredient or adulteration. Id.

The act as to food makes no distinction between compounds known at its date and those thereafter devised, but the act does not absolutely forbid the use in any compound of any element that a jury may call deleterious, but Congress, having selected and regulated the use of those things known to be particularly dangerous, has not wholly forbidden other things from which no serious danger need be anticipated. Id.

The word "added" in the act, section 7, clause 5, declaring food adulterated if it contain any added poisonous or other added deleterious ingredient, may be construed as being used with reference to a possibly deleterious food ingredient beyond the quantity in which the ingredient is normally found in usual or customary articles of food, and no such ingredient should be considered as added, provided it is present only in the quantity in which it existed in common articles of food generally known, and so construed, caffeine, forming an ingredient of Coca Cola, and in less amount than common in coffee, is not an added deleterious ingredient. Id.

Under the provision of the act, section 7, that an article of food shall be deemed adulterated if it contains any added poisonous or other added deleterious ingredient which may render such article injurious to health, a poisonous or deleterious ingredient with the injurious effect stated by the statute may be an *added* ingredient in the statutory sense although it is covered by the formula and made a constituent of the article. *United States* v. *Coca Cola Co*---------- 741

Reversing judgment in *United States* v. *40 Barrels and 20 Kegs of Coca Cola*---------- 606

In order to condemn an article of food as adulterated within the provision of the act, section 7, that an article of food shall be deemed adulterated "if it contain any added poisonous or other added deleterious ingredient which may render such article injurious to health", it is unnecessary for the Government to prove that the article contained added poisonous or other added deleterious ingredient in such quantity as would render such article injurious to health; it is sufficient if it be shown that the article contained any added poisonous or other added deleterious ingredient of a nature or character which *may* render the article injurious to health. It is the character, and not the quantity, of the added ingredient which is to determine whether the article is adulterated. *United States* v. *625 Sacks of Flour*---------- 129

In the provision of the act, section 7, that an article of food shall be deemed adulterated "if it contain any added poisonous or other added deleterious ingredient which may render such article injurious to health", the words "injurious to health" must be considered and given their natural meaning, and the addition of an ingredient to an article of food which is poisonous in sufficient quantity does not constitute an adulteration unless the quantity used is such as may render the article injurious to health. *Lexington Mill & Elevator Co.* v. *United States*---------- 443

ADDED POISONOUS AND ADDED DELETERIOUS INGREDIENTS—Continued.

Page

In order to condemn an article of food as adulterated under subdivision 5 of section 7 of the act, providing that an article of food shall be deemed adulterated "if it contain any added poisonous or other added deleterious ingredient which may render such article injurious to health", it is incumbent upon the Government to establish that the added substance may render the article injurious to health. The word "may" in the subdivision is used in its ordinary and usual signification; and if an article of food may not by any possibility injure the health of the consumer, it may not be condemned under this subdivision of the act. *United States* v. *Lexington Mill & Elevator Co*---------- 577
United States v. *3,192 Boxes of Apples et al*---------- 1199

The word "added" in the act, section 7, subdivision 5, is not to be taken as referring to the quantity of the ingredient used. It is added ingredient which the statute describes, not added quantity of the ingredient; although of course quantity may be highly important in determining whether the ingredient may render the article harmful. *United States* v. *Coca Cola Co.*---------- 741

Where it clearly appears that a poisonous substance wholly foreign to a food product has been added to it solely to mislead and deceive, the court is under no duty to endeavor to protect the offender against loss from destruction of the adulterated article by indulging in hair-splitting speculation as to whether the amount of poison used may possibly have been so nicely calculated as not to kill or be of immediate serious injury. *United States* v. *1,950 Boxes of Macaroni et al*---------- 112

Where a beverage sirup contains an added poisonous or added deleterious ingredient it is immaterial that the ingredient is present in a small quantity; if it is an appreciable quantity, the article is adulterated. *United States* v. *Koka Nola Co*---------- 59

Arsenic contained in shellac used for coating candy must, in order to constitute adulteration under the provision of the act that an article of food shall be deemed adulterated if it contain any added poisonous or other added deleterious ingredient which may render such article injurious to health, be an added ingredient, and in such amount that it would reasonably have a tendency to injure the health of persons eating the candy coated with the article. *United States* v. *Weeks*---------- 528

An article of food composed of shellac containing arsenic, dissolved in alcohol, for use as a varnish for glazing candy, may be within the provision of the act, section 7, declaring an article of food is adulterated if it contain any added poisonous or other added deleterious ingredient which may render such article injurious to health, though the amount of arsenic which could possibly be consumed by a person eating the varnished candy would be minute. The only question is: Was there sufficient arsenic in the varnish to make it an article which "may be injurious to health"? *Weeks* v. *United States*---------- 650

Coloring materials for use in food preparations containing arsenic, *held* not adulterated where there was no proof that the arsenic in the quantities present was in fact poisonous, hurtful, or injurious to health. *United States* v. *W. B. Wood Manufacturing Co*--- 1002

The word "deleterious", as used in the act, is to be taken in its ordinary meaning, i. e., harmful and destroying. Therefore a substance is deleterious if it has a tendency to be harmful or to destroy when taken into the system, though it may not be deleterious to the extent that its effect would be apparent immediately, and though it may be administered by those called to relieve the sick in distress for immediate effect. *United States* v. *One Pound Can Coal Tar Color*---------- 1019

Where, in the manufacture of coloring material, sulphanilic acid was added to a coal-tar derivative, the arsenic in such acid was "added", within the act, section 7, subdivision 5, declaring food adulterated if it contain any added poisonous or other deleterious ingredient which may render such article injurious to health, but

ADDED POISONOUS AND ADDED DELETERIOUS INGREDIENTS—Continued. Page

where it was impossible to eliminate arsenic entirely from the coloring material, the presence of such a small quantity that, when diluted as ordinarily used, it would take years to produce a dose one-thirtieth of a grain, such as ordinarily prescribed by physicians, *held* not to render the coloring material "injurious to health." *W. B. Wood Manufacturing Co.* v. *United States*_____ 1070

Coloring material for use in food products, containing an added poisonous or deleterious substance which may render the article injurious to health when so used, is adulterated under the act, regardless of how it entered the coloring material, and even though necessarily used in its manufacture. *United States* v. *One Pound Can Coal Tar Color*_____ 1019

ADMIRALTY PROCEEDINGS:

Section 10 of the act, providing that proceedings in libel cases shall conform, as near as may be, to proceedings in admiralty, does not render such proceedings within the admiralty or maritime jurisdiction of Federal courts; the jurisdiction in such proceedings being conferred by the act itself. *United States* v. *Two Barrels of Desiccated Eggs*_____ 232

The provision in section 10 of the act, that seizure proceedings shall be by libel and conform, as nearly as may be, to proceedings in admiralty, does not include appellate proceedings. Congress did not intend to confer a new jurisdiction upon the district court, but that the proceedings after seizure should take on the character of a law action. The action of the district court on the libel can only be reviewed as at common law, by writ of error and not by appeal. *443 Cans of Frozen Egg Product* v. *United States*_____ 416

The Food and Drugs Act, section 8, and amendment of 1912, do not confer admiralty jurisdiction on district courts, in proceedings to condemn property seized under such act and amendment; the provision that a libel shall be filed, and the proceedings shall conform as near as may be to those in admiralty, relating only to procedure, and not to jurisdiction. *Goodwin et al.* v. *United States*_____ 1130

Under Revised Statutes, section 563, subdivision 8, giving United States district courts jurisdiction of all civil cases of admiralty and maritime jurisdiction, and of all seizures on land and on water not within the admiralty and maritime jurisdiction, the court in cases of seizures on land proceeds, not as a court of admiralty, but as a court of common law jurisdiction on a trial by jury. *United States v. George Spraul & Co*_____ 217

See Admiralty Rules; Appeal and Error; Costs; Jurisdiction; Libel; Seizure.

ADMIRALTY RULES:

Admiralty rule 1 provides that libels shall be verified, except those filed on behalf of the United States. *United States* v. *Two Barrels of Desiccated Eggs*_____ 232

Section 10 of the act, providing that seizure proceedings shall conform as near as may be to the proceedings in admiralty does not adopt admiralty rule 22, that libels on seizures for breach of the revenue, navigation, or other laws of the United States shall state the place of seizure and the district within which the property is brought and where it then is, rather than rule 23, providing that the libel, if in rem, shall state that the property is within the district. *United States* v. *George Spraul & Co*_____ 217

ADMIRALTY RULES—Continued. Page

The provision of General Admiralty rule 23 that "the libel shall also propound and articulate in distinct articles the various allegations of fact upon which the libelant relies in support of his suit, so that the defendant may be enabled to answer distinctly and separately the several matters contained in each article", is applicable to libels for condemnation under the Food and Drugs Act, section 10, providing that proceedings in such cases shall conform, as near as may be, to the proceedings in admiralty. *United States* v. *154 Cases of Canned Tomatoes* 967

Admiralty rule 29 declares that, on taking of a libel pro confesso, "the court shall proceed to hear the cause ex parte and adjudge therein as to law and justice shall appertain." The act, section 10, provides that the proceedings for condemnation shall conform as near as may be to the proceedings in admiralty. *Held* that, the libel being confessed, the burden was on the Government to prove, as to the misbranding alleged, that the label contained a statement which was substantially false and misleading. *United States* v. *650 Cases of Tomato Catsup* 31

See Admiralty Proceedings; Appeal and Error; Libel; Seizure.

ADULTERATION:

The word "adulteration", as used in the Food and Drugs Act, means to corrupt, debase, or make impure by an admixture of a foreign or a baser substance. *United States* v. *St. Louis Coffee & Spice Mills* 44

The word "adulterated" imports fraud and deception; it implies that the article is not what it purports to be. *United States* v. *40 Barrels and 20 Kegs of Coca Cola* 606

An article is not adulterated so as to be subject to condemnation unless adulterated at the time of seizure; and where a drug below the standard of strength, quality, and purity by the test prescribed in the United States Pharmacopoeia or National Formulary, and not having the strength, quality, or purity stated on the containers, and therefore within the definition of adulteration in such case in section 7 of the act, was received in interstate commerce, and the containers were so marked as to comply with the requirements in the section before seizure by the Government, the drug was not subject to forfeiture under section 10 of the act. *United States* v. *5 Boxes of Asafoetida* 160

United States v. *9 Boxes of Asafoetida* 165

In a prosecution for shipping an adulterated drug product, *held*, that the jury, in order to convict, must find that the product, if adulterated, was adulterated before it was shipped. *United States* v. *Lorick & Lowrance* 202

Statements in a booklet enclosed in a carton of a drug must be considered on a charge of adulteration under the act, section 7, in that the strength of the drug fell below the professed standard. *United States* v. *17 Bottles, Etc., of An Article of Drugs Labeled in Part "B. & M."* 1287

Statement describing a drug as "antiseptic", though false, *held* not a profession of standard and strength within the definition of adulteration in the act, section 7, "if its strength or purity fall below the professed standard or quality under which it is sold." Id.

The test of adulteration of a food product, under the act, is not what is customarily done, but what is properly done. *W. B. Wood Manufacturing Co.* v. *United States* 1098

Any substance packed with an article of food, which reduces, lessens, or weakens the strength of the article, that is, renders it less efficient, less capable of performing the purpose for which it is eaten, constitutes adulteration under the act. *United States* v. *Potter* 409

ADULTERATION—Continued. Page

A charge that an article of food labeled as "Extract Terpeneless Lemon" was adulterated in that a dilute solution of alcohol and water was substituted in part for said terpeneless lemon extract so that the same contained no more than 0.05 percent of citral derived from the oil of lemon, whereas, as recognized in the trade generally and by the standard of purity established by the Secretary of Agriculture by authority of act March 3, 1903, c. 1008, 32 Stat. 1158, such extract should contain at least 0.2 percent by weight of such citral; and that the dilute solution of alcohol and water was mixed and packed with said article of food so as to reduce and lower and injuriously affect the quality and strength of said article purporting to be terpeneless lemon extract; *held*, sufficient to charge adulteration under the act. *United States* v. *Frank et al* ---- 205

It is unnecessary, in a prosecution charging adulteration of milk through the addition of water, to establish the fact that the addition of the water injuriously affected the quality or strength of the milk, in view of section 7 of the act, declaring an article of food adulterated if any substance has been mixed with it so as to reduce or lower or injuriously affect its quality or strength. *Union Dairy Co.* v. *United States* ---- 869

A shipment of oats containing 23 percent of foreign material, a percentage of which was commercial wild oats which had been intentionally added, *held* adulterated under the act in that a substance had been mixed with them so as to reduce and injuriously affect their quality, notwithstanding that the oats were graded by an authorized inspector as sample oats, and the Grain Standards Act August 11, 1916, and standards for oats promulgated by the Secretary of Agriculture thereunder, authorizing shipment, as sample grade, of oats in their natural state containing as high as 25 percent of foreign material. *United States* v. *154 Sacks of Oats* ---- 1039

Alleged pure cider vinegar *held* adulterated where samples showed only from 0.11 to 0.16 glycerin. *United States* v. *100 Barrels of Vinegar* ---- 287

Allegation that an article of food contained substances, that is, sugar, commercial glucose, and artificial coloring matter, "which had been substituted in part for the said article", *held* insufficient to charge adulteration, on the ground that the ingredients of the "said article" which was thus alleged to have been debased by an admixture of the substances mentioned were not also alleged. *United States* v. *Goodman* ---- 484

Coloring material held adulterated in that sodium chloride and sodium sulphate had been mixed and packed with the article so as to lower and reduce and injuriously affect its quality and strength, and had been substituted in part for the article. *United States* v. *One Pound Can Coal Tar Color* ---- 1019

Where the quantity of salt used in coloring material varied with each manufacturer, and even somewhat in the product of a single manufacturer, and it had the effect of increasing the quantity of the coloring material, and, regardless of the percentage used, required great dilution by the user, the Secretary of Agriculture had no authority under the act to establish an arbitrary percentage beyond which the manufacturer could not go without violating section 7 of the act, and in the absence of any deceptive labeling a coloring material containing a larger percentage of salt did not violate the provisions of said section that an article of food shall be deemed adulterated if any substance has been mixed and packed with it so as to reduce or lower or injuriously affect its quality or strength, or if any substance has been substituted wholly or in part for the article. *W. B. Wood Manufacturing Co.* v. *United States* ---- 1070

It is not necessary that an article of food, in order to be unlawfully adulterated within the act, be dangerous to the public. *United States* v. *Krumm* ---- 993

ADULTERATION—Continued. Page

The H. Co., at Kansas City, Mo., contracted to sell to the W. Co., at Fort Worth, Tex., a quantity of No. 2 Red wheat according to Missouri official State grades, and ordered the operator of a public elevator where it stored its grain to ship to the W. Co. in fulfillment of this contract No. 2 Red wheat. The operator loaded and sent to the W. Co. a car of wheat. After the wheat was loaded, an official inspector of the State of Missouri at Kansas City inspected, adjudged, and certified this wheat to be No. 2 Red wheat. An invoice of it was forwarded to the W. Co., showing that it was shipped under the contract and subject to Kansas City weights and grades. The wheat arrived in Texas without change. There, on inspection by a Texas inspector, a Federal inspector, and other witnesses, it was found to be wheat of another and less valuable grade. None of the officers or employees of the H. Co. had any knowledge of this fact, or anything to do with the grading or shipping, except to order the operator of the elevator to ship No. 2 Red wheat. *Held*, the H. Co. was not guilty of adulteration within the meaning of section 7 of the act. *Hall-Baker Grain Co.* v. *United States*---------- 391

Reversing *United States* v. *Hall-Baker Grain Co.*---------- 291

An information charging an article of food adulterated within the meaning of the act, in that a product which contained less than 80 per centum by weight of milk fat had been substituted for "butter", *held*, charged an offense in view of the Food and Drugs Act, section 7, which provides that an article of food shall be deemed to be adulterated if any substance has been substituted wholly or in part for the article, and in view of act March 4, 1923, which provides that for the purposes of the Food and Drugs Act "butter" shall mean the food product usually known as butter, and which is made exclusively from milk or cream, or both, and containing not less than 80 per centum by weight of milk fat, all tolerances being allowed for. *United States* v. *Centralia Dairy Co.*- 1336

In a prosecution charging adulteration of an article of food labeled "Condensed Skim Milk", in that a certain substance, namely, cane sugar, had been substituted in part for the article, *held* unnecessary for the Government to prove that such substituted substance is deleterious or poisonous, or injurious to health; it is sufficient to constitute adulteration within the meaning of the act if any substance not a component part of the original substance had been substituted. *United States* v. *Libby, McNeill & Libby*---------- 442

That all grades of flour bleached with nitrogen peroxide gas by the Alsop patented process are whiter than the unbleached and might be taken by the purchaser for superior grades, is not sufficient to prove that such bleaching constitutes an adulteration under the act, section 7, subdivision 4, by so coloring the flour as to conceal inferiority, in view of the fact that whiteness is generally known to be an uncertain index of quality and is desired because bread baked from it is whiter and considered better in appearance, and the further fact that the color produced by bleaching is not the same as that produced by aging. *Lexington Mill & Elevator Co.* v. *United States*---------- 443

Flour bleached by treatment by the Alsop process *held* to be adulterated in that, as a result of such treatment, nitrites had been mixed and packed with the flour so as to reduce and lower and injuriously affect its quality and strength; and in that, as a result of such treatment, the flour was mixed, colored, and stained in a manner whereby damage and inferiority was concealed; and in that, as a result of such treatment, the flour contained added poisonous and added deleterious ingredients, to wit, nitrites, which rendered the flour injurious to health. *United States* v. *420 Sacks of Flour*---------- 96

Flour treated by the Alsop bleaching process *held* to be adulterated in that, as a result of such bleaching, nitrites or nitrite-reacting material had been mixed and packed with the flour so as to reduce and lower and injuriously affect its quality and strength; and in that, as a result of such treatment, the flour had been mixed,

ADULTERATION—Continued. Page

colored, and stained in a manner whereby damage and inferiority was concealed; and in that, as a result of such treatment, the flour contained added poisonous or other added deleterious ingredients, to wit, nitrites or nitrite-reacting material, which might render the flour injurious to health. *United States* v. *625 Sacks of Flour*___ 129

Judgment reversed, *Lexington Mill & Elevator Co.* v. *United States* _____ 443

Judgment C. C. A. affirmed, *United States* v. *Lexington Mill & Elevator Co*_____ 577

Under the provision of the act, section 7, that an article of food shall be deemed to be adulterated if it contains any added poisonous or deleterious ingredient which may render such article injurious to health, the addition of an ingredient to an article of food, which is poisonous in sufficient quantity, does not constitute adulteration unless the quantity used is such as may render the article injurious to health. *Lexington Mill & Elevator Co.* v. *United States*_____ 443

The provision of the act, section 7, subdivision 5, that food shall be deemed adulterated "if it contain any added poisonous or other deleterious ingredient which may render such article injurious to health" is definitely limited to food containing an added poisonous or deleterious ingredient when such addition might render the article of food injurious to health. It is not required that an article of food containing added poisonous or other added deleterious ingredients, to come within said provision, must affect the public health, nor, in order to condemn such article as adulterated under said provision, is it incumbent on the Government to establish that fact, but it is incumbent on the Government to establish that the added poisonous or deleterious substances must be such as may render such article injurious to health. The word "may" in said subdivision is used in its ordinary and usual significance; and if an article of food may not, by the addition of a small amount of poisonous or deleterious substance, by any possibility injure the health of any consumer, it may not be condemned as adulterated under said provision. *United States* v. *Lexington Mill & Elevator Co*_____ 577

The act, as against adulteration, was intended to protect the public health from possible injury by adding to articles of food consumption poisonous and deleterious substances which might render such articles injurious to health. Id.

United States v. *Coca Cola Co*_____ 741

A coloring material *held* adulterated in that it contained an added poisonous or deleterious ingredient, arsenic, which might render it injurious to health. *United States* v. *One Pound Can Coal-Tar Color*_____ 1019

A coloring material was not, by reason of the presence of arsenic, within the provision of the act, section 7, subdivision 5, declaring an article of food adulterated if it contain any added poisonous or deleterious ingredient which may render it injurious to health, where, though the arsenic was "added" within the meaning of the act, the quantity present was so small that it did not render the coloring material "injurious to health." *W. B. Wood Manufacturing Co.* v. *United States*_____ 1070

The ordinary use of the word "adulteration" implies an actual addition to the original substance through human agency, but as used in the act, section 7, subdivision 6, the meaning is not restricted to an addition by the hand of man, and if the adulteration of filthy, decomposed, or putrid substance has been added by nature, and is contained in the article to be shipped, it is adulterated in the eyes of the law. *United States* v. *Sprague et al*_____ 508

A libel charging adulteration of a food product simply in the words of the act, that it "consists of a filthy, decomposed, and putrid animal and vegetable substance", *held* sufficient. The words of the act are as descriptive of what the adulteration consists of as any added description could be. *United States* v. *94 Dozen, More or Less, Half-Gallon Bottles of Capon Springs Water*_____ 1216

ADULTERATION—Continued. Page

In a prosecution for shipping eggs alleged to be decomposed and adulterated, *held*, that in order to convict, the jury must be convinced the eggs were decomposed to the extent that they were unfit for food, and that they were in such condition at the time they were shipped by defendant. *United States* v. *Wilson & Co*---------- 999
United States v. *Blazek*---------- 1074
On a libel for condemnation of a shipment of canned salmon alleging adulteration in that it consisted in whole or in part of a filthy, decomposed, or putrid animal substance, *held* that the jury, in order to return a verdict in favor of the Government, must find that the salmon was so filthy, decomposed, or putrid as to be "unfit for food", as that expression is ordinarily understood, and that such adulteration extended to the entire shipment. *United States* v. *1,974 Cases of Canned Salmon*---------- 1108
A shipment of numerous cases of canned salmon *held* adulterated within the meaning of the act, in that it consisted in part of a filthy, decomposed, or putrid animal substance in excess of reasonable and salutary requirements. *United States* v. *430 Cases of Canned Salmon*---------- 1037
In a proceeding for condemnation of a food product as adulterated within the provision of the act, section 7, that an article of food shall be deemed adulterated if it consist in whole or in part of a filthy, decomposed, or putrid animal or vegetable substance, proof that the article would be injurious to health is not required. *United States* v. *200 Cases of Adulterated Tomato Catsup*---------- 583
A. O. Andersen & Co. v. *United States*---------- 1053
In a proceeding to condemn canned pork and beans as adulterated in that it consisted in whole or in part of a decomposed vegetable substance, *held*, that the question whether or not the product was unfit for human food, or would be deleterious to health if eaten, was not involved in the case, and the Government was not required to establish either that the product was unfit for human food, or that it would be deleterious to health, if eaten. The sole issue with respect to the adulteration charged was: Did the product consist in whole or in part of a decomposed vegetable substance? *United States* v. *1,367 Cases of Pork and Beans*---------- 766
Oranges, frozen before shipment, which were undergoing decomposition because of the freezing and would ultimately become unfit for food, *held* adulterated within the meaning of the act, and subject to condemnation, even though they were not harmful, if eaten. *United States* v. *462 Boxes of Oranges*---------- 816
An article of food is adulterated and subject to condemnation and forfeiture if it is composed in whole or in part of a filthy, decomposed, or putrid animal or vegetable substance, and it is not necessary that it be shown to be unfit for food, or deleterious, if eaten. *United States* v. *200 Cases, More or Less, of Canned Salmon*---------- 1095
The test to determine whether an article of food is adulterated within the provision of the act, section 7, that an article of food shall be deemed to be adulterated if it consists in whole or in part of a filthy, decomposed, or putrid animal or vegetable substance, is not whether such article is unwholesome or injurious to health. *Knapp et al.* v. *Callaway et al.*---------- 1276
A shipment of cases of canned tuna labeled "Tuna for pets. Not intended for human consumption", *held* to be subject to condemnation and forfeiture, on evidence that the product in 21 percent of 96 cases examined was somewhat decomposed, and that 8 to 9 percent of the remaining number was tainted, the same standards of test being applied to the product as are applied to tuna for human consumption. *United States* v. *620 Cases of Canned Tuna Fish*---------- 1281
While proof that the contents of only 20 percent of cans in a shipment of salmon were filthy, decomposed, or putrid might authorize the inference that the whole product was bad, and therefore support a condemnation of the lot, where the same proof

ADULTERATION—Continued. Page

which establishes the adulteration of one-fifth establishes the lack of adulteration of the balance, the Government must fail except as to the cans particularly identified as adulterated. *United States* v. *200 Cases, More or Less, of Canned Salmon*_____ 1095

In order to warrant condemnation of an article of food as adulterated, it is necessary that it be shown that the adulteration charged extends to the whole product sought to be condemned. *United States* v. *2,995 Cases of Canned Salmon*_____ 1136

A shipment of canned cherries *held* adulterated in that they consisted in whole or in part of a filthy, decomposed, or putrid vegetable or animal substance, where, of 30 representative cans each contained worms or larvae and decomposed or spotted cherries, one group of 6 cans averaging 39.3 worms and 43 decomposed or spotted cherries, another group of 12 cans averaging 75 worms or larvae and 22.8 decomposed or spotted cherries, and another group of 12 cans averaging 25.6 worms or larvae and 32.4 decomposed or spotted cherries. *United States* v. *384 Cases of Canned Cherries*_____ 1176

The question whether an adulterated article of food shipped in interstate commerce should be condemned is not dependent on the degree of care exercised in manufacturing or producing it. A shipment of canned cherries which was adulterated in that they consisted in whole or in part of a filthy, decomposed, or putrid animal and vegetable substance because of the presence of worms or decomposed cherries, was subject to condemnation even though the canner was unable to procure cherries free from worms or from decomposition. Id.

On trial of an information charging shipment of milk adulterated in that it consisted in whole or in part of a filthy, decomposed, or putrid animal or vegetable substance, *held* that the jury, in order to convict, must find that the milk was adulterated as alleged, at the time it was delivered at the railway depot for shipment; and that the jury, in determining whether the milk was old and impure at that time, should regard as a standard that prescribed in a statute of the State where the trial was held, providing that "milk containing more than 1,000,000 bacteria per cubic centimeter shall be considered impure milk." *United States* v. *Hopkins*_____ 585

In a prosecution brought against the manufacturer of an article of food furnished by it to the shipper under a valid guaranty against adulteration, and charging adulteration of the article because it consisted in whole or in part of a filthy, decomposed, or putrid vegetable substance, *held* essential to a conviction that it be shown that the article was so adulterated at the time defendant turned it over to the shipper. *United States* v. *Glaser, Kohn & Co*_____ 601

In a prosecution charging the defendant with shipping decomposed and adulterated eggs, *held* that the jury, in order to convict, must find that the eggs were so adulterated at the time they were shipped. *United States* v. *Smith*_____ 1173

The act, section 8, subdivision 4, provides that an article of food which does not contain any added poisonous or deleterious ingredients shall not be deemed to be adulterated or misbranded in the case of mixtures or compounds known as articles of food under their own distinctive names and not an imitation of or offered for sale under the distinctive name of another article, etc. *Held*, that an article of food manufactured and sold under the distinctive name of "C. A. P.", and consisting of calcium acid phosphate and cornstarch, and not containing any poisonous or deleterious ingredient within the meaning of the act, was not adulterated or misbranded within the meaning of the act by reason of the presence of cornstarch. *United States* v. *100 Barrels of Calcium Acid Phosphate*_____ 58

Evidence *held* to establish that the name "Coca-Cola" is a trade name which for many years has been given by the manufacturer to a food product, and registered as a trade mark; that such product

ADULTERATION—Continued. Page

is an artificial compound used in the preparation of beverages, consisting of a sweet sirup having for one of its essential ingredients caffeine prescribed in definite proportions in the formula under which the compound has been manufactured for many years; that the compound, as made under such formula, has been extensively advertised and has become well known to the trade and to consumers under such trade-mark name; and that no other food or beverage has been manufactured or sold under such name. *Held*, that under such facts and the provision of the act, section 8, that mixtures or compounds known under their own distinctive names and not an imitation of or sold under the distinctive name of another article, if the name be accompanied by a statement of the place of manufacture, shall not be deemed to be adulterated or misbranded unless they contain some added poisonous or deleterious ingredient, a shipment of Coca-Cola labeled as required by such provision was not subject to condemnation as adulterated because of the presence of caffeine as one of the ingredients, even though such ingredient be deemed poisonous or deleterious. *United States* v. *40 Barrels and 20 Kegs of Coca-Cola*---------- 239
Affirmed, *United States* v. *40 Barrels and 20 Kegs of Coca Cola*-- 606
Judgment C. C. A. reversed, *United States* v. *Coca Cola Co*------ 741

The provision of the act, section 7, subdivision 5, that an article of food shall be deemed adulterated if it contain any added poisonous or other added deleterious ingredient which may render such article injurious to health, is to be construed with the proviso of section 8 to the effect that an article which does not contain any added poisonous or deleterious ingredients shall not be deemed to be adulterated. The fact that a formula has been made up and followed and a distinctive name therefor adopted does not suffice to take an article from the said provision of section 7. In such a case the standard by which the combination is to be judged is not necessarily the combination itself. A poisonous or deleterious ingredient with the injurious effect stated by the statute may be an *added* ingredient in the statutory sense, although it is covered by the formula and made a constituent of the article itself. *United States* v. *Coca Cola Co*---------- 741
Reversing judgment in *United States* v. *40 Barrels and 20 Kegs of Coca Cola*---------- 606

In construing the provision of the act, section 7, that an article of food shall be deemed to be adulterated if it contains any added poisonous or other added deleterious ingredient which may render such article injurious to health, *held* that the term adulteration is used in a special sense and its ordinary meaning is not controlling; that an article may be adulterated by the adding of an injurious ingredient including a component part of the article itself; that adulteration must not be confused with misbranding and the provisions as to the latter do not limit the explicit provisions of section 7 as to adulteration; and that proprietary foods sold under distinctive names are within its provisions, including those which were in the market when the act was passed. Id.

Under the provision of the act that an article of food which does not contain any added poisonous or other added deleterious ingredient shall not be deemed to be adulterated in case of mixtures or compounds known as articles of food under their own distinctive names, and not an imitation of or offered for sale under the name of another article, if the name be accompanied on the same label or brand with a statement of the place where said article has been manufactured or produced, an article composed of milk, cocoa or chocolate, and sugar, containing no poisonous or deleterious ingredient, and sold under the label "milk chocolate" with a statement also of the place of its manufacture, is not adulterated within the meaning of the act because it contained cornstarch, the presence of which was not stated on the label. *United States* v. *Auerbach & Sons*---------- 357

A food product labeled "Grenadine Syrup", composed of sugar, citric and tartaric acid, and juices of certain fruits, and in the manufacture of which no pomegranates were used, *held* not adulterated in

ADULTERATION—Continued. Page

that a compound sugar sirup had been substituted wholly or in part for the product, since the word "grenadine" in its common acceptation does not mean a sirup made from pomegranates, but the term "grenadine syrup" is used in commerce to designate, not a sirup so made, but a sirup possessing a certain characteristic flavor and color, and a purchaser of sirup so labeled was not entitled to expect to receive a sirup actually made from pomegranates. *United States* v. *30 Cases Purporting to be Grenadine Syrup*_____ 394

The provision of the act, section 8, subdivision 4 (in case of food), that mixtures or compounds known as articles of food under their own distinctive names shall not be deemed adulterated when sold under such name, and not an imitation of or sold under the distinctive name of another article, does not apply to a case where the name used in its popular meaning is accurately descriptive of another well-known food product. A food product sold under the name of "Condensed Skimmed Milk" *held* to be adulterated, where it contained 42 percent of cane sugar, the presence of which was not indicated on the label; it being shown that condensed skimmed milk unsweetened is also made and sold. *Libby, McNeill & Libby* v. *United States*_____ 540

Affirming judgment in *United States* v. *Libby, McNeill & Libby*_ 442

In a prosecution charging adulteration of macaroons by the addition of glucose where the evidence showed that a macaroon is a mixed food composed of certain ingredients, that the name by which it is known is distinctive, and that the added glucose, producing the charged adulteration was not poisonous or deleterious to health, *held*, that the article was not adulterated within the meaning of the act, under the provision of section 8, subdivision 4 (1), that a mixture known by a distinctive name shall not be regarded as adulterated if it does not contain any added poisonous or deleterious ingredient. *F. B. Washburn & Co.* v. *United States*_____ 654

Reversing judgment in *United States* v. *F. B. Washburn & Co*__ 434

An article of food labeled "Fruit Wild Cherry Compound" *held* not adulterated under the act in that an imitation wild cherry essence had been mixed and packed with the article purporting to be fruit wild cherry compound so as to reduce and lower and injuriously affect the quality and strength of the article, or in that an imitation wild cherry essence had been substituted in part for fruit wild cherry essence which the article purported to be; since the description of the article on the label as "Fruit Wild Cherry Compound" plainly indicated that the article did not consist wholly of fruit wild cherry, but was a "compound" or combination of fruit wild cherry with some other ingredient or ingredients, and, in the absence of any poisonous or deleterious ingredient, there is nothing in the act to prevent the combination of fruit wild cherry with an imitation wild cherry essence, when labeled as stated; nor is it required by the act that the ingredients of such compound be stated. *United States* v. *Weeks*_____ 519

Judgment reversed, *Weeks* v. *United States*_____ 646

The provision of the act, section 8, that an article of food which does not contain any added poisonous or deleterious ingredients shall not be deemed to be adulterated in enumerated cases, qualifies section 7, declaring that an article shall be deemed adulterated if it be mixed, colored, powdered, coated, or stained in a manner whereby damage or inferiority is concealed; and an article labeled "Fruit Wild Cherry Compound", and containing no "Fruit Wild Cherry", but containing a coal-tar color giving to the mixture the genuine color of wild cherry juice, but not any added poisonous or deleterious ingredient, is not adulterated. *Weeks* v. *United States*_ 646

Reversing judgment in *United States* v. *Weeks*_____ 519

An article of food, packed and sold in cases bearing labels describing the contents as a particular brand of molasses, but plainly stating that the product was a compound of molasses and corn sirup, and also containing all of the other information required by the act

ADULTERATION—Continued. Page

and the regulations thereunder, and which article was in fact a compound of molasses and commercial glucose, *held* not adulterated within the meaning of the act; it being shown that it contained nothing deleterious to health, and that under the rulings of the Department of Agriculture it was permissible to describe commercial glucose on labels or brands as made from corn sirup. *United States* v. *779 Cases of Molasses*---------- 65

Where an article sold under the name "Corno Horse and Mule Feed" was contained in packages labeled "Corno Horse and Mule Feed. Mixture of ground alfalfa, oats, corn, flax bran, oat and hominy feeds, made by the Corno Mills Company, East St. Louis, Illinois"—followed by a guaranteed analysis, *held* that such article, being a compound and so described on the package, was not adulterated because it contained a quantity of oat hulls mixed and packed therewith in excess of the amount normally present in oat feed consisting of whole ground oats. *United States* v. *One Carload of Corno Horse and Mule Feed*---------- 274

An article labeled "Perfection Mills Compound White Pepper" in large type, with the words "Composed of Ground White Pepper and Ground Cereals" in small and inconspicuous type, and consisting of 65 percent white pepper and 35 percent corn product, *held* adulterated in that corn product had been mixed and packed with the article so as to reduce and lower its quality and strength, since the term "Compound White Pepper" does not so naturally imply to the average purchaser a mixture of white pepper with an ingredient other than pepper as to make it a proper branding, where the statement of its ingredients is so placed and in such type as not to be readily noticed by the purchaser, and as to be calculated and intended to deceive and mislead the latter. *Frank et al* v. *United States*---------- 329

An article of food labeled "Compound Ess Grape", but which contains nothing from grapes and is a mere imitation, must, within the general terms of the act, section 7, be deemed adulterated, since some other substance has been substituted wholly for the one obviously indicated by the label, viz, "compound essence of grape"; and in such case the mere use of the word "compound" is not a compliance with the proviso in paragraph 4 of section 8 of the act, since it does not give notice that the article is a mere imitation but suggests the contrary. *United States* v. *Schider*--- 875

Under the provisions of the act, section 2, that no article shall be deemed misbranded or adulterated within the provisions of the act when intended for export to any foreign country and prepared and packed according to the specifications or directions of the foreign purchaser, a shipment of dried figs prepared for a foreign purchaser who purchased like fruit for coffee flavoring, *held* not subject to seizure as adulterated under the provisions of section 7 that an article of fruit shall be deemed adulterated if it consists in whole or in part of a filthy, decomposed, or putrid vegetable substance, although the figs were wormy in part, since the certificate introduced showing the law of the country to which the shipment was to be made prohibiting use of impure materials in coffee admixtures could not have the effect to put the shipper out of the class excepted in section 2, for the purchaser on receiving the figs might free them of all deleterious matter before converting them into coffee flavoring or he might divert them to other proper uses, and, in the absence of evidence to the contrary, it would be assumed he would comply with the law of his country. *United States* v. *Catz American Co., Inc*---------- 1282

AFFIDAVITS: Page

Affidavits used in support of allegations of information for violating the act must contain a venue; and, if sworn to before a notary public, must have a certificate attached showing that the person certifying them was at the time a notary public and authorized by the laws of the State or district to take and certify oaths and affirmations, and that same is taken and subscribed as required by the laws of the State or district. If taken before a State judge or justice of the peace, there must be a like certificate, and so of commissioners outside the district where the affidavit is used. *United States* v. *Baumert et al*---------- 113

Notaries public have no authority under the laws of the United States to administer oaths in connection with criminal prosecutions; hence, affidavits attached to and filed with an information charging violation of the Food and Drugs Act and expressly stating that it was made upon the oath of parties whose affidavits were annexed, would not be considered by the court. *United States* v. *Schallinger Produce Co*---------- 623

See Information; Libel.

AGENTS.

The officers of a corporation which manufactured a food product shipped by its manager in interstate commerce, and which was adulterated or misbranded, are subject to prosecution therefor under the act, where they employed the manager and authorized him to operate the plant and sell the product without restriction, and the previous course of business had been to ship on orders to other States. *United States* v. *Mayfield et al*---------- 90

On trial of an information charging defendants, a partnership, with shipping from one State to another allegedly misbranded molasses, where there was uncontradicted testimony for the Government tending to show that defendants' plant was supervised and managed by a superintendent, and that in the usual course of business orders were forwarded to him by defendants and he filled such orders and made the shipments, and where there was undisputed testimony by one of the defendants that prior to the taking effect of the act he had instructed the superintendent not to ship such products unless they were branded as provided by the act, and testimony by the superintendent that he had received such instructions, but no evidence tending to show that any specific instruction was given with reference to the goods charged as shipped and misbranded; *held* that if the jury believe such testimony, and that the molasses was shipped and misbranded as charged, and that it was so shipped by defendants' superinntendent, then, under section 12 of the act, defendants would be liable and the instruction claimed by defendants to have been given to the superintendent would not relieve them of responsibility. *United States* v. *Hobart et al*---------- 171

A corporation maintained a sanatorium from which patients at a distance were treated through correspondence. The president of the corporation, who was also its medical director, had charge of the patients, and in every case where a patient applied for treatment a history of the case was obtained from the patient, a diagnosis was made, and a prescription prepared and sent by the medical director to meet the needs of the particular case. *Held*, in a prosecution of the corporation for shipping misbranded medicine in interstate commerce, that the acts of the medical director were performed for the corporation, and, in legal contemplation, by it. *Dr. J. L. Stephens Co* v. *United States*---------- 471

To sustain a prosecution against a shipper of misbranded drugs it is not necessary to show that defendant was also the owner thereof, or that he shipped them for his own profit; he would be equally liable as shipper under the act if he, as an officer, agent, or manager, of any company or corporation, made the shipment or caused the same to be made. *United States* v. *Kellett*---------- 711

If, in a prosecution for shipping an article of food which is adulterated or misbranded the evidence shows that defendant was en-

AGENTS—Continued. Page

gaged in the business of shipping such adulterated or misbranded articles, and that defendant's employees were specially or generally authorized to make such shipments, and that in pursuance of such authority they made the shipment complained of, then defendant is guilty as if he himself had made the shipment. *United States v. Monahos*---------- 935

A seller of an article of food so represented by his agent to the buyer as to be misbranded under the act is liable for the misbranding, although he told the agent not to misdescribe the article, since intent is not an element of the offense. *Weeks* v. *United States*--- 646

Affirmed, *Weeks* v. *United States*---------- 867

Upon a charge of misbranding an article of food by offering for sale under the name of another article, *held*, that the trial court properly received evidence that the shipment was made to fill an order obtained by defendant's agent by so misrepresenting the article. *Weeks* v. *United States*---------- 867

Where a creamery corporation shipped butter in regular course to a corporation in another State, and such shipments when received by the consignee were commingled with shipments from other sources and sold on the market in regular course, and payment by the consignee to the consignor for all such shipments was made weekly at schedule price, and there was no report to the consignor by the consignee of the latter's sales of butter so shipped and no accounting for moneys received in excess of the schedule price paid by it to the consignor, and there was no return of any of the money so paid, *held* such shipment was not made by a principal to a mere agent, or by a mere agent to a principal. *United States* v. *Boise Valley Cooperative Creamery Co*---------- 1203

See Corporations; Knowledge and Intent.

AKOZ:

A medicinal drug labeled "Akoz" alleged to be misbranded on the ground that statements contained on the labels and in the packages falsely and fraudulently represented that the article was a natural remedy for certain specified diseases and that it had proved effective in the treatment of such diseases and others named, *held* not so misbranded, upon evidence as to the beneficial effects of the medicine and that it had relieved all of the diseases specified. *United States* v. *Natura Co*---------- 836

ALCOHOL:

The amount of alcohol contained in a drug product the act requires to be stated on the label with substantial correctness. *United States* v. *Haltiwanger-Taylor Drug Co*---------- 822

ALETRIS ROOT:

A quantity of aletris root transported in interstate commerce *held* not adulterated under the act, as containing more than 16 percent of ash, the test for such drug prescribed in the National Formulary. *United States* v. *One Bale of Aletris Root*---------- 1212

ALMOND PASTE:

See Corn Sirup.

ANALYSIS.

See Examination; Investigation; Notice and Opportunity to be Heard; Samples; Standards; Tests.

ANTIKAMNIA TABLETS:

A drug labeled "Antikamnia Tablets" which contained acetphenetidin, *held* not misbranded because of a statement on the label that it contained no acetanilid and because of the failure to declare on the label that the acetphenetidin contained therein was a derivative of acetanilid. *United States* v. *100 Packages of Antikamnia Tablets*---------- 178

Judgment affirmed, *United States* v. *Antikamnia Chemical Co*--- 260

Judgment reversed, *United States* v. *Antikamnia Chemical Co*--- 552

See Acetanilid.

APPEAL AND ERROR: Page

The provision in section 10 of the act that proceedings for seizure of goods shall be by libel for condemnation and conform as near as may be to proceedings in admiralty, is not applicable to appellate proceedings; the action of the district court on the libel can be reviewed only as at common law, by writ of error and not by appeal.
443 Cans of Frozen Egg Product v. *United States* 416
United States v. *Hudson Manufacturing Co. et al* 420
United States v. *779 Cases of Molasses* 65
Lexington Mill & Elevator Co. v. *United States* 577
Goodwin et al. v. *United States* 1107
United States v. *10 Cases, More or Less, Bred Spred, Etc., et al* 1262

Where an appeal has been erroneously taken from a judgment of condemnation in a proceeding under section 10 of the act, the case will, under the act of September 6, 1916, section 4, be transferred to the law side, and to render the transfer effective, a statement of the evidence, conforming to equity rule 75, though not allowed and signed until after the term, and therefore not good as a bill of exceptions, may be treated and considered as such. *Goodwin et al.* v. *United States* 1107

A proceeding for condemnation and forfeiture, under section 10 of the act, in which either party is given the right to demand a trial by jury of any issue of fact, where such trial is demanded and had, is essentially an action at law and is reviewable only on writ of error. *United States* v. *779 Cases of Molasses* 65
Lexington Mill & Elevator Co. v. *United States* 443

Where the validity of a regulation made pursuant to section 3 of the act is denied, an authority exercised under the United States is drawn in question, and not merely the construction of the statute, and the Supreme Court has jurisdiction to review the judgment of the Court of Appeals of the District of Columbia. *United States* v. *Antikamnia Chemical Co* 552

Review by the Court of Appeals of the District of Columbia of the decree of the Supreme Court of the District in a condemnation proceeding under the act, tried by the court without the intervention of a jury, is confined to questions of law presented by the record proper and to such other questions as may have been reserved by exceptions duly noted during the progress of the trial, in view of provisions of the code of the District of Columbia (1919) sections 70, 71. *Goode* v. *United States* 698

Since a circuit court of appeals may not determine the weight of evidence or reverse on the ground of the verdict being against weight of the evidence, if it is sustained by substantial evidence, under Rev. St. Sec. 1011, a general verdict for the Government on a libel under section 10 of the Food and Drugs Act to condemn bottled water, charging misbranding in general terms, must be sustained. *Goodwin et al.* v. *United States* 1130

A conviction under the act, justified by evidence though conflicting, will not be disturbed on writ of error. *Weeks* v. *United States* 650

Whether bottled water was adulterated and misbranded, as alleged in a libel for condemnation, cannot be considered on appeal, where the record does not contain testimony supporting such allegations. *United States* v. *94 Dozen, More or Less, Half-Gallon Bottles Capon Springs Water* 1278

The refusal or granting of a motion for a new trial is in the sound discretion of the trial judge, and cannot be reviewed on writ of error. *Bradley* v. *United States* 964
Frank et al. v. *United States* 329

Where a decree condemning certain food products as in violation of the act, and ordering their destruction by the marshal, has been fully executed, and the costs taxed against the claimant have been voluntarily paid, there is nothing on which the decision of an appellate court can operate, and it will not review the case on appeal or writ or error. *Charles* v. *United States* 180

APPEAL AND ERROR—Continued. Page

No appeal lies from the discretion of the court in the matter of costs assessed against the claimant in a libel proceeding under section 10 of the act, unless perhaps in the case of gross abuse of such discretion. Id.

The opinion of the trial court in a libel proceeding for condemnation under the act, although not made a part of the record, may be considered by the appellate court. *Hall* v. *United States*_____ 978

In a libel proceeding for condemnation under the act, where issues of fact are tried by the court without a jury, and there is other evidence which supports the judgment, the admission of evidence which might be subject to objection as tending to mislead a jury is not ground for reversal. Id.

Where the Government (appellant) abides by its overruled demurrer to each of two paragraphs of an answer to a libel brought against claimant's (appellee's) food product, and admits that one of the paragraphs permits of a good defense, there can be no reversal, even though the ruling on demurrer may have been erroneous as to the other paragraph. *United States* v. *15 Cases of Bred Spred*_ 1236

An information under the act will not be ordered dismissed on appeal for the reason that it does not appear that there had been a notice and hearing as provided for by section 4 of the act, where no motion to dismiss for this reason was made below, nor was the question raised by any pleading or assignment of error. *Frank et al.* v. *United States*_____ 329

On a prosecution for violation of the act, record examined, and *held*, that the case was not heard in the district court solely upon an agreed statement of facts, and that, therefore, the final judgment embraced the determination of a question of fact, which was not reviewable. Id.

In a proceeding under section 2 of the act the question whether there was sufficient evidence to warrant the submission of the case to the jury cannot be raised for the first time in the appellate court. *Brina* v. *United States*_____ 104

The question of defects in the acknowledgment of an information under the act cannot be raised for the first time in the appellate court. *Abbott Bros. Co.* v. *United States*_____ 831

Unless an information is void, an objection that it was not made on the oath of the prosecuting officer, but solely upon oath of witnesses by affidavit, some of which were taken before notaries public, cannot be raised for the first time in the appellate court, unless a refusal to consider it would shock the judicial conscience. *Simpson* v. *United States*_____ 832

See Admiralty Proceedings; Information; Jurisdiction; Libel.

APPLES:

Apples are "food" within the meaning of the act. *United States* v. *3,192 Boxes of Apples et al*_____ 1199

Apples held misbranded as to the State where they were produced. *United States* v. *100 Cases of Tepee Apples et al*_____ 20

Apples *held* adulterated in that they consisted in whole or in part of a filthy, decomposed, or putrid vegetable substance by reason of being wormy and worm eaten; and misbranded in that they were labeled "Gano Extra", indicating that they were of the Gano type or variety and of extra or superior quality, when in fact they were Gano apples which were in whole or in part wormy and worm eaten. *United States* v. *Wedell*_____ 771

Apples *held* adulterated because they contained an added poisonous and deleterious substance, arsenate of lead, which might render them injurious to health. *United States* v. *630 Baskets of Apples*_ 1205
United States v. *3,192 Boxes of Apples et al*_____ 1199

ARSENIC:

Arsenic contained in an article composed of shellac for use for coating candy, must, in order to constitute adulteration under the provision of the act that an article of food shall be deemed adulterated

ARSENIC—Continued. Page

if it contains any added poisonous or other deleterious ingredient which may render such article injurious to health, be an added ingredient, and in such amount that it would reasonably have a tendency to injure the health of persons eating the candy coated with the article. *United States* v. *Weeks*---------- 528

Arsenic contained in an article composed of shellac, dissolved in alcohol, for use for glazing candy, may constitute adulteration under the act, section 7, declaring an article of food adulterated if it contain any added poisonous or other added deleterious ingredient which may render such article injurious to health, though the amount of arsenic which could possibly be consumed by a person eating the candy glazed with the varnish would be minute. The only question is: Was there sufficient arsenic in the varnish to make it an article which may be injurious to health? *Weeks* v. *United States*---------- 650

Arsenic *held* to be an added poisonous and deleterious ingredient in a coloring material for use in coloring confectionery, etc. *United States* v. *One Pound Can Coal-Tar Color*---------- 1019

Arsenic contained in coloring materials for use in food preparations *held* not to constitute adulteration where there was no proof that the arsenic in the quantities present was in fact poisonous, hurtful, or injurious to health. *United States* v. *W. B. Wood Manufacturing Co*---------- 1002

A compound or compounds of arsenic on apples and pears, *held* to be an added poisonous or deleterious ingredient which might have rendered them injurious to health. *United States* v. *630 Baskets of Apples et al*---------- 1205

United States v. *3,192 Boxes of Apples*---------- 1199

See Added Poisonous and Added Deleterious Ingredients; Apples; Coloring Materials; Confectionery; Pears.

ARTICLE:

In section 2 of the act, declaring that any person who shall ship in interstate commerce any article of food or drugs adulterated or misbranded shall be guilty of a misdemeanor, and for the first offense fined not exceeding $200, and upon conviction of each subsequent offense not exceeding $300, etc., the article is clearly specified as the unit of the offense, as distinguished from the shipment; and the shipment of seven different articles, each of which was both adulterated and misbranded, constituted fourteen separate and distinct violations of the act, for which separate penalties might be imposed, though the aggregate exceeded $200. *United States* v. *Direct Sales Co*---------- 866

In proceedings to condemn shipments of numerous cases of canned salmon, alleged to be adulterated within the meaning of the provision of the act declaring an article of food adulterated if it consists in whole or in part of a filthy, decomposed, or putrid animal substance, *held*, that the word "article" in the act has reference to each individual can of salmon. *United States* v. *1,459 Cases of Canned Salmon*---------- 995

United States v. *1,974 Cases of Canned Salmon*---------- 1037

In the act, section 10, providing for condemnation of "any article of food" that is adulterated or misbranded, the word "article" is used in a broad and comprehensive sense, and as applied to a shipment of an allegedly adulterated food product in containers, as canned salmon, has reference to the shipment as a whole, and to authorize condemnation it is not necessary to prove that each individual can is adulterated. *A. O. Andersen & Co.*, v. *United States*---------- 1053

The word "article" in the act, section 10, providing for condemnation of any article of food adulterated or misbranded, applies to the food itself, and not to the case or package in and by means of which the shipment is effected. *United States* v. *200 Cases, More or Less, of Canned Salmon*---------- 1095

ARTICLE—Continued. Page

In a proceeding for condemnation of numerous cases of canned salmon as adulterated under the act providing that an article of food shall be deemed adulterated if it consists in whole or in part of a filthy, decomposed, or putrid animal substance, *held*, that the word "article" as used in the statute has reference to the case or cases seized, and does not have reference to the single individual case or cases. *United States* v. *1,195 Cases of Canned Salmon*---------- 1099

In a proceeding for condemnation of shipments of canned salmon as adulterated under the act, section 7, paragraph 6, providing that an article of food shall be deemed adulterated if it consists in whole or in part of a decomposed animal substance, *held*, that the word "article" as used in the act does not refer to the single, separate can, or to the single, separate case, of salmon in each shipment, but refers to each lot or shipment seized. *United States* v. *2,205 Cases of Canned Salmon*---------- 1133

See Offenses; Package; Penalties; Shipment.

ASAFOETIDA:

Asafoetida which did not comply with the tests prescribed by the United States Pharmacopoeia when shipped, *held* not adulterated or misbranded so as to be subject to condemnation where the article was tested by the consignee prior to seizure and correctly labeled by him before seizure to show its true standard of strength, quality, and purity. *United States* v. *Five Boxes of Asafoetida*---------- 160

United States v. *Nine Boxes of Asafoetida*---------- 165

ATHLOPHOROS:

A drug labeled "Athlophoros" *held* misbranded in that the package and label contained statements regarding the curative or therapeutic effect of the article which were false and fraudulent. *United States* v. *The Athlophoros Co*---------- 732

ATTORNEYS, UNITED STATES:

The Food and Drugs Act (sec. 5) does not repeal Revised Statutes Sections 701 or 1022 making it the duty of district attorneys of the United States to prosecute all offenders against the laws of the United States, nor does it limit his authority to the prosecution only of those offenders who have had a hearing before the Secretary of Agriculture. *United States* v. *Morgan et al*---------- 335

BACTERIA:

There may be bacteria or bacilli without decomposition, but there cannot be decomposition without the presence of bacteria or bacilli. *United States* v. *F. E. Rosebrock & Co*---------- 190

Various forms of plant life, such as yeasts, bacteria, and molds in tomato catsup, are evidences of decay and decomposition. *United States* v. *200 Cases of Adulterated Tomato Catsup*---------- 583

It is the action of bacteria, yeast germs, and mold spores in food products that eventually brings about decomposition thereof, and a point is reached when the article becomes rotten. *United States* v. *275 Cases Tomato Catsup*---------- 141

Though not in themselves filthy, decomposed, or putrid, living bacteria, including *Bacillus coli* and *B. streptococci*, when present in a food, such as milk, indicate that it consists in whole or in part of a filthy, decomposed, or putrid substance, and are therefore evidence of adulteration. *Dade* v. *United States*---------- 465

On trial of an information charging shipment of milk adulterated in that it consisted in whole or in part of a filthy, decomposed, and putrid animal or vegetable substance, *held* that the jury, in determining whether the milk was old and impure at the time of shipment, as bearing on the question whether the milk at that time was adulterated as alleged, should regard as a standard the provision in a statute of the state in which the trial was held, that "milk containing more than 1,000,000 bacteria per cubic centimeter shall be considered impure milk." *United States* v. *Hopkins*---------- 585

BACTERIA—Continued. Page

A substance containing bacilli liable to cause disease, to such an extent as to make it dangerous for food purposes, is "filthy", under the meaning of that word as generally used, and especially since the result of investigation has shown that filth or dirtiness is dangerous through the germs which it contains, and not solely because of offense to the senses. *United States* v. *Sprague et al*---- 508

See Filthy, Decomposed, and Putrid.

BAD-EMS SALZ:

An article labeled "Bad-Ems Salz" *held* misbranded in that statements appearing on the label, representing that the article was composed of substances derived from the springs at Ems, Germany, and that the article reproduced the medical properties of said springs, and that the article represented the medical agents obtained by evaporating the water from said springs, were false and misleading. Said article *held* further misbranded in that statements regarding the curative or therapeutic effects of the article, appearing on the labels and in a circular accompanying the package, were false and fraudulent. *United States* v. *The American Laboratories* ---------- 641

BEANS:

Horse beans held to be filthy and adulterated by reason of the presence of weevils and larvae or grubs. *United States* v. *Koshland*_ 777

Canned beans labeled "Red Kidney Beans", but consisting of long cranberry beans, *held* adulterated and misbranded. *United States* v. *100 Cases of Canned Red Kidney Beans*---------- 982

See Pork and Beans.

BEEMAN'S PEPSIN CHEWING GUM:

Chewing gum *held* misbranded because of a false and misleading statement on the label regarding the quantity of pepsin contained therein. *United States* v. *American Chicle Co*---------- 362

BETHESDA NATURAL MINERAL SPRING WATER:

Bottled water, *held* misbranded because the labels stating "Bethesda: For all kidney diseases, Bright's disease, diabetes, torpid liver, dyspepsia, insomnia, calculi, and nervous prostration", falsely and fraudulently represented the curative or therapeutic effect of the water with respect to the diseases named. *United States* v. *Bethesda Mineral Spring Co*---------- 841

BI-CARB-SODARINE:

An article labeled "Bi-Carb-Sodarine" *held* not misbranded by reason of a statement on the label to the effect that the article was better than any other bread preparation. *United States* v. *165 Cases of Bi-Carb-Sodarine* ---------- 202

BLACKBERRIES:

Canned blackberries *held* misbranded as to the State in which the fruit was grown. *United States* v. *100 Cases of Tepee Apples et al* ---------- 20

BLEND:

Under the proviso of section 8 of the act, that an article of food which does not contain any added poisonous or deleterious ingredients shall not be deemed misbranded if labeled so as to plainly indicate that it is a compound, imitation, or blend, and the word "blend" is plainly stated on the package, which term shall be construed to mean a mixture of like substances, not excluding harmless coloring or flavoring ingredients used for coloring or flavoring only, a sirup consisting of refined cane sugar flavored with an extract of maple wood and sold under a label describing it as "Western Reserve Ohio Maple Syrup" is a "blend" and not misbranded. *United States* v. *68 Cases of Syrup*---------- 62

Where sirup made from cane sugar, flavored to represent maple sirup by the introduction of an extract from maple wood after it had

BLEND—Continued.

Page

been chopped down, was labeled "Western Reserve Ohio Blended Maple Syrup", the words "Ohio" and "Maple Syrup" being in red, and between them the word "Blended", and then below that, in smaller type, the statement "This syrup is made from the sugar-maple tree and cane sugar", *held* that the label was misleading in that purchasers would ordinarily understand that the article contained in part maple sirup made from the boiled-down sap drawn from live maple trees, and constituted misbranding. *United States* v. *Scanlon*---------- 28

To the provision of the act, section 8, subdivision 4, paragraph 2, that an article of food which does not contain any added poisonous or deleterious ingredients shall not be deemed to be misbranded if labeled or branded so as to plainly indicate that they are compounds, imitations, or blends, Congress added another requirement, "*Provided*, That the term blend as used herein shall be construed to mean a mixture of like substances, etc." If the substances mixed are not "like substances", the statement on the label that the product is a "blend" is not sufficient to secure immunity from seizure for misbranding. *Held* that a mixture consisting of distilled vinegar and boiled apple cider is not a mixture of "like substances" and therefore not a "blend", within the statutory definition, and, labeled "Saratoga Brand Vinegar, A Blend of Pure Boiled Apple Cider and Distilled Vinegar", is misbranded. *United States* v. *10 Barrels of Vinegar*---------- 254

An article composed of a mixture of black pepper and long pepper constituted a compound or "blend", within the meaning of subdivision 4, section 8, of the act, and should have been so marked as in such cases thereunder required; but not being so marked, and being labeled "Pure Pepper", was misbranded. *United States* v. *75 Boxes of Alleged Pepper*---------- 340

See Adulteration; Compound; Distinctive Name; Misbranding.

BOND:

In a suit on a bond made and given by defendant as claimant of a quantity of canned sardines which had been condemned and confiscated as adulterated in a forfeiture proceeding had under the act and which by authority of an order of the court had been delivered to and taken by claimant upon the execution and delivery of such bond, *held* that it was no defense that the act of defendant in afterwards selling the goods in their adulterated state, without inspection, and without segregating the good, if any, from the bad, in violation of conditions of the bond, was with the understanding and belief on its part that such conditions had been complied with when the goods were delivered to it by the United States marshal; and that the terms of the bond were absolute, and whether defendant acted mistakenly or intentionally was immaterial. *United States* v. *Seacoast Canning Co*---------- 1209

The act, section 11, provides for the examination of articles sought to be imported, suspected of being adulterated or misbranded, by the Department of Agriculture, and declares that, if they are found to be so, entry shall be forbidden, and they shall be destroyed unless exported within 3 months of the date of refusal of entry, except that, pending examination, the importer may obtain possession by executing a penal bond conditioned to return the goods to the Secretary of the Treasury when demanded, etc. *Held* that, where proceedings were instituted for the examination and exclusion of certain alleged adulterated or misbranded olives, the acceptance of a bond executed by the importer for possession under said section did not amount to an official declaration that the olives had been found to comply with the act. *United States* v. *Nine Barrels of Olives*---------- 128

BORIC ACID: Page

Boric acid *held* to be an added deleterious ingredient of preserved whole eggs. *United States* v. *50 Cans of Preserved Whole Eggs*--- 74

See Added Poisonous and Added Deleterious Ingredients.

BOWMAN'S ABORTION REMEDY:

An article sold as a remedy for infectious abortion in cattle, the packages of which contained the words "Bowman's Abortion Remedy" and directions for administering the article, *held* misbranded under the provision of the act declaring drugs misbranded if the package or label bear or contain any false or fraudulent statement regarding curative or therapeutic effect, where it was shown that the so-called "abortion remedy" was composed of brown sugar and wheat product and that it could not possibly prevent, cure, retard, or in any way affect said disease. *United States* v. *100 Boxes of Bowman's Abortion Remedy*---------- 1187

BOURBON WHISKY.

See Whisky.

BRANDS.

See Label; Misbranding.

BRED SPRED:

An article of food labeled "Bred Spred", alleged to be adulterated by reason of the presence of pectin, and alleged to be misbranded for the reason that the words "Bred Spred Strawberry (or 'Raspberry') Flavor" and a design of fruit, appearing on the labels, represented the article to be strawberry or raspberry jam, when it was not, *held* not so adulterated or misbranded, on the ground that articles of food not labeled with the distinctive name of some other article come within the exception of the first proviso of section 8 of the act. *United States v. 49½ Cases of Bred Spred*---- 1204

Evidence *held* not to show that an article labeled "Bred Spred" and consisting essentially of berries, sugar, water, pectin, and tartaric acid was adulterated as being mixed, colored, or stained in a manner whereby damage or inferiority was concealed, or that the article was misbranded as being an imitation of another article, jam. *United States* v. *10 Cases, More or Less, Bred Spred, Etc., et al*----- 1262

BUFFALO LITHIA WATER:

Water taken from a spring at Buffalo Lithia Springs, Mecklenburg County, Va., and labeled "Buffalo Lithia Springs No. 2 * * * Buffalo Lithia Springs Water, Nature's Materia Medica," *held* misbranded because said water did not contain a sufficient quantity of lithium to entitle it to be called lithia water. *United States v. 7 Cases of Buffalo Lithia Water*---------- 573

Affirmed, *Goode* v. *United States*---------- 698

(c) By a balance of the probabilities. *United States* v. *Eleven Packages of B. & M. External Remedy* 1059

In forfeiture proceedings under section 10 of the act, *held* that the burden of proof was on the Government to establish the allegations of the libel by the weight of evidence which must be of a clear and convincing character. *United States* v. *443 Cans of Frozen Egg Product* 197
United States v. *300 Cases of Mapleine* 39

In forfeiture proceedings under section 10 of the act, the burden of proof is on the Government to establish its case by a higher degree of proof than a mere preponderance. It is not the ordinary burden of proof such as exists in a civil suit between two parties. *United States* v. *One Barrel of Desiccated Egg Product* 99
United States v. *10 Barrels of Olives* 125

Proceedings by libel for condemnation under section 10 of the act being civil and not criminal actions, the Government is not required to sustain the allegations of the libel by proof beyond a reasonable doubt as in criminal cases. *United States* v. *625 Sacks of Flour* 129
United States v. *5,060 Cans of Tomato Pulp* 780
United States v. *1,500 Cases of Tomato Pulp* 892
United States v. *275 Cases of Mineral Water* 920
United States v. 1,246 Cases of Tomato Catsup 943
United States v. *4½ Cases of Creme de Menthe* 1191

A seizure proceeding brought by the United States under section 10 of the act is not an ordinary civil suit, nor is it an ordinary criminal suit. It occupies a place between these two proceedings. It is a suit to enforce a penalty. The remedy is a severe one, and the burden is on the Government to offer better evidence than just the mere weight. The evidence of the Government must be clear and convincing to secure a favorable verdict. *United States* v. *36 Bottles of London Dry Gin* 489

In a proceeding to condemn drugs as misbranded in that the label, etc., stating the curative and therapeutic effect of the article was false and fraudulent, the burden of proof is upon the Government to show by a preponderance of the evidence which is clear and convincing that some one or more of the statements contained in the label, etc., and charged in the libel were false and fraudulent. *United States* v. *36 Bottles of Crab Orchard Mineral Water* 1011
United States v. *22 Bottles of Crab Orchard Concentrated Mineral Water* 1055
United States v. *23 7/12 Dozen Bottles, Etc., of "Lee's Save The Baby"* 1240
United States v. *9 Packages of Crisp's Tung-Tone, et al* 1268
United States v. *17 Bottles, Etc., of An Article of Drugs Labeled in Part "B. & M."* 1287

In a proceeding under section 10 of the act, for forfeiture of a food product for misbranding, *held* that the burden of proof was on the Government to establish by the evidence not merely a technical, but a substantial violation of the act, which might render the article injurious to health, or mislead the public to its prejudice or harm, or induce the purchase of an article different from the one desired. *Ninety-five Barrels, More or Less, Apple Cider Vinegar* v. *United States* 1079

BURDEN OF PROOF—Continued. Page

Where the claimant neither answered nor contested the allegations of a libel filed under section 10 of the act, it was held to be the duty of the court, before a decree of condemnation was entered, to see that a case was made out by the libelant. The burden held to be on the Government to show that the label contained a statement substantially false and misleading. *United States* v. *650 Cases of Tomato Catsup* 31

See Civil Cases; Criminal Cases; Evidence; Reasonable Doubt; Libel.

BUTTER:

Butter *held* adulterated for the reason that it contained less than 80 percent by weight of milk fat; *held*, not misbranded in that the weight of the contents of the package was not plainly and conspicuously marked on the outside thereof. *United States* v. *South Hero Creamery Association* 1142

Butter *held* misbranded because the packages contained less than the quantity stated thereon, and because the article contained less than 80 percent by weight of milk fat. *United States* v. *Trinidad Creamery Co* 1152

Butter *held* not adulterated in that it contained less than 80 percent by weight of butterfat. *United States* v. *South Peacham Creamery Co* 1147

Butter *held* not misbranded in that the weight of contents of the packages was less than stated thereon. *United States* v. *Monotti-Larimer* 1144

Allegation that an article branded "reworked butter", shipped in interstate commerce, was adulterated by reason of deficiency in milk fat, *held*, did not charge an offense against the act, in the absence of a law in force at the time of the shipment, or of a valid regulation, prescribing the amount of milk fat in butter. *United States* v. *Swift & Co* 1146

Allegation in an information that an article of food was adulterated by substitution of a product containing less than 80 per centum by weight of milk fat for "butter", *held* to charge adulteration in view of the Food and Drugs Act, section 7, and of act March 4, 1923, defining butter for the purposes of the Food and Drugs Act; and allegation that such article of food was misbranded in that statements "butter" and "one pound net", on the packages, represented that the article was "butter", to wit, a product which should contain not less than 80 per centum of milk fat, and that each of the packages contained 1 pound net of the article, whereas, the article contained less than 80 per centum by weight of milk fat, and the packages contained less than 1 pound net of the article, *held* to charge misbranding under the Food and Drugs Act, section 8, as amended by act March 3, 1913. *United States* v. *Centralia Dairy Co* 1336

In an action for the destruction of butter which contained impurities and a portion of which had become rancid, claimant will be allowed to "renovate" the butter—that is, to melt it to a fluid, so that all solid matter falls to the bottom, and then strain and blow it into spray, in which condition hot water is allowed to percolate through the oil, after which the water is drawn off and an emulsion made with milk, cooled into crystals, and packed, under a bond that, after renovating, the butter will be submitted to inspection, and destroyed if the renovation has not removed the impurities and the rancid oils—but will not be permitted to cleanse the butter by the process known as "ladling", which consists merely in picking out with a trowel such parts as show impurities to the eye, and then molding it into pats and coloring it for sale to bakers. *United States* v. *Nine Barrels of Butter* 826

The sale within the District of Columbia of process butter *held* within the purview of the Food and Drugs Act. *District of Columbia* v. *Coburn* 120

CAFFEINE:

Caffeine *held* to be an essential and normal ingredient of Coca-Cola, and not an added ingredient within the meaning of the act. *United States* v. *40 Barrels and 20 Kegs of Coca-Cola* 239

Caffeine *held* to be an added poisonous and deleterious ingredient of a beverage called "Celery Cola." *United States* v. *Mayfield et al*-- 90
See Added Poisonous and Added Deleterious Ingredients; Celery Cola; Coca Cola; Creme de Menthe Flavor Non-alcoholic Cordial.

CALCIUM ACID PHOSPHATE:
An article of food labeled "C. A. P.", which was composed of calcium acid phosphate and corn starch and which contained no added poisonous or deleterious ingredient, *held* not adulterated or misbranded by reason of the addition of corn starch the presence of which was not stated on the label, since it was an article manufactured and sold under its own distinctive name. *United States* v. *100 Barrels of Calcium Acid Phosphate*---------- 58
See Distinctive Name.

CANCERINE:
A medicinal preparation labeled "Cancerine" *held* not misbranded within the meaning of the act because of alleged false and misleading statements on its label regarding its curative effect. *United States* v. *Johnson* ---------- 85
Affirmed, *United States* v. *Johnson*---------- 267

CANDY.
See Confectionery.

CAPON SPRINGS WATER:
Bottled water taken from a spring in West Virginia, labeled "Capon Springs Water, Known to the Catauba Indians as 'Ca-Ca-Paon' Healing Water", *held* not misbranded as fraudulently represented by the term "healing water" to have curative or therapeutic effect, and not adulterated within the act, section 7, paragraph 6. *United States* v. *94 Dozen, More or Less, Half-Gallon Bottles of Capon Springs Water* ---------- 1216
Judgment affirmed, *United States* v. *94 Dozen, More or Less, Half-Gallon Bottles of Capon Springs Water*---------- 1278

CATSUP.
See Tomato Catsup.

CELERY COLA:
A beverage labeled "Celery Cola" *held* adulterated because it contained cocaine and caffeine, added poisonous and deleterious ingredients; and misbranded because the quantity or proportion of cocaine present was not stated on the label. *United States* v. *Mayfield et al*---------- 90

CERTIFICATE.
See Affidavits.

CERTIFICATION OF VIOLATIONS:
The provision of the act, section 4, that the Secretary of Agriculture, after an investigation of the alleged violation of the act, shall at once certify the facts to the *proper* United States attorney, requires the certification to the district attorney in whose district prosecution should be had. *United States* v. *J. L. Hopkins & Co*---------- 401
See Jurisdiction.

CHAMPAGNE:
The term "champagne," when used alone and apart from any qualifying or descriptive words, is commonly understood to describe an effervescent or sparkling wine produced in a Province in France, the gas therein being the result of natural fermentation. *Held*, a bottle containing wine produced in California and labeled "Extra

CHAMPAGNE—Continued. Page

Dry Champagne", without any other qualifying or descriptive words, tends to mislead and deceive the purchaser into the belief that he is buying a foreign product, and is misbranded under the provisions of the act. *United States* v. *Schraubstadter et al*_____ 237
Affirmed, *Schraubstadter et al.* v. *United States*_____ 398

A very cheap, ordinary, low-grade, carbonated white wine, is not champagne in any sense of the word. Such an article contained in bottles of the same shape and made in imitation of the ordinary champagne bottle, and corked and dressed about the neck the same as and in close imitation of the ordinary genuine champagne bottle, and having the same style of label and seal, both attached in the same manner, and the label bearing the name "Special Gold Cabinet, Superior Quality", with other designs and devices such as are ordinarily used in the labeling of genuine champagne, and the boxes in which the article was packed closely imitated in appearance, markings and labels the boxes in which genuine champagne is packed, is misbranded. *United States* v. *5 Cases of Champagne*__ 503

Apple juice artificially carbonated and containing capsicum contained in bottles which were labeled "Sparkling White Seal", and which in form and dress resembled a distinctive bottle used for champagne sold under the same name, *held* misbranded. *United States* v. *9 Cases of Sparkling White Seal*_____ 1023
Affirmed, *Duffy-Mott Co.* v. *United States*_____ 1078

"Chrome yellow" is a metal largely used as a yellow pigment, and is an active poison. *United States* v. *R. C. Boeckel & Co. et al*____ 637

See Confectionery.

CIDER:

An article labeled "Sweet Cider Produced of Concentrated Pure Apple Juice" and consisting of diluted apple juice sweetened with saccharine and artificially colored with caramel, in imitation of genuine sweet cider, *held* misbranded. *United States* v. *Shucart*_____ 693

See Vinegar.

CINCHONA, FLUID EXTRACT:

A drug labeled "Fluid Extract Cinchona" *held* adulterated in that, being a drug sold under a name recognized in the United States Pharmacopoeia, it differed from the standard of strength, quality, and purity by the test laid down therein for such drug, and the standard of strength, quality, and purity of the said drug was not stated on the container thereof. *United States* v. *G. F. Harvey Co*__ 754

CIRCULARS, PAMPHLETS, BOOKLETS, ETC.:

Section 8 of the act, relating to misbranding, merely embraces any statement, design, or device regarding an article which appears on the outside of the package in which the article is offered for sale and does not include an advertising circular inclosed with an article inside the carton in which it is offered for sale. *United States* v. *American Druggists' Syndicate*_____ 250

CIRCULARS, PAMPHLETS, BOOKLETS, ETC.—Continued. Page

False representations regarding an article of food, contained in a circular and a poster inclosed within the package of the article, cannot be considered as violating the act. *United States* v. *Newton Tea & Spice Co* 950

Misbranding within the definition thereof in the act, section 8, as including cases where the package or label "bears" a false or misleading statement, *held* inapplicable to such statements in a booklet enclosed within a carton containing drugs. *United States* v. *17 Bottles, Etc., of An Article of Drugs Labeled In Part "B. & M."* 1287

Statements in a booklet inclosed in a carton of a drug may be the basis of a charge of adulteration under the act, section 7, in that the strength or purity of the drug fell below the professed standard under which it is sold. Id.

The provision of the act, section 8, as amended by act August 23, 1912, that drugs shall be deemed to be misbranded if the package or label shall bear or contain any statement, etc., regarding the curative or therapeutic effect of such article which is false and fraudulent, applies to such statements whether they appear on the package or in circulars or printed matter contained in the package. *Seven Cases of Eckman's Alterative* v. *United States* 707

Statements regarding the curative or therapeutic effect of drugs shipped in interstate commerce, if false and fraudulent, come within the act, as amended by act August 23, 1912, if they accompany the shipment and are intended for perusal by prospective purchasers, regardless of whether they appear on the label on the bottles containing the article, or on the cartons or containers in which the bottles were shipped, or in circulars, pamphlets, or booklets accompanying the shipment. *United States* v. *Eleven Packages of B. & M. COCOANUT.
See Shred Cocoanut.

COFFEE:

Coffee shipped from Aden, Arabia, whether produced in Arabia or Abyssinia, may properly be labeled "Mocha", but is misbranded if the label fails to state in which of the two countries it was produced. *United States* v. *Thomson & Taylor Spice Co* 390
An article labeled "Blanke's Kafeka * * * is the nearest approach to coffee ever put on the market. It has all the merits without any objectionable features", *held* not misbranded by reason of said statements on the label. *United States* v. *C. F. Blanke Tea & Coffee Co* 432
An article composed almost entirely of Santos coffee, and labeled "Blanke's Mojav Coffee", *held* not misbranded as purporting to be a mixture of Mocha and Java coffee. *United States* v. *C. F. Blanke Tea & Spice Co* 439

COLOCYNTH APPLE, POWDERED:

An article labeled "Powdered Colocynth Apple", and containing 25 percent of seeds and yielding 11.39 percent of fixed oil, *held* adulterated in that it differed from the standard of strength, quality, and purity by the tests as laid down in the United States Pharmacopoeia, according to which colocynth apple should contain not more than 5 percent of seeds and yield not more than 2 percent of fixed oil, and the standard of the strength, quality, and purity of the article was not declared on the container thereof. The article was *held* misbranded in that the label was false and misleading, and in that the article was sold under the name of another article, to wit, colocynth apple. *United States* v. *McIlvaine Bros* 1127

COLORED:

The word "colored", as used in the act, section 7, subdivision 4, must be held to include any artificially produced change in the natural color of the substance in a manner whereby damage or inferiority is concealed. *Lexington Mill & Elevator Co.* v. *United States* 443
See Damage or Inferiority; Mixed.

COLORING MATERIALS:

A coloring material labeled "Red Color" *held* adulterated in that substances, to wit, ponceau 6R, fast red A, Bordeaux B, sodium chloride, sodium sulphate, and arsenic, had been mixed and packed with the article so as to lower and reduce and injuriously affect its quality and strength, and had been substituted in part for the article; and said article, *held* misbranded because it did not consist wholly of "Red Color", but consisted in part of ponceau 6R, fast red A, Bordeaux B, sodium chloride, sodium sulphate, and arsenic.
A coloring material labeled "Ponceau Red" *held* adulterated in that substances, to wit, ponceau 6R, orange II, fast red A, Bordeaux B, sodium chloride, sodium sulphate, and arsenic, had been mixed and packed with the article so as to lower and reduce and injuriously affect its quality and strength, and had been substituted in part for the article; and said article *held* misbranded because it did not consist wholly of "Ponceau Red", but consisted in part of ponceau 6R, orange II, fast red A, Bordeaux B, sodium chloride, sodium sulphate, and arsenic.
A coloring material labeled "Orange Yellow" *held* adulterated in that substances, to wit, sodium chloride, sodium sulphate, and arsenic, had been mixed and packed with the article so as to lower

COLORING MATERIALS—Continued. Page

and reduce and injuriously affect its quality and strength, and had been substituted in part for the article; and said article *held* misbranded because it did not consist wholly of "Orange Yellow", but consisted in part of sodium chloride, sodium sulphate, and arsenic.

A coloring material labeled "Amaranth Red" *held* adulterated in that substances, to wit, ponceau 6R, fast red A, Bordeaux B, sodium chloride, sodium sulphate, and arsenic, had been mixed and packed with the article so as to lower and reduce and injuriously affect its quality and strength, and had been substituted in part for the article; and said article *held* misbranded because it did not consist wholly of "Amaranth Red", but consisted in part of ponceau 6R, fast red A, Bordeaux B, sodium chloride, sodium sulphate, and arsenic.

A coloring material labeled "Lemon" *held* adulterated in that substances, to wit, sodium chloride, arsenic, and orange II had been mixed and packed with the article so as to lower and reduce and injuriously affect its quality and strength, and had been substituted in part for the article; and said article *held* misbranded because it did not consist wholly of "Lemon", that is to say, "Tartrazine", but consisted in part of sodium chloride, arsenic, and orange II.

United States v. *W. B. Wood Manufacturing Co*_____ 1002

Affirmed, *W. B. Wood Manufacturing Co.* v. *United States*_____ 1098

An article sold for coloring ice cream, soft drinks, candy, cakes, etc., *held* to be adulterated in that sodium chloride and sodium sulphate had been mixed and packed with the article so as to reduce or lower or injuriously affect its quality and strength, and had been substituted wholly or in part for the article; and in that the article contained an added poisonous or deleterious ingredient, arsenic, which might render the article injurious to health. Said article *held* to be misbranded in that the statement, "Warranted. Complies With All Requirements. Quality Color", appearing on the label, was false and misleading. *United States* v. *One Pound Can of Coal-Tar Color*_____ 1019

Affirmed, *W. B. Wood Manufacturing Co.* v. *United States*_____ 1070

Coloring material *held* not to be adulterated in that other substances had been mixed and packed therewith so as to reduce, lower, and injuriously affect its quality and strength, and had been substituted wholly or in part for the article. Said article *held* to be misbranded in that the statement "We guarantee the contents of this package to contain no coal tar color excepting our certified colors", borne on the label, was false and misleading. *United States* v. *37 One-Pound Packages of Colors*_____ 1165

Coloring materials *held* not adulterated because they contained arsenic as an added poisonous and deleterious ingredient, where there was no proof that the quantities of arsenic present were in fact poisonous, hurtful, or injurious to health. *United States* v. *W. B. Wood Manufacturing Co*_____ 1002

See Added Poisonous and Added Deleterious Ingredients; Arsenic; Regulations; Standards.

COMMISSIONERS, UNITED STATES.

See Affidavits.

COMPOUND:

An article of food bearing principal labels describing it as a particular brand of molasses, but plainly stating that the product is a compound of molasses and corn sirup, and also containing all the other information required by the act and the regulations thereunder, and which article is in fact a compound of molasses and commercial glucose, is not adulterated or misbranded within the meaning of the act; it being shown that the article contains nothing deleterious or injurious to health, and that under the rulings of the Department of Agriculture it is permissible to describe commercial glucose on labels as made from corn sirup. *United States* v. *779 Cases of Molasses*_____ 65

COMPOUND—Continued.

Page

The term "Compound White Pepper" does not so naturally imply to the average purchaser a mixture of white pepper with an ingredient other than pepper as to make it a proper branding where the statement of the ingredient is so placed and in such type as not readily to be noticed by the purchaser, and is calculated and intended to deceive and mislead the latter. *Frank et al.* v. *United States*---------- 329

A blend is a compound, but a compound may or may not be a blend; in other words, the term "compound" does not necessarily denote a mixture of unlike substances. Id.

Where pumpkin was added to tomato catsup as a filler, the fact that it was merely marked "Compound", without anything on the labels under which it was sold to show the substances composing the compound, did not constitute a compliance with the act. *William Henning & Co.* v. *United States*---------- 344

An article containing milk and chocolate *held* to be a mixture or compound, and, containing no added poisonous or deleterious ingredients and being labeled "Milk Chocolate", is within the provision of the act, section 8, that an article of food which does not contain any added poisonous or deleterious ingredients shall not be deemed to be adulterated in the case of mixtures or compounds known as articles of food under their own distinctive names. *United States* v. *Auerbach & Sons*---------- 357

Under the provision of the act, section 8, that an article of food which does not contain any added poisonous or deleterious ingredients shall not be deemed adulterated or misbranded in the case of compounds known as articles of food under their own distinctive names, and not an imitation of or offered for sale under the distinctive name of another article, and in case of articles labeled so as to plainly indicate that they are compounds, and the word "compound" is stated on the package in which it is offered for sale, an article labeled "Fruit Wild Cherry Compound", not containing any "Fruit Wild Cherry", but containing a coal-tar color giving the mixture the genuine color of wild cherry juice, but not containing any added poisonous or deleterious ingredients, is not adulterated or misbranded. *Weeks* v. *United States*---------- 646

Affirming *United States* v. *Weeks*---------- 519

Section 8 of the act contains a proviso that food which does not contain any poisonous or deleterious ingredients shall not be deemed adulterated or misbranded, in the case of mixtures or compounds known as articles of food under their own distinctive names, if such name be accompanied on the same label or brand with a statement of the place where the article has been manufactured or produced, and, in the case of articles labeled, branded, or tagged so as to indicate plainly that they are compounds, imitations, or blends, and the word "compound", "imitation", or "blend", as the case may be, is plainly stated on the package in which it is offered for sale. *Held*, that where an article known as "Corno Horse and Mule Feed" was contained in packages labeled "Corno Horse and Mule Feed. Mixture of ground alfalfa, oats, corn, flax bran, oat and hominy feeds. Made by the Corno Mills Company, East St. Louis, Illinois"—followed by a guaranteed analysis, such article, being a compound sold under its own distinctive name, and containing no deleterious ingredient, and the label showing it to be a mixture and truthfully stating its constituents and the place of manufacture, was not adulterated because it contained oat hulls in excess of the amount normally present in oat feed consisting of whole ground oats, and was not misbranded because it contained an excess of oat hulls in compound and not the whole ground oats. *United States* v. *One Carload of Corno Horse and Mule Feed*---------- 274

Within the general terms of the act, sections 7 and 8, an article labeled "Compound Ess Grape", but which contains nothing from grapes and is a mere imitation, is adulterated, since some other substance has been substituted wholly for the one obviously indi-

COMPOUND—Continued. Page

cated by the label, viz, "Compound essence of grape", and also misbranded, since the label carries a false and misleading statement; and in such case the use of the word "compound" is not a compliance with the proviso in paragraph 4 of section 8 of the act, since it does not give notice that the article is a mere imitation but suggests the contrary. *United States* v. *Schider*---------- 875

See Added Poisonous and Added Deleterious Ingredients; Adulteration; Blend; Distinctive Name; Imitation; Misbranding.

COMPOUND ESS GRAPE.

An article labeled "Compound Ess Grape", but containing nothing from grapes, *held* adulterated and misbranded. *United States* v. *Schider*---------- 875

CONDEMNATION.

See Libel; Release; Seizure.

CONDENSED MILK.

See Milk, Condensed Skimmed.

CONDIMENT:

A condimen ti sa food and not a medicine. *Savage* v. *Scovell*---------- 18

The condiments used in the manufacture of tomato catsup have the effect of concealing decomposition or putrefaction from the senses, and its existence can most readily be determined by a bacteriological analysis of the manufactured product to ascertain whether the organisms referred to are present in sufficient quantities to indicate a decomposed state. *United States* v. *200 Cases of Adulterated Tomato Catsup*---------- 583

CONFECTIONERY:

An article labeled "Pure Milk Chocolate, Manufactured by D. Auerbach & Sons, New York City", *held* not adulterated by reason of its containing wheat starch, the presence of which was not declared on the label. The article was *held* to be a mixture or compound sold under its own distinctive name and not an imitation of or offered for sale under the distinctive name of another article. *United States* v. *Auerbach & Sons*---------- 357

Confectionery labeled "Ghirardelli's Italian Chocolates, D. Ghirardelli Company, San Francisco, California", with colors and design of the Italian flag, which was manufactured in the United States, *held* not misbranded as purporting to have been manufactured in Italy. *United States* v. *D. Ghirardelli Co*---------- 397

The act, section 7, provides that confectionery shall be deemed to be adulterated "if it contain terra alba, barytes, talc, chrome yellow, or other mineral substance or poisonous color or flavor, or other ingredients deleterious or detrimental to health." The words "deleterious or detrimental to health" are limited to the term "ingredient", and qualify that word only and not any preceding word or words. Coloring or flavoring matter is permissible, provided it is not poisonous, but any other ingredient, although not theretofore specified or classified, which is deleterious or detrimental to health, is prohibited. Certain specified articles are by the provision inferentially denominated minerals, and their use is prohibited; then, to the specific mineral substances whose use is prohibited, is added "or other mineral substances." Hence, the introduction into confectionery of mineral substances is prohibited, irrespective of the presence or absence of any poisonous, deleterious or detrimental quality, and notwithstanding such is not of the class of the specified mineral substances; they are prohibited because they are adulterants, and for that reason only. Confectionery labeled "Silver Dragées", coated with metallic silver, *held* adulterated in that it contained a mineral substance. *United States* v. *Oriental Dragée Co*---------- 35

The provision of the act, section 7, that confectionery shall be deemed to be adulterated if it contain terra alba, barytes, talc, chrome yellow, or other mineral substance or poisonous color or flavor, must be construed to prohibit the use in confectionery of all mineral substances of the same nature as those enumerated,

CONFECTIONERY—Continued. Page

and of those enumerated some are well known to be merely inert, possessing no poisonous qualities whatever (e. g., terra alba and talc). Silver is inert and is just as much a mineral substance as is terra alba, and is within the prohibition. Confectionery labeled "Silver Drageés", coated with metallic silver, *held* adulterated. *United States* v. *French Silver Dragée Co*---------- 43
Reversed, *French Silver Dragée Co.* v. *United States*---------- 121

The act, section 7, provides that confectionery shall be deemed to be adulterated "if it contain terra alba, barytes, talc, chrome yellow, or other mineral substance or poisonous color or flavor or other ingredient deleterious or detrimental to health." The words "other mineral substance", under the doctrine of *ejusdem generis*, included other mineral substances which are deleterious or detrimental to health of the same nature as those specifically described preceding such words, and hence did not include a thin coating of pure silver covering candy, used principally by confectioners for decorative purposes, and not deleterious or detrimental to health. *French Silver Dragée Co.* v. *United States*---------- 121

Confectionery *held* not adulterated in that it contained talc. *Held* that in order to condemn confectionery as adulterated in that it contained talc, the burden was on the Government to establish by a preponderance of the evidence that the talc was present in a quantity beyond a mere chemical trace and sufficient to be regarded as significant or important for some possible practical purpose. *United States* v. *307 Cases of Confectionery*---------- 353
Reversed, *United States* v. *R. C. Boeckel & Co. et al*---------- 637

Under the provision of the act, section 7, that confectionery shall be deemed to be adulterated "if it contain terra alba, barytes, talc, chrome yellow, or other mineral substance or poisonous color or flavor, or other ingredient deleterious or detrimental to health, or any vinous, malt, or spiritous liquor or compound or narcotic drug", confectionery is adulterated when it contains any of the substances specifically named, such as talc, regardless of whether the amount of the added adulterant indicates an intention to deceive, or is liable to injure health or morals, and it was therefore error for the court to charge that a mere chemical trace of talc would not constitute adulteration, but that there must be enough to show some purpose of deception. *United States.* v. *R. C. Boeckel & Co. et al*---------- 637

In the provision of the act, section 7, that confectionery shall be deemed to be adulterated "if it contain terra alba, barytes, talc, chrome yellow, or other mineral substance or poisonous color as flavor, etc.", the word "contain" is used in a general and not in a restricted sense, and confectionery may "contain" any of the prohibited substances if they are used as a compound, a filler, a flavor, a pigment to color it internally or externally, a coating, or other similar purpose, especially if purposely used for those or other similar purposes, even in minute quantities. Id.

Confectionery includes an article produced by the mixing or compounding of sugars, sweets, etc., and intended mainly for the purpose of pleasing the taste. An article in the form of tablets, composed of a mixture of sugar 93 parts, talc 5 parts, mineral oil one-half of 1 part, some starch, and wintergreen oil one-eighth of 1 part, *held* to be confectionery and not a drug, and adulterated by reason of the presence of a substantial amount of talc. *United States* v. *4 Boxes of Mulford's Wintergreens*---------- 592

An information charging that confectionery, commonly called candy, was adulterated in that it consisted in whole or in part of a filthy, decomposed, and putrid vegetable substance, *held*, sufficiently charged adulteration of "confectionery" within the terms of the act defining what constitutes adulteration of "confectionery", namely, "if it contains terra alba, etc., or other mineral substance or poisonous color or flavor, or other ingredient deleterious or detrimental to health." *United States* v. *Watson-Durand-Kasper Grocery Co*---------- 837

See Contain; Chrome Yellow; Construction, Rules of; Distinctive Name; Ejusdem Generis; Talc.

CONGRESS, JOURNALS OF: Page

In case of doubt or ambiguity, the journals of the legislature may be examined for the intent of the lawmakers to ascertain facts of which such journals are evidence. *United States* v. *Dr. J. L. Stephens Co*---------- 305

See Congressional Committee Reports; Construction and Interpretation; Debates in Congress; Legislative History of the Act.

CONGRESSIONAL COMMITTEE REPORTS:

Congressional committee reports explaining the bill considered by the court in determining the intent of Congress. *United States* v. *Coca Cola Co*---------- 741
United States v. *Lexington Mill & Elevator Co*---------- 577
United States v. *150 Cases of Fruit Puddine*---------- 557
French Silver Dragée Co. v. *United States*---------- 121

Reports of congressional committees explaining the bill may be considered in determining the meaning of a doubtful statute, but will not be used to support a construction contrary to the plain import of its terms. *United States* v. *Shreveport Grain & Elevator Co*---------- 1339

See Congress, Journals of; Construction and Interpretation; Debates in Congress; Legislative History of the Act.

CONSIST:

The term "consists of", as used in the provision of the act, section 7, that an article of food shall be deemed to be adulterated if it consists in whole or in part of a filthy, decomposed, or putrid animal or vegetable substance, means something more than the word "contains" used elsewhere in the statute. The word "contains" ordinarily means something added to or embraced within the original substance; the term "consist of", as used in said provision, means a part or a constituent element of the product. *United States* v. *1,367 Cases of Pork and Beans*---------- 766

Where an article of food, by reason of the presence of bacteria, or worms, insects, and beetles, is in a filthy, decomposed, or putrid condition, it is no defense to say that it does not *consist* in whole or in part of a filthy, decomposed, or putrid animal or vegetable substance, but that it *contains* such substances, and therefore it is not adulterated within the meaning of the act. Such article is adulterated whether its filthy, decomposed, or putrid condition is caused by an inherent condition or by a substance foreign to its proper constituents or ingredients, and if such foreign substance, though not filthy, decomposed, or putrid in itself, by its presence renders the article of food filthy, decomposed, or putrid. *Dade* v. *United States*---------- 465
Wm. M. Galt & Co---------- 422

See Contain; Filthy, Decomposed, and Putrid.

CONSTITUTIONALITY OF THE FOOD AND DRUGS ACT:

The constitutionality of the act is generally conceded and well established. *United States* v. *Sweet Valley Wine Co*---------- 468

Congress not only has the right to pass laws regulating legitimate commerce among the States and with foreign nations, but has full power to keep the channels of such commerce free from the transportation of illicit or harmful articles, to make such as are injurious to the public health outlaws of such commerce and to bar them from the facilities and privileges thereof. Congress may itself determine the means appropriate to this purpose, and so long as they do no violence to other provisions of the Constitution it is itself the judge of the means to be employed in exercising the powers conferred upon it in this respect. *McDermott et al.* v. *Wisconsin*---------- 473

CONSTITUTIONALITY OF THE FOOD AND DRUGS ACT—Contd. Page

The act is not unconstitutional as an attempt by Congress to exercise police power belonging to the States. The act is not unconstitutional as depriving persons of property without due process of law. The act is not void for uncertainty and indefiniteness, in that no standard of grade, quality, or purity is prescribed, but that the determination of the standard is left to the courts as such objection may be obviated by requiring specific and properly drawn pleadings. *United States* v. *420 Sacks of Flour* 96

The act is not an exercise of police power within the exclusive jurisdiction of the States, but is within the power of Congress as a proper regulation of interstate commerce. *Shawnee Milling Co.* v. *Temple et al* 106

The act is a legitimate exercise of the power of Congress to regulate interstate commerce. *United States* v. *74 Cases of Grape Juice* 144

United States v. *65 Casks of Liquid Extracts* 47

United States v. *100 Cases of Tepee Apples et al* 20

United States v. *Bethesda Mineral Spring Co* 841

United States v. *11 Packages of B. & M. External Remedy* 1059

The act is sanctioned by the power given to Congress by the Constitution to regulate commerce and to pass all laws necessary and proper to carry that power into effect. *United States* v. *8 Packages and Casks of Drugs* 149

Congress had the power under the Constitution to pass the Food and Drugs Act prohibiting interstate commerce in food or drugs that do not comply with certain standards established by the act. *United States* v. *Atlantic Macaroni Co* 793

The act is not void for uncertainty because it fails to specify definitely the extent to which decomposition of an article of food must have progressed to bring the article within the prohibition of food defined as adulterated if it consists in whole or in part of a "decomposed substance." *A. O. Andersen & Co.* v. *United States* 1053

Congress has the right in the interest of the general public and in the exercise of its control over interstate commerce to prescribe the standard up to which certain drugs must come when they are shipped in interstate commerce. *United States* v. *G. F. Harvey Co.* 754

Congress can use appropriate means to execute the powers conferred upon it by the Constitution, and the seizure and condemnation of adulterated articles of food which have been transported in interstate commerce at their point of destination in the original, unbroken packages is an appropriate means. *Hipolite Egg Co.* v. *United States* 223

The act is not unconstitutional as being ex post facto, or as containing an improper delegation of legislative authority by reason of section 7, declaring that a drug shall be deemed to be adulterated when "sold under or by a name recognized in the United States Pharmacopoeia (and differing) from the standard of strength, quality, or purity as determined by the test laid down in (said) Pharmacopoeia * * * * official at the time of investigation". *United States* v. *Lehn & Fink* 229

A drug containing alcohol used as an inhalant for head colds, *held* to be subject to regulation by Congress in interstate commerce, though constituting a harmless substance not detrimental to health. *United States* v. *11 Cartons of Drug Labeled in Part "Vapex"* 1332

The Sherley amendment (act Aug. 23, 1912) to the Food and Drugs Act, prohibiting false and fraudulent statements as to the curative properties of drugs, is within the power of Congress to enact, and is constitutional. *United States* v. *American Laboratories* 641

The act of August 23, 1912, amending the Food and Drugs Act, section 8, under which misbranding includes false and fraudulent statements regarding curative or therapeutic effects of drugs, is within the power of Congress to regulate interstate and foreign commerce. Such regulation of interstate commerce is within the power of Congress whether the statement be contained in the original package or on the container of the article. *Seven Cases of Eckman's Alterative* v. *United States* 707

CONSTITUTIONALITY OF THE FOOD AND DRUGS ACT—Contd. Page

The act of August 23, 1912, amending the Food and Drugs Act, section 8, does not by reason of uncertainty operate as a deprivation of property without due process of law in violation of the Fifth Amendment of the Constitution, nor does it prevent the laying of definite charges as required by the Sixth Amendment, as it in terms requires that the statements to fall within the prohibition of the act must be false and fraudulent. *Id.*

The provision of the act, section 8, paragraph 3, as amended by act March 3, 1913, that the quantity of the contents of packages of food be plainly marked on the package in terms of weight, measure, or numerical count, and that reasonable variations shall be permitted, etc., *held* not unconstitutional for uncertainty. *United States* v. *The Merchants Biscuit Co*_____ 1129

The provision of the act, section 8, paragraph 3, as amended by act March 3, 1913, that an article of food shall be deemed misbranded if in package form, the quantity of the contents be not plainly and conspicuously marked on the outside of the package in terms of weight, measure, or numerical count, with the proviso that "reasonable variations shall be permitted, and tolerances and also exemptions as to small packages shall be established by rules and regulations made in accordance with the provisions of section 3 of the act", *held* unconstitutional because it is too indefinite, not setting up any ascertainable standard of guilt. *United States* v. *Shreveport Grain & Elevator Co*_____ 1239

Reversed, *United States* v. *Shreveport Grain & Elevator Co*____ 1339

The provision of the act, section 8, paragraph 3, as amended by act March 3, 1913, declaring food misbranded if in package form, the quantity of the contents thereof is not marked on the outside thereof in terms of weight, measure, or numerical count, with the proviso that "reasonable variations shall be permitted, and tolerances and also exemptions as to small packages shall be established by rules and regulations made in accordance with section 3 of the act", *held* unconstitutional in that the provision, and particularly the proviso as to "reasonable variations", constituted a fixing by Congress of an unascertainable standard of guilt, and was inadequate to inform persons accused of violations thereof, of the nature and cause of the accusation against them. *United States* v. *American Maid Flour Mills*_____ 1286

The provision of the act, section 8, paragraph 3, as amended by act March 3, 1913, that food shall be deemed misbranded if the quantity of the contents of the package be not plainly and conspicuously marked thereon, and that reasonable variations shall be permitted, and tolerances and also exemptions as to small packages shall be established by rules and regulations, *held* not invalid for uncertainty in describing the offense. *United States* v. *Centralia Dairy Co*_____ 1336

Section 2 of the act punishes shipment in interstate or foreign commerce of any article of food which is misbranded; and section 8, as amended by act March 3, 1913, declares that such an article in package form shall be deemed misbranded if the quantity of the contents be not plainly and conspicuously marked on the outside of the package in terms of weight, measure, or numerical count; with the proviso "That reasonable variations shall be permitted, and tolerances and also exemptions as to small packages shall be established by rules and regulations made in accordance with section three." Section 3 provides that executive officers designated shall make uniform regulations for carrying out the act. *Held* that the executive regulations are to fix the variations allowable, as well as tolerances and exemptions, hence the statute is not open to the constitutional objection of uncertainty in defining the offense. *United States* v. *Shreveport Grain & Elevator Co*_____ 1339

Reversing *United States* v. *Shreveport Grain & Elevator Co*_____ 1239

The provision of the act, section 8, paragraph 3, for defining by executive regulations the reasonable variations that are permissible from the quantities marked on the packages, is not unconstitutional as an attempted delegation of legislative power. Id.

CONSTITUTIONALITY OF THE FOOD AND DRUGS ACT—Contd. Page

Section 9 of the act, which provides that no dealer shall be prosecuted under the act when he can establish a guaranty signed by the party from whom he purchased the article to the effect that it is not adulterated or misbranded within the meaning of the act, and providing that in such case the party giving the guaranty shall be amenable to the prosecutions and penalties which would attach under the act in due course to the dealer, is within the power vested in Congress to exclude adulterated and misbranded foods from interstate commerce. *United States* v. *Charles L. Heinle Specialty Co*---------- 82

See Constitutionality of State Laws; Interstate Commerce; Police Regulation; Standards.

CONSTITUTIONALITY OF STATE LAWS:

A law of Kentucky which requires articles of food sold in the State to be labeled so as to disclose the ingredients, and authorizes the taking of samples from packages for analysis, is not unconstitutional, but is a valid inspection law. Nor is it invalidated by the enactment of the national Food and Drugs Act, which does not conflict with its provisions. *Savage* v. *Scovell*---------- 18

A statute of Indiana regulating the sale and requiring disclosure of formula of concentrated commercial food for stock, *held* valid as a proper and reasonable exercise of legislative police authority, and not unconstitutional as a burden on interstate commerce or as being in conflict with the Federal Food and Drugs Act. *Savage* v. *Jones*---------- 376

A statute of Wisconsin prescribing a label for corn sirup and prohibiting all other forms of labeling is invalid so far as it relates to articles properly branded on the immediate container thereof under the Federal Food and Drugs Act and brought into the State in interstate commerce, so long as they remain unsold by the importer, whether in the original outside package or not. *McDermott et al.* v. *Wisconsin*---------- 473

A statute of the State of Florida prohibiting the sale or shipment of citrus fruits immature or otherwise unfit for consumption is not invalid as in contravention of the Federal Food and Drugs Act, since Congress has not included green or immature fruit in its regulation under that act. *Sligh* v. *Kirkwood*---------- 634

CONSTRUCTION AND INTERPRETATION:

As the act is a criminal statute, creating a new offense, it must be strictly construed and applied. It must be restrained to its expressed reasonable intendment; otherwise the courts, by mere construction, may extend its operation far beyond the legislative intent. *United States* v. *Johnson*---------- 85

The act (sec. 2) provides that any person who shall ship or deliver from any State to another, or who shall receive in any State from another, and having so received shall deliver, in original unbroken packages, or offer to deliver to any other person, any article of food which is adulterated or misbranded, shall be guilty of a misdemeanor. The act (sec. 10) provides that any article of food, drug, or liquor that is adulterated or misbranded and is being transported from one State to another, shall be liable to be proceeded against and seized for confiscation by a process of libel for condemnation. *Held* that these provisions must be strictly construed. *United States* v. *65 Casks of Liquid Extracts*---------- 47

In determining the constitutionality of the act, a much stricter construction is required in criminal actions for violation of the statute than in civil actions. *United States* v. *Shreveport Grain & Elevator Co*---------- 1239

The act, while it contains penal provisions without which it could not be enforced, was enacted to remedy the great mischief resulting from the unrestricted sale of adulterated drugs and food, and ought to be given, where possible, a construction that will effect the general legislative intention. *United States* v. *Antikamnia Chemical Co*---------- 260

CONSTRUCTION AND INTERPRETATION—Continued. Page

The fact that the act has a penal character does not mean that it should not be given its reasonable intendment. *United States* v. *Antikamnia Chemical Co* 552

The act, although penal in its nature, is not given a strict construction, but one which will reasonably tend to accomplish its general object and purposes. *United States* v. *95 Barrels, More or Less, Alleged Apple Cider Vinegar* 1047

The rule of strict construction does not apply to statutes like the Food and Drugs Act, designed to promote the public health or safety. *A. O. Andersen & Co.* v. *United States* 1053

The act should be liberally construed to effect its beneficent purposes. *United States* v. *One Carload of Corno Horse and Mule Feed* 274

The act is essentially remedial, and its evident purpose is not to be defeated by any narrowness of construction. *Lexington Mill & Elevator Co.* v. *United States* 443

The act is a police regulation, enacted to conserve the public health. It will be construed liberally to meet the evils intended to be embraced within its provisions. *Dade* v. *United States* 465

The purpose of the act is the ever insistent consideration in its interpretation. *United States* v. *Antikamnia Chemical Co* 552

United States v. *150 Cases of Fruit Puddine* 557

The purpose of the act is to secure the purity of food and drugs and to inform purchasers of what they are buying. Its provisions are directed to that purpose and must be construed to effect it.

United States v. *Antikamnia Chemical Co* 552

United States v. *Schider* 875

United States v. *95 Barrels, More or Less, Alleged Apple Cider Vinegar* 1047

The primary purpose of the act is to prevent injury to the public health, and while the test of misbranding of a food product is whether it is true to name, there should not be overstrictness in applying this test in a case where the public health cannot possibly be jeopardized. *Ninety-five Barrels, More or Less, Apple Cider Vinegar* v. *United States* 1079

The act should be read favorably to the accomplishment of its purpose, and not only any branding which is misleading or liable to mislead, but also any which is ambiguous, should be visited with the condemnation of the act. *United States* v. *95 Barrels, More or Less, Alleged Apple Cider Vinegar* 1118

United States v. *McIlvaine Bros* 1127

The act was passed by Congress under its authority to exclude from interstate commerce impure and adulterated food and drugs and to prevent the facilities of such commerce being used to enable such articles to be transported throughout the country from their place of manufacture to the people who consume and use them, and it is in the light of the purpose and of the power exerted in its passage by Congress that the act must be considered and construed. *McDermott et al.* v. *Wisconsin* 473

Glaser, Kohn & Co. v. *United States* 651

The primary purpose of Congress in enacting the Food and Drugs Act was to prevent injury to the public health by the sale and transportation in interstate commerce of misbranded and adulterated food. As against misbranding, the statute was intended to make it possible that the consumer should know that an article purchased was what it purported to be; that it might be bought for what it really was and not upon misrepresentations as to character and quality. As against adulteration, the statute was intended to protect the public health from possible injury by adding to articles of food consumption poisonous and deleterious substances which might render such article injurious to the health of consumers. Where such a purpose has been effected by plain and unambiguous language by an act within the power of Congress, the only duty of the courts is to give the act effect according to its terms. *United States* v. *Lexington Mill & Elevator Co* 577

CONSTRUCTION AND INTERPRETATION—Continued. Page

The purpose of Congress in the enactment of the statute was the better protection of the people of the United States from adulterated or deleterious foods, drugs, medicines, and liquors. It is the duty of the court, in interpreting such statutes, to keep in mind the legislative intent, the evils sought to be overcome, and, if possible, to give substantial force and effect to that intent. *Wm. M. Galt & Co.* v. *United States*---------- 422

In the interpretation of statutes such as the Food and Drugs Act the purposes intended by Congress to be accomplished, the benefits it had in mind, and the evils it sought to remedy, must be borne in mind. *United States* v. *Joslin-Schmidt Co*---------- 881

The act should be given a fair and honest construction for the purpose of accomplishing that for which it was intended. It should not be given a construction or an effect purely theoretical as opposed to a practical construction. *United States* v. *307 Cases Confectionery*---------- 353

It is the duty of the court to give the act a fair and reasonable construction for the accomplishment of its object; that object is the exclusion from interstate commerce of food products so adulterated as to endanger health. *United States* v. *1,950 Boxes of Macaroni et al*---------- 112

Congress by the enactment of the statute intended to promote honesty and fair dealing in trade and secure to the public pure and wholesome food and drugs, and manifestly there must be a reasonable construction of the act to carry out the intention of Congress in this regard. *United States* v. *Buffalo Cold Storage Co*---------- 103

In applying a statute, such as the Food and Drugs Act, to particular facts, and when it becomes necessary to construe language to which the parties give different meanings, it is vital that the court have in mind the essential scope and purpose of the act. *United States* v. *40 Barrels and 20 Kegs of Coca Cola*---------- 606

The act should be construed in the light of its purpose, to secure the purity of food and drugs, and to inform purchasers of what they are buying; and as between the dealer, to whom the purity of food is guaranteed, and the manufacturer, who has the better opportunity of ascertaining the facts, the act throws the ultimate responsibility on the latter, and the act should be interpreted, if reasonably possible, so as to carry out this purpose. *Glaser, Kohn & Co.* v. *United States*---------- 651

Letters of guaranty should receive a liberal, fair, and reasonable interpretation, so as to attain the object for which the instrument is designed and the purpose to which it is applied. Id.

It is a fair and reasonable construction of the act to include within the scope of section 9 relating to guaranty, continuing guaranties as well as those given at the time of sale of and in reference to specific goods. Id.

It is especially necessary, in administering a statute like the Food and Drugs Act, that there should be reasonable definiteness and accuracy, not only in the statement of offenses against the act, but in conceptions of what is and what is not within the intent of Congress. In the administration of such an act it is particularly essential that it should not be given forced or strained construction. *United States* v. *650 Cases of Tomato Catsup*------ 31

Technical rules of construction must give way to the avowed purpose and intention of the act. If it be that an act admits of more than one construction, then that one will be adopted which best serves to carry out the purpose of the act. The rule of ejusdem generis or other technical rule of construction should not be adopted where it limits the scope of the act. *United States* v. *Oriental Dragée Co*---------- 35

The provision of the act, section 7, that confectionery shall be deemed to be adulterated "if it contain terra alba, barytes, talc, chrome yellow, or other mineral substance or poisonous color or flavor, or other ingredient deleterious or detrimental to health, etc.", construed to prohibit the use in confectionery of a mineral substance

CONSTRUCTION AND INTERPRETATION—Continued. Page

irrespective of the presence or absence of any poisonous, deleterious, or detrimental quality of such substance, and although such substance is not of like character or the same class, or ejusdem generis, with the mineral substances specifically enumerated in the provision. *Id.*

The provision of the act, section 7, that confectionery shall be deemed adulterated "if it contain terra alba, barytes, talc, chrome yellow, or other mineral substance or poisonous color or flavor, or other ingredient deleterious or detrimental to health, etc.", must be construed as prohibiting the use in confectionery of all mineral substances of the same nature as those specifically enumerated, including such substances having no poisonous qualities whatever, such as silver. *United States* v. *French Silver Dragée Co*_____ 43
Reversed, *French Silver Dragée Co.* v. *United States*_____ 121

The act, section 7, provides that confectionery shall be deemed adulterated if it contain terra alba, barytes, talc, chrome yellow, or other mineral substance or poisonous color or flavor, or other ingredient deleterious or detrimental to health. *Held* that, since the purpose of the act was to protect the purchaser of food products from having inferior and different articles passed off on him in place of those he desired, and to protect him from injury by prohibiting the addition to foods of substances poisonous or deleterious to health, the words "other mineral substances", under the doctrine of ejusdem generis include other mineral substances which are deleterious or detrimental to health of the same nature as those specifically described preceding such words, and hence did not include a thin coating of pure silver covering candy, used principally by confectioners for decorative purposes, and not deleterious or detrimental to health. *French Silver Dragée Co.* v. *United States*_____ 121

In the provision of the act, section 7, that confectionery shall be deemed to be adulterated "if it contain terra alba, barytes, talc, chrome yellow, or other mineral substance or poisonous color or flavor, or other ingredient deleterious or detrimental to health, or any vinous, malt, or spirituous liquor or compound or narcotic drug", the phrase "or other ingredient deleterious or detrimental to health", is not limited by or restricted to the preceding phrase, "or other mineral substance or poisonous color or flavor", but under said provision there are three distinct and separate general modes of adulteration, namely, (1) by containing "terra alba, barytes, talc, chrome yellow, or other mineral substance or poisonous color or flavor", (2) by containing any "other ingredient deleterious or detrimental to health", or (3) by containing "any vinous, malt, or spirituous liquor or compound or narcotic drug;" and an information alleging that confectionery, commonly called candy, was adulterated in that "it consisted in whole or in part of a filthy, decomposed, or putrid vegetable substance", charges adulteration of confectionery. *United States* v. *Watson-Durand-Kasper Grocery Co*_____ 837

Pure food laws are enacted to protect the public, whose members may be and usually are ignorant of the technical significance which ordinary words may have acquired in particular trades or industries. The true rule of construction with reference to such statutes is that words are to be given their ordinary meaning as understood by the general public. *Libby, McNeill & Libby* v. *United States*___ 540

All the words and terms used in the act should be given their proper and usual signification and effect. *United States* v. *Lexington Mill & Elevator Co*_____ 577
United States v. *95 Barrels, More or Less, Alleged Apple Cider Vinegar*_____ 1047

The words used in the act must be given their ordinary and common meaning in the absence of something to demand a special definition. *United States* v. *Sweet Valley Wine Co*_____ 468

The act was framed in ordinary language which any man of reasonable education can understand, and this is to govern in construing

CONSTRUCTION AND INTERPRETATION—Continued. Page

words used in the act, such is "filthy", "decomposed", and "putrid" (sec. 7). Said words are to be given their ordinary meanings and not their scientific meanings or definitions. *United States* v. *350 Bags of Shell Peanuts* 685

The statute, like a written instrument, is to be construed by its express terms, from its four corners. In case of doubt and ambiguity the journals of Congress may be examined for the intent of the lawmakers to ascertain facts of which such journals are evidence. The act, however, is not so obscure as not to be susceptible of interpretation without recourse to the journals of Congress. *United States* v. *Dr. J. L. Stephens Co* 305

A construction placed on the act by the Secretary of the Treasury, the Secretary of Agriculture, and the Secretary of Commerce, in the rules and regulations for the enforcement of the act, may be considered by the court, not as controlling on the court by way of construing the act, but as being a reasonable construction which the court may adopt if it sees proper. *United States* v. *Piso Co* 319

Practical and long continued construction of the act by the executive departments charged with its administration and with the duty of making the rules and regulations to carry it out is to be accepted where the statute is doubtful, unless there are cogent and persuasive reasons for rejecting it. *United States* v. *Shreveport Grain & Elevator Co* 1339

The act being highly penal, a district court cannot read into it the imposition of anything which partakes of the nature of punishment, not to be found in the law. *United States* v. *1,590 Cases of Tomato Pulp* 914

CONTAIN:

The word "contain", in the provisions of the act, section 7, that confectionery shall be deemed to be adulterated if it contain terra alba, barytes, talc, chrome yellow, or other mineral substance or poisonous color or flavor, or other ingredient deleterious or detrimental to health, is used in a general and not in a restricted sense, and confectionery may "contain" any of the prohibited substances if they are used as a compound, a filler, a flavor, a pigment to color it internally or externally, a coating, or other similar purpose, especially if purposely used for those or other similar purposes, even in minute quantities. *United States* v. *R. C. Boeckel & Co. et al* 637

It appears from the legislative history of the act of August 23, 1912, amending the Food and Drugs Act, section 8, that the word "contain" was inserted in the amendment to hit precisely the case of circulars or printed matter placed inside the package. *Seven Cases of Eckman's Alterative* v. *United States* 707

Where packages of a so-called remedy for contagious abortion in cattle were so wrapped that the printed statement "Bowman's Abortion Remedy. This package contains one 9½ pounds treatment of Bowman's Abortion Remedy. Read the directions carefully before administering", and printed directions appeared only upon removal of the wrapping, *held* that said printing and labeling were a branding within the meaning of the phrase, "If the package or label shall bear or contain any statement, etc", in the act, section 8, paragraph 3. *United States* v. *100 Boxes of Bowman's Abortion Remedy* 1187

CORDIAL NON-ALCOHOLIC ROCK & REY.

An article labeled "Cordial Non-Alcoholic Rock & Rey", which was a sirup containing sugar, commercial glucose, prune juice, and artificial coloring matter, *held* to be an article sold under an arbitrary and fanciful name, and not adulterated or misbranded. *United States* v. *Goodman*---------- 484

See Distinctive Name.

CORN MEAL:

Corn meal labeled "Choice water-ground plain meal", *held* misbranded in that it was not ground by a mill operated by the direct application of water power, and because said article was not ground at the Hazel Green Mills as represented on the label. *United States* v. *58 Sacks and 70 Sacks Corn Meal*---------- 322

See Water-Ground Meal.

CORNO HORSE AND MULE FEED:

Where a substance sold under the name "Corno Horse and Mule Feed" was contained in a package labeled "Corpo Horse and Mule Feed. Mixture of ground alfalfa, oats, corn, flax, bran, oat, and homing feeds, made by the Corno Mills Co., East St. Louis, Ill.", followed by a guaranteed analysis; *held* that such substance, being a compound and so described on the package, was not adulterated or misbranded because it contained a quantity of oat hulls mixed and packed therewith in excess of the amount normally present in oat feed consisting of whole ground oats. *United States* v. *One Carload of Corno Horse and Mule Feed*---------- 274

See Distinctive Name.

CORN SIRUP (GLUCOSE):

An article of food composed of molasses and corn sirup, described on the principal label as molasses, but plainly stated on the labeling to be a compound of molasses and corn sirup, *held* not misbranded. *United States* v. *779 Cases of Molasses*---------- 65

An article *held* misbranded in that it was sold as molasses when in fact it was a compound of molasses and commercial glucose. *United States* v. *Hobart et al*---------- 171

An article labeled "Compound: Pure Comb and Strained Honey and Corn Syrup", *held* not misbranded, although the percentage of corn sirup largely exceeded that of strained honey. *United States* v. *Boeckmann*---------- 88

Almond paste *held* not to be adulterated by reason of the presence of 5 percent of glucose (corn sirup). *United States* v. *Heide*---- 325

See Macaroons; Molasses.

CORPORATIONS:

The right of a corporation to be sued only in the district where it has its principal place of business and home office relates to civil actions, and not to prosecutions under the Food and Drugs Act. *United States* v. *J. L. Hopkins & Co*---------- 401

The officers of a corporation which manufactures an adulterated and misbranded food product shipped by its manager in interstate commerce *held* to be subject to prosecution under the act, section 2, where they employed the manager and authorized him to operate the plant and sell the product without restriction, and the previous course of business had been to ship on orders to other States. *United States* v. *Mayfield et al*---------- 90

A corporation maintained a sanitorium in Ohio where patients were treated and from which patients at a distance were treated by correspondence. The president of the corporation, who was also its medical director, had charge of the patients at the sanitorium and of those treated at a distance, and in every case where a patient applied for treatment, either at the sanitorium or from a

CORPORATIONS—Continued. Page

distance, a history of the case was obtained from the patient, a diagnosis was made, and a prescription was prepared by the medical director. *Held*, that the acts of the medical director in prescribing and furnishing medicine to persons in Washington, D. C., were performed for the corporation, and in legal contemplation, by it. *Dr. J. L. Stephens Co.* v. *United States*---------- 471

One who, as officer, agent, or manager of a corporation, makes or causes to be made an interstate shipment of a misbranded drug, is equally liable under the act as if he was the owner of the article or made the shipment for his own profit. *United States* v. *Kellett*_ 711

A corporation is liable for violation of the act committed by its officers, agents, or employees acting within the scope of their authority or employment. *United States* v. *Trinidad Creamery Co*_ 1152

In a proceeding against a proprietary medicine for misbranding by alleged false and fraudulent representations as to curative or therapeutic effects, where the proprietor and claimant was a corporation, *held* that the jury, in determining whether the representations, if found to be untrue, i. e., false, were also fraudulent, must look to the knowledge or lack of knowledge of claimant corporation's several officers who acted in making such false representations; and that in the event the jury find that any one of such officers who, acting within the scope of his official authority had a substantial part in making the false representations, had knowledge of their falsity or did not honestly believe them to be true, then the jury might find that claimant corporation acted fraudulently and that the representations were both false and fraudulent; and that it is not a sufficient defense that one or more of such officers had an honest opinion that the false representations were true. *United States* v. *17 Bottles, Etc., of An Article Labeled In Part "B. & M."*__ 1287

See Agents; Jurisdiction.

COSTS:

In proceedings in rem under section 10 of the act the court has jurisdiction to enter personal judgment for costs against the claimant. *United States* v. *50 Cans of Preserved Whole Eggs*-------- 74
Affirmed, *Hipolite Egg Co.* v. *United States*---------- 223

Costs in personam may be assessed against the claimant in proceedings in rem under section 10 of the act, even if the principles of admiralty law are made applicable by the provision of that section that the proceedings shall conform as near as may be to the proceedings in admiralty. *Hipolite Egg Co.* v. *United States*------ 223

In libel proceedings under section 10 of the act, costs, conformably with admiralty practice, are within the discretion of the court, from which no appeal lies, unless perhaps in case of gross abuse of discretion. In no case can costs be adjudged against the United States. *Charles* v. *United States*---------- 189

Under the act, on a libel of an article of food, intervening claimants who did not stipulate to pay costs and expenses, expense of custody having exceeded all money value involved, so that they acquiesced in the Government's securing a decree of destruction, were not subject to decree in personam for costs, despite rule 26 of the Supreme Court. *United States* v. *1,590 Cases of Tomato Pulp*---- 914

Water *held* misbranded in that the package and label contained statements regarding the curative or therapeutic effect of the article with respect to various diseases and ailments, which were false and fraudulent. *United States* v. *36 Bottles of Crab Orchard Mineral Water* 1011

CREAMTHICK:

An article labeled "Creamthick. It is guaranteed to contain no gelatin, gum arabic, egg albumen, or similar article", *held* misbranded in that it contained an article similar to gum arabic, to wit, Indian gum. *United States* v. *Weeks* 485
Affirmed, *Weeks* v. *United States* 613

CREAM VANILLA.

See Fruit Puddine.

CREME DE MENTHE FLAVOR NON-ALCOHOLIC CORDIAL:

An article labeled "Creme de Menthe Flavor Non-Alcoholic Cordial", *held* not to be adulterated or misbranded because it contained added caffeine. *United States* v. *4½ Cases of Creme de Menthe* 1191

CRIME, INFAMOUS:

The act, section 2, prohibits the shipping of adulterated or misbranded food or drugs in interstate commerce, and provides a fine not exceeding $200 on conviction for the first offense, and for each subsequent offense a fine not exceeding $300, or imprisonment not exceeding 1 year, or both, in the discretion of the court. Where, for the commission of an offense the accused may be imprisoned for more than 1 year, the confinement must be in the penitentiary, and constitutes an infamous crime; where the period of imprisonment is for 1 year or less, the confiinement must be in a county jail, and in such case the offense is not an infamous crime. Since imprisonment that may be imposed under section 2 of the act cannot exceed 1 year, violation of that section is not an infamous crime. *United States* v. *J. Lindsay Wells Co* 169

See Indictment; Information; Petty Offense.

CURATIVE.

See Curative and Therapeutic Effects of Drugs.

CURATIVE AND THERAPEUTIC EFFECTS OF DRUGS:

False and misleading statements borne on the package or label of a drug, as to the curative or therapeutic effect of the article, constitute misbranding under the Act. *United States* v. *Harper*---- 11
United States v. *Schuch*---- 209

The definition of misbranding, in section 8 of the act, as including articles of food or drugs "the package or label of which shall bear any statement, design, or device regarding such article, or the ingredients or substances contained therein which shall be false or misleading", is inapplicable to misrepresentations as to curative or remedial effects. *United States* v. *Johnson*---- 85
Affirmed, *United States* v. *Johnson*---- 267
United States v. *American Druggists' Syndicate*---- 250

The section regarding misbranding (section 8) in the act, as originally enacted, was aimed only at false statements as to identity, possibly including strength, quality, and purity, of the article, and not at statements as to its curative effect; and Congress, by the act of August 23, 1912, known as the Sherley Amendment, amended the statute to provide that an article shall be deemed to be misbranded in case of drugs if its package or label bear or contain any statement, etc., regarding the curative or therapeutic effect, which is false and fraudulent. *United States* v. *17 Bottles, Etc., of an Article Labeled in Part "B. and M."*---- 1287
United States v. *539 Boxes and 322 Cartons of Radam's Microbe Killer*---- 511

The words "curative" and "therapeutic", as used in the act, section 8, as amended by act August 23, 1912, have substantially the same meaning. *United States* v. *Pulmonol Chemical Co.*---- 806

The words "curative" and "therapeutic", in the act, section 8, as amended by act August 23, 1912, are practically synonymous. *United States* v. *Abbott Bros. Co*---- 722

In the phrase "curative or therapeutic effect", contained in the act, section 8, as amended by act August 23, 1912, the word "curative" is defined as "relating to, or employed in, the cure of diseases", and the word "therapeutic" is defined as "of, or pertaining to, the healing art." The term "therapeutic", as used in medicine, borders a little more on the realm of experimentation than the word "curative." But as used in the statute, the expression "therapeutic effect" is the effect that might with reason be expected to be pro-

CURATIVE AND THERAPEUTIC EFFECTS OF DRUGS—Continued. Page

duced upon the human system by any given drug. If a drug is represented to have a curative effect, while it might not always cure, it must be a drug that either does cure, or such as is generally recognized and employed in the effort to cure a certain disease or certain diseases; and if it is represented as a cure for certain diseases, when it is not, and is not recognized as a specific or as a remedy for such diseases, then such representation is false. *United States* v. *Eleven Packages of B. & M. External Remedy*---- 1059

The words "therapeutic" and "curative", as used in the act, section 8, as amended by act August 23, 1912, providing that drugs shall be deemed misbranded if the package or label bear or contain any statement, etc., regarding the curative or therapeutic effect of such article which is false and fraudulent, were intended to be given their ordinarily accepted meaning, and while they have a certain meaning to the medical expert, the physician, nevertheless they are a part of the vocabulary of any intelligent person. "Therapeutic" to the medical world means to heal; to make well; to restore to health. The ordinary definitions found in the dictionaries are as follows: "Having healing qualities; curative; alleviative; a medicine efficacious in curing or alleviating disease." The word "curative" is not found in medical dictionaries. The regular dictionaries define the word as "possessing power or tending to cure; relating to the cure of disease; relating to or employed in the cure of disease; tending to cure." In none of the definitions is there a suggestion that the words "therapeutic" or "curative" convey the meaning of absolute cure. *United States* v. *23 7/12 Dozen Bottles, Etc., of An Article of Drugs Labeled In Part "Lee's Save the Baby"*---- 1240

United States v. *9 Packages of Crisp's Tung-Tone et al*---- 1268

"Curative" is defined as an agency possessing power or the tendency to cure. "Therapeutic" is defined as an agency having healing qualities, as an alleviator of a diseased condition. *United States* v. *60 Bottles of Dr. Hermance's Asthma and Hay Fever Medicine*-- 1324

The word "therapeutic", as used in the act, section 8, as amended by act August 23, 1912, means healing or curative properties of any substance to which it may be applied. *United States* v. *Simpson*-- 700

The word "remedy" is defined in Webster's International Dictionary as "that which relieves or cures a disease"; and as "that which is used in any way for the cure or relief of bodily disease; a medicine; also remedial treatment." It cannot, therefore, in a criminal action under the act, charging defendant with falsely and fraudulently misbranding its medicine as a "remedy" for specified diseases, be concluded that defendant used the word "remedy" as synonymous with "cure," nor that the word would be understood by the public to mean cure. *United States* v. *Natura Co*---- 836

The words "remedy" and "cure" should be taken in their ordinary sense, as understood by people in the ordinary walks of life, and not as they are understood by doctors, druggists, and chemists. The word "remedy" in its ordinary and usual meaning, signifies something that cures or alleviates a disease and benefits health. Another recognized definition of "remedy" is something that is curative in tendency only, and not absolutely. The ordinary and usual meaning of the word "curative" is that which cures, a remedy. *United States* v. *A. Skarzynski & Co*---- 860

The word "remedy", as used on the labels, etc., of a proprietary medicine, describing it as a remedy for diseases specified, is to be taken in its common and ordinary meaning—that is to say, in the meaning that would naturally be attributed to it by the public and particularly those persons who would be inclined to purchase and use the medicine if they were suffering, or thought they were suffering, from any of the diseases named. The primary signification of the word "remedy", as defined in Webster's New International Dictionary, is "that which relieves or cures disease; any medicine or application which puts an end to disease and restores health." The word "remedy" does not import a guarantee of a cure, but it

CURATIVE AND THERAPEUTIC EFFECTS OF DRUGS—Continued. Page

does necessarily imply, as used on the medicine, a substantial curative tendency with respect to the diseases mentioned. *United States* v. *17 Bottles, Etc., of An Article Labeled in Part "B. and M."* 1287

The term "remedy" used in connection with drugs claimed to be misbranded by reason of false and fraudulent statements regarding their curative or therapeutic effects, *held* to imply a curative tendency, though not guaranteeing a cure. *Simpson* v. *United States* 832

Averments in a libel under the act, section 8, as amended by Act August 23, 1912, that statements regarding curative or therapeutic effect of a drug, accompanying the article in interstate commerce, were false and fraudulent as stating that the article "has cured" and "will cure" diseases, whereas "in truth and in fact" it would "not cure", and that there were no "medicinal substances nor mixtures known at present" which could be relied upon to effect a cure, are sufficient to sustain the libel. *Seven cases of Eckman's Alterative* v. *United States* 707

In a prosecution for misbranding a medicinal preparation in that statements regarding its curative or therapeutic effect, appearing on the labels, etc., were false and fraudulent, where the evidence of medical experts was that, exept in few cases, drugs or medicines do not work a cure, but are administered for the relief of the patient, *held*, that if the jury find that if the statements made on defendant's preparation in no case assert a curative property for the same, there could be no conviction. *United States* v. *Matusow* 664

The statement on the label of a drug compound, "For kidney and bladder troubles, diabetes, weak and lame backs, rheumatism", *held*, not a statement that the compound is a specific for the cure of the diseases named, but a statement that the compound is recommended to have a therapeutic or curative effect in the treatment of said diseases. The further statement on the label of the compound that it "dissolves gravel" and "regulates bladder trouble in children" is a statement of fact that it will have the effect of dissolving gravel in the human body and it will have the effect of regulating bladder trouble in children. *United States* v. *One Gross Packages of "A Texas Wonder"* 910

A label on mineral water stating that it was "recommended in the treatment of" certain diseases, and containing directions for its use, was susceptible of the construction that it meant that the use of the water in the treatment of such diseases would effect a cure or alleviation. *Bradley* v. *United States* 964

A libel in a proceeding to condemn bottled water, based on the amendment of 1912 to the act, section 8, which, after quoting from the label a long list of ailments for which the water was said to be beneficial, with "healing powers" and a "reliable remedy", declared that the water was capable of producing the therapeutic effects so claimed, stated a case under the statute. *Goodwin et al.* v. *United States* 1107

Statement on the labels of drugs alleged to be misbranded under the act, section 8, as amended by act August 23, 1912, that "we have received many letters from physicians reporting", followed by what was represented to be the substance of such "reports", constituted direct statement or representation that the drugs were of curative or therapeutic value, and would be misbranding under the act, if the drugs were worthless. *United States* v. *John J. Fulton Co.* 1229

A drug mixture alleged to be misbranded in that the labels and packages contained false and fraudulent representations that it contained ingredients effective against certain diseases, *held* not misbranded, where the evidence showed that the ingredients of the mixture had curative or therapeutic value in the treatment of such diseases. *United States* v. *23 7/12 Dozen Bottles, Etc., of An Article of Drugs Labeled "Lee's Save The Baby"* 1240

See Circulars, Pamphlets, Booklets, Etc.; Constitutionality of the Food and Drugs Act; Evidence; False and Fraudulent; Knowledge and Intent; Label; Misbranding.

DAMAGE OR INFERIORITY: Page

In the provision of the act, section 7, that an article of food shall be deemed adulterated if it be mixed, colored, etc., whereby its damage or inferiority is concealed, the use of the word "damage" in connection with the word "inferiority" is significant. The word "damage" in this connection means that an ingredient has suffered loss of strength or quality. The word "inferiority" means that an ingredient is of low grade or quality. *United States* v. *10 Cases, More or Less, Bred Spred, Etc., et al*---------- 1262

See Colored; Mixed.

DAMIANA:

An article labeled "Damiana Nerve Invigorator", held misbranded because it contained little or no damiana. *Steinhardt Bros. & Co.* v. *United States*---------- 327

DANGEROUS TO HEALTH:

It is not necessary that an article of food, in order to be unlawfully adulterated or misbranded within the act, be dangerous to the public. *United States* v. *Krumm*---------- 993

See Added Poisonous and Added Deleterious Ingredients; Adulteration; Confectionery; Injurious to Health; Misbranding.

DEBATES IN CONGRESS:

Debates in Congress considered by the court in arriving at the intent of Congress in the act. *United States* v. *Johnson*---------- 85

United States v. *Buffalo Cold Storage Co*---------- 103

United States v. *Dr. J. L. Stephens Co*---------- 305

United States v. *150 Cases of Fruit Puddine*---------- 557

United States v. *Lexington Mill & Elevator Co*---------- 577

See Congress, Journals of; Congressional Committee Reports; Construction and Interpretation; Legislative History of the Act.

DECOMPOSED:

See Filthy, Decomposed, and Putrid.

DEFENSES:

In a libel proceeding for forfeiture of distilled spirits alleged to be misbranded, it is no defense that the brand was placed upon the packages containing such liquor by the United States gauger upon information received from the distiller in accordance with the usual practice, or that the same kind of liquor had for a number of years been so branded and sold under such brand to the knowledge of the agents and officers of the United States. *United States* v. *50 Barrels of Whiskey*---------- 22

It is no defense to a charge of shipping sirup misbranded as to measure of contents of the can, that the cans were filled while the sirup was hot and the shortage in measure was caused by shrinkage on cooling. If the can were short in measure at the time they were shipped, then the sirup was misbranded. *United States* v. *Scudder Syrup Co*---------- 461

It is no defense to a prosecution for shipping an adulterated article of food that the article was not shipped for sale, where the shipment was for any purpose which constitutes interstate commerce. *Philadelphia Pickling Co.* v. *United States*---------- 451

Where decomposed canned eggs, which were not denatured and therefore could have been used either for food or tanning purposes, were shipped in interstate commerce from one warehouse of the owner to another, they constituted an adulterated article of food within the definition and meaning of the act, and it was no defense to a proceeding to condemn them that the owner intended that they should be sold only for tanning purposes.--*United States* v. *13 Crates of Frozen Eggs*---------- 531

Affirmed, *United States* v. *13 Crates of Frozen Eggs*---------- 605

That a defendant ceased the use of labels on packages containing food which were misleading as to quantity of contents went only to the question of mitigation. *United States* v. *Rigney & Co*---- 632

See Estoppel; Guaranty; Knowledge and Intent; Res Judicata; Sale.

DELEGATION OF LEGISLATIVE POWER. Page

See Constitutionality of the Food and Drugs Act; Executive Officers; Pharmacopoeia; Regulations.

DELETERIOUS:

The term "deleterious", as used in the act, means hurtful, harmful, tending to destroy. *United States* v. *One Pound Can Coal-Tar Color*---- 1019

See Added Poisonous and Added Deleterious Ingredients; Dangerous to Health; Injurious to Health.

DELETERIOUS INGREDIENTS.

See Added Poisonous and Added Deleterious Ingredients.

DELETERIOUS TO HEALTH.

See Added Poisonous and Added Deleterious Ingredients; Confectionery; Dangerous to Health; Injurious to Health.

DELIVERY FOR SHIPMENT.

See Shipment.

DEPOSITIONS AND INTERROGATORIES:

In a proceeding to condemn drugs under the act, *held* that the testimony of Government witnesses, taken either by depositions, or by interrogatories, notice thereof having been duly given by the Government, was, under the statutory provision for the taking of testimony of persons residing over 100 miles from the place of trial by means of depositions and interrogatories, admissible in evidence. *United States* v. *Nine Packages of Crisp's Tung-Tone et al*---- 1268

DERIVATIVES:

In addition to the trade names of the derivatives of the drugs mentioned in section 8 of the act, in the case of drugs, paragraph 2, the names of the parent substances of such derivatives must also be stated on the labels of medicines in which they are contained. *United States* v. *Antikamnia Chemical Co*---- 552

Reversing *United States* v. *Antikamnia Chemical Co*---- 260

See Acetanilid; Regulations.

DESIGNS AND DEVICES:

The act was intended to reach all forms of misrepresentations by misbranding by the use of words, or by the use of designs or devices, pictures, etc., calculated to mislead and deceive, cheat, or defraud the purchasers. Designs and devices on bottles of imitation champagne which give them the appearance of bottles of genuine imported champagne, *held* misleading and deceptive and to constitute misbranding. *United States* v. *5 Cases of Champagne*---- 503

An indictment for misbranding of a domestic product as a known Rhine wine by means of a device representing a German village, *held* to be sufficient. More particular description of the picture *held* unnecessary. *United States* v. *Sweet Valley Wine Co*---- 468

See Label; False and Misleading; False and Fraudulent.

DIGESTER TANKAGE:

An article labeled "Digester Tankage" *held* misbranded because the label represented that it contained 60 to 70 percent of protein, when in fact it contained only 43 to 45 percent of protein. *United States* v. *Swift & Co*---- 717

DISTINCTIVE NAME:

A distinctive name is either one so arbitrary or fanciful as to clearly distinguish the article to which it is applied from all other things, or one which by common use has come to mean a substance clearly distinguishable by the public from everything else. *United States* v. *300 Cases of Mapleine*---- 39

DISTINCTIVE NAME—Continued. Page

A "distinctive name" may of course be purely arbitrary or fanciful, and thus being the trade description of the particular thing, may satisfy the statute, provided the name has not already been appropriated for something else so that its use would tend to deceive. *United States* v. *Coca Cola Co*---------- 741
United States v. *24⅞ Gallons of Smack*---------- 1181

While a distinctive name may be purely arbitrary it must be one that distinguishes the article; and where more than one name, each descriptive of an article, are united, it amounts to misbranding if the article does not contain any of the articles generally known individually by any of such names. *United States* v. *Coca Cola Co*---------- 741

A distinctive name is one ordinarily used to distinguish clearly it or the article to which it is applied from all others, or one which has become generally recognized by the public as meaning something different from any other article. The term "Maple Flavo" *held* not to be a distinctive name of an article made in imitation of a maple product. *United States* v. *S. Gumpert et al*---------- 182

Even though an article of food is sold under its own distinctive name, it is misbranded within the meaning of the act if the label contains a false statement regarding the ingredients of the article. *United States* v. *American Chicle Co*---------- 362
United States v. *Weeks*---------- 485
United States v. *150 Cases of Fruit Puddine*---------- 557
United States v. *40 Barrels and 20 Kegs of Coca-Cola*---------- 239

The proviso of the fourth subsection of section 8 of the act, providing that an article of food which does not contain any added poisonous or deleterious ingredients shall not be deemed adulterated or misbranded in case of mixtures or compounds known as articles of food under their own distinctive names, and not an imitation of or offered for sale under the name of another article, etc., goes only to the branding or the name of the article, and does not furnish a refuge for one who has on the label otherwise fasely stated the nature of the contents of the package. *United States* v. *Newton Tea & Spice Co*---------- 950

The proviso of the act, section 8, that an article of food which does not contain any added poisonous or deleterious ingredients shall not be deemed to be adulterated or misbranded in the case of mixtures or compounds known as articles of food, under their own distinctive names, and not an imitation of or offered for sale under the distinctive name of another article, etc., does not apply to a case where the charge is misbranding, and is not directed against the name, but against false statements on the label. *Newton Tea & Spice Co.* v. *United States*---------- 1089

The clause "if it be an imitation of or offered for sale under the distinctive name of another article", in the act, section 8, declaring food in such case misbranded, deals, first, with imitations, that is, things patterned after, or a copy of, or made in simulation of, another article, and, as such, offered or put out as genuine; second, articles, whatever they may be, whether imitations or not, which are put out under the distinctive name of another article. The statute condemns the use of means to arouse the belief that one thing is really another. *United States* v. *24⅞ Gallons of Smack*---------- 1181

It is not sufficient to remove an imitation and misbranded article from the condemnation of the act that it has a distinctive name applied to it, as the very language of the proviso of section 8 requires that if known under its own distinctive name it, the article, must not be either an imitation of another article or offered for sale under the distinctive name of another article. Ordinary, cheap, low-grade, carbonated white wine contained in bottles in shape, dress, corking, and label closely imitating the ordinary genuine champagne bottle, but without the word "champagne", and shipped to fulfill an order for champagne, *held* to be an article sold

DISTINCTIVE NAME—Continued. Page

under the distinctive name and an imitation of another article, champagne, and hence not within the said proviso. *United States* v. *5 Cases of Champagne*---- 503

The provision of the act that mixtures or compounds known as articles of food under their own distinctive names shall not be deemed adulterated or misbranded when sold under such name, and not an imitation of another article, does not apply to a case where the name used in its popular meaning is accurately descriptive of another well-known food product. An article of food labeled "Condensed Skimmed Milk", and composed of skimmed milk and cane sugar, *held* not to be a mixture or compound sold under its own distinctive name, where it was shown that condensed skimmed milk unsweetened was also made and sold. *Libby, McNeil & Libby* v. *United States*---- 540

An article consisting of calcium acid phosphate and starch, labeled "C. A. P.", *held* to be a compound sold under its own distinctive name and not adulterated or misbranded within the meaning of the act. *United States* v. *100 Barrels of Calcium Acid Phosphate*- 58

An article labeled "Coca Cola", consisting of a sirup used in the preparation of beverages, *held* to be a compound sold under its own distinctive name, and, the name being accompanied on the label by the name of the manufacturer and the place of manufacture, not adulterated or misbranded. *United States* v. *40 Barrels and 20 Kegs of Coca-Cola*---- 239

Affirmed, *United States* v. *40 Barrels and 20 Kegs of Coca Cola*-- 606

Judgment reversed, *United States* v. *Coca Cola Co*---- 741

An article labeled "Grant's Hygienic Crackers" *held* to be an article sold under its own distinctive name and not misbranded. *United States* v. *Hygienic Health Food Co*---- 259

An article composed of cherries bleached and rendered wholly or partly tasteless, artificially colored red, and packed in liqueur flavored with essence of bitter almond, is not sold under its own distinctive name when labeled "Maraschino Cherries." *United States* v. *Bettman-Johnson Co*---- 299

An article labeled "Pure Milk Chocolate", *held* to be a mixture or compound sold under its own distinctive name and not adulterated or misbranded by reason of the fact that it contained wheat starch, the presence of which was not declared on the label. *United States* v. *Auerbach & Sons*---- 357

The use of the words "Hudson's Extract" on an imitation of vanilla extract, without giving any indication of what the article was composed, constituted misbranding, where there was no proof that the words "Hudson's Extract" had a well-known trade meaning. *Hudson Manufacturing Co.* v. *United States*---- 344

Under the proviso of section 8 of the act, that an article of food which does not contain any added poisonous or deleterious ingredients shall not be deemed to be misbranded in specified cases, a compound sold under the name of Coca Cola, which is the distinctive name of the product of the manufacturer thereof and nothing else, is not misbranded, "Coca" being indicative of one article, "Cola" being indicative of another distinct article, and the combination not being descriptive of any substance or combination known until adopted by the manufacturer, and still unknown as an appellation for any other substance on the market. *United States* v. *40 Barrels and 20 Kegs of Coca Cola*---- 606

A proprietary food product consisting largely of cornstarch was labeled "Fruit Puddine, Fruit Flavored", and with the words "Cream Vanilla" and "Rose Vanilla" to designate the different colors as a trade mark, the product being flavored with vanillin or synthetic vanilla obtained from oil of cloves. *Held:* That the terms "Puddine" and "Fruit Puddine" were distinctive names of the product and did not constitute misbranding; that the first proviso of section 8 of the act was limited to the distinctive name and as so limited the proviso applied to the first paragraph of said section and protected distinctive names from constituting misbranding,

DISTINCTIVE NAME—Continued. Page

and hence the words "Fruit Flavored" on the label, when the article was not fruit flavored, constituted misbranding; and that the words "Cream Vanilla" and "Rose Vanilla" were distinctive names the use of which was protected by the proviso and did not constitute misbranding. *United States* v. *150 Cases of Fruit Puddine*_ 557

In a prosecution for misbranding so-called macaroons, if the jury found that a macaroon, as commonly understood, consists of ground cocoanut, sugar, and the white of eggs, defendant's product containing glucose in addition, and branded "Macaroons", was "an imitation of or offered for sale under the distinctive name of another article", and misbranded within the meaning of the act. *F. B. Washburn & Co.* v. *United States*_____ 654

An article composed of alcohol and citral derived from lemon grass, and an imitation of lemon oil, and labeled "Special Lemon", and represented by the seller's agent to the buyer as pure lemon oil, was misbranded within the meaning of the act, section 8, defining misbranding as offering an article for sale under the distinctive name of another article, though no label describing it as such article was affixed to it. *Weeks* v. *United States*_____ 646

Affirmed, *Weeks* v. *United States*_____ 867

An artificial or intentional mixture of oats containing 23 percent of foreign material, a percentage of which was wild oats, which had been intentionally added, branded "sample grade star oats", *held* misbranded as sold under the distinctive name of another article, to wit, a natural mixture of cultivated and wild oats, even assuming that the wild oat seed is a food, and that such brand was not deceptive, and notwithstanding that, under the Grain Standards Act and regulations thereunder, a natural mixture containing the same ingredients could have been branded "sample grade oats." *United States* v. *154 Sacks of Oats*_____ 1039

Vinegar made from evaporated apples by adding water equivalent to that removed by evaporation, and fermenting the resulting solution, even though it be similar to vinegar produced directly from fresh apple cider and equally wholesome, is not the same thing and a label describing it as "Apple Cider Vinegar Made from Selected Apples" is false and misleading, and the vinegar must be held to be offered for sale under the distinctive name of another article as that name is popularly and commonly understood. *United States* v. *95 Barrels, More or Less, Alleged Apple Cider Vinegar*_____ 1047

Judgment reversed, *Ninety-five Barrels, More or Less, Apple Cider Vinegar* v. *United States*_____ 1079

Judgment C. C. A. reversed, *United States* v. *95 Barrels, More or Less, Alleged Apple Cider Vinegar*_____ 1118

An article labeled "Smack", a manufactured, synthetic concentrate, containing water, sugar, tartaric acid, vanillin, and other ingredients, and used as a base for a beverage resembling grape juice in fluid consistency, color, and taste, *held* to be an article sold under its own distinctive name and not misbranded. The term "Smack", being arbitrary and not at all representative of any other known product, its consistency, ingredients, food, or other qualities, place of manufacture, etc., is distinctive of the particular article within all the positive and negative tests recognized in the administration of the act and its consideration by the courts. *United States* v. *24⅞ Gallons of Smack*_____ 1181

The name "Lee's Save The Baby", used to designate a certain medicinal preparation, *held* a distinctive and not descriptive name. *United States* v. *23 7/12 Dozen Bottles, Etc., of "Lee's Save The Baby"*_____ 1240

An article of food labeled "Bred Spred Strawberry Flavor", *held* not adulterated or misbranded on the ground that the article was not labeled with the distinctive name of another article, to wit, jam, and therefore came within the first proviso of section 8 of the act. *United States* v. *49½ Cases of Bred Spred*_____ 1204

See Added Poisonous and Added Deleterious Ingredients; Adulteration; Compound; Imitation; Misbranding.

DISTRICT OF COLUMBIA: Page

The Food and Drugs Act of June 30, 1906, defining when an article of food shall be deemed to be adulterated within the meaning of the act supersedes and repeals section 3 of the local act of Congress of February 17, 1898 (30 Stat. 246, ch. 25), covering the same subject; and the appropriation in the District of Columbia Appropriation Act of May 18, 1910, to enforce the act of February 17, 1898, merely indicates the intention of Congress to repeal that act only to the extent that it was repugnant to the later act. *District of Columbia* v. *Coburn*---------- 120

See Jurisdiction; Police Court, District of Columbia.

DOBRY'S POSITIVE HOG CURE:

An article labeled "Dobry's Positive Hog Cure" *held* misbranded in that the package bore false and fraudulent statements regarding the curative and therapeutic effects of the article with respect to certain diseases in hogs. *United States* v. *John Dobry Manufacturing Co*---------- 1085

DRUG:

In a prosecution for shipping adulterated turpentine, *held* unnecessary for the Government, in order to convict, to show that the article was intended for use as a drug rather than for mechanical purposes. *United States* v. *Lorick & Lowrance*---------- 202

Where a claimant shipped mineral water under a label representing that it possessed curative or alleviative properties for diseases named he could not deny that it was a drug within the meaning of the act, section 8, subdivision 3, as to misbranding of drugs. *Bradley* v. *United States*---------- 964

Mineral water, not being in its original state, and processes of separation of the constituent drug elements being carried to the extent that the commercial water can no longer be used as a beverage, but only in small quantities or doses as a medicine, is to be classified as a "drug", and not a "food", within the meaning of the act. *Goodwin et al.* v. *United States*---------- 1130

An article recommended on the label for treatment of colds and similar ailments is a "drug" within the definition of the term in the act, section 6. *United States* v. *23 7/12 Dozen Bottles, Etc., of An Article of Drugs Labeled "Lee's Save The Baby"*---------- 1240

An article used as an inhalant for the treatment of head colds *held* to be a "drug" within the definition of the act, section 6. *United States* v. *11 Cartons of Drug Labeled in Part "Vapex"*---------- 1332

See Adulteration; Confectionery; Curative and Therapeutic Effects of Drugs; Election; False and Fraudulent; Food; Knowledge and Intent; Misbranding; Physicians' Prescriptions.

DRUG HABIT CURE:

A drug sold as a cure for drug habit *held* misbranded in that the quantity or proportion of morphine present was not properly declared on the label. *United States* v. *The Richie Co*---------- 286

DUE PROCESS OF LAW.

See Constitutionality of the Food and Drugs Act; Notice and Opportunity to be Heard.

DUTCH TEA RUSK.

See Rusk.

ECONOMY SPECIAL HOG FEED:

An article labeled "Economy Special Hog Feed" *held* misbranded in that the labels contained false and misleading statements as to the percentages of its ingredients. *United States* v. *426 Bags of Economy Special Hog Feed*---------- 1001

EGG FOR CUSTARD:

An article sold as "Egg for Custard" and bearing no label, *held* adulterated because skimmed milk had been substituted in part for the article. *United States* v. *German American Specialty Co.*- 459

EGGS AND EGG PRODUCTS:

Page

A frozen egg product containing added sugar and alleged to consits in whole or in part of a decomposed animal substance, *held*, not adulterated. *United States* v. *443 Cans of Frozen Egg Product*---------- 197
Reversed, *United States* v. *443 Cans of Frozen Egg Product*---- 345
Judgment C. C. A. reversed, *443 Cans of Frozen Egg Product* v. *United States*---------- 416

A frozen egg product *held* to be adulterated in that it contained formaldehyde, an added deleterious ingredient which might render the product injurious to health, and in that the product consisted in whole or in part of a filthy, decomposed, or putrid animal or vegetable substance. *United States* v. *F. E. Rosebrock & Co.*--- 190

Frozen eggs *held* to be adulterated because they were "decomposed and filthy and of a poisonous and deleterious character." *United States* v. *3,000 Pounds of Frozen Eggs*---------- 198

Frozen eggs *held* adulterated in that they consisted in whole or in part of a filthy, decomposed, or putrid animal substance. *United States* v. *Excelsior Baking Co*---------- 501

Decomposed frozen eggs which could have been used either for food or tanning purposes and which had not been denatured or labeled so as to prevent their use as food, *held* to be a "food" within the meaning of the act, and adulterated for the reason that they consisted of a filthy, decomposed, and putrid animal substance. *United States* v. *13 Crates of Frozen Eggs*---------- 531
Affirmed, *United States* v. *13 Crates of Frozen Eggs*---------- 605

Decayed frozen eggs taken from the shell and mixed together are within the prohibition of the act which prohibits the transportation from one State to another of any adulterated food, and the question of intent of either the shipper or the consignee is immaterial. *United States* v. *13 Crates of Frozen Eggs*---------- 605

Where a libel against frozen eggs described them as articles of food, it was not objectionable for failure to allege negation that they were intended for other than food purposes. *United States* v. *300 Cans of Frozen Eggs*---------- 283

Section 10 of the act, authorizing proceedings to forfeit adulterated food transported from one State to another, is applicable to eggs shipped from one State to another, not for resale, but solely to be used as raw material in the manufacture of some other product. *United States* v. *Two Barrels of Desiccated Eggs*---------- 232

Preserved whole eggs containing 2 percent of boric acid, *held* to be adulterated in that they contained an added deleterious ingredient which might render them injurious to health. *United States* v. *50 Cans of Preserved Whole Eggs*---------- 74
Judgment affirmed, *Hipolite Egg Co.* v. *United States*---------- 223

A desiccated egg product containing an excessive number of bacterial organisms, *held* adulterated in that it consisted in whole or in part of a filthy, decomposed, or putrid animal substance. *United States* v. *One Barrel Desiccated Egg Product*---------- 99

Defendant *held* not guilty of a violation of the act in shipping eggs alleged to be adulterated in that they consisted in whole or in part of a filthy, decomposed, and putrid animal substance on the ground that they were so spoiled or decayed as to be unfit for food, where the only evidence of the alleged condition of the eggs at the time of shipment was as to their spoiled or decayed condition 16 and 18 days afterward. *United States* v. *Wilson & Co*---------- 999

Defendant *held* not guilty of a violation of the act in shipping eggs alleged to be adulterated in that they consisted in whole or in part of a filthy, putrid, and decomposed animal substance, where the only evidence bearing on the alleged condition of the eggs at the time of shipment was as to their decomposed condition 12 days afterward. *United States* v. *Blazek*---------- 1074

Defendant *held* not guilty of violation of the act in shipping eggs alleged to be adulterated in that they consisted in whole or in part of a filthy, decomposed, or putrid animal substance, upon conflicting evidence as to whether the eggs were decomposed at the time they were shipped. *United States* v. *Smith*---------- 1173

EGGS AND EGG PRODUCTS—Continued. Page

See Added Poisonous and Added Deleterious Ingredients; Filthy, Decomposed, and Putrid; Food; Tests.

EJUSDEM GENERIS:

To come within the prohibition of the act, section 7, declaring confectionery adulterated "if it contain terra alba, barytes, talc, chrome yellow, or other mineral substance, etc.", a mineral substance need not be ejusdem generis with the substances specifically prohibited by name, or a poisonous substance; it is sufficient if it be a mineral substance. *United States* v. *Oriental Dragée Co*__ 35

In the provision of the act, section 7, declaring confectionery adulterated if it contain terra alba, barytes, chrome yellow, or other mineral substance, etc., the phrase "or other mineral substance" is properly construed to refer only to other mineral substances ejusdem generis with those specifically enumerated. *United States* v. *French Silver Dragée Co*_____ 43

French Silver Dragée Co. v. *United States*_____ 121

In the provision of the act, section 7, that confectionery shall be deemed to be adulterated "if it contain terra alba, barytes, talc, chrome yellow, or other mineral substance or poisonous color or flavor, or other ingredient deleterious or detrimental to health, etc.", the phrase, "or other ingredient deleterious or detrimental to health", is not limited by or restricted to the preceding phrase, "or other mineral substance or poisonous color or flavor." *United States* v. *Watson-Durand-Kasper Grocery Co*_____ 837

Where, upon an issue of misbranding, a drug was described as "a standard and reliable remedy for amenorrhea (suppression of the menses due to colds, ill-health, and other morbid causes)", the language, "other morbid causes", may fairly be construed to mean "other *like* causes", that is to say, other irregularities of the menstrual function of the same general nature as those particularly specified. *Chichester Chemical Co. et al.* v. *United States*____ 1258

See Confectionery; Construction and Interpretation.

ELECTION:

In a prosecution for violation of the act by misbranding, the Government cannot be required to elect between counts, one of which describes the article as a drug and the other of which describes it as a food or drink, where the question is in controversy and the article would be misbranded under the act whether it was a drug or a drink. *Steinhardt Bros. & Co.* v. *United States*_____ 327

In a prosecution of an information charging misbranding of an article in two counts which differed only in that the article was described as a food in one count and as a drug in the other, *held* that whether the article was a food or a drug within the meaning of the act was a question of fact for determination by the jury, and that they could find a verdict of guilty on only one or the other of the two counts. *United States* v. *American Chicle Co*___ 362

ENTRAPMENT:

It is the duty of officers charged with the enforcement of acts of Congress such as the Food and Drugs Act to use whatever means they think most successful in enforcing the act and suppressing what Congress intended to be suppressed; hence, in a prosecution for shipping misbranded drugs, the fact that the shipment was induced by an agent of the Government by means of letters written under an assumed name was immaterial and not to be considered by the jury in arriving at a verdict. *United States* v. *Schuch*____ 209

The fact that the only interstate shipment of a misbranded article by defendants was secretly induced by an agent of the Department of Agriculture is not a defense to a prosecution therefor, the reasons for the action of such agent not appearing. *United States* v. *Morgan et al*_____ 146

EQUITY:

See Injunction; Mandamus.

ESTOPPEL:

Page

In a libel proceeding to forfeit certain misbranded whisky which had been shipped in interstate commerce, *held* to be no defense that the brand was placed on the packages containing such whisky by the United States gauger on information received from the distiller in accordance with the usual practice; or that the same kind of liquor had been for a number of years branded and sold under such brand to the knowledge of the agents and officers of the United States. *United States* v. *50 Barrels of Whisky*---------- 22

Where a certain degree of decomposition of food products was permitted in bulletins published by the Department of Agriculture in the course of the administration of the act, the Government, in a libel proceeding against such food product allegedly decomposed in whole or in part, may not be heard to complain that the product was decomposed within the strict requirement of the statute in such respect, if the degree of decomposition be shown to be within the toleration permitted in such bulletins. *United States* v. *1,246 Cases of Tomato Catsup*---------- 943

The Government is not estopped from maintaining forfeiture proceedings against an intentional mixture of cultivated and wild oats by acts of a licensed inspector in certifying the oats. *United States* v. *154 Sacks of Oats*---------- 1039

See Defenses; Res Judicata.

EVIDENCE:

In a libel proceeding under section 10 of the act against drugs as misbranded under section 8, as amended by act August 23, 1912, in that the labels on the package and containers and a pamphlet contained in the package contained statements regarding the curative or therapeutic effect of the article which were false and fraudulent, *held* that the jury, in determining the issue of misbranding, was not entitled to take into consideration all of the statements contained in the labels or in the pamphlet, but only such statements as were set forth in the libel. *United States* v. *539 Boxes and 322 Cartons of Wm. Radam's Microbe Killer*------ 511

On trial of an information charging misbranding of drugs by false and fraudulent statements regarding curative or therapeutic effects, appearing on the cartons containing the bottles and in a circular inclosed in the carton, where the language charged as falsely and fraudulently used was not all that appeared upon the carton or in the circular, *held* that it was proper for the jury, in determining whether the language especially set out in the information was or was not falsely and fraudulently used, to consider the whole inscription, and to look to any other part of the matter appearing on the carton or in the circular. *United States* v. *Simpson*---------- 700

In a prosecution of an information charging drugs misbranded by false and fraudulent statements regarding the curative or therapeutic effect of the article, *held*, as to such statements contained in a pamphlet inclosed in the package, that the jury should not consider any portion of the pamphlet except such as to which there was evidence tending to show the falsity of a statement regarding the curative or therapeutic effect of the drugs, which was charged in the information to be false and fraudulent. *United States* v. *Matusow*---------- 664

In proceedings on libels seeking condemnation of drug products alleging misbranding under the act, section 8, as amended, in that certain statements regarding their curative or therapeutic effect, appearing on the labels on the packages and containers and in accompanying circulars, were false and fraudulent, where certain words and directions contained on the labels and in the circulars were omitted from the allegations of the libels, *held* that the Government was precluded, by well-accepted rules of pleading and evidence, from complaining of the omitted words, but that, in order to reach a proper conclusion respecting the issues presented, it was proper to consider the labels in their entirety and all that was

EVIDENCE—Continued. Page

contained in the circular, as bearing on the good faith of the manufacturer of the product. *United States* v. *237/12 Dozen Bottles, Etc., of An Article of Drugs Labeled in Part "Lee's Save The Baby"* 1240
United States v. *9 Packages of Crisp's Tung-Tone et al* 1268
United States v. *17 Bottles, Etc., of An Article of Drugs Labeled in Part "B. & M."* 1287
Testimony of Government witnesses in a condemnation proceeding under the act, taken either by deposition or by interrogatory, due notice thereof having been given by the Government, *held* admissible in evidence, under the statutory provision for the taking of testimony of persons residing over 100 miles from the place of trial by means of depositions and interrogatories. *United States* v. *9 Packages of Crisp's Tung-Tone et al* 1268
Testimony by an agent of the Department of Agricultulre that he opened packages of an article of food deposited in the mails for interstate transportation and took therefrom samples for examination, with the consent of the postmaster, but without a search warrant, *held* inadmissible because the agent's act was a violation of the Fourth Amendment of the Constitution. *United States* v. *Myers* 1159
In a prosecution alleging misbranding of defendant's medicinal preparation by false and fraudulent statements regarding its curative or therapeutic effect, evidence as to the good character of the defendant *held* proper for consideration by the jury, particularly on the question of intent to do right; since good character, when thoroughly established, is sufficient of itself, in a proper case, to raise a reasonable doubt. *United States* v. *Haltiwanger-Taylor Drug Co* 822
United States v. *Dr. J. H. McLean Medicine Co* 850
Dr. J. H. McLean Medicine Co. v. *United States* 907
Testimony as to the reputation of defendant for honesty and fair dealing *held* competent in a prosecution under the act, section 8, as amended by act August 23, 1912, for misbranding a shipment of drugs. *United States* v. *Dr. J. H. McLean Medicine Co* 850
In a prosecution for misbranding of an article as labeled and branded so as to deceive and mislead the purchaser, in that sesame oil not made from olives was branded as "Imported Salad Oil", it was error to refuse to permit dealers in salad oil not made from olives to say whether they had ever heard any complaints from purchasers to the effect that they had been misled or deceived. *Von Bremen et al.* v. *United States* 338
In a prosecution charging sesame oil not made from olives, labeled "Imported Salad Oil", was misbranded, it was error to refuse to permit large dealers in such oil to state the understanding of the trade as to the meaning of the words "salad oil." Id.
In a prosecution for misbranding sesame oil as "Imported Salad Oil", it was error to permit the Government to cross-examine defendants' witnesses as to whether they thought the words "salad oil" would be less misleading if the words "pressed from cotton seed", on some of the labels were in larger type, or if the cans had been labeled simply "cotton seed oil." Id.
In a prosecution for adulteration and misbranding of a coloring powder used in food preparations, testimony of a qualified chemist, who had made a quantitative analysis, that the improper proportions of the ingredients lowered the quality and strength of the powder as a coloring substance, *held* competent. *W. B. Wood Manufacturing Co.* v. *United States* 1098
In a prosecution charging adulteration and misbranding of a coloring powder used in food preparations, testimony as to whether it was customary to dilute a certain substance when using it in the manufacture of food colors, was properly excluded. The standard set by the statute is not what is customarily done by manufacturers, but what is properly done by them. Id.

EVIDENCE—Continued. Page

In a libel proceeding against a food product for misbranding, a grocer's testimony that a product consisting of ingredients and proportions found in respondent's product was an imitation of jam, *held* properly excluded. *United States* v. *10 Cases, More or Less, Bred Spred, Etc., et al*---------- 1262

On trial of an information charging misbranding of a medicinal preparation in that the package and label contained statements as to its curative or therapeutic effect which were false and fraudulent, letters or testimonials purporting to have been received by defendant as to the efficacy of the preparation, *held* not competent as proof of the truth of the statements therein, but merely as bearing on the question of defendant's intent, that is, as tending to show defendant's good faith in making the representations charged as false and fraudulent. *United States* v. *Athlophoros Co*---------- 732

In a prosecution for misbranding a shipment of drugs, under section 8 of the act, as amended by act August 23, 1912, testimonials, etc., are admissible on the question of defendant's good faith, without proof of their execution or of the truth of their subject matter, where the officer in charge of defendant's business testified that he relied thereon, but not where no such reliance was asserted. *Dr. J. H. McLean Medicine Co.* v. *United States*---------- 907

In a proceeding to condemn a medicinal preparation for alleged misbranding on the ground that the packages and labels contained false and fraudulent statements regarding its curative or therapeutic effect with respect to certain diseases, *held* that testimonials read to the jury were proper for their consideration only as bearing upon the state of mind and belief of the claimant when he put the statements with the preparation, that is, upon the question whether or not he intended thereby to deceive and defraud, and were not to be considered as proof of the effect of the preparation on the diseases mentioned therein, and that where the authors of such testimonials personally appeared and testified, then it was the testimony of the witness, and not the language of the testimonial, that was competent as bearing upon the truth of the claims of curative or therapeutic effects made for the preparation. *United States* v. *11 Packages of B. & M. External Remedy*---------- 1059

In a proceeding to condemn claimant's drugs as misbranded by alleged false and fraudulent statements regarding their curative or therapeutic effects, letters in the form of testimonials *held* competent evidence as bearing on the question of intent, where it had been shown that they had been received by claimant in due course through the mails and that claimant believed in their genuineness, and that they related to matters in controversy. *United States* v. *9 Packages of Crisp's Tung-Tone et al*---------- 1268

On a libel to condemn pills as misbranded in that a booklet placed in each package contained statements which were false and fraudulent, within the act, section 8, as amended by act August 23, 1912, the exclusion of letters from the owner of the formula to his attorney, written long before the institution of the libel, requesting him to confer with Government officials as to necessary changes in the booklet to make it comply with the law, and requesting the attorney to carefully scan advertising matter so that it would not conflict with existing laws, regulations, or decisions, was error, even though the court permitted letters of counsel in response to the excluded letters to be introduced in evidence, because it was important in protecting the libelee's rights that its good faith in so advertising its pills be tested by motives and actions in preparation thereof, and there was no evidence that the excluded letters were written for any other purpose than an honest desire to obey the law. A manufacturer should, on the issue of good faith in branding patent drugs, be permitted to show he sought advice of counsel who consulted proper Government officers in an effort to bring his advertising matter within the law. *Chichester Chemical Co. et al.* v. *United States*---------- 1258

EVIDENCE—Continued. Page

In a proceeding by libel for condemnation of claimant's drug product for misbranding in that statements borne on the labels of the packages and containers and appearing in an accompanying booklet, regarding the curative or therapeutic effect of the article, were false and fraudulent, papers relating to a similar condemnation proceeding against such product alleged to be similarly misbranded, tried ten years previous, in which there was a verdict for the claimant, admitted in evidence as tending to show claimant's good faith. *United States* v. *17 Bottles, Etc., of An Article of Drugs Labeled in Part "B. & M."* ---------- 1287

In proceedings charging drugs misbranded by false and fraudulent statements regarding their curative or therapeutic effects with respect to specified diseases, ailments, or disorders, testimony of witnesses for the defense that they have used or been treated with the drug with beneficial, remedial, or curative effect as to diseases, ailments, or disorders with which they state they are or have been afflicted, is admissible. *United States* v. *Matusow*-- 664
United States v. *C. M. C. Stewart Sulphur Co*---------- 669
United States v. *Simpson*---------- 700
United States v. *Kellett*---------- 711
United States v. *Abbott Bros. Co*---------- 722
United States v. *60 Dozen Bottles of "A Texas Wonder"*------ 888
United States v. *One Gross Packages of "A Texas Wonder"*---- 910
United States v. *22 Bottles of Crab Orchard Concentrated Mineral Water* ---------- 1055
United States v. *Eleven Packages of B. & M. External Remedy*- 1059
United States v. *17 Bottles, Etc., of An Article of Drugs Labeled in Part "B. & M."*---------- 1287

In a prosecution charging misbranding of certain drugs in that the packages and labels bore and contained statements representing that the article contained ingredients effective for disorders specified, which were false and fraudulent, testimony of medical experts for the Government that the ingredients found upon analysis of the article would not be effective for the disorders named, and that in their opinion there were no drugs which would be so effective, *held* proper for consideration by the jury in determining whether or not the statements were false. *United States* v. *Matusow* ---------- 664

In prosecutions charging a proprietary medicine misbranded in that statements as to its therapeutic effect as to certain diseases and ailments, appearing on the label, etc., were false and fraudulent, testimony of medical experts for the Government, as to the therapeutic effect of the several ingredients contained in the medicine, as disclosed by evidence as to its analysis, and as to the therapeutic effect of such drugs in combination, *held* proper for consideration by the jury in determining whether or not the statements on the label, etc., were false. *C. M. C. Stewart Sulphur Co*------- 669
United States v. *Athlophoros Co*---------- 732

In a prosecution charging misbranding of a proprietary medicine in that the labels and packages bore and contained statements regarding the curative or therapeutic effect of the article with respect to diseases and disorders specified, which were false and fraudulent, testimony of physicians for the Government, that in their opinion, the ingredients found on analysis of the article would not be effective in the treatment of the diseases or disorders named, and that, in their opinion, there was no single combination of substances or drugs that would be effective in the treatment of all the diseases enumerated, *held* proper for consideration by the jury in determining whether or not the statements were false. *United States* v. *Simpson*---------- 700

In a prosecution of an information charging certain medicinal preparations misbranded in that the labels and packages bore and contained statements regarding the curative or therapeutic effects of the articles with respect to certain specified disorders, which were false and fraudulent, testimony of medical experts that, in their opinion, the preparations, and the ingredients thereof found upon

EVIDENCE—Continued. Page

analysis, would not be effective in the treatment of the disorders for which they were stated to be effective and in respect to which it was charged that such statements were false and fraudulent, and that, in their opinion, there were no substances or drugs that would be effective in the treatment of said disorders, *held* proper for consideration by the jury in determining whether or not the statements were false. *United States* v. *Kellett*_____ 711

In a prosecution of an information charging misbranding of a medicinal preparation by false and fraudulent statements regarding its curative or therapeutic effect with respect to specified diseases, testimony of physicians for the Government that, while the ingredients of the preparation possessed curative properties, yet a compound of all of them would not cure, or arrest or retard the progress of, any of the diseases named, *held* proper for consideration by the jury on the question of the falsity of the statements charged. *United States* v. *Dr. J. H. McLean Medicine Co*_____ 850

In a proceeding by libel alleging misbranding of a certain medicinal compound in that the label stating its therapeutic effect with respect to specified diseases was false and fraudulent, testimony of physicians for the Government as to the therapeutic effect of the ingredients of the compound, as disclosed by chemical analysis, would not be effective in the treatment of the diseases named, and that they would probably have no curative effect as to such diseases, and that some of such diseases were in their nature incurable by any known medicine, *held* proper for consideration by the jury upon the question of the alleged falsity of the label. *United States* v. *One Gross Packages of "A Texas Wonder"*_____ 910

On trial of a libel charging misbranding of a medicine by false and fraudulent statements regarding its curative or therapeutic effect with respect to specified diseases, proof by reputable physicians, both upon the nature and character of the diseases named and upon the alleged medicinal properties and effect of the medicine itself, *held* to establish that there was no medicinal treatment which would aid or relieve certain of the diseases named, and that there was no single substance or drug or combination of substances or drugs that could be helpful in the treatment of all forms of the diseases named. *United States* v. *141 Bottles of Drug Products*_____ 931

In a prosecution charging misbranding of drugs as to their curative or therapeutic effects, the testimony of a doctor that preparations analyzed by another witness and shown to him were absolutely worthless and had no food, curative, or medical value, was admissible. *Kar-Ru Chemical Co.* v. *United States*_____ 970

On trial of a libel for forfeiture of a quantity of a certain medicinal preparation on the ground of misbranding by false and fraudulent statements regarding its curative or therapeutic effect with respect to specified diseases, testimony of physicians for the Government, as to the characteristics of certain of the diseases named, as to the treatment recognized among medical men for such diseases, and as to the use of drugs with reference to such diseases, and as to the effect upon the human system of the different substances entering into the composition of the preparation in the case at bar, and that by no possibility could the drugs entering into the composition of said preparation, either singly or in mechanical mixture or chemical compound with the other substances enterng into the composition of such preparation, have the curative or therapeutic effects claimed for the preparation as to some of the diseases named, and that this was the generally recognized opinion of the medical profession, *held* proper for consideration by the jury on the issue of falsity of the statements contained in the label, etc. *United States* v. *Eleven Packages of B. & M. External Remedy*____ 1059

In a prosecution charging misbranding of articles of drugs in that the labels contained statements regarding their curative or therapeutic effects, which were false and fraudulent, the opinions of medical experts are admissible in evidence as bearing on the issue of the falsity of such statements. *United States* v. *Gandara*_____ 984

EVIDENCE—Continued. Page

On the issue of misbranding of mineral water as to curative or therapeutic effects of commercial concentrated mineral water, expert testimony is admissible. The opinion of one learned in the science of chemistry or regularly admitted to the practice of medicine, having knowledge of the drug elements and their efficacy or lack thereof as curative agents, separately or in combination, is competent, regardless of whether witness has had actual experience or observation of the effect of the use of such drugs in the exact form in question. *Goodwin et al.* v. *United States* ---------- 1130

In a proceeding to forfeit drugs as being misbranded under the act, section 8, as amended by act August 23, 1912, testimony by a medical expert that in the opinion of doctors generally such drugs would not have any curative effect, is admissible, over objection that it was opinion evidence. *Eleven Gross Packages, More or Less, of Dr. Williams' Pink Pills* v. *United States* ---------- 752

In a prosecution for misbranding a medicinal preparation under the act, section 8, as amended by act August 23, 1912, testimony of physicians that there was a general agreement as to the therapeutic effect of such a preparation, and what that general medical opinion was, was properly admitted to show the falsity of the statements on the labels, etc., representing the article to be effective for the treatment of disease. The testimony of the physicians as to their individual opinions of the efficacy of the preparation would have been properly rejected, if there had been disclosed a difference of medical opinion on the subject, as a conviction could not properly rest upon an allegation of fraudulent statements when based upon mere matters of opinion on such debatable subjects; but a mere concurrence of such witnesses' opinions with the uniform course of medical opinion was not open to that objection. *Dr. J. H. McLean Medicine Co.* v. *United States* ---------- 907

On a libel to condemn drug products alleging that the label, etc., stating the curative or therapeutic effect of the article with respect to certain ailments were false and fraudulent, falsity of the statement being one of the elements required to be proved, expert evidence was admissible on that issue. On such issue the opinions of persons whose occupations, training, and experience are such as to make them acquainted with the qualities of the ingredients of the article in question is admissible; and it is permissible to prove that those comprising such a class generally regard the ingredients of the article in question as ineffective, singly or in combination, in the treatment of ailments for which the article is claimed to be effective, and would in practice refrain from using it in such treatment because of the futility of doing so. *Hall* v. *United States* ---------- 978

In an action for forfeiture of a quantity of a certain medicinal preparation as misbranded in that the label, etc., contained false and fraudulent statements regarding the curative or therapeutic effect of the article with respect to various diseases, where physicians, qualified as experts, on being asked to give their individual opinions as to the efficacy of the preparation and its effect as a curative upon certain of the diseases, testified that in their opinion it would not be efficacious, *held* that the personal opinion of the witnesses would not, standing alone, be sufficient evidence upon which the jury could reach a conclusion that the statements in the labels, etc., were false, since it is recognized that there is oftentimes a difference of opinion even among medical men, and if the individual opinion of one weighed against the individual opinion of another equally skilled, it could not be said that there was such a balance of probabilities as to permit the jury to determine the issue one way or the other, but when the individual opinion of the witnesses is in accord with the generally recognized opinion of medical men skilled in the profession, such opinions may, as aliquot parts of the crystallized opinion of medical men, be considered in connection with other evidence. *United States* v. *Eleven Packages of B. & M. External Remedy* ---------- 1059

EVIDENCE—Continued.

Page

In a libel proceeding for condemnation of pills for misbranding under the act, section 8, as amended by act August 23, 1912, a physician may testify as to the consensus of medical opinion relative to the therapeutic properties of the ingredients of the pills. *United States* v. *Chichester Chemical Co*---- 1115

The opinion of doctors testifying as experts is evidence of a fact, just as the testimony of an ordinary witness to a fact within his observation is evidence of a fact, and is binding on the jury only insofar as it produces a conviction of the truth or falsity of a certain fact. *United States* v. *American Laboratories*---- 641

In a prosecution for adulteration and misbranding of a coloring powder for use in food preparations, testimony of a qualified chemist, who had made a quantitative analysis, that the proportions of the ingredients found by him in the powder would have the effect of lowering and lessening the quality and strength of the powder as a coloring substance, *held* competent. *W. B. Wood Manufacturing Co.* v. *United States*---- 1002

A statement on the label of an article of food that it is an excellent substitute for eggs, and is to be used for baking and cooking purposes, 1 teaspoonful in place of each egg called for in a recipe, is not a statement of opinion, but one of fact, and is a representation to ordinary purchasers that 1 teaspoonful of the article is substantially equivalent to 1 egg for all the purposes, including nutrition, involved in the use of egg in baking and cooking, and in a prosecution for misbranding evidence of their comparative value is competent. *Newton Tea & Spice Co.* v. *United States*---- 1089

While expert opinion evidence should be received with caution, it is within the province of the jury to determine its weight; and a conviction, sustained by opinion evidence not inherently impossible nor improbable, together with other evidence, will not be disturbed. *Glaser, Kohn & Co.* v. *United States*---- 651

The testimony of expert witnesses as to conclusions with relation to what they believe to be fact is not conclusive upon the jury. While their testimony should be considered by the jury, their conclusions must be based upon facts disclosed by the evidence which would justify the conclusions, and the jury should take into consideration all the facts and determine whether the conclusions are justified by the facts upon which they are predicated. *United States* v. *C. M. C. Stewart Sulphur Co*---- 669

The statements of physicians testifying as experts are merely statements of their opinion, and those opinions are to be considered by the jury as evidence from which they may draw inferences of fact as the testimony warrants. *United States* v. *11 Gross Packages of Dr. Williams' Pink Pills*---- 680

In a prosecution of an information or libel charging drugs misbranded by false and fraudulent statements regarding their curative or therapeutic effects, the jury is not bound to accept as conclusive the opinion of an expert witness as to any fact of the case. *United States* v. *Matusow*---- 664

United States v. *539 Boxes and 322 Cartons of Wm. Radam's Microbe Killer*---- 511

United States v. *C. M. C. Stewart Sulphur Co*---- 669

United States v. *11 Gross Packages of Dr. Williams' Pink Pills*---- 680

United States v. *Athlophoros Co*---- 732

United States v. *Dr. J. H. McLean Medicine Co*---- 850

United States v. *141 Bottles of Drug Products*---- 931

United States v. *Gandara*---- 984

United States v. *36 Bottles of Crab Orchard Mineral Water*---- 1011

United States v. *22 Bottles of Crab Orchard Concentrated Mineral Water*---- 1055

United States v. *Eleven Parkages of B. & M. External Remedy*---- 1059

United States v. *17 Bottles, Etc., of An Article of Drugs Labeled in Part "B. & M."*---- 1287

EVIDENCE—Continued. Page

The jury is not necessarily bound by the testimony of expert witnesses, but such testimony should be considered in connection with all other evidence in the case. *United States* v. *Athlophoros Co*__ 732

Opinion evidence is not binding upon the jury, but is to be given consideration in connection with other evidence in the case. *United States* v. *36 Bottles of Crab Orchard Mineral Water*_____ 1011

United States v. *22 Bottles of Crab Orchard Concentrated Mineral Water* _____ 1055

In a prosecution for misbranding drugs, under the act, section 8, as amended by act of August 23, 1912, testimony of medical experts, admissible to aid the court in determining the curative or therapeutic effect of the article, is not conclusive though uncontradicted. *United States* v. *Dr. J. H. McLean Medicine Co*_____ 850

In a prosecution charging adulteration and misbranding of coloring materials for use in food preparations, *held* that the testimony of persons learned in the science of chemistry as to their expert opinions relative to matters within the scope and range of that science, was competent, but such opinions were not to be considered by the jury as binding, but as advisory only. *United States* v. *W. B. Wood Manufacturing Co*_____ 1002

In a proceeding by libel for condemnation of an article of food as adulterated and misbranded, *held* that the testimony of experts having knowledge of the science of chemistry as to their opinions is competent for consideration by the jury, though such testimony is not binding upon them, but merely to assist them in reaching their conclusions. *United States* v. *4½ cases of Crème de Menthe*_ 1191

See Burden of Proof; Criminal Cases; Curative and Therapeutic Effects of Drugs; Depositions and Interrogatories; Entrapment; False and Fraudulent; Filthy; Decomposed, and Putrid; Judicial Notice; Knowledge and Intent;; Reasonable Doubt; Samples; Search Warrant; Standards.

EXAMINATION:

The examination provided for by section 4 of the act *held* to be a necessary condition precedent to proceedings under the act, instituted at the instance of the Department of Agriculture, whether such proceedings are *in personam* or for a forfeiture of goods under section 10. *United States* v. *74 Cases of Grape Juice*_ 144

Affirmed, *United States* v. *74 (or 20) Cases of Grape Juice*____ 256

United States v. *Certain Cans of Syrup*_____ 328

United States v. *Mohn Wine Co*_____ 316

A preliminary examination by the Department of Agriculture, as provided for by section 4 or the act, *held* not to be a necessary condition precedent to the filing of a libel *in rem* for condemnation under section 10. *United States* v. *50 Barrels of Whiskey*_____ 22

United States v. *65 Casks of Liquid Extracts*_____ 47

Section 4 of the act, providing for preliminary examination by the Department of Agriculture for alleged adulteration or misbranding of food or drug products, does not apply to a libel for forfeiture under section 10 which provides for a hearing in court in accordance with proceedings in admiralty; so that a preliminary examination before the Department of Agriculture is not a necessary condition precedent to the maintenance of a libel for condemnation of such product. *United States* v. *Nine Barrels of Olives*__ 128

The findings and conclusions of officers of the Department of Agriculture with respect to adulteration or misbranding of foods or drugs, under section 4 of the act, are merely tentative and have no binding or obligatory force in themselves. They are merely the the assertion of an opinion that the law has been violated and that proceedings in the name of the United States as directed by the statute should be instituted for the violation. *National Remedy Co.* v. *Hyde, Secretary of Agriculture, et al* _____ 1272

See Analysis; Investigation; Notice and Opportunity to be Heard; Samples; Tests.

EXECUTIVE OFFICERS:

Page

Congress may delegate to executive officers matters of detail looking to the promulgation of regulations for carrying its statutes into effect, such as providing for the proceedings thereunder, the fixing of standards, brands, and labels, or the ascertainment of necessary facts upon which the law may operate. *United States* v. *Antikamnia Chemical Co*---- 260

The authority vested in the Secretaries of Treasury and Agriculture by the act, section 11, to determine whether drugs offered to be imported into the United States are adulterated or misbranded, calls for a finding of facts and exercise of judgment on facts found, and the exercise of such authority will not be reviewed by the courts unless capricious or arbitrary. *Ambruster* v. *Mellon, Secretary of Treasury, et al*---- 1236

See Injunction; Mandamus; Regulations; Standards.

EXPERT OPINION.

See Evidence.

EXPORT ARTICLES:

An article intended for export if "prepared or packed according to the specifications or directions of a foreign purchaser, etc.," is not subject to seizure even though adulterated when judged by the standard for such article in the United States. *Philadelphia Pickling Co.* v. *United States*---- 451

A shipment of dried figs prepared for a foreign purchaser, who processed like fruit to make coffee flavoring, *held* not subject to seizure under the act, although the shipment contained deleterious matter and the law of the purchaser's country prohibited use of impure materials in coffee admixtures, since a certificate introduced showing such law, could not have the effect to put the shipper out of the class excepted in section 2 of the act, for the purchaser, on receiving the figs, might free them from all deleterious matter before converting them into coffee flavoring, or he might divert them to other proper uses, and, in absence of evidence to the contrary, it would be assumed that he would comply with the law of his country. *United States* v. *Catz American Co. Inc*---- 1282

FALSE AND FRAUDULENT:

The phrase "false and fraudulent" in the act, section 8, which, as amended by act August 23, 1912, provides that drugs shall be deemed to be misbranded if the package or label shall bear or contain any statement, design, or device regarding the curative or therapeutic effect of such article, which is false and fraudulent, must be taken with its accepted legal meaning, and thus it must be found that the statement contained in the package was put there to accompany the goods with actual intent to deceive, an intent which may be derived from the facts and circumstances, but which must be established. *Seven Cases of Eckman's Alterative* v. *United States*---- 707

United States v. *Athlophoros Co*---- 732

United States v. *Dr. J. H. McLean Medicine Co*---- 850

Dr. J. H. McLean Medicine Co. v. *United States*---- 907

United States v. *17 Bottles, Etc., of An Article of Drugs Labeled in Part "B. & M."*---- 1287

FALSE AND FRAUDULENT—Continued. Page

That false and fraudulent representations may be made with respect to the curative effect of substances is obvious. It is said that the owner has the right to give his views regarding the effect of his drugs. But state of mind is itself a fact and may be a material fact, and false and fraudulent representations may be made about it; and persons who make or deal in substances, or compositions, alleged to be curative, are in a position to have superior knowledge and may be held to good faith in their statements. *Seven Cases of Eckman's Alterative* v. *United States* ---- 707
United States v. *Athlophoros Co* ---- 732
United States v. *Dr. J. H. McLean Medicine Co* ---- 850
United States v. *A. Skarzynski & Co* ---- 860
United States v. *141 Bottles of Drug Products* ---- 931
United States v. *17 Bottles, Etc., of An Article of Drugs Labeled in Part "B. & M."* ---- 1287

The expression "false and fraudulent", in the act, section 8, as amended by act August 23, 1912, has a well-defined meaning in the criminal law. The word "false" means untruthful in its ordinary sense. The word "fraudulent", as used in the statute and in an allegation in an information charging defendant with misbranding a medicinal preparation by statements regarding its curative or therapeutic effects which were false and fraudulent, is given its legal meaning, and that is that the defendant deliberately planned, and it was its purpose and intent, to deceive the public; in other words, that it made such false statements regarding the curative or therapeutic effect of its preparation, well knowing that the preparation contained nothing in its ingredients which could operate beneficially as a remedy for the various ailments it pretended to benefit, and this for the sole purpose of deceiving the public. *United States* v. *Athlophoros Co* ---- 732

In order to come within the act, section 8, as amended by act August 23, 1912, providing that drugs shall be deemed misbranded if the package or label bear or contain any statement, etc., regarding the curative or therapeutic effect of such article, which is false and fraudulent, the statement must be found to be both false and fraudulent. *United States* v. *Matusow* ---- 664

(*m*) That the statement was made recklessly and without knowledge of the truth. *United States* v. *C. M. C. Stewart Sulphur Co* 669
United States v. *Abbott Bros. Co* 722
(*n*) That the person making the statement did so carelessly and recklessly without sufficiently apprising himself of the true facts. *United States* v. *A. Skarzynski & Co* 860
(*o*) That the statement was made in reckless disregard of the truth which could have been ascertained upon reasonable inquiry from authoritative and reliable sources. *United States* v. *17 Bottles, Etc., of An Article of Drugs Labeled in Part "B. & M."* 1287
(*p*) That the person making the statement knew that he did not know that the statement was true. *United States* v. *Long* 989
(*q*) That the person making the statement did not act as honest, fair-minded, average person would act under like circumstances. *United States* v. *C. M. C. Stewart Sulphur Co* 669
United States v. *Athlophoros Co* 732
A fraudulent statement is a statement which is recklessly made without knowledge of its truth, but which is really false, and an unqualified statement of that which one does not know to be true, or has no reasonable ground to believe to be true, is equivalent to a statement of that which one knows to be false. *United States* v. *C. M. C. Stewart Sulphur Co* 669
United States v. *Athlophoros Co* 732

FALSE AND FRAUDULENT—Continued. Page

One who makes a false statement, not knowing whether it is false or true, is as guilty of wrong as one who makes a false statement knowing it to be false. *United States* v. *Dr. J. H. McLean Medicine Co*---- 850
Reversed, *Dr. J. H. McLean Medicine Co.* v. *United States*---- 907

In a prosecution under the act, section 8, as amended by act August 23, 1912, for misbranding drugs, an actual intent to deceive, which may be inferred from the circumstances, is essential to conviction, so an instruction that one who makes a statement, not knowing whether it is false, is as guilty as one knowingly making a false statement, was erroneous. *Dr. J. H. McLean Medicine Co.* v. *United States*---- 907

In a proceeding alleging drugs misbranded by false and fraudulent statements regarding their curative or therapeutic effect with respect to certain diseases and ailments, the word "fraudulent" requires the Government to prove such a state of facts regarding the curative or therapeutic effect of the drug which imply knowledge that the drug will not do the thing asserted in the label, etc.; in other words, it must so show that the drug is worthless as to the curative or therapeutic effect claimed for it upon the diseases or ailments named, or any of them, as to justify an inference of knowledge that the drug was so worthless. *United States* v. *539 Boxes and 322 Cartons of Wm. Radam's Microbe Killer*---- 511
United States v. *Athlophoros Co*---- 732
United States v. *Eleven Packages of B. & M. External Remedy*---- 1059
United States v. *17 Bottles, Etc., of An Article of Drugs Labeled in Part "B. & M."*---- 1287

In a proceeding to condemn a medicinal preparation on the ground that the labels, etc., falsely and fraudulently represented its curative or therapeutic effects, *held* that a verdict for the Government cannot properly rest upon claims of fraudulent statements when such claims are based upon mere matters of opinion on debatable subjects, but it must stand upon a finding that the representation was false in fact, that is, that the preparation was worthless for the use represented, or that such representation was so grossly exaggerated as to be false; and that the evidence as to worthlessness or exaggeration justified an inference of purpose and intent to deceive the public. *United States* v. *11 Packages of B. & M. External Remedy*---- 1059
United States v. *539 Boxes and 322 Cartons of Wm. Radam's Microbe Killer*---- 511
United States v. *Athlophoros Co*---- 732

A finding that a drug product shipped in interstate commerce in bottles contained in cartons, the labels and cartons bearing statements representing that it would be effective in the treatment of certain ailments named, whereas it contained no ingredient which could possibly have any remedial or beneficial effect in the treatment of such ailments, as was known to the shipper, who was the manufacturer, *held* sufficient to justify the conclusion of an actual intent, on the part of the shipper, to deceive purchasers and users of the article, and the further conclusion that the label or package contained a statement regarding the curative or therapeutic effect of the article which was false and fraudulent within the meaning of the act. *Hall* v. *United States*---- 978

Statements regarding the curative or therapeutic effect of an article of drugs, made by the owner in his labels and in a circular accompanying the packages, *held* to be false and fraudulent where the evidence showed that the statements were made knowingly and with intent to deceive. *United States* v. *186 Bottles of Tratamiento Zendejas*---- 998

A libel for condemnation of a drug, alleging that false and fraudulent statements regarding its curative or therapeutic effect were applied to the article knowingly or in reckless or wanton disregard of their truth or falsity, *held* sufficient as alleging that the statements were fraudulent within the act, section 8, as amended by act August 23, 1912, since the accepted legal meaning of the term "fraudulent" includes false statements made in reckless and

FALSE AND FRAUDULENT—Continued. Page

wanton disregard of their truth or falsity. *United States* v. *17 Bottles, Etc., of An Article of Drugs Labeled in Part "B. & M."* 1287

On a libel to condemn packages of pills for misbranding under the act, section 8, as amended, refusal of a request to instruct that persons who deal in compositions alleged to be curative are in a position to have superior knowledge, and if the statements in their booklet are false the jury may infer that they are fraudulently made, *held* proper. *United States* v. *Chichester Chemical Co* 1115

An information charging a shipment of an article of drugs misbranded in that the packages and an accompanying circular contained false and fraudulent statements regarding its curative or therapeutic effects, alleged that the shipment was made by S., the defendant, trading as S.'s Medical Institute, that the name of the article given on the label was S.'s Nerve Compound, and that the representations were false and fraudulent in that they were applied to such article knowingly and in reckless and wanton disregard of their truth or falsity. *Held*, that the information sufficiently showed that it was defendant's knowledge and defendant's wanton and reckless disregard of the truth that was intended to be charged, and sufficiently charged the alleged false and fraudulent character of the statements made. *Simpson* v. *United States* 832

In a prosecution charging misbranding of drugs under the act, as amended by act August 23, 1912, declaring drugs misbranded if the package or label shall bear or contain any statement regarding the curative or therapeutic effect of such article which is false and fraudulent, it is not necessary for the Government to prove or even introduce any evidence tending to prove that any particular person has been defrauded. The prohibited misbranding constitutes the crime, and not the fact that some particular person had been deceived. *United States* v. *John Dobry Manufacturing Co* 1085

On the issue of misbranding of drugs, under the act, section 8, as amended, declaring drugs misbranded if the package or label bear or contain any statement, etc., regarding the curative or therapeutic effect of such article which is false and fraudulent, the opinions of physicians and others qualified to testify as experts with regard to the curative or therapeutic effects of drugs, are competent as bearing on the question whether the claims made for the drugs are true or false. *United States* v. *Matusow* 664

United States v. *Eleven Gross Packages of Dr. Williams' Pink Pills* 680

United States v. *Kellett* 711

Goodwin et al. v. *United States* 1130

United States v. *17 Bottles, Etc., of an Article of Drugs Labeled in Part "B. & M."* 1287

On a charge in an information that statements regarding the curative or therapeutic effect of an article of drugs, appearing on the cartons containing the article and in an inclosed circular, were false and fraudulent, where the language set out and charged in the information as falsely and fraudulently used was not all that appeared on the carton or in the circular, *held* that it was proper for the jury, in determining whether the language especially set out in the information was or was not falsely and fraudulently used, to consider the whole inscription, and to look to any other part of the matter appearing on the carton or in the circular. *United States* v. *Simpson* 700

FALSE AND FRAUDULENT—Continued. Page

In proceedings on libels seeking condemnation of drugs on the ground of misbranding under the act, section 8, as amended, in that certain statements regarding the curative or therapeutic effect of the article, appearing on the labels on the package and container and in an accompanying circular, were false and fraudulent, where certain words and directions contained on the labels and in the circular were omitted from the allegation of the libel, *held* that, in order to reach a proper conclusion respecting the issues presented, it was proper to consider the labels in their entirety and all that was contained in the circular, as bearing on the good faith of the manufacturer of the product. *United States* v. *9 Packages of Crisp's Tung-Tone et al*_____ 1268

United States v. *23 7/12 Dozen Bottles, Etc., of An Article of Drugs Labeled in Part "Lee's Save The Baby"*_____ 1240

United States v. *17 Bottles, Etc., of An Article of Drugs Labeled in Part "B & M."*_____ 1287

See Construction and Interpretation; Curative and Therapeutic Effects of Drugs; Evidence; False and Misleading; Knowledge and Intent; Label; Misbranding; Object of the Act; Purpose of the Act.

FALSE AND MISLEADING:

The two words "false" and "misleading", as used in the act, section 8, are of the same import, and one or the other, or both, may be used indifferently. The appropriate meaning of the word "false" is adapted or intended to mislead; and the word "misleading" means tending to lead astray, deceptive. *United States* v. *Lehn & Fink*_____ 229

"False" means, of course, untrue. "Misleading" means calculated to deceive, actually tending to deceive. *United States* v. *Von Bremen et al*_____ 193

A statement regarding an article of food, which appears on the label thereof, constitutes misbranding under the act if it is shown to be either false or misleading; it is not required that it be shown to be both false and misleading. Id.

An article of food is misbranded within the meaning of the act if its label is false or misleading to the ordinary purchaser, even though it is not false or misleading to people in the trade. Id.

In a prosecution charging misbranding of a shipment of drugs, *held* it was unnecessary to show that the label actually misled the consignee, but that it was necessary to show that the label was of such a character as to deceive the consignee; since the drugs were being shipped to men familiar with the trade and the drug business, the question was whether or not the label was of such a character as to be calculated to deceive the ordinary man in the trade. *United States* v. *J. L. Hopkins & Co*_____ 366

It is not necessary, in order to forfeit an article of food as misbranded within the definition of the act in respect to false or misleading statement on the label, that it be found that any person was actually deceived or misled by the label; it is sufficient if it be found that the label is calculated to deceive or mislead in any particular. *United States* v. *300 Cases of Mapleine*_____ 39

In determining whether an article of food is misbranded the question is not whether the brand would deceive jobbers, wholesalers, retailers, and people who trade in such articles, but whether it is liable to deceive the consuming public. *United States* v. *1,459 Cases Canned Salmon*_____ 995

It is not a necessary condition to a finding of guilt, in a prosecution on a charge of misbranding by false or misleading statements, that the statement should be flatly and boldly false, but the word "misleading", in the act, has its function, which is to bring the statement within the inhibition of the statute if it is such as to create or lead to a false impression in the mind of the reader as to the ingredients or composition of the article. *United States* v. *American Laboratories*_____ 641

FALSE AND MISLEADING—Continued. Page

The statute is plain and direct. Its comprehensive terms condemn every statement, design, and device which may mislead or deceive. Deception may result from the use of statements not technically false or which may be literally true. The aim of the statute is to prevent that resulting from indirection and ambiguity, as well as from statements which are false. It is not difficult to choose statements, designs, and devices which will not deceive. Those which are ambiguous and liable to mislead should be read favorably to the accomplishment of the purpose of the act. *United States* v. *95 Barrels, More or Less, Alleged Apple Cider Vinegar*---------- 1118
United States v. *John J. Fulton Co*---------- 1229

A branding which is misleading because of its ambiguity is as much within the inhibition of the statute as if it was misleading in statement. *United States* v. *McIlvaine Bros*---------- 1127

Under the act, section 8, declaring that the term "misbranded" shall apply to drugs the package or label of which shall bear any statement which shall be false and misleading in any particular, a statement regarding a drug cannot be false or misleading unless it relates to some one or more of the various particulars expressly enjoined or prohibited by the act. *United States* v. *American Druggists' Syndicate*---------- 250

See Construction and Interpretation False and Fraudulent; Knowledge and Intent; Label; Misbranding; Object of the Act; Purpose of the Act.

FIGS:

Dried figs prepared for a foreign purchaser who processed like fruit to make coffee flavoring, *held* not subject to seizure under the act, although the shipment contained deleterious matter and the law of the purchaser's country prohibited the use of impure materials in coffee admixtures. *United States* v. *Catz American Co., Inc*---------- 1282

FILTHY, DECOMPOSED, AND PUTRID:

The word "filthy" is capable of a variety of meanings. It is the superlative degree of such a condition as we refer to as "soiled." The word "dirty" might be considered as the comparative degree of the word "soiled", and the word "filthy" as the superlative degree. The scientific definition need not be applied to the word "decomposed", as used in the act. The sense in which "decomposed" is used in the act means that stage which, if carried somewhat further, would bring a particular substance to a state which would properly be called "rotten." *United States* v. *10 Barrels of Olives*---------- 125

The words "filthy", "decomposed", and "putrid", as used in the act, are to be construed by their ordinary meaning, and not by their scientific meaning or definition. "Filthy" is defined as of the nature of or containing filth; dirty; nasty. "Decomposed" is defined as in a state of decomposition; decayed, rotten. "Putrid" is defined as in a state of putrefaction; tainted; as putrid flesh. *United States* v. *350 Bags of Shell Peanuts*---------- 685

In determining whether an article of food consists in whole or in part of a filthy, decomposed, or putrid animal or vegetable substance, within the meaning of the act, the words "filthy", "decomposed", and "putrid" should be considered as used in their common and ordinary meaning and not in a purely technical and scientific sense; that is to say, the word "filthy" is usually considered to mean nasty or dirty, and "decomposed" is usually considered to mean rotten, and "putrid" has a somewhat similar meaning in every-day life—rotten or emitting a vile odor. *United States* v. *720 Cases of Tomato Catsup*---------- 877

It is not necessary to apply any very fine or close or scientific definition of the words "filthy, putrid, or decomposed," as used in the act, section 7, subdivision 6. In plain English these words mean that the substance is rotten; that it is unfit for food for man. *United States* v. *Gidden*---------- 360

FILTHY, DECOMPOSED, AND PUTRID—Continued. Page

The words "filthy, decomposed, and putrid", as used in an information charging that an article of food contained filthy, decomposed and putrid animal substance, mean what they ordinarily imply—putrid, tainted, decomposed, or decayed. *United States* v. *Gorman & Co* 1171

As used in the provision of the act, section 7, that an article of food shall be deemed to be adulterated if it consists in whole or in part of a filthy, decomposed, or putrid animal substance, the word "filthy" means dirty, nasty, unwholesome; "decomposed" means decayed; and "putrid" means a state of putrefaction, tainted, or such a state of decomposition as to be offensive to the smell. *United States* v. *1,600 Cases of Canned Salmon* 1105

In determining the meaning of Congress in the words "filthy", "decomposed", and "putrid", as used in the provision of the act, section 7, subdivision 6, that food shall be deemed to be adulterated if it consists in whole or in part of a filthy, decomposed, or putrid animal or vegetable substance, all of them may be considered. The word "decomposed" was used by Congress in its ordinary sense. This may be implied from consideration of the words with which it is associated. The word "filthy" means something more than merely dirty; the word "decomposed" means something more than filthy, and ordinarily is understood to mean rotten. The word "putrid" implies something that is so rotten that it is vile, or stinks. Decomposition, from a technical standpoint, sets in immediately upon the destruction of life and continues to a greater or less extent. The word "decomposed" must be understood relatively and in its ordinarily accepted sense. The word must be construed in its natural and obvious sense, its general, and not its scientific, definition, and that general definition is that it means rotten. *United States* v. *1,246 Cases of Tomato Catsup* 943

The words "filthy, decomposed, and putrid" are applicable to certain conditions resulting from the presence of living organisms, and the conditions of animal substance known as "filthy, decomposed, and putrid" are caused by the presence of such living organisms. A substance containing bacilli liable to cause disease, to such an extent as to make it dangerous for food purposes, is certainly "filthy", under the meaning of that word as generally used, and especially since the result of investigation has shown that filth or dirtiness is dangerous through the germs which it contains, and not solely because of offense to the senses. Oysters, although shipped unopened as taken from the water, may come within the prohibition of the act, where, by reason of the condition of the waters in which they are grown, they contain harmful bacteria, which renders them "filthy, decomposed, or putrid" and therefore adulterated within section 7, subdivision 6 of the act. *United States* v. *Sprague et al* 508

The word "filthy", as used in the act (sec. 7, subdiv. 6), has its ordinary and usual signification. *United States* v. *Wedell* 771

The word "filthy" means nasty, foul, or dirty. *United States* v. *408 Bushels of Oysters* 718

The word "filthy", as used in the act with reference to food, means what it means in ordinary use, that is, unclean, foul, dirty, and unfit for use by reason of its uncleanly condition. The word "decomposed", as so used in the statute, means decayed or rotten in the ordinary acceptation of these words, and not decomposition as understood scientifically. *United States* v. *1,500 Cases of Tomato Pulp* 892

Horse beans *held* to be "filthy" within the meaning of the act if as much as 25 percent of them contained weevils, larvae, or grubs. *United States* v. *Koshland* 777

In a proceeding to condemn oysters as being filthy, *held* that the jury must find that the oysters contained filth in a substantial amount, not necessarily in such quantity as to be observable to the naked eye, but even though it be observable only with the aid of a microscope. *United States* v. *408 Bushels of Oysters* 718

FILTHY, DECOMPOSED, AND PUTRID—Continued. Page

The presence in flour of a large number of worms, insects, and beetles renders the flour filthy in the general acceptation of the term, and even assuming them to be removable, the flour would by reason of its contact with them still contain more or less husks and excreta and would still be filthy within the meaning of the act. *Wm. M. Galt & Co.* v. *United States*---------- 422

The words "filthy" and "decomposed", in the provision of the act declaring an article of food adulterated if it consists in whole or in part of a filthy or decomposed animal or vegetable substance, are not to be used or considered in a purely technical and scientific sense. They are to be used in a practical, common sense way, and are to relate to a substantial presence of filth or decomposition. "Filthy" is defined as of the nature of or containing filth; dirty; nasty. "Decomposed" is defined in some of the dictionaries as decayed, rotton; and that is the definition of the word for the purposes of the statute. *United States* v. *1,000 Cases of Tomato Puree*---------- 704

In determining whether or not an egg product was decomposed in whole or in part, the word "decomposed" must be given its ordinary signification and not any technical meaning. Such product *held* not in whole or in part decomposed in the ordinary sense of the word. *United States* v. *443 Cans of Frozen Egg Product*-- 197

Judgment reversed, *United States* v. *443 Cans of Frozen Egg Product*---------- 345

Judgment C. C. A. reversed, *443 Cans of Frozen Egg Product* v. *United States*---------- 416

The term "decomposed," as used in the act, section 7, subdivision 6, providing that an article shall be deemed adulterated if it consists in whole or in part of a filthy, decomposed, or putrid animal or vegetable substance, means a state of decomposition, rotten, decayed. *United States* v. *Glaser, Kohn & Co*---------- 601

The word "decomposed", as used in the act, section 7, means more than the beginning of decomposition; it means a state of decomposition. *A. O. Andersen & Co.* v. *United States*---------- 1053

In order to come within the provision of the act that an article of food shall be deemed to be adulterated if it consists in whole or in part of a decomposed animal or vegetable substance, there must be something more than a trace of rottenness in the article; there must be such an amount or such a degree of rottenness as to be definable, measurable, and appreciable. It need not be of any particular degree, but it must be something that can be found substantially in the article. Id.

The word "decomposed" means a state of decomposition, and "decomposition" means the condition of being decayed, putrid, or rotten. The word "putrid" means absolutely rotten and decayed. *United States* v. *1,195 Cases of Canned Salmon*---------- 1099

The word "decomposed", as used in the act (sec. 7, subdiv. 6) means a state of decomposition, and "decomposition" means a condition of being decayed, putrid, or rotten. *Held* that canned salmon, if found to be decomposed within said definition, was adulterated within the meaning of the act, and subject to condemnation. *United States* v. *2,205 Cases of Canned Salmon*---------- 1133

The mere fact that an article of food is decomposed cannot of itself subject it to forfeiture. There are many articles of food which are decomposed, both from a scientific and a lay standpoint, and yet they are commonly eaten, and they are either not known to be harmful or known not to be harmful. If the Food and Drugs Act were to be construed as meaning that any article which was decomposed, irrespective of its effect upon the public health, could be forfeited to the Government, then logically the Government could forfeit many kinds of articles of food, simply because, from the standpoint of a theory, such articles were technically decomposed, whether that word be used scientifically or in the lay language. *United States* v. *350 Bags of Shell Peanuts*---------- 685

FILTHY, DECOMPOSED, AND PUTRID—Continued. Page

The term "decomposed", as it appears in the act, section 7, subdivision 6, is not confined to its technical or scientific definition. Strictly speaking, or scientifically speaking, an article may be said to be decomposed when it is broken down, when it is separated into its constituent elements; but as the term is used in the act that is not the final test. If it were, foods which are produced by the decomposition of some other food substance would be within the ban of the statute. So there must be some other or some additional meaning of the term "decomposed", as it is used in the act; and that meaning is decayed or rotten, as these terms are commonly and ordinarily understood. *United States* v. *1,367 Cases of Pork and Beans* 766

Decomposition begins, in a sense, where life ends, but that is not the sort of decomposition meant by the act, section 7, subdivision 6, declaring food adulterated if it consists in whole or in part of a decomposed animal substance. Decomposition, beginning the moment life ceases, increases by degrees to rottenness, decomposition, and decay. It is necessary, therefore, to give a reasonable construction to the word "decomposed" in order to carry out the intent of the statute. *United States* v. *1,195 Cases of Canned Salmon* 1099

United States v. *2,205 Cases of Canned Salmon* 1133

In a proceeding to condemn canned salmon as adulterated because it consisted in whole or in part of a filthy, decomposed, or putrid animal substance, *held* that the word "decomposed" does not mean the beginning of decomposition, because decomposition sets in whenever life is extinct, and therefore there must be some state after fish is taken out of the water and before it is canned, when it cannot be said that it is decomposed or putrid or filthy or decayed. *United States* v. *1,600 Cases of Salmon* 1105

The word "decomposed", as used in the act, section 7, subdivision 6, does not mean the beginning of decomposition—when life ends—nor does it mean that an article of food shall have reached such an advanced stage of decomposition that it is resolved into its elements; it contemplates a state of decomposition that renders the article unfit for human food. *United States* v. *1,974 Cans of Canned Salmon* 1108

United States v. *2,995 Cases of Canned Salmon* 1136

Decomposition means to break up; to decompose; to resolve into elements. The process of fermentation being a process of decomposition, when fermentation has proceeded far enough an article becomes decomposed. *United States.* v. *One Barrel of Desiccated Egg Product* 99

Taking the word "rotten" as expressing the general idea to which the words "decomposed" and "putrid" may be referred, the word "decomposed" would probably represent a less advanced stage than "putrid." Id.

An article of food which is decomposed to the extent that it is unfit for human food might reasonably be called filthy and deleterious and perhaps in a sense poisonous. *United States* v. *3,000 Pounds of Frozen Eggs* 198

Where a frozen egg product is so near decomposition that exact chemical and thermal precautions are necessary to prevent decomposition, then the product is, as an article of food, so close to the danger line as to excite suspicion and demand the closest judicial scrutiny, before it is allowed to become an article of food consumption. Evidence *held* to require a finding that a frozen egg product was decomposed and therefore adulterated within the act. *United States* v. *443 Cans of Frozen Egg Product* 345

Reversing judgment in *United States* v. *443 Cans of Frozen Egg Product* 197

Judgment reversed, *443 Cans of Frozen Egg Product* v. *United States* 416

FILTHY, DECOMPOSED, AND PUTRID—Continued. Page

Oranges, frozen before shipment, which because of the freezing were undergoing decomposition and would become increasingly unfit for food and less wholesome, *held* to be "decomposed" and adulterated within the meaning of the act, even though they were not harmful if eaten. *United States* v. *462 Boxes of Oranges* 816

The word "decomposed", as used in the act, section 7, declaring food adulterated if it consists in whole or in part of a filthy, decomposed, or putrid animal or vegetable substance, *held*, not applicable to a change in the condition of oranges, caused by frost bite; though there may be a difference of opinion on the point, since undoubtedly the chemical contents of the fruit is changed as the result of frost bite. *United States* v. *315 Boxes of Oranges* 1208

While the act prohibits the interstate shipment of food which consists in whole or in part of decomposed vegetable matter, the Government, in a libel proceeding against certain tomato catsup shipped in interstate commerce, allegedly decomposed in whole or in part, may not be heard to complain that the catsup was decomposed within the strict requirement of the statute if the degree of decomposition be shown within toleration permitted for such food product in bulletins published by the Department of Agriculture in the course of the administration of the act. *United States* v. *1,246 Cases of Tomato Catsup* 943

Provisions of the act prohibiting sale or shipment of adulterated food, defined in part as food containing a "decomposed substance", *held* not invalid because the act fails to definitely specify the extent to which decomposition must have progressed to bring an article within the prohibition. *A. O. Andersen & Co.* v. *United States* 1053

Where, in a proceeding to condemn canned salmon for adulteration as being in whole or in part decomposed, evidence tended to show that, as to salmon, three well-defined degrees of decomposition exist, after life had ceased, described in order as "stale", "tainted", and "putrid", *held* that if the jury found that the evidence fixed such degrees or states of decomposition, they might consider them in determining whether the salmon was adulterated or not, that is to say, whether or not the salmon was "stale", "tainted", or "putrid", in whole or in part; and that if they found that any of these three degrees of decomposition existed, then the verdict should be for the libelant. *United States* v. *2,205 Cases of Canned Salmon* 1133

Canned cherries containing cherries affected with rot, and wormy cherries, *held* adulterated as decomposed within the meaning of the act, but not "filthy" or "putrid." *United States* v. *897 Cases of Canned Cherries* 1183

Eggs may become putrid or decomposed by the simple process of decay and as the resultant or natural causes, but they will not be come filthy unless something is added thereto which renders them dirty, noisome, or nasty. A "putrid" substance is in such a state of decay as to be fetid or stinking from rottenness. *United States* v. *F. E. Rosebrock & Co* 190

An article of food is adulterated within the meaning of the act, section 7, subdivision 6, if it is in a filthy, decomposed, or putrid condition, caused either from an inherent conditon or an external substance; or if it "consists of" or contains filthy, decomposed, or putrid matter; or if it contains a foreign substance which, though neither filthy, decomposed, or putrid in itself, causes the food from contact with it to decompose or become filthy or putrid. Milk containing bacteria, including *Bacillus coli* and *B. streptococci*, *held* adulterated in that it consisted in whole or in part of a filthy, decomposed, or putrid animal and vegetable substance. *Dade* v. *United States* 465

Flour containing worms, insects, and beetles, *held* adulterated in that it consisted in whole or in part of a filthy, decomposed, and putrid animal and vegetable substance. *United States* v. *350 Sacks of "Princess Flour" and 50 Sacks of "Fancy Melba Flour"* 351

Affirmed, *Wm. M. Galt & Co.* v. *United States* 422

FILTHY, DECOMPOSED, AND PUTRID—Continued. Page

A libel for condemnation of tomato catsup, alleging that it was misbranded in that it was made in part from tomato pulp screened from peelings and cores as the "offal" of tomato canning factories, and not from choice ripe tomatoes, etc., as stated in the labels, did not charge a violation of the act, section 7, subdivision 6, relating to preparations consisting in whole or in part of a filthy, decomposed, or putrid animal or vegetable substance; the words "as the offal of tomato canning factories" being of no exact signification, and the word "offal" not the equivalent of a charge that the tomato pulp was a filthy, decomposed, or putrid vegetable substance. *United States* v. *650 Cases of Tomato Catsup* 31

Canned pork and beans *held* to be adulterated and subject to condemnation if some of the beans in the cans were partly rotten or decayed. *United States* v. *1,367 Cases of Pork and Beans* 766

Canned cherries *held* adulterated in that they consisted in whole or in part of a filthy, decomposed, or putrid vegetable substance because of the presence of wormy cherries and of decomposed cherries. *United States* v. *384 Cases of Canned Cherries* 1176

In a prosecution charging defendant with shipping eggs adulterated in that they consisted in whole or in part of a filthy, decomposed, or putrid animal substance, *held* essential to conviction that it be shown that the eggs were at the time of shipment rotten and decomposed to such an extent that they were unfit for food. *United States* v. *Blazek* 1074

In proceedings for condemnation of canned salmon for adulteration in that it consisted in whole or in part of a filthy, decomposed, or putrid animal substance, *held* that the jury, in order to find for the Government, must find that the article was filthy or decomposed or putrid so as to render it unfit for human food. *United States* v. *1,600 Cases of Canned Salmon* 1105

United States v. *1,974 Cases of Canned Salmon* 1108

United States v. *2,995 Cases of Canned Salmon* 1136

If an article of food consists in whole or in part of a filthy or decomposed vegetable substance, it is unnecessary, in order to come within the prohibition of the act in such respect, that such article be shown to be unfit for food. *United States* v. *720 Cases of Tomato Catsup* 877

Eggs released from the shells and frozen, but which by reason of decay had so far decomposed that they were not fit for human food or consumption as such, *held* to be adulterated within the meaning of the act, section 7, in that they consisted in whole or in part of a filthy and decomposed and putrid animal or vegetable substance. *United States* v. *13 Crates of Frozen Eggs* 531

Affirmed, *United States* v. *13 Crates of Frozen Eggs* 605

The provision of the act, section 7, that an article of food shall be deemed adulterated if it consists in whole or in part of a filthy, decomposed, or putrid vegetable substance, does not apply to citrus fruits unfit for consumption because green or immature. *Sligh* v. *Kirkwood* 634

A libel charging that an article of food is adulterated in that it consists in whole or in part of a filthy, decomposed, or putrid vegetable substance, completely and distinctly states an offense under the act, section 7, and an added allegation that the article was "unfit for food" may be regarded as superfluous language; and on a trial of such libel it was unnecessary for the Government to prove that such article was unfit for food. The test of adulteration in such case is not to be determined by the answer to the question whether the article is or is not fit for food. The article is adulterated if it consists in whole or in part of a filthy, decomposed, or putrid substance. *United States* v. *275 Cases Tomato Catsup* 141

In a proceeding to condemn canned salmon as adulterated under the provision of the act that food shall be deemed to be adulterated if it consists in whole or in part of a filthy, decomposed, or putrid animal substance, *held* that it was unnecessary, in order to justify condemnation, that it be shown that the eating of the salmon would

FILTHY, DECOMPOSED, AND PUTRID—Continued. Page

be injurious to the health of the individual, but that it must be shown to be unwholesome to such an extent that it would not satisfy the ordinary requirements of the commercial world. *United States* v. *1,600 Cases of Canned Salmon*---- 1105

In the provision of the act declaring an article of food adulterated if it consists in whole or in part of a decomposed vegetable substance, Congress has made the rule and fixed the standard of adulteration in this respect; and the right of the Government under the act to condemn and forfeit articles of food so adulterated is not limited or restricted to such as are found to be decomposed to such an extent as to render them unfit for food or deleterious to health. In a proceeding to forfeit canned pork and beans on the ground that the product was adulterated in that it consisted in whole or in part of a decomposed vegetable substance, *held* that the question whether or not the product was unfit for food, or would be deleterious to health, if eaten, was not involved in the case. *United States* v. *1,367 Cases of Pork and Beans*---- 766

Under the act, section 7, subdivision 6, an article of food is adulterated and subject to condemnation and forfeiture, if it is composed in whole or in part of a filthy, decomposed, or putrid animal or vegetable substance, and it is not necessary that it be shown to be unfit for food, or deleterious if eaten. *United States* v. *200 Cases, More or Less, of Canned Salmon*---- 1095

The letter of the statute forbids the transportation and sale in interstate commerce of an article of food which consists in whole or in part of a filthy, decomposed, or putrid animal substance. The words used are free and clear from ambiguity, and each has a common, ordinary and well-known meaning. There is nothing in the statute itself which would make the state of edibleness or healthfulness of the article relevant. It is, therefore, improper for the jury, in a proceeding to condemn an article of food as within such prohibition of the statute, to take into consideration any evidence tending to show that the article is fit or unfit for food, or healthful or harmful to health; it makes no difference whether the article is fit for food and healthful or is not. *United States v. 2,205 Cases of Canned Salmon*---- 1133

In a proceeding to forfeit a shipment of peanuts containing moldy or wormy nuts, as adulterated within the meaning of the act, section 7, subdivision 6, where it appeared that not more than 10 percent of the nuts throughout the shipment were moldy or wormy, *held*, that only such of the individual peanuts that were moldy or wormy, or both, as were found to be either filthy or decomposed or putrid, in the ordinary meaning of these words, and, because of such condition, to tend to be injurious to health, were subject to condemnation. *United States* v. *350 Bags of Shell Peanuts*---- 685

In a proceeding for condemnation of a food product as adulterated within the provision of the act, section 7, declaring food adulterated if it consist in whole or in part of a filthy, decomposed, or putrid animal or vegetable substance, proof that the product would be injurious to health is not required. *United States* v. *200 Cases of Adulterated Tomato Catsup*---- 583

A. O. Andersen & Co. v. *United States*---- 1053

United States v. *384 Cases of Canned Cherries*---- 1176

In a proceeding to condemn oysters because they contained filth, *held* that the question whether the oysters were healthful or not was not involved under the act. *United States* v. *408 Bushels of Oysters*- 718

The act prohibits the interstate shipment of food products if they are decomposed, and this prohibition applies without reference to the effect of the decomposition on the health of the consumer. Therefore, in a libel proceeding to condemn as decomposed within the meaning of the statute a food product shipped in interstate commerce, the Government is not required to show that the product was, by reason of the decomposition, injurious to health; if the product is decomposed in the common, ordinary acceptation of the term, it comes within the inhibition of the statute, even if it would have no deleterious effect on the health of the consumer. *United States* v. *1,500 Cases of Tomato Pulp*---- 892

FILTHY, DECOMPOSED, AND PUTRID—Continued. Page

The test to determine whether an article of food is adulterated within the act, section 7, providing that an article of food shall be deemed adulterated if it consists in whole or in part of a filthy, decomposed, or putrid animal or vegetable substance, is not whether the article is unwholesome or injurious to health. *Knapp et al.* v. *Callaway et al*---------- 1,276

Tomato pulp *held* to be subject to condemnation as adulterated because it consisted in whole or in part of a filthy or decomposed vegetable substance, if made partly of decomposed tomatoes, even though its injurious properties were destroyed through sterilization by heat and it would be harmless to health, if eaten, and whether or not it was fit for food. *United States*, v. *5,060 Cans of Tomato Pulp*---------- 780

An article of food which is decomposed is within the prohibition of the act regardless of whether it is harmful or harmless to health, if eaten; it makes no difference whether such article be healthful or unhealthful, or even that it be perfectly healthful. *United States* v. *1,195 Cases of Canned Salmon*---------- 1099

Under the provision of the act, section 7, subdivision 6, that a food product is adulterated if it consists in whole or in part of a filthy, decomposed, or putrid animal or vegetable substance, no standard being fixed by which it can be determined when the product has reached such a stage of decomposition as to consist wholly or partly of filthy, decomposed, or putrid substance, each case must be determined on its own facts, and a product which is so far decomposed as to be unfit for food is within the meaning of the statute. *United States* v. *200 Cases of Adulterated Tomato Catsup*---------- 583

A. O. Andersen & Co. v. *United States*---------- 1053

The act has not established a precise standard whereby adulteration can be determined under the provision of section 7, subdivision 6, that an article of food shall be deemed to be adulterated if it consists in whole or in part of a filthy, decomposed, or putrid animal or vegetable substance; and because of this fact the courts have uniformly permitted each case to be judged upon its own special facts. *United States* v. *384 Cases of Canned Cherries*---- 1176

Evidence that the presence of mold in tomato catsup is so substantial as to warrant a finding that the product is filthy, decomposed, or putrid in the common, ordinary, practical sense is sufficient to warrant a finding that the product is adulterated in such respect within the meaning of the act. *United States* v. *720 Cases of Tomato Catsup*---------- 877

In a prosecution charging shipment of milk adulterated in that it consisted in whole or in part of a filthy, decomposed, or putrid animal or vegetable substance, *held* that the jury, in order to convict, must find that the milk was adulterated as alleged, when it was delivered at the railway depot for shipment; and that the jury, in determining whether the milk was old and impure at that time, might use the standard prescribed in a statute of the State where the trial was held providing that "milk containing more than 1,000,000 bacteria per cubic centimeter shall be considered impure milk." *United States* v. *Hopkins*---------- 585

The act, section 7, subdivision 6, provides that food shall be deemed adulterated if it consists in whole or in part of a filthy, decomposed, or putrid animal or vegetable substance, or any portion of an animal unfit for food, whether manufactured or not, or if it is the product of a diseased animal, or one that has died otherwise than by slaughter. Raw fish infested with threadlike worms difficult to identify, but surrounded by thick, greenish-yellow fluid unpleasantly suggestive of pus, which consisted of broken-down fish tissue and to some extent the excreta of the worms, and which was readily observable by anyone eating the fish, but, unless he knew its origin, would probably be unobjectionable, *held* to come within the scope of the act, section 7, subdivision 6, and not ex-

FILTHY, DECOMPOSED, AND PUTRID—Continued. Page

cluded therefrom by the absence of proof that the condition of the fish would impair the health of the consumer or the flavor of the fish. While the statute is primarily concerned with the health of consumers, it might well ban "filthy" or "decomposed" animal matter or the "product of a diseased animal" without direct or scientific proof of danger to health. The aesthetic guide frequently precedes the scientific one, and the Government might wisely ban food which runs counter to it in the categories mentioned. *United States* v. *186 Boxes of Whole Tullibees and 116 Boxes of Dressed Tullibees*---------- 1342

In a prosecution charging a shipment of tomato paste adulterated in that it consisted in whole or in part of a filthy, decomposed, or putrid vegetable substance, *held*, that whether the process of nature in the tomato between the time it was ready for canning and the time it was actually put into the can may have been such as to cause the alleged condition of the product, was immaterial; the question was whether the product was in such condition at the time of shipment. *United States* v. *Gidden*---------- 360

In an action to condemn numerous cases of canned tomato purée as adulterated within the provision of the act that an article of food shall be deemed adulterated if it consist in whole or in part of a filthy, decomposed, or putrid animal or vegetable substance, dismissal of the libel ordered as to all of the article except cans examined, upon the ground that it appeared from the evidence that there was a variation in the amount of mold in the contents of the different cans examined, and that it did not sufficiently appear from the testimony offered as to the manufacture of the product and the filling of the cans which had not been examined, that they contained filthy, putrid, or decomposed vegetable substance. *United States* v. *1,000 Cases of Tomato Purée*---------- 704

In a libel proceeding against certain cases of tomato catsup alleged to be in whole or in part decomposed, evidence as to the conditions at the factory where the catsup was manufactured, *held* competent. *United States* v. *1246 Cases of Tomato Catsup*---------- 943

On trial of a libel against certain cases of tomato catsup of which claimant was the manufacturer, for alleged adulteration in that it consisted in whole or in part of a filthy and decomposed vegetable substance, where the Government adduced evidence tending to show that the tomatoes used in the manufacture of the catsup were partly or wholly decomposed or rotten, *held*, on the theory that in the manufacture of tomato catsup the exclusion of all decomposed tomato matter was impossible, that the Government, in order to prevail, must show that in the selection of the tomatoes from which the catsup was manufactured such reasonable care and caution as a person of ordinary care and prudence would use were not exercised to exclude decomposed tomatoes, and that the catsup was decomposed and filthy to an unreasonable extent, or to an extent that a reasonably prudent, cautious, and diligent person engaged in the business of manufacturing such product would not permit if the product were to be consumed by his own family. *United States* v. *1,038 Cases of Tabasco Flavor Catsup*---------- 871

In a proceeding for forfeiture of canned salmon as adulterated in that it consisted in whole or in part of a filthy, decomposed, or putrid animal substance, *held* that the question whether or not salmon tainted, spoiled, or decomposed before it was canned, is, after canning, processing, and subjection to a high degree of heat, harmful to health, was not in issue and was immaterial. *United States* v. *1,195 Cases of Canned Salmon*---------- 1090

A shipment of canned salmon *held* to consist in part of a filthy, decomposed, or putrid animal substance to such a percentage in excess of reasonable and salutary requirements as to constitute the shipment adulterated within the prohibition of the act. *United States* v. *430 Cases of Canned Salmon*---------- 1035

FILTHY, DECOMPOSED, AND PUTRID—Continued. Page

Shipments of numerous cases of canned salmon *held* not subject to forfeiture as adulterated within the meaning of the Act declaring an article of food adulterated if it consists in whole or in part of a filthy, decomposed, or putrid animal substance, on the theory that each individual can of salmon was an "article of food" within the meaning of the act, and that it was not shown that a sufficient number of the cans contained salmon that was filthy, decomposed, or putrid. *United States* v. *1,459 Sases of Canned Salmon*_____ 995

United States v. *1,974 Cases of Canned Salmon*_____ 1037

In proceedings for condemnation of shipments of canned salmon as adulterated in that it consisted in whole or in part of a filthy, decomposed, or putrid animal substance, *held* necessary to a verdict of condemnation that it be shown that the adulteration extended to the entire product sought to be condemned. *United States* v. *1,974 Cases of Canned Salmon*_____ 1108

United States v. *2,995 Cases of Canned Salmon*_____ 1136

In a proceeding to condemn parcels of canned salmon as adulterated under the provision of the act that food shall be deemed to be adulterated if it consists in whole or in part of a filthy, decomposed, or putrid animal substance, *held* that the jury, in order to return a verdict in favor of the Government, must find that a percentage of such adulteration extended throughout the parcel, and was greater than was inevitable in the process of canning when ordinary and proper care is exercised. *United States* v. *243 Cases of Canned Salmon* _____ 1131

In a proceeding to condemn shipments of canned salmon in that it consisted in whole or in part of a decomposed animal substance, *held* that in order to warrant condemnation of such shipment, the jury must find that decomposition to a substantial degree extended throughout the whole shipment, although it was not necessary to find that each and every can of salmon in such shipment was so decomposed. *United States* v. *2,205 Cases of Canned Salmon*_____ 1133

In a libel proceeding against a certain number of cases of tomato catsup allegedly adulterated in that it consisted in whole or in part of a filthy, decomposed, or putrid vegetable substance, *held*, that if the jury should find that the catsup in the total number of cases, or in any part of such number, is in such a condition as to be within the prohibition of the act, then their verdict should be for the Government, and that if they should find the catsup in only a part of the total number of cases to be in such condition, they should indicate the number of such cases. *United States* v. *720 Cases of Tomato Catsup*_____ 877

Where an article of food is alleged to consist in whole or in part of a filthy, decomposed, or putrid animal substance, any one of these adjectives, if applied to the substance and established by proof, would be sufficient to justify condemnation of the article. *United States* v. *One Barrel of Desiccated Egg Product*_____ 99

In a proceeding to forfeit an article of food as being filthy or decomposed, *held*, the Government was not required to prove that the article was both filthy and decomposed; it was sufficient if the article be shown to be either filthy or decomposed. *United States* v. *10 Barrels of Olives*_____ 125

In a libel proceeding against an article of food for alleged adulteration under the provision of the act that an article of food shall be deemed adulterated if it consists in whole or in part of a filthy, decomposed, or putrid animal or vegetable substance, *held* unnecessary for the Government to prove that the product was filthy and decomposed and putrid; it is sufficient to establish the existence of any one of the conditions enumerated. *United States* v. *720 Cases of Tomato Catsup*_____ 877

In a libel proceeding to condemn shipments of a food product on the ground that it was filthy and decomposed, *held* that the Government would be entitled to a verdict if the jury should find that the product was either filthy or decomposed, or both. *United States* v. *1,500 Cases of Tomato Pulp*_____ 892

FILTHY, DECOMPOSED, AND PUTRID—Continued. Page

in a proceeding for condemnation of canned salmon as adulterated because it consisted in whole or in part of a filthy, decomposed, or putrid animal substance, *held* that the jury should find for the Government if they should find that the article was either filthy or decomposed or putrid. *United States* v. *1,600 Cases of Canned Salmon* 1105

See Adulteration; Article; Consist; Constitutionality of the Food and Drugs Act; Injuries to Health; Knowledge and Intent; Standards; Unfit for Food.

FINES.

See Offenses; Penalties.

FISH.

Raw fish infested with parasitic worms, *held*, come within the scope of the provision of the act, section 8, that food shall be deemed adulterated if it consists in whole or in part of a filthy, decomposed, or putrid animal or vegetable substance, etc. *United States* v. *186 Boxes of Whole Tullibees and 116 Boxes of Dressed Tullibees* 1342

See Salmon, Canned; Sardines; Tuna Fish.

FLAVOR.

See Compound Ess Grape; Creme de Menthe Flavor Non-alcoholic Cordial; Fruit Wild Cherry Compound; Lemon Extract or Flavor; Orange Extract or Flavoring; Vanilla Extract or Flavor.

FLOUR:

Flour *held* to be filthy and adulterated under the act, section 7, subdivision 6, by reason of the presence of worms, insects, and beetles, and of the condition which they produced in the flour. *United States* v. *350 Sacks of "Princess Flour" and 50 Sacks of "Fancy Melba" Flour* 351

Affirmed, *Wm. M. Galt & Co.* v. *United States* 422

Flour treated by the Alsop process for bleaching *held* to be adulterated because, as a result of such treatment, nitrites or nitrite-reacting material had been mixed and packed with the flour so as to reduce and lower and injuriously affect its quality and strength; the flour was mixed, colored, and stained in a manner whereby damage or inferiority was concealed; and the flour contained added poisonous or other added deleterious ingredients, to wit, nitrites or nitrite-reacting material, which might render the flour injurious to health. Said flour *held* to be misbranded because it was offered for sale under the distinctive name of another article, to wit, "Patent Flour", and, being labeled "Fancy Patent. This flour is made from the first quality hard wheat", was labeled so as to deceive and mislead the purchaser. *United States* v. *625 Sacks of Flour* 129

Reversed, *Lexington Mill & Elevator Co.* v. *United States* 443

Judgment C. C. A. affirmed, *United States* v. *Lexington Mill & Elevator Co* 577

Flour bleached by treatment by the Alsop process *held* to be adulterated because, as a result of such treatment, substances known as nitrites had been mixed and packed with the flour so as to reduce and lower and injuriously affect its quality and strength; the flour was mixed, colored, and stained in a manner whereby damage and inferiority was concealed; and the flour contained added poisonous and added deleterious ingredients, to wit, nitrites, which rendered it injurious to health. Said flour *held* to be misbranded because it was offered for sale under the distinctive name of another article, to wit, "High Patent Flour", when it was not such article, but was flour of a grade inferior to "Patent Flour"; and because it was labeled and branded so as to deceive and mislead the purchaser, being labeled and branded "High Patent Flour", when it was not "Patent Flour", but was flour of a grade inferior to "Patent Flour." *United States* v. *420 Sacks of Flour* 96

FLUID EXTRACT CINCHONA: Page

A drug labeled "Fluid Extract Cinchona" *held* adulterated within the meaning of the act, section 7, in that, being a drug sold under by a name recognized in the United States Pharmacopoeia or National Formulary, it differed from the standard of strength, quality, and purity, as determined by the test laid down in the United States Pharmacopoeia or National Formulary at the time of investigation. *United States* v. *G. F. Harvey Co*---------- 754

FOOD:

Pears and apples are food within the meaning of the act. *United States* v. *3,192 Boxes of Apples and 532 Boxes of Pears*---------- 1199

Eggs released from the shell and frozen or unfrozen are an "article of food", and, if adulterated, their transportation in interstate commerce is prohibited. The fact that decomposed eggs ought not to be used for food or as an ingredient of some food article does not remove them from the category of adulterated food, they being within the statutory definition, nor does the fact that they may be used for tanning purposes. *United States* v. *13 Crates of Frozen Eggs*---------- 531

United States v. *13 Crates of Frozen Eggs*---------- 605

Where a libel for condemnation of frozen eggs described them as articles of food it was not objectionable for failure to negative that the eggs were intended for other than food purposes. *United States* v. *300 Cans of Frozen Eggs*---------- 283

Under the act, section 6, defining "food" to include all articles used for food, drink, confectionery, or condiment by man or other animals, whether simple, mixed, or compound, the term applies to and includes wine. *United States* v. *Sweet Valley Wine Co*---- 468

Cider is a food within the meaning of the act. *United States* v. *Shucart*---------- 693

Vinegar is a food product, as defined in the act, section 6. *United States* v. *95 Barrels, More or Less, Alleged Apple Cider Vinegar*-- 1047

A sirup called "Coca Cola" is an article of food, under the definition of the act. *United States* v. *40 Barrels and 20 Kegs of Coca Cola*---------- 606

Conceivably an article may be both a food and a medicine, and that when used in the same way, i. e., when taken internally. A manufacturer who designates an article made and sold by him as a food ("International Stock Food") is in no position to complain of his article being treated as what he calls it, i. e., a food. *Savage* v. *Scovell*---------- 18

A condiment is a food and not a medicine. Id.

Coloring materials sold and shipped with the knowledge that they were intended to be used as components of food, *held*, were to be regarded as food within the meaning of the act, though they had no food value themselves. *Untied States* v. *W. B. Wood Manufacturing Co*---------- 1002

Oil of birch, used as one of the ingredients entering into the composition of root beer, is an article of food within the meaning of the act. *United States* v. *Bowers*---------- 763

An article composed of shellac, containing arsenic, dissolved in alcohol, and sold for use in glazing candy, is an article of food. *Weeks* v. *United States*---------- 650

The seed of the wild oat is not a food. *United States* v. *154 Sacks of Oats*---------- 1039

A dairy company which shipped from its receiving plant in Illinois to Missouri milk which was adulterated by addition of water and by reason of the presence of decomposed matter, cannot defeat a prosecution under the act on the ground that the milk was to be treated in Missouri and was not an article of food until after treatment. *Union Dairy Co.* v. *United States*---------- 869

See Adulteration; Confectionery; Drug; Election; Knowledge and Intent; Misbranding.

FOOD INSPECTION DECISIONS: Page

Where, under the decisions of the Department of Agriculture, coloring material, containing more than 5 per cent of salt could not be certified, and a coloring material containing a greater percentage carried a label bearing the words, "Warranted. Complies with all requirements", it was misbranded within the act, section 8, as the label would tend to convey the belief that the color was warranted to comply with the decisions of the Department. *W. B. Wood Manufacturing Co.* v. *United States*---------- 1070

See Mandamus.

FOREIGN PRODUCT.

See Confectionery; Gin; Importation; Macaroni; Oil, Olive; Oil; Salad; Rusk.

FOREIGN SHIPMENT.

See Export Articles.

FORMALDEHYDE:

A frozen-egg product containing formaldehyde *held* to be adulterated in that it contained an added poisonous or deleterious ingredient. *United States* v. *F. E. Rosebrock & Co*---------- 190

FRAUDULENT.

See False and Fraudulent.

FROZEN EGG PRODUCT.

See Eggs and Egg Products.

FRUIT:

The act is not applicable to shipment in interstate commerce of fruit unfit for consumption because green or immature. *Sligh* v. *Kirkwood*---------- 634

See Apples; Blackberries; Filthy, Decomposed, and Putrid; Oranges.

FRUIT PUDDINE:

An article of food sold under its own distinctive name, to wit, "Fruit Puddine" or "Puddine", held misbranded because the statement "Fruit Flavored", appearing on the label, was false or misleading. *United States* v. *150 Cases of Fruit Puddine*---------- 557

The words "cream vanilla" and "rose vanilla", used on a product called "Fruit Puddine" or "Puddine", to designate colors of the product, *held* to be distinctive names and not to constitute misbranding because the product was not flavored with a high-grade vanilla extract, but with vanillin or synthetic vanilla extract obtained from oil of cloves. Id.

FRUIT WILD CHERRY COMPOUND:

Allegations in an information that an article labeled "Fruit Wild Cherry Compound" was adulterated in that a substance, to wit, an imitation wild cherry essence, had been mixed and packed with the article purporting to be fruit wild cherry compound so as to reduce, lower, and injuriously affect the quality and strength of the article, and in that an imitation wild cherry essence had been substituted in part for the genuine article, fruit wild cherry, and in that the article had been colored in a manner whereby its inferiority was concealed, *held* insufficient to charge an offense under the act, since the description of the article on the label as "Fruit Wild Cherry Compound" did not indicate that the article consisted wholly of fruit wild cherry, and, assuming that the article did not contain any added poisonous or deleterious ingredient, there was nothing to prevent the combination of fruit wild cherry with an imitation wild cherry essence. Allegation that the article labeled "Fruit Wild Cherry Compound" consisted chiefly of an imitation wild cherry essence artificially colored, *held* to charge a violation of the act as to misbranding, since the name "Fruit Wild Cherry Compound" represented that the dominant element of the compound was genuine fruit wild cherry. *United States* v. *Weeks*---- 519

FRUIT WILD CHERRY COMPOUND—Continued. Page

An article labeled "Fruit Wild Cherry Compound" *held* to be misbranded in that such statement on the label was false and misleading, and in that it was labeled so as to deceive and mislead the purchaser, the label representing that the article was a genuine fruit wild cherry compound, when it consisted chiefly of imitation wild cherry essence artificially colored; and in that it was sold under the distinctive name of another article, to wit, fruit wild cherry, when it was not fruit wild cherry, but was an imitation thereof. Said article *held* to be adulterated in that it was artificially colored with coal-tar dye to simulate a true fruit wild cherry color, and in a manner whereby its inferiority was concealed. Id.

Reversed, *Weeks* v. *United States*---------- 646

An article labeled "Fruit Wild Cherry Compound", but not containing any "Fruit Wild Cherry", nor any added poisonous or deleterious ingredients, is covered by the provision of the act, section 8, that an article of food which does not contain any added poisonous or deleterious ingredients shall not be deemed to be adulterated or misbranded in the case of compounds known as articles of food under their own distinctive names, and not an imitation of or sold under the distinctive name of another article, and in case of articles so labeled as to indicate they are compounds, and the word "compound" is stated on the package; and therefore is not misbranded. *Weeks* v. *United States*---------- 646

An article labeled "Fruit Wild Cherry Compound", but containing a coal-tar color giving to the mixture the genuine color of wild cherry juice, but not containing any added poisonous or deleterious ingredients, is not adulterated under the provisions of the act, section 7, that an article of food shall be deemed adulterated if it is mixed, colored, powdered, coated, or stained in a manner whereby damage or inferiority is concealed, for the reason that said provision is qualified by the provision of section 8, that an article of food which does not contain any added or poisonous or deleterious ingredients shall not be deemed to be adulterated in enumerated cases. Id.

GENERIC TERM:

"Generic" may be defined as meaning a class, as distinct from "specific", which might mean a particular member or a class, and when it is used in regulation 19, in connection with the word "term", so as to create the phrase "generic term", the word "generic" means a class. "A generic term" means the description of a class of product. *United States* v. *Finlayson et al*---------- 535

The word "Holland", used in connection with the word "gin", is a geographical name which has become generic by long usage, and represents a style, type, or brand, within the meaning of regulation 19 (a). *United States* v. *Five Cases of Hurdle Brand Holland Gin*---------- 549

GEOGRAPHICAL NAME.

See Coffee; Holland Gin; Hollands Geneva Gin; London Dry Gin; Macaroni; Regulations; Rusk.

GIN.

See Holland Gin; Hollands Geneva Gin; London Dry Gin.

GINGEROLE.

A drug called "Gingerole" held not misbranded under the act as amended by act August 23, 1912, on the ground that the evidence did not show that any of the alleged false and fraudulent statements as to the curative or therapeutic effects of the drug, contained on the label, etc., was both false and fraudulent. *United States* v. *Gingerole Co*---------- 977

GLUCOSE.

See Corn Sirup.

GON-NOL: Page

An article of drugs labeled "Gon-Nol" *held* misbranded for the reason that statements on the label falsely and fraudulently represented its curative or therapeutic effects. *United States* v. *Kar-Ru Chemical Co*---- 900
Affirmed, *Kar-Ru Chemical Co.* v *United States*---- 970

GOULD AMENDMENT.

See Constitutionality of the Food and Drugs Act; Weight, Measure, and Numerical Count.

GRAIN ALCOHOL VARNISH:

An article labeled "Grain Alcohol Varnish", for use in glazing candy, *held* to be adulterated in that it contained an added poisonous and deleterious ingredient, arsenic, which might render the article injurious to health. *United States* v. *Weeks*---- 528
Affirmed, *Weeks* v. *United States*---- 650

GRAIN STANDARDS ACT.

See Oats.

GRANT'S HYGIENIC CRACKERS:

An article of food labeled "Grant's Hygienic Crackers" *held* to be within the provision of the act, section 8, subdivision 4, that articles of food which do not contain any added poisonous or deleterious ingredient shall not be deemed misbranded if known under their own distinctive names and not an imitation of or offered for sale under the distinctive name of another article, and not misbranded by reason of alleged false and misleading statements on the label. *United States* v. *Hygienic Health Food Co*---- 259

GRAPE FLAVOR.

See Compound Ess Grape; Smack.

GRAPE, COMPOUND ESS.

See Compound Ess Grape.

GRAPE JUICE:

An article labeled "Grape Juice. Pure, unfermented, thrice sterilized", held misbranded if cane sugar were added thereto and if the article were partially fermented. *United States* v. *Mohn Wine Co*-- 316

GRENADINE SIRUP.

See Sirup, Grenadine.

GUARANTY:

A guaranty made under the provisions of section 9 of the act, if false, can have been made with no other purpose than to defeat the object of the act. *United States* v. *Charles L. Heinle Specialty Co*---- 82

If, for any reason, a guaranty is insufficient to impose liability upon the manufacturer, the liability remains where it primarily rested—upon the dealer. *United States* v. *Mayfield et al*---- 90

The provision of section 9 of the act, regarding guaranty, is available to a dealer only when such guaranty relates to the identical article shipped by him, and affords no defense to him where it relates to a constituent used by him in the manufacture of the article shipped. Id.

Whether a document offered as a guaranty is in fact a guaranty within section 9 of the act is a question of law for determination by the court; and the legal effect of a document delivered by a manufacturer to a jobber, stating that all goods furnished "hereafter will comply with the Food and Drugs Act" until notice of revocation, was, as to a product furnished after the guaranty was given, to guarantee such product against adulteration. *United States* v. *Glaser, Kohn & Co*---- 601
Affirmed, *Glaser, Kohn & Co.* v. *United States*---- 651

Section 9 of the act, regarding guaranty, includes continuing guaranties, as well as those given at the time of sale and in reference to specific goods; and a guaranty of a manufacturer that all goods

GUARANTY—Continued. Page

furnished a wholesale dealer "hereafter will comply with the Food and Drugs Act until notice of revocation" is a continuing guaranty, and a valid and sufficient guaranty under the section, and attaches to every item of sale made by the manufacturer to the wholesaler until the guaranty is revoked, and furnished a basis for an information against the manufacturer for selling an adulterated article of food, since where, by the terms of a written guaranty, it appears that the parties look to a future course of dealing for an indefinite time, or a succession of credits to be given, it should be deemed a continuing guaranty. *Glaser, Kohn & Co.* v. *United States*_____ 651

A letter of guaranty should receive a liberal, fair, and reasonable interpretation, and attain the object designed and the purpose to which it is applied. Id.

A guaranty signed by the manufacturer of a misbranded article, signed more than 18 months after a prosecution was instituted and a few days before the trial, *held* not to satisfy the requirements of a valid guaranty under section 9 of the act and not to constitute a defense in the prosecution of a shipper of such article. *Steinhardt Bros. & Co.* v. *United States*_____ 327

An alleged guaranty given 6 years prior to the prosecution, to the effect that all goods to be sold by the guarantor to a particular dealer thereafter would comply with the Food and Drugs Act and would not be in any manner adulterated or misbranded, *held* to be no guaranty at all under the act. *United States* v. *Scully et al*__ 460

See Constitutionality of the Food and Drugs Act; Knowledge and Intent; Object of the Act; Purpose of the Act.

GUM ARABIC:

Gum arabic *held* to be a "similar" article to gum chadya, or Indian gum. *United States* v. *Weeks*_____ 485

HARPER'S CUFORHEDAKE:

An article labeled "Harper's Cuforhedake Brain Food" and "Harper's Cuforhedake Brane Fude", *held* misbranded. *United States* v. *Harper*_____ 11

HEARING.

See Notice and Opportunity to be Heard.

HOG FEED, ECONOMY SPECIAL.

See Economy Special Hog Feed.

HOLLAND GIN:

An article of domestic manufacture, labeled "Hurdle Brand Holland Gin, Distilled by Baird Daniels Co., Warehouse Point, Conn.", *held* not misbranded as purporting to be a foreign product. *United States* v. *Five Cases of Hurdle Brand Holland Gin*_____ 549

See Hollands Geneva Gin; London Dry Gin.

HOLLANDS GENEVA GIN:

The term "Hollands Geneva Gin" *held* to have come, through long usage, to indicate a style, type, or brand of gin, and not to constitute misbranding when used on a domestic article, if accompanied on the label by the name of the place where the article was manufactured. *United States* v. *Finlayson et al*_____ 535

See Holland Gin; London Dry Gin,

HONEY:

An article labeled "Excelsior Choice Pure Strained Honey", composed of honey and invert sugar, *held* adulterated and misbranded. *United States* v. *Six Cases of Honey*_____ 543

See Corn Sirup.

HORSEBEANS.

See Beans.

HUDSON'S EXTRACT: Page

An imitation of vanilla, labeled "Hudson's Extract", without any indication of what the article was composed, *held* to be misbranded where there was no proof that the words "Hudson's Extract" had a well-known trade meaning. *Hudson Manufacturing Co.* v. *United States*---------- 344

See Vanilla Extract or Flavor.

HYGIENIC CRACKERS.

See Grant's Hygienic Crackers.

ICE CREAM:

Ice cream containing only 7.09 percent of butterfat *held* not adulterated by reason of deficiency in fat, as there is no authorized standard for ice cream, and the evidence was insufficient to warrant the fixing of a standard for butterfat in ice cream. *United States* v. *Rinchini*---------- 318

IMITATION:

The provision of the act that an article of food shall be deemed to be misbranded "if it be an imitation of or offered for sale under the name of another article", deal, first, with imitations; that is, articles patterned after, or a copy of, or made in simulation of, another article, and as such, offered or put out as the genuine; and, second, articles, whatever they may be, whether imitations or not, which are put out under the distinctive name of another article. The statute condemns the use of means which being used arouse the belief that one thing is really another. *United States* v. *24⅞ Gallons of Smack*---------- 1181

See Compound; Distinctive Name.

IMPERIAL SPRING WATER.

Ordinary Croton water drawn from the pipes in New York City, filtered and bottled after the addition of small quantities of mineral salts and carbonic acid gas, is not "spring water", as the term is generally understood, and labeled as "Imperial Spring Water", is misbranded within the meaning of the Act. *United States* v. *Morgan et al*---------- 146

IMPORTATION:

Section 11 of the act provides for the examination of articles sought to be imported, suspected of being adulterated or misbranded, by the Department of Agriculture, and declares that, if they are found to be so, entry shall be forbidden, and they shall be destroyed unless exported within 3 months from the date of notice of refusal of entry, except that, pending examination, the importer shall obtain possession by executing a penal bond conditioned to return the goods to the Secretary of the Treasury when demanded, etc. *Held* that, where proceedings were instituted for the exclusion of certain adulterated or misbranded olives, the importer's execution of a bond for possession under said section did not amount to an official declaration that the olives had been found to comply with the act. *United States* v. *Nine Barrels of Olives*---------- 128

Bill for injunction to restrain the Secretaries of Treasury and Agriculture from permitting importations of crude ergot of rye alleged to be substandard and in violation of the act, *held* properly dismissed in the absence of showing that such action was capricious or arbitrary. *Ambruster* v. *Mellon, Secretary of the Treasury, et al*---------- 1236

See Injunction.

INDICTMENT:

The offense against the act, section 2, is not an "infamous crime", and the institution of proceedings by an information charging such offense, filed by the district attorney, was not a violation of the Fifth Amendment of the Constitution, providing that no person shall be held to answer for an infamous crime unless upon presentment or indictment of a grand jury. *United States* v. *J. Lindsay Wells Co*---------- 169

INDICTMENT—Continued.

Page

An indictment for misbranding an article in violation of the act was not invalid for failure to allege investigation by an officer of the Department of Agriculture, notice to the defendants of their violation of the act, or that defendants were afforded an opportunity to present evidence and be heard. *Schraubstadter et al.* v. *United States* ---------- 398

Where an indictment described defendants as "S. and G., doing business in the city and county of San Francisco under the name and style of A. Fink's Widow, hereinafter called the defendants", *held* that such phrase was merely descriptive of the persons indicted, and that the indictment would be regarded as of the individual members of the firm, and not of the firm under its firm name. Id.

Where an indictment charged defendant in three counts with misbranding and the verdict was "guilty as charged in the indictment", *held* that the verdict was tantamount to a conviction on each of the three counts. Id.

Where an indictment charging defendant with violations of the act contained allegations to the effect that the same defendant had previously, on a plea of nolo contendere to a criminal information, been convicted and fined the sum of $50 and costs for another violation of the same act which provides that for a first offense thereunder the punishment shall on conviction be a certain minimum in the statute set forth, but that on conviction for any subsequent offense thereunder the punishment shall be increased in a certain definite manner in the statute prescribed, *held* that the fact of such former conviction was properly pleaded in the indictment. *United States* v. *St. Louis Dairy Co*---------- 962

See Crime, Infamous; Election; Information; Notice and Opportunity to be Heard; Prior Conviction.

INFAMOUS CRIME.

See Crime, Infamous.

INFERIORITY.

See Colored; Damage or Inferiority; Mixed.

INFORMATION.

The proceeding by information is an ancient method of procedure which has come to us from the common law of England, and it is well settled that this method of procedure is proper here. *Weeks* v. *United States*---------- 613

Procedure by criminal information is common law practice, and being a matter of practice it needs no statute to support it. Originally it was a concurrent remedy with indictments for all misdemeanors except misprison of treason. Informations under the Food and Drugs Act are perfect representatives of this ancient practice. In the United States the function of an information is limited by the constitutional provision that no one shall be held to answer for a "capital or otherwise infamous crime", except on presentment by the grand jury. *United States* v. *J. L. Hopkins & Co*---------- 366

There is no question that offenses against the Food and Drugs Act may be prosecuted upon information and without an indictment. *United States* v. *Wells*---------- 480

The practice followed in prosecuting individuals by information for violating the Food and Drugs Act must be in accord with recognized procedure, and must not be within the inhibitions of the Federal Constitution. *United States* v. *Simon et al*---------- 728

The offense against section 2 of the act *held* not an "infamous offense", and hence the institution of proceedings thereunder by information of the district attorney, charging defendant with shipping adulterated food in interstate commerce was not a violation of the Fifth Amendment of the Constitution, providing that no person shall be held to answer for an infamous crime unless upon presentment or indictment of a grand jury. *United States* v. *J. Lindsay Wells Co*- 169

In the United States the informations used by the prosecuting officers are the informations used by the Attorney General in England, and

INFORMATION—Continued. Page

not those exhibited by masters of the crown, and which were governed by 4 and 5 William and Mary, chapter 18, and as at common law an information could be filed by the Attorney General simply on his oath of office, and without verification, the verification of an information by a prosecuting attorney in this country is unnecessary, unless required by some constitutional or statutory provision. *Weeks* v. *United States*---------- 613

It is proper for the court to examine the information and the affidavits in support thereof, and, if the same shall be found insufficient, to deny motion of the United States attorney for leave to file the information. Motions of the United States attorneys for leave to file informations charging misbranding in violation of the act, denied, where in the opinion of the court the misbranding alleged was doubtful. *In re Wilson*---------- 33

United States v. *Schurman et al*---------- 95

In proceedings against a defendant for violation of the act, instituted by a district attorney, in his official capacity, by a criminal information, *held* that the fact that leave of court to file the information had not actually been had was no abuse of process and not ground to revoke the leave by virtue of which the information purported to have been filed. *United States* v. *Simon et al*---------- 728

Prosecutions by information have long had a recognized place in criminal procedure. In form, they proceed with leave of court. Whether the leave is made formal or actual is a matter of practice, to be regulated by the courts. Actual leave may be exacted, or it may be permitted to be assumed unless and until challenged. The latter is the established practice, and on the whole the better practice, because it leaves the propriety of the proceeding to be determined on its merits. Id.

Under the Constitution, Amendment 4, the court has no jurisdiction to direct the issuance of a warrant on an information filed, made on the information and belief of the United States attorney alone. It must be supported by proof establishing probable cause; that is, by legal evidence that a crime has been committed and that there is probable cause to believe the accused guilty of the commission thereof. *United States* v. *Baumert et al*---------- 113

United States v. *Wells*---------- 480

Before a summons or capias is issued in prosecutions instituted by information filed by the United States attorney, wherein the defendant is charged with a crime upon conviction for which he may be fined and imprisoned, the information should be presented to the judge, supported by the oath of someone having knowledge of the facts showing the existence of probable cause. The evidence may be oral or by affidavits. Upon the hearing of which the court, as it may believe that the evidence does or does not show probable cause, may or may not cause the arrest of the accused, and have him or not have him brought before the court to answer the charge. In other words, before a citizen is arrested, there should be facts sworn to and presented to the court showing the existence of probable cause for such arrest. *United States* v. *Wells*---------- 480

Revised Statutes, section 1022, provides that certain offenses may be prosecuted either by indictment or information filed by the United States attorney, and the Constitution, Amendment 4, declares that no warrant shall be issued but on probable cause supported by oath or affirmation. *Held*, that the constitutional provision does not require that the oaths or affirmations of the supporting witnesses be taken in open court or before the judge issuing the warrant or directing its issuance, but that the information is so supported where it is accompanied by the evidence of witnesses sworn before a United States commissioner on a preliminary examination, properly taken and certified, or when accompanied by the affidavits made on oath of witness sworn before any officer authorized by law to take and subscribe such oaths or affirmations. *United States* v. *Baumert et al*---------- 113

INFORMATION—Continued. Page

An information for violation of the Food and Drugs Act was sworn to on information and belief by the United States district attorney, supported by certain letters purporting, but not proved, to have been written or authorized by accused taking issue with the Agricultural Department's claim of violation; also a statement not in the form of an affidavit, by an analyst of the Department, to which was attached a notary's certificate that it had been subscribed and sworn to, etc. The paper contained no venue, nor was there any certificate attached to it showing that the person certifying it was a notary authorized to take and certify oaths and affirmations, and that it was taken and subscribed as required by the laws of the State, etc. *Held*, that the information was not sufficiently proved to justify the issuance of process. Id.

The provision of the Fourth Amendment to the Constitution that "no warrant shall issue but upon probable cause supported by oath or affirmation", which is a limitation upon the powers of the Federal Government only, does not require an information filed by a district attorney of the United States to be verified or supported by an affidavit based on personal knowledge and showing probable cause, unless such information is made the basis of an application for a warrant of arrest. If the sole purpose of the information is to state the accusation, a defendant may be charged and tried for a misdemeanor on an information not verified nor so supported. *Weeks* v. *United States* 613

An information not upon oath is not violative of the Fourth Amendment of the Constitution, where defendant has voluntarily appeared and filed motion to quash, it being only required that the information shall be supported by oath before warrant may issue thereon. *United States* v. *Newton Tea & Spice Co* 950

An information, bearing the signature of the district attorney and to which were attached four affidavits sworn to before notaries public, is sufficient to support a judgment of conviction, though not verified by the district attorney; no warrant of arrest having been sought, and it being assumed that the district attorney, who signed in his official capacity, acted under his oath as a Government official. *Abbott Bros. Co.* v. *United States* 831

While an information filed by the United States attorney under the sanction of his official oath, and without verification, would be sufficient in certain cases, an information not so filed, but expressly stating upon its face that it was made upon the oath of the several parties whose affidavits were annexed, was not sufficient, unless the affidavits could be considered. *United States* v. *Schallinger Produce Co* 623

Notaries public have no authority under the laws of the United States to administer any oaths in connection with criminal prosecutions, and hence an information expressly stating that it was made upon the oath of parties whose affidavits were annexed, was defective, where three of the affidavits were taken before notaries public, and the fourth, standing alone, was of no avail. Id.

Though a corporation cannot commit certain crimes, and may not be arrested or imprisoned, a proceeding against it for the violation of a criminal statute is a "criminal proceeding", with all the incidents of such a proceeding, and an information therein is defective, if made upon the oath of parties named in annexed affidavits taken before notaries public. Id.

Defects in the acknowledgment of an information are waived, if not raised by suitable objection before trial, and cannot thereafter be raised. *Abbott Bros. Co.* v. *United States* 831

The objection that an information was not made on the oath of the prosecuting officer, but on the oaths of witnesses by affidavit, some of which were taken before notaries public, was purely technical, and was waived by pleading to the information without raising the objection. *Simpson* v. *United States* 832

Unless an information is void, an objection that it was not made on the oath of the prosecuting officer, but solely upon oath of witnesses by affidavits, some of which were taken before notaries

INFORMATION—Continued. Page

public, cannot be raised for the first time on appeal, unless a refusal to consider it would shock the judicial conscience. Id.

Failure to attach to an information the affidavits on which it is based does not justify the setting aside of a conviction. *United States* v. *American Laboratories* 641

An information under the Act will not be dismissed on appeal for the reason that it does not appear that there had been a notice and hearing by the Secretary of Agriculture as provided for by section 4 of the act, where no motion to dismiss for this reason was made below nor was the question raised by any pleading or assignment of error. *Frank et al.* v. *United States* 329

The rule applicable to an information is no less liberal than that prescribed for indictments by Revised Statutes, section 1025, and its averments of fact constituting the offense need be only so certain and specific as fairly to inform defendant of the crime intended to be alleged, and to make the judgment a complete defense to a second prosecution for the same offense. *Simpson* v. *United States* 832

In view of Revised Statutes, section 1025, the allegations of an information need only be so specific as fairly to inform defendant of the crime intended to be alleged, and to make available a plea of former acquittal or conviction, if a second prosecution were instituted for the same offense. An information charging defendant made an interstate shipment of drugs misbranded in violation of section 8 of the act, as amended by act August 23, 1912, which alleged that statements regarding the curative or therapeutic effects of the drugs, made on the label and package and in an accompanying circular, were false and fraudulent and were applied by defendant to the article knowingly and in wanton disregard of their falsity, *held* sufficient as against motion in arrest. *Dr. J. H. McLean Medicine Co.* v. *United States* 907

The certainty required in an information is only such as will fairly inform the defendant of the offense intended to be charged, so as to enable him to prepare his defense, and so as to make the judgment a complete defense to a second prosecution. *Newton Tea & Spice Co.* v. *United States* 1089

It is generally enough to describe a statutory offense in the words of the statute, and if more particularity is desired defendant may move for a bill of particulars. Id.

United States v. *American Maid Flour Mills* 1286

An innuendo may not change, add to, or enlarge the sense of expressions beyond their usual meaning. It may serve as an explanation, but not as a substitute. Hence, an averment in an information that one who branded an article with a label whose accepted and usual signification correctly describes it, intended that the public or purchasers should understand that the label had an opposite and unusual significance, fails to disclose any misbranding. *Nave-McCord Mercantile Co.* v. *United States* 166

An information charging defendant with selling an adulterated or misbranded article of food in interstate commerce in violation of the act, should specifically charge the manner of adulteration as defined in section 7, or of misbranding as defined in section 8. *United States* v. *St. Louis Coffee & Spice Mills* 44

An information charging that defendant sold in interstate commerce a liquid labeled "Flavor of Vanilla", which did not contain any extract of vanilla, does not state a case of adulteration or misbranding of vanilla extract in violation of section 2 of the act, the words "extract" and "flavor" not being synonymous terms. Id.

An information alleging shipment in interstate commerce of an article of food labeled as "Extract Terpeneless Lemon", in which a dilute solution of alcohol and water was substituted in part for said terpeneless lemon extract so that the same contained no more than 0.05 percent of citral derived from the oil of lemon, whereas, as recognized by the trade generally and by the standard of purity established by the Secretary of Agriculture under authority of the act of March 3, 1903, such extract should contain at least 0.2 percent by weight of such citral, *held* stated facts

INFORMATION—Continued.

Page

sufficient to sustain counts of both adulteration and misbranding under the Food and Drugs Act. *United States* v. *Frank et al*_____ 205

An information alleging that an interstate shipment of confectionery, commonly called candy, was adulterated in that it consisted in whole or in part of a filthy, decomposed, or putrid vegetable substance, *held* sufficiently charged violation of the act. *United States* v. *Watson-Durand-Kasper Grocery Co*_____ 837

An information alleging that statements on the label of an article of food were false and misleading in that they represented to the purchaser that the article was a substitute for eggs and could be used in place of eggs for cooking and baking, whereas, in truth, said article was not a substitute for eggs, and could not be used in place of eggs for baking and cooking, was sufficient under the act, as against an objection that it did not set forth why or in what manner the article could not be used as a substitute for eggs. *United States* v. *Newton Tea & Spice Co*_____ 950

Affirmed, *Newton Tea & Spice Co.* v. *United States*_____ 1089

An information under the act for misbranding an article of food, charging that the label bore statements that the article was an excellent substitute for eggs and could be used in place thereof for baking and cooking purposes, which statements were false and misleading, *held* sufficiently definite. *Newton Tea & Spice Co.* v. *United States*_____ 1089

Affirming *United States* v. *Newton Tea & Spice Co*_____ 950

Since "macaroni" is defined as made from a paste from the flour of hard glutinous wheat, and "semolina" is defined as the hard grains retained in the bolting machine after the fine flour has passed through, an information charging an article labeled "macaroni" adulterated and misbranded because made of flour, and not of semolina, is not sufficiently definite, even though macaroni must not contain the fine flour which passes through the bolting machine. *United States* v. *Krumm*_____ 993

The restriction of the application of the act to original unbroken packages applies only to those who receive in interstate commerce and thereafter deliver adulterated or misbranded articles, not to those who ship or deliver for shipment, so that an information charging that defendant shipped an adulterated and misbranded article of food in interstate commerce need not allege that it was shipped in original unbroken packages. Id.

An information charging defendant with shipping an article of food adulterated in that a product containing less than 80 per centum by weight of milk fat had been substituted for "butter", *held*, charged an offense under the Food and Drugs Act, in view of section 7, and in view of the act of March 4, 1923, which defines butter for the purposes of the Food and Drugs Act. *United States* v. *Centralia Dairy Co*_____ 1336

An information charging that an article of food was misbranded in that the statements "butter" and "one pound net", on the packages, were false and misleading in that they represented that the article was butter, namely a product which should contain not less than 80 per centum by weight of milk fat, and represented that each of such packages contained one pound net of the article, whereas in truth the article contained less than 80 per centum by weight of milk fat, and each of the packages contained less than 1 pound net of the article; and in that the article was labeled as stated so as to mislead and deceive the purchaser into the belief that it was butter as defined, and that each of such packages contained 1 pound net of the article; *held*, not demurrable. Id.

An information charging misbranding under the act, section 8, paragraph 3, of certain sacks of flour, meal, etc., alleging that such sacks were branded as containing each 24 pounds, when in fact they contained less, but not alleging promulgation of, or violation by defendant of, regulations fixing tolerances and exemptions or permitting variations; *held*, not open to motion to quash on the ground that the provision of section 8, paragraph 3, for establishing tolerances and exemptions and for permitting variations was invalid. *United States* v. *American Maid Flour Mills*_____ 1286

INFORMATION—Continued. Page

Where an information charging an interstate shipment of drugs misbranded in that the package and an accompanying circular contained false and fraudulent statements regarding the curative or therapeutic effect of the drugs, alleged that the shipment was made by S., the defendant, trading as S's Medical Institute, and that the representations were false and fraudulent in that they were applied to such article knowingly and in reckless and wanton disregard of their truth or falsity; *held*, that the information sufficiently showed that it was defendant's knowledge and reckless and wanton disregard of the truth that was intended to be charged. *Simpson* v. *United States*---------- 832

An information for shipping drugs misbranded in that the label of the package containing the drug and an accompanying circular contained false and fraudulent statements regarding their curative or therapeutic effects, which alleged that the shipment consisted of certain packages, that the packages contained the circular or pamphlet described, and that one of the alleged misrepresentations appeared on the label, and that the other was included in such circular; *held*, that it sufficiently alleged that the misrepresentations charged were intended to accompany the bottles containing the drugs into the hands of the consumers. Id.

In a prosecution for violation of the act by misbranding, the Government cannot be required to elect between counts, one of which describes the article as a drug, and the other as a food or drink, where the question is in controversy. *Steinhardt Bros. & Co.* v. *United States*---------- 327

United States v. *American Chicle Co*---------- 362

See Affidavits; Appeal and Error; Constitutionality of the Food and Drugs Act; Crime, Infamous; Election; Indictment; Notice and Opportunity to be Heard; Prior Conviction.

INJUNCTION:

The Food and Drugs Act being a valid enactment of Congress, injunction will not issue to restrain United States officers from having issued, or serving, process for seizing complainant's flour under a section 10, in view of Revised Statutes, section 723, declaring that suits in equity shall not be sustained in either of the courts of the United States in any case where plain, adequate, and complete remedy may be had at law. *Shawnee Milling Co.* v. *Temple, United States District Attorney et al*---------- 106

A bill in equity to restrain and enjoin the Secretary of Agriculture and other officials of the Department from prosecuting libels brought and seizures made of plaintiff's remedy in various cities, and from causing to be instituted any further such libels or seizures, until the issues involved could be determined by the court in a test case, dismissed on the ground that the bill failed to state a cause for injunctive relief. *National Remedy Co.* v. *Hyde, Secretary of Agriculture et al*---------- 1230

Reversed, *National Remedy Co.* v. *Hyde, Secretary of Agriculture, et al*---------- 1272

The action of the Department of Agriculture in causing libels to be instituted and prosecuted against plaintiff's remedy in numerous widely scattered places constituted arbitrary exercise of power and deprivation of due process of law, where under averments of plaintiff's bill, the effect thereof would be to deprive plaintiff of its property through destruction of its business before the issues involved could be determined by the court, and the facts did not show that such drastic action was necessary to protect the public prior to determination of the court; and a court of equity, under its jurisdiction to restrain by injunction multiplicity of suits under such circumstances, may so restrain the Secretary and other officials of the Department of Agriculture from such action. *National Remedy Co.* v. *Hyde, Secretary of Agriculture et al*---------- 1272

Reversing *National Remedy Co.* v. *Hyde, Secretary of Agriculture et al*---------- 1230

INJUNCTION—Continued. Page

A bill for injunction in the Supreme Court of the District of Columbia to restrain the Secretary of Agriculture from publishing, pursuant to section 4 of the act, notice of a judgment of the Police Court of the District of Columbia imposing a fine upon plaintiff after conviction of the offense of offering for sale and selling an adulterated article of food, dismissed, plaintiff's contention that the Police Court of the District of Columbia was without jurisdiction of such offense because it was not "a proper court of the United States" within the meaning of the act, section 5, providing for the prosecution for offenses under the act in the proper court of the United States, being adjudged meritless. *Huyler's* v. *Houston*---------- 507

Affirmed, *Huyler's* v. *Houston*---------- 572

Motion for a preliminary injunction to restrain officers of the Department of Agriculture from detaining shipments of dried egg yolk belonging to plaintiffs and from basing the standards of dried egg yolk, for purposes of admissibility into the United States, upon the test adopted by the Department, denied, where, in view of the contents of defendants' affidavits opposing the motion, it could not be said that the action of defendants had been arbitrary or capricious, or that complainants had shown reasonable probability of ultimate success in the suit. *Knapp et al.* v. *Callaway et al*---------- 1276

A suit to enjoin officials of the Department of Agriculture from arbitrarily seizing plaintiff's remedy as adulterated and misbranded, depriving plaintiff of due process of law, *held* not a "suit against the United States." *National Remedy Co.* v. *Hyde, Secretary of Agriculture, et al*---------- 1272

The exercise by the Secretary of the Treasury and the Secretary of Agriculture of authority vested in them by the act to determine whether imported drugs are adulterated or misbranded, requiring findings of facts and exercise of judgment, will not be reviewed by the courts in a suit for injunction, unless such authority has been capriciously or arbitrarily exercised. *Ambruster* v. *Mellon, Secretary of the Treasury, et al*---------- 1236

See Constitutionality of the Food and Drugs Act; Mandamus.

INJURIOUS TO HEALTH:

It is not necessary, in order to constitute misbranding of a food product by reason of a misleading label, that the product should be injurious to health. *United States* v. *Mohn Wine Co*---------- 316

The prohibition of misbranding of food is designed to prevent deceiving or misleading the purchasing public, even though the article sold is not injurious to health. *United States* v. *95 Barrels, More or Less, Alleged Apple Cider Vinegar*---------- 1047

The primary purpose of the act is to prevent injury to the public health, and while the test of misbranding of a food product under the act, section 8, is whether it is true to name, there should not be overstrictness in applying this test in a case where the public health cannot possibly be jeopardized. *Ninety-five Barrels, More or Less, Apple Cider Vinegar* v. *United States*---------- 1079

In the provision of the act, section 7, that no article shall be deemed adulterated "if it contains any added poisonous or other added deleterious ingredient which may render such article injurious to health", the words "injurious to health" must be considered and given their natural meaning, and the addition of an ingredient to an article of food which is poisonous in sufficient quantity does not constitute an adulteration unless the quantity used is such as may render the article injurious to health. *Lexington Mill & Elevator Co.* v. *United States*---------- 443

It is not required that the article of food containing added poisonous or other added deleterious ingredients must affect the public health, and it is not incumbent on the Government in order to make out a case to establish that fact. The act has placed upon the Government the burden of establishing, in order to secure a

INJURIOUS TO HEALTH—Continued. Page

verdict of condemnation under the statute, that the added poisonous or deleterious substance must be such as may render such article injurious to health. The word "may" is here used in its ordinary and usual signification, there being nothing to show the intention of Congress to affix to it any other meaning. In thus describing the offense Congress doubtless took into consideration that foods may be used in many ways. Food may be consumed by the strong and the weak, the old and the young, the well and the sick; and it is intended that if any food, because of any added poisonous or other deleterious ingredient, may possibly injure the health of any of these, it shall come within the ban of the statute. If it cannot by any possibility, when the facts are reasonably considered, injure the health of any consumer, such food may not be condemned under the act. *United States* v. *Lexington Mill & Elevator Co*---------- 577

United States v. *3,192 Boxes of Apples et al*---------- 1199

An article composed of shellac, containing arsenic, dissolved in alcohol, for use in coating candy, *held* adulterated under the act, section 7, declaring an article of food adulterated where it contains any added poisonous or other added deleterious ingredient which may render the article injurious to health, if the amount of arsenic was such that it would reasonably have a tendency to injure the health of a person eating candy coated with the article. *United States* v. *Weeks*---------- 528

An article of food composed of shellac, containing arsenic, dissolved in alcohol, for use in glazing candy is adulterated under the act, section 7, declaring an article of food adulterated if it contains any added poisonous or other added deleterious ingredient which may render such article injurious to health, though the amount of arsenic which could possibly be consumed by a person eating the glazed candy would be minute. The only question is, was there sufficient arsenic in the varnish to make it an article which "may be injurious to health"? *Weeks* v. *United States*---------- 650

Coloring materials for use in foods and drinks, allegedly containing an added poisonous and deleterious ingredient, to wit, arsenic, *held* not adulterated on the ground that the arsenic in the quantities present was not shown to be in fact poisonous, hurtful, or injurious to health. *United States* v. *W. B. Wood Manufacturing Co*---------- 1002

Where it was impossible to eliminate arsenic entirely from coloring material, the presence of such a small quantity that, when diluted as ordinarily used, it would take years to produce a dose of one-thirtieth of a grain, such as is ordinarily prescribed by physicians, *held* not to render the coloring material "injurious to health" within the act, section 7, subdivision 6. *W. B. Wood Manufacturing Co.* v. *United States*---------- 1070

In a prosecution charging adulteration of an article of food in that a substance has been substituted in part for such article, it is unnecessary that the Government prove that such substituted substance is deleterious or poisonous, or injurious to health. It is sufficient to constitute adulteration within the statute if any substance not a component part of the original article has been substituted. *United States* v. *Libby, McNeill & Libby*---------- 442

Under the act, section 7, declaring a food product adulterated if it consist in whole or in part of a filthy, decomposed, or putrid animal or vegetable substance, the interstate shipment of such product is prohibited whether or not its use would be injurious to health. *United States* v. *200 Cases of Adulterated Tomato Catsup*---------- 583

A. O. Andersen & Co. v. *United States*---------- 1053

United States v. *384 Cases of Canned Cherries*---------- 1176

United States v. *186 Boxes of Whole Tullibees and 116 Boxes of Dressed Tullibees*---------- 1342

In a proceeding for condemnation of a food product as adulterated within the provision of the act, section 7, declaring food adul-

INJURIOUS TO HEALTH—Continued. Page

terated if it consist in whole or in part of a filthy, decomposed, or putrid animal or vegetable substance, proof that the article would be injurious to health is not required. *United States* v. *200 Cases of Adulterated Tomato Catsup*---------- 583
A. O. Andersen & Co. v. *United States*---------- 1053

The test to determine whether food is adulterated under the act, section 7, providing that any article of food shall be deemed to be adulterated if it consists in whole or in part of a filthy, decomposed, or putrid animal or vegetable substance, is not whether the article is unwholesome or injurious to health. *Knapp et al.* v. *Callaway et al*---------- 1276

Shipment in interstate commerce of decomposed food products is prohibited under the act, without reference to the effect of the decomposition on the health of the consumer. Hence, in a libel proceeding to condemn a food product as decomposed within the meaning of the act, the Government is not required to show that it was, by reason of the decomposition, injurious to health; if the product is decomposed in the common, ordinary acceptation of the term, it comes within the inhibition of the statute, even though it would have no deleterious effect on the health of the consumer. *United States* v. *1,500 Cases of Tomato Pulp*---------- 892

Where canned cherries were adulterated within the meaning of the act in that they consisted in whole or in part of a filthy, decomposed, or putrid vegetable or animal substance by reason of the presence of decomposed and spotted cherries and of worms and larvae, *held* that evidence that the adulteration was such as to render the cherries injurious to health was unnecessary to subject them to condemnation. *United States* v. *384 Cases of Canned Cherries*---------- 1176

Oranges, frozen before shipment, which because of the freezing were undergoing decomposition and were rendered increasingly unfit for food and less wholesome, *held* adulterated and subject to condemnation under the act, though they were not harmful, if eaten. *United States* v. *462 Boxes of Oranges*---------- 816

Raw fish which, by reason of being infested with parasitic worms, come within the scope of the provision of the act, section 7, subdivision 6, that an article of food shall be deemed adulterated "if it consists in whole or in part of a filthy, decomposed, or putrid animal or vegetable substance, etc.", and are not excluded therefrom by absence of proof that their condition would impair the health of the consumer. *United States* v. *186 Boxes of Whole Tullibees and 116 Boxes of Dressed Tullibees*---------- 1342

In a proceeding to forfeit a shipment of shell peanuts as moldy or wormy, or both, and adulterated under the act, section 7, subdivision 6, declaring an article of food adulterated if it consist in whole or in part of a filthy, decomposed, or putrid vegetable substance, where it appeared that only a portion of the peanuts in the shipment were moldy or wormy, *held* that only such of the moldy or wormy peanuts were subject to forfeiture as were found as a matter of fact filthy, or as matter of fact decomposed, or as a matter of fact putrid, vegetable substance, and, if any of these three, then only if it were found that their consumption as food might tend to be injurious to health. *United States* v. *350 Bags of Shell Peanuts*---------- 685

In a proceeding against oysters as adulterated because they were filthy, the question whether or not the oysters were healthful held not involved under the statute. *United States* v. *408 Bushels of Oysters*---------- 718

Under the provision of the act, section 7, declaring an article of food adulterated if it consists in whole or in part of a filthy, decomposed, or putrid animal or vegetable substance, Congress has not limited or restricted the Government's right of condemnation and forfeiture to such article as is found to be so adulterated to an extent that renders it deleterious to health. *United States* v. *1,367 Cases of Pork and Beans*---------- 766

INJURIOUS TO HEALTH—Continued. Page

In a proceeding to forfeit canned pork and beans because the product consisted in whole or in part of a decomposed vegetable substance, *held* that whether or not the product was unfit for human food, or would be deleterious to health, if eaten, was immaterial, and the Government was not required to prove the affirmative as to either. *United States* v. *1,367 Cases of Pork and Beans* 766

Tomato catsup, if filthy or decomposed, is adulterated within the meaning of the act, whether or not it is thereby rendered injurious to health in the sense of being poisonous. *United States* v. *720 Cases of Tomato Catsup* 877

In a proceeding for condemnation of canned salmon as adulterated under the provision of the act declaring an article of food adulterated if it consist in whole or in part of a filthy, decomposed, or putrid animal substance, *held* immaterial whether or not the salmon was hurtful or harmful to health. *United States* v. *1,195 Cases of Canned Salmon* 1099

In a proceeding to condemn canned salmon on the ground that it was adulterated in that it consisted in whole or in part of a filthy, decomposed, or putrid animal substance, *held* unnecessary for the Government, in order to obtain a verdict in its favor, to show that the salmon would be injurious to the health of the individual eating it; but that the question was whether the salmon was unwholesome to such an extent that it would not satisfy the ordinary requirements of the commercial world; and if it was, then it should be condemned, but if it was not, then it should not. *United States* v. *1,600 Cases of Canned Salmon* 1105

In a proceeding against shipments of canned salmon charging adulteration under the act, section 7, subdivision 6, in that the salmon was in whole or in part decomposed, *held* that it was improper for the jury to consider any evidence tending to show that the salmon was fit for food and healthful or was unfit for food and harmful, and that it was immaterial whether the salmon was fit for food and healthful or was not; there being nothing in the statute making the state of the healthfulness or the edibleness of the article relevant to the inquiry. *United States* v. *2,205 Cases of Canned Salmon* 1133

In a prosecution charging adulteration of a medicinal drug in that the article was sold under or by a name recognized in the United States Pharmacopoeia and differed from the standard of strength, quality, and purity as determined by the test laid down in said Pharmacopoeia, *held* unnecessary for the Government to show that the adulteration complained of was deleterious and injurious to the health of the user and consumer. *United States* v. *G. F. Harvey Co* 754

A drug containing alcohol and used as an inhalant, *held* not exempt from the provision of the act requiring a declaration on the label of the alcoholic content, though the drug was harmless and not detrimental to health. *United States* v. *11 Cartons of Drug Labeled In Part "Vapex"* 1332

In a libel proceeding against an article of drugs for misbranding in that the label, etc., contained statements regarding the curative or therapeutic effect of the article which were false and fraudulent, *held* that it was unnecessary for the Government in order to prevail, to prove that the article was injurious in any respect, nor would the jury be justified in finding for the claimant on the ground that the article was harmless, such question not being in issue. *United States* v. *539 Boxes and 322 Cartons of Wm. Radan's Microbe Killer* 511

On the issue of misbranding of drugs by false and fraudulent statements regarding the curative or therapeutic effect of the article, the question whether the article would be harmful or harmless is immaterial. *United States* v. *One Gross Packages of "A Texas Wonder"* 910

United States v. *Long* 989

INTENT OF THE ACT.

See Object of the Act; Purpose of the Act.

INTERSTATE COMMERCE:

The act, section 2, prohibits the introduction into any State of any article of food or drugs adulterated or misbranded, and provides that any person who shall ship or deliver for shipment from any State to any other State any such adulterated or misbranded article shall be guilty of a misdemeanor. *Held* that, since the statute relates solely to interstate commerce, no jurisdiction to prosecute for violation of the act can be acquired except through the existence of interstate commerce. *United States* v. *J. L. Hopkins & Co* ---------- 401

United States v. *Gandara* ---------- 984

The act, section 10, provides, in the alternative, that any article of food adulterated or misbranded within the meaning of the act, and is being transported from one State, etc., to another for sale, or having been transported, remains unloaded, unsold, or in original unbroken packages, shall be liable to be proceeded against by libel for condemnation. The words "having been transported" contemplate a transportation in interstate commerce, and not from one point in a given State, Territory, District, or insular possession to another point in the same State, Territory, District, or possession. *United States* v. *46 Packages and Bags of Sugar* ---------- 168

Neither a sale nor the place of sale and delivery is alone the test of interstate commerce, nor does transportation, although an adjunct essential to commerce, constitute a transaction of interstate commerce. A sale, the parties to which are from different States, is a transaction of interstate commerce, wherever the contract of sale may be made, when the goods are to be transported from one State to another, whether the sale is made before or after shipment. The indispensable element and test of interstate commerce is importation into one State from another. Every negotiation, contract, initiatory and intervening act, trade, and dealing between citizens of any State, or Territory, or the District of Columbia, with those of another political division of the United States, which causes such importation, is a transaction of interstate commerce. *United States* v. *Tucker* ---------- 248

The act *held* not a police regulation, but a proper act for the regulation of interstate commerce. *Shawnee Milling Co.* v. *Temple, United States District Attorney, et al* ---------- 106

Where a drug preparation was shipped in casks by the manufacturing agent in one State to the owner of the secret formula for its manufacture in another State, to be bottled and labeled by the owner before being offered for sale, *held* that the shipment was not made in interstate commerce within the meaning of the act, and was not subject to seizure under section 10 because the casks containing the preparation were not labeled so as to show the quantity or proportion of alcohol contained therein. *United States* v. *65 Casks of Liquid Extracts* ---------- 47

Affirmed, *United States* v. *Knowlton Danderine Co* ---------- 89

Where defendant shipped adulterated tomato paste from its place of business in one State to itself at its other place of business in another State, for the purpose of having it tested with a view to export, *held* such shipment was in interstate commerce and constituted an offense against the act. *Philadelphia Pickling Co.* v. *United States* ---------- 451

INTERSTATE COMMERCE—Continued. Page

The fact that frozen eggs proceeded against had been shipped from one State to another, consigned by the shipper to itself, did not indicate that they had not been transported in interstate commerce. *United States* v. *300 Cans of Frozen Eggs*---------- 283

A manufacturer who sells and delivers an adulterated article of food to a wholesaler with knowledge that the latter is engaged in interstate commerce, and upon the terms of a guaranty against adulteration, deliberately places the article in interstate commerce channels, and is within the Food and Drugs Act punishing the sale and delivery in interstate commerce of adulterated food. *Glaser, Kohn & Co.* v. *United States*---------- 651

It is settled by decisions of the Supreme Court that the negotiation of sales of goods which are in another State, for the purpose of introducing them into the State in which the negotiation is made, is interstate commerce. *Weeks* v. *United States*---------- 867

The sending or shipping of articles of drugs by mail from a point in one State to a point in another State constitutes an interstate shipment within the act, and, where such articles are misbranded, an offense against the act. *United States* v. *Tucker*---------- 248

United States v. *Gandara*---------- 984

Where defendant in Ohio sent a misbranded medicine by mail to a person in the District of Columbia, *held* the transaction was in interstate commerce and constituted an offense against the act, and the fact that the negotiations had been conducted by mail and that the medicine was deposited in the mail in Ohio did not make the transaction an intrastate one. *United States* v. *Tucker*------ 248

The State has power to make regulations for the protection of its people against fraud or imposition by impure food or drugs, but the State may not, under guise of exercising its police power or otherwise, impose burdens upon or discriminate against interstate commerce, nor may enact legislation in conflict with the statutes of Congress passed for the regulation of the subject, and if it does, to the extent that the State law interferes with or frustrates the operation of the acts of Congress, its provisions must yield to the superior Federal power given to Congress by the Constitution. *McDermott et al.* v. *State of Wisconsin*---------- 473

The doctrine of original packages was not intended to limit the right of Congress, when it chose to assert it, as it has done in the Food and Drugs Act, to keep the channels of interstate commerce free from the carriage of injurious or fraudulently branded articles and to choose appropriate means to that end. The legislative means provided in the Federal law for its own enforcement may not be thwarted by State legislation having a direct effect to impair the effectual exercise of such means. Id.

Congress had the power to enact the provisions of the act, section 10, under which adulterated articles of food, transported in interstate commerce, may be confiscated by a proceeding in rem in the Federal courts after they have reached their destination and there remain in the hands of the consignee in the original unbroken packages. *Hipolite Egg Co. v. United States*---------- 223

The Sherley amendment of August 23, 1912, to section 8 of the Food and Drugs Act, under which misbranding includes false and fraudulent statements regarding the curative or therapeutic effects of drugs, is within the power of Congress to regulate interstate and foreign commerce; and such regulation of interstate commerce is within the power of Congress whether the statement be contained in the original package or on the containers of the article. *Seven cases of Eckman's Alterative* v. *United States*---------- 707

A State cannot, under cover of exerting its police power, directly regulate or burden interstate commerce, and no State statute which even affects incidentally interstate commerce is valid if repugnant to the Food and Drugs Act; but a police regulation of a State which has real relation to the proper protection of the people of the State, and is reasonable in its terms, and does not

INTERSTATE COMMERCE—Continued. Page

conflict with any valid act of Congress, is not unconstitutional because it may incidentally affect interstate commerce. *Savage* v. *Jones*---------- 376

See Constitutionality of the Food and Drugs Act; Constitutionality of State Laws; Jurisdiction; Original Unbroken Package; Physicians' Prescriptions; Police Regulation; Sale; Shipment.

INVESTIGATION:

The word "investigation" used in section 7 of the act, providing that a drug shall be deemed to be adulterated if, when sold under a name recognized in the United States Pharmacopoeia, it differs from the standard of strength, quality, or purity as determined by the test laid down in said pharmacopoeia official at the time of *investigation*, is not necessarily identical with the word "examination" used in section 4. Investigation is much the wider word; it includes not only an examination into the nature of the article shipped, but into all the circumstances of the shipment. The examination of the article itself is but a part of the investigation which must necessarily be held, to ascertain the matters necessary to the formulation and proof of an information or indictment. *United States* v. *Lehn & Fink*---------- 229

The function and duty of officials of the Department of Agriculture, under section 4 of the act, are those of investigation. The findings and conclusions with respect to adulteration and misbranding are merely tentative and not binding. They are not a regulation or an order, but merely the assertion of an opinion that the law has been violated and that proceedings in the name of the United States as directed by statute should be instituted. *United States* v. *Morgan*- 335

National Remedy Co. v. *Hyde, Secretary of Agriculture, et al*---- 1272

The investigation by the Department of Agriculture, including notice and opportunity to be heard, provided for in section 4 of the act, is a necessary condition precedent to the institution of condemnation proceedings under section 10, where they are based on a report of the Secretary of Agriculture. *United States* v. *74 Cases of Grape Juice*---------- 144

United States v. *74 Cases (Or 20 Cases) of Grape Juice*---------- 256

United States v. *Certain Cans of Syrup*---------- 328

The investigation provided for in section 4 of the act refers to cases in which there is to be a prosecution under section 5 for the enforcement of penalties prescribed by section 2, and not to cases where forfeiture proceedings are contemplated for condemnation, as authorized by section 10; so that it was no objection to forfeiture proceedings that no prior proceedings had been instituted by the Secretary of Agriculture under section 4. *United States* v. *100 Barrels of Vinegar*---------- 287

An indictment for misbranding an article under the act was not invalid for failure to allege a preliminary investigation by an officer of the Department of Agriculture, notice to defendants of their violation of the act, or that defendants were afforded an opportunity to present evidence and be heard. *Schraubstadter et al* v. *United States*---------- 398

See Analysis; Examination; Notice and Opportunity to be Heard; Pharmacopoeia, United States; Samples.

JUDICIAL NOTICE:

The court may take judicial notice of the fact that food syrup is a saccharine solution of a superior quality, frequently called molasses, and that it may be made of any of the various sugars of commerce, such as cane, beet, or maple sugar. *United States* v. *68 Cases of Syrup*---------- 62

Judicial notice will be taken of the fact that good, sound wheat of the best variety, properly and timely harvested, put through the sweat in the stack, well ground and bolted, makes nutritious, wholesome, and white flour. *Shawnee Milling Co.* v. *Temple et al*-- 106

JUDICIAL NOTICE—Continued. Page

Judicial notice will be taken of the fact that screening or sifting is one of the processes of catsup making. *United States* v. *650 Cases of Tomato Catsup* 31

Judicial notice may be taken of the fact that cider vinegar is far superior to distilled vinegar. *United States* v. *10 Barrels of Vinegar* 254

The court may take judicial notice that standard lexicographers define the words "salad oil" as "olive oil." *Von Bremen et al.* v. *United States* 338

The court may take judicial notice of the nature of the substances declared to be adulterants by section 7 of the act, in case of confectionery. *United States* v. *French Silver Dragée Co* 43

It is a matter of common knowledge that in the fine wheat flour of commerce much of the nutritive property of the grain is absent, which remains in whole wheat flour. *United States* v. *Krumm* 993

It is a matter of common knowledge that water in milk reduces and lowers its strength. *United States* v. *Griebler* 29

Union Dairy Co. v. *United States* 869

The court takes judicial notice of the fact that the raising of citrus fruits is one of the great industries of the State of Florida. *Sligh* v. *Kirkwood* 634

It is common knowledge that generally the wild oat plant is regarded as a weed, in the sense that it is highly undesirable vegetation, and that the seed of the wild oat is not a food. *United States* v. *154 Sacks of Oats* 1039

It is not a matter of common knowledge of which the court may take judicial notice without proof, that a chemical derivative, as acephenetidin, necessarily contains, or is of the same nature as, the substance whence it may be derived, as acetanilid. *United States* v. *Antikamnia Chemical Co* 260

It is a matter of common knowledge that proprietary medicines in bottles are usually sold to the consumer in cartons, and that the latter usually contain circulars or other advertising matter. *Simpson* v. *United States* 832

Where a court is required to take judicial notice of the meaning of a term as a matter of law, it may resort to any authoritative sources of information to enlighten its judgment. *United States* v. *One Carload of Corno Horse and Mule Feed* 274

JURISDICTION:

Under section 2 of the act no jurisdiction to prosecute for violation thereof can be acquired except through the existence of interstate commerce. *United States* v. *J. L. Hopkins & Co* 401

Under section 2 of the act the gist of the offense is shipping or delivering for shipment of adulterated or misbranded food or drugs, to be introduced into another State by interstate commerce, and, hence, jurisdiction exists in the Federal court of the district from which the goods were shipped, though the defendant did not reside in that district. Id.

The provision of section 10 of the act, for the seizure of adulterated or misbranded food or drugs within any district where they may be found, relates only to civil proceedings against the goods, and does not determine the jurisdiction of a criminal prosecution. Id.

The Police Court of the District of Columbia is a "proper court of the United States", within the meaning of the act, section 5, which requires United States attorneys to whom violations of the act are reported "to cause appropriate proceedings to be commenced and prosecuted in the proper courts of the United States" for the enforcement of the penalties provided by the act; and said court has statutory jurisdiction of first offenses under the act. *Huyler's* v. *Houston* 507

Affirmed, *Huyler's* v. *Houston* 572

The provision of section 10 of the act that proceedings in cases to forfeit adulterated or misbranded food or drugs shall conform as

JURISDICTION—Continued. Page

near as may be to proceedings in admiralty, does not render such proceedings within the admiralty or maritime jurisdiction; the jurisdiction in such cases is conferred by the act itself. *United States* v. *Two Barrels of Desiccated Eggs*---- 232

The act does not confer admiralty jurisdiction upon the district courts in proceedings to condemn property under the act. The provision of section 10 that a libel shall be filed and the proceedings shall conform as near as may be to proceedings in admiralty, relates only to procedure and not to jurisdiction. *Goodwin et al.* v. *United States*---- 1130

Under Revised Statutes, section 563, subdivision 8, giving United States district courts jurisdiction of all civil cases in admiralty or maritime jurisdiction, the court, in seizures under section 10 of the Food and Drugs Act, and on land, proceeds as a court of common law jurisdiction on a trial by jury. *United States* v. *George Spraul & Co*---- 217

Certain cans of adulterated preserved whole eggs, shipped from one State to another but not for sale, and, when seized, stored on the premises of the owner, and in the original unbroken packages in which they were shipped, and not intended for sale but for use by the owner in its bakery business, *held* to be subject to the jurisdiction of the court in a proceeding in rem under section 10 of the act. *United States* v. *50 Cans of Preserved Whole Eggs*---- 74

Affirmed, *Hipolite Egg Co.* v. *United States*---- 223

Under the act adulterated articles are, while in interstate commerce, made culpable as well as their shipper; while in the original unbroken packages, they can be seized and they carry their own identification as contraband of law; they are subject to the power of Congress to regulate interstate commerce, and they are not beyond the jurisdiction of the National Government because within the borders of a State. *Hipolite Egg Co.* v. *United States*---- 223

Under section 10 of the act providing for seizure and forfeiture of adulterated food shipped from one State to another for sale, or, having been so transported, remains unsold, in the original unbroken packages, etc., the jurisdiction of the Federal Government over interstate commerce of adulterated food continues while the food remains in the original unbroken packages at the point of destination. *United States* v. *Two Barrels of Desiccated Eggs*---- 232

Congress having, in the act, made adulterated or misbranded articles of food or drugs contraband of interstate commerce, in section 10 has provided not only for the seizure of such articles while being actually transported in interstate commerce, but also for such seizure after such transportation and while such articles remain "unloaded, unsold, or in original unbroken packages", and the provisions of section 10 are clearly within the power of Congress under its authority to make effectual regulations to keep impure or misbranded articles out of the channels of interstate commerce, and are measures essential to the accomplishment of the purpose of the act. Hence, it is enough to give the Federal Government jurisdiction over adulterated or misbranded articles of food or drugs which have been transported in interstate commerce, if they remain unsold, whether in the original unbroken packages or not. *McDermott et al.* v. *State of Wisconsin*---- 473

In a proceeding in rem under section 10 of the act the court has jurisdiction to enter personal judgment for the costs against the claimant, and stipulation by the owner intervening is unnecessary to give the court such jurisdiction. *United States* v. *50 Cans of Preserved Whole Eggs*---- 74

Affirmed, *Hipolite Egg Co.* v. *United States*---- 223

The provision in section 10 of the act that proceedings for seizure of goods shall be by libel and conform as near as may be to proceedings in admiralty, does not include appellate proceedings; the action of the district court on the libel can be reviewed only as at common law, by writ of error and not by appeal; and the circuit courts of appeals have no jurisdiction upon an appeal in such cases,

JURISDICTION—Continued. Page

and neither the action of the court nor the consent of the parties could give such jurisdiction. *443 Cans of Frozen Egg Product* v. *United States* 416
United States v. *779 Cases of Molasses* 65
United States v. *Hudson Manufacturing Co. et al* 420
Hudson Manufacturing Co. v. *United States* 344
Goode v. *United States* 698

Where the validity of a regulation made by the three Secretaries to whom power to make regulations is delegated by section 3 of the act, is denied, an authority exercised under the United States is drawn in question, and not merely the construction of a statute, and the Supreme Court has jurisdiction to review the judgment of the Court of Appeals of the District of Columbia. *United States* v. *Antikamnia Chemical Co* 552

In proceedings for condemnation and forfeiture under section 10 of the act, seizure of the goods proceeded against is jurisdictional and must precede filing of the libel. *United States* v. *8 Packages and Casks of Drugs* 149

Prior executive seizure of goods proceeded against under section 10 of the act is unnecessary to confer jurisdiction to condemn and forfeit the same. *United States* v. *Two Barrels of Desiccated Eggs* 232
United States v. *George Spraul & Co* 217
United States v. *100 Barrels of Vinegar* 287

JURY TRIALS:

The right to trial by jury granted by section 10 of the act, on demand of either party, is absolute, and means a trial by jury according to the established practice in courts of common law. *United States* v. *779 Cases of Molasses* 65

Under the Constitution of the United States, article 3, section 2, which provides that trial of all crimes, except impeachment, shall be by jury, if an offense amounting to a crime should not be tried by jury, the judgment would be a nullity and would require reversal. The trial of a "petty offense" under waiver of jury would amount to an arbitration as to questions of fact involved, and the court's conclusions of fact could not be reviewed. *Frank et al.* v. *United States* 329

See Appeal and Error; Petty Offense.

JUSTICES OF THE PEACE.

KAR-KOL:

A medicinal preparation labeled "Kar-Kol" *held* misbranded in that the label bore statements regarding the curative or therapeutic effect of the article which were false and fraudulent. *United States* v. *Kar-Ru Chemical Co* 900
Affirmed, *Kar-Ru Chemical Co.* v. *United States* 970

KAR-NITUM:

A medicinal preparation labeled "Kar-Nitum" *held* misbranded in that the label bore statements regarding the curative or therapeutic effect of the article which were false and fraudulent. *United States* v. *Kar-Ru Chemical Co* 900
Affirmed, *Kar-Ru Chemical Co.* v. *United States* 970

KAR-RU:

A medicinal preparation labeled "Kar-Ru" *held* misbranded in that the label bore statements regarding the curative or therapeutic effect of the article which were false and fraudulent. *United States* v. *Kar-Ru Chemical Co* 900
Affirmed, *Kar-Ru Chemical Co.* v. *United States* 970

KELLETT'S OIL OF EDEN NO. 1:

Page

A medicinal preparation labeled "Dr. J. L. Kellett's Oil of Eden No. 1" *held* misbranded in that the labels, the packages, and circulars in the packages contained statements regarding the curative or therapeutic effect of the article which were false and fraudulent. *United States* v. *Kellett*---------- 711

KELLETT'S SWEET SPIRITS OF EDEN:

A medicinal preparation labeled "Dr. J. L. Kellett's Sweet Spirits of Eden" *held* misbranded in that a statement, on the labels, of the proportion of alcohol in the article, was false and misleading; and in that the labels, the packages, and circulars in the packages, contained statements regarding the curative or therapeutic effect of the article which were false and fraudulent. *United States* v. *Kellett*---------- 711

KNOWLEDGE AND INTENT:

The act nowhere requires proof of intention by the use of the words "knowingly", "willfully", or such like words. It would be destructive of the act, nullify it entirely, to allow the intent of the person violating it to be considered as a defense. *United States* v. *36 Bottles of London Dry Gin*---------- 570
United States v. *Koshland*---------- 777

In a prosecution charging misbranding of an article of food as labeled so as to deceive or mislead the purchaser, *held* that the question of the actual intention of defendant to deceive was immaterial, and that the sole question was whether the label, taken as a whole, was reasonably calculated to deceive or mislead the average purchaser of the article. *United States* v. *Johnson et al*-- 847

In a prosecution charging misbranding of an article of food, *held* that the question of defendant's intent or purpose in misbranding the article, if misbranded, was immaterial; the sole question was whether the article was misbranded as charged. *United States* v. *Scaduto*---------- 947

In determining whether an article of food is misbranded by alleged false or deceptive label, the question of what the seller intended is immaterial; the question is, what would be the effect of the label on the minds of purchasers—would they be deceived and misled into thinking they were getting something they did not get. *United States* v. *37 One-Pound Packages of Colors*---------- 1165

In a prosecution charging defendant with shipping milk adulterated because it contained water, it is unnecessary to prove that defendant actually put the water in the milk himself, or that he knew that there was water in the milk. Under the act, which is for the protection of the consuming public, a person who undertakes to ship food products must be held to know what it is he puts into commerce and must know at his own peril what it contains. *United States* v. *Griebler*---------- 29

On a charge that an article shipped by defendant in interstate commerce as oil of birch was adulterated and misbranded by reason of containing methyl salicylate, *held* that the jury, in order to convict, must find that defendant knew or had reason to know that the article so shipped contained methyl salicylate and was adulterated or misbranded, as alleged. *United States* v. *Bowers*-- 763

In a prosecution charging defendants with shipping milk allegedly adulterated in that water had been mixed therewith and substituted in part therefor, *held* requisite to conviction that it be shown that defendants intentionally added and mixed water with the milk or that it was done with their knowledge or consent. *United States* v. *Tetz et al*---------- 917

In a prosecution charging defendant with shipping an article of food allegedly misbranded because the quantity of the contents of the package was less than that represented on the label, *held* that the jury, in order to convict, must find that defendant intended to misbrand or misstate the true quantity of the contents of the package. *United States* v. *Italian Importing Co*---------- 922

KNOWLEDGE AND INTENT—Continued. Page

In a prosecution of an information charging defendant with shipping an article contained in a barrel bearing the label "Vanilla Extract", and alleging adulteration and misbranding because the article was not vanilla extract as described on the label, but was a substance containing coumarin, commercial glucose, and caramel, *held* that the jury, in order to convict, must find that defendant authorized or countenanced the putting of the label containing the alleged misbrand on the barrel containing the article, knowing that it was to be so misbranded. *United States* v. *Weeks*_ 528

In a prosecution charging defendants with shipping olive oil alleged to be adulterated by reason of mixture therewith of cottonseed oil, *held* esential to a conviction that the jury find that defendants either so adulterated the article themselves or knew or had good reason to believe it was so adulterated at the time of shipment. *United States* v. *Marmarelli et al*_____ 1122

On an information charging defendant with shipping butter allegedly misbranded because the weight of the contents of the package was misstated on the label, *held* that if the jury find that the butter when it left defendant's place of business was full weight, and that the shortage, if any, was due to the physical condition of the butter and beyond defendant's control, they must acquit. *United States* v. *Monotti-Larimer*_____ 1144

In a prosecution under the act for the giving of a false guaranty the criminal intent essential to the commission of the offense existed at the time the defendant gave the certificate specifying that it was under the act of June 30, 1906, and such a certificate could only be given for the purpose of evading the act of Congress or of fraudulently securing its benefit. *United States* v. *Charles L. Heinle Specialty Co*_____ 82

Proof of the absence of knowledge on the dealer's part that an article is obnoxious to some of the provisions of the act is a defense only when the article is purchased from a manufacturer and a guaranty is taken from the manufacturer that it complies with the requirements of the act. *United States* v. *Mayfield et al*_____ 90

In a prosecution against the manufacturer of an allegedly adulterated article of food delivered by defendant under a guaranty to a dealer who shipped it in interstate commerce, *held*, that the question of defendant's intent or knowledge was not involved, and that it was unnecessary that the Government show that defendant intentionally adulterated the article, or that defendant knew at the time it delivered the article to the dealer that the article was adulterated, and that the only question was whether the article was adulterated at the time of such delivery. *United States* v. *Glaser, Kohn & Co*_____ 601

In a libel proceeding to forfeit certain gin, charging misbranding under the provision of the act, section 8, that the term "misbranded" shall apply to any food product which is falsely branded as to the country where it is produced, *held* that the charge would be sufficiently sustained by evidence showing that the label did not tell the truth as to the country where the gin was produced, and that it was immaterial whether the failure to tell the truth was the result of design or was merely unintentional or accidental, since Congress by the act has chosen to punish failure to tell the truth in such respect. *United States* v. *36 Bottles of London Dry Gin*____ 489

In a libel proceeding to forfeit certain gin charging misbranding in that the label was calculated to deceive and mislead the purchaser of the article into believing that it was a foreign product when it was not, *held* that the jury in order to find in favor of the Government on the charge, must find that the maker of the gin in using the label intended to deceive or mislead the purchaser by representing the gin to be a foreign product when it was not. Id.

In a proceeding against certain "London Dry Gin" for misbranding in that the gin was not made in London, the jury having found that such name had reference to a distinct kind of gin, which

KNOWLEDGE AND INTENT—Continued. Page

need not necessarily be made in London, and that in using the label the maker did not intend to deceive or mislead the purchaser by representing that the gin was a foreign product, the Government was not entitled to a judgment of condemnation. Id.

Judgment reversed, *United States* v. *36 Bottles of London Dry Gin*---------- 570

In a proceeding for condemnation of alleged misbranded gin under the act, section 8, providing that an article shall be deemed misbranded if it be labeled or branded so as to deceive or mislead the purchaser or purport to be a foreign product when it is not so, the intent of the maker not to deceive is immaterial, the gist of the offense being whether the label deceives or is calculated to mislead and deceive the purchaser. *United States* v. *36 Bottles of London Dry Gin*---------- 570

Reversing judgment in *United States* v. *36 Bottles of London Dry Gin*---------- 489

The intent follows from the act. The true construction of the Food and Drugs Act is that the dealer or manufacturer sells a commodity at his peril and he is bound to understand the ingredients of the products. *United States* v. *Hobart et al*---------- 171

The act does not expressly provide that shippers or dealers must knowingly or wilfully violate its provisions, but if a false label was placed on an article inadvertently or by a mistake by an employee, the defendant should not be held guilty of misbranding. *United States* v. *S. Gumpert et al*---------- 182

The question whether or not the defendant in a case prosecuted under section 2 of the act, intended to violate the law does not enter into the case. The question is, was the law violated? *United States* v. *Gidden*---------- 360

United States v. *J. L. Hopkins & Co*---------- 366

United States v. *Koshland*---------- 777

United States v. *Taylor*---------- 839

An article of food or drugs which is adulterated or misbranded is an offending thing which threatens the health of the citizen, and is therefore subject to seizure and forfeiture without regard to the acts or knowledge of the owners or claimants. *United States* v. *Five Boxes of Asafoetida*---------- 160

United States v. *Nine Boxes of Asafoetida*---------- 165

In determining whether an article of food is labeled or branded so as to deceive or mislead the purchaser, the question of intent does not enter into the case. *United States* v. *58 Sacks and 70 Sacks Corn Meal*---------- 322

United States v. *Johnson et al*---------- 847

In a prosecution charging defendant sold and shipped wheat as "No. 2 Red wheat" alleged to be adulterated and misbranded because it was a mixture containing hard wheat of inferior quality, *held* that it was no defense that defendant did not know that such wheat was being shipped, and that it had no intention of shipping wheat of any other quality or variety than No. 2 Red wheat. *United States* v. *Hall-Baker Grain Co*---------- 291

Reversed, *Hall-Baker Grain Co.* v. *United States*---------- 391

The H. Co., Kansas City, Mo., contracted to sell to the W. Co., Fort Worth, Tex., a quantity of No. 2 Red wheat, according to Missouri officials State standards, and ordered the operator of a public elevator where it stored its grain to ship to the W. Co. in fulfillment of this contract. The operator shipped wheat which was inspected by an official inspector of the State of Missouri and adjudged and certified to be No. 2 Red wheat. On arrival of the wheat in Texas, a Texas inspector, a Federal inspector, and other witnesses found it to be, and it was, wheat of another and less valuable grade. None of the officers or employees of the H. Co. had any knowledge of this fact, or anything to do with the grading or shipping except to order the operator of the public elevator to ship No. 2 Red wheat. *Held*, the H. Co. was not guilty of misbranding or of adulteration within the meaning of sections 7 and 8 of the act. *Hall-Baker Grain Co.* v. *United States*---------- 391

Reversing *United States* v. *Hall-Baker Grain Co*---------- 291

KNOWLEDGE AND INTENT—Continued. Page

In a prosecution charging misbranding of a drug by a false and misleading statement of the quantity of chloroform contained therein, *held* immaterial whether or not defendant intended the false or misleading statement, since, under the act, one who makes such a statement on the label of his article sent out to the public is bound to know whether it is true or not. *United States* v. *Piso Co*_____ 319

The object of the act is to enable the consumer to know what it is in the way of food or drugs that he is putting into his stomach, and to punish anybody who, whether by willful design or carelessness or inadvertence—it makes no difference which—puts forth for human consumption as food or drug that which is not what it pretends to be. *United States* v. *Lehn & Fink*_____ 411

Since a person is presumed to intend the natural and probable consequences of his acts, one using a deceptive or misleading label on an article of food may be convicted of misbranding, even though he had no actual intent to deceive or to mislead. *United States* v. *McConnon & Co*_____ 496

The purpose of the act, section 8, providing that an article of food shall be deemed misbranded if it be labeled or branded so as to deceive or mislead the purchaser, or purport to be a foreign product when not so, is to protect the public from deception, and the intent of one charged with misbranding is immaterial. *United States* v. *267 Boxes of Macaroni*_____ 630

In a prosecution under the act for shipping adulterated or misbranded articles of food or drugs, it is not necessary to conviction to prove the knowledge of the defendant that the article shipped was adulterated or misbranded. *United States* v. *Excelsior Baking Co*____ 501

Where decomposed canned eggs, which had not been denatured and therefore could have been used either for food or tanning purposes, were shipped in interstate commerce from one warehouse of the owner to another, they were "an adulterated article of food" within the definition and meaning of the act, and it was no defense to a proceeding to condemn them that the owner intended that they should be used only for tanning purposes. *United States* v. *13 Crates of Frozen Eggs*_____ 531

Decayed frozen eggs taken from the shell and mixed together are within the prohibition of the act, section 2, which prohibits the transportation from one State to another of any adulterated article of food, and the intent of either the shipper or the consignee is immaterial. The act could not be enforced if the Government is compelled, in the case of articles clearly prohibited from interstate commerce, to establish the wrongful intent of the parties. It is enough that such articles are prohibited. All that was necessary for the Government to show was that an adulterated article of food had been transported in interstate commerce. *United States* v. *13 Crates of Frozen Eggs*_____ 605

Defendant shipped an adulterated article of food from its place of business to itself at its other place of business in another State, for the purpose of having it there examined and tested with a view to its export to England if it conformed to the English standard, which would have been lawful under the proviso of the act, section 2. It failed to meet the test and was destroyed, not being used nor sold. *Held*, that the shipment was in interstate commerce, and constituted an offense under said section of the act. *Philadelphia Pickling Co.* v. *United States*_____ 451

Affirming *United States* v. *Philadelphia Pickling Co*_____ 414

Since intent is not an element of offense against the act, a seller of an article of food so represented by his agent to the buyer as to be misbranded, is liable for misbranding, although he told him not to misdescribe the article. *Weeks* v. *United States*_____ 646

On trial of an information charging defendant with shipping an article of food labeled "Grain Alcohol Varnish" adulterated in that it contained an added poisonous and deleterious ingredient, to wit, arsenic, which might render said article injurious to health, *held* that guilty intent was not part of the offense charged and it

KNOWLEDGE AND INTENT—Continued. Page

was unnecessary to prove that defendant knew the nature of the product shipped. The statute makes the acts that are defined to be penal in themselves criminal. Whether or not defendant intended to ship the adulterated article as alleged is immaterial. The question is: Did he do so? *United States* v. *Weeks*_____ 528

A seller of an article of food labeled "Grain Alcohol Varnish", composed of shellac, containing arsenic, dissolved in alcohol, for use for glazing candy, with knowledge of the use, may be convicted of violating the act, section 7, declaring that an article of food is adulterated if it contain any added poisonous or other added deleterious ingredient which may render such article injurious to health, though all shellac imported into the United States contains the added arsenic, and though the seller supposed that the amount of arsenic consumed with the varnished candy would be too minute to injure anyone. *Weeks* v. *United States*_____ 650

The manufacturer of drug products who compounds them and puts them on the market in interstate commerce is bound at his or its peril to see to it that they are up to the standard fixed by law not only when made and shipped, but are so compounded and put up for sale that they will be of the required standard when shipped in interstate commerce for sale to the consumer or user. *United States* v. *G. F. Harvey Co*_____ 754

On an information charging defendant with shipping in interstate commerce a drug product which was adulterated and misbranded because it fell below the standard required under the act, *held* that no question of intent was involved in the case, nor any question, necessarily of evil mind or purpose; and that the question was not whether or not defendant *intended* to comply with the law, but whether it *did* comply with the law; and that it was no defense to the charge in the information that defendant intended to bring the drug product up to the required standard, and supposed and honestly believed it had done so, when it made the shipment complained of. Id.

In a prosecution charging defendant with shipping apples which were adulterated and misbranded, *held* that the question of the intent of defendant or his motive with respect to the labels or brands placed upon the packages, was immaterial; and that the question was: Were the apples adulterated and were they misbranded within the meaning of the act? *United States* v. *Wedell*_____ 771

In a prosecution for shipping an adulterated or misbranded article of food or drugs it is unnecessary to prove that the defendant had knowledge that the article shipped by him was obnoxious to some provision of the act. He is charged with knowledge of the condition of the article. *United States* v. *Koshland*_____ 777

The purpose of the act being to protect the public in the purchase of articles of food, and to prevent deceit, in a prosecution of a manufacturer for shipping a misbranded article of food, the question of what was the intention or purpose of the defendant is immaterial. Whatever was defendant's intention or purpose, and though he was absolutely innocent of any intention to defraud or deceive, yet, if the article differs in composition from that represented on the label, defendant is guilty. *United States* v. *Joslin-Schmidt Co*_____ 881

The statute denounces the act of shipping in interstate commerce an adulterated or misbranded article of food. It does not make the intent with which the act is done an ingredient of the offense. It places upon the person committing the act the necessity of knowing that he is not violating the statute. It is, therefore, no defense, in a prosecution for shipping an adulterated and misbranded article of food, that defendant did not know the article was adulterated or misbranded. *United States* v. *Alban*_____ 1014

The act does not require a specific criminal intent upon the part of the defendant to be shown in order to convict in a prosecution charging him with shipping an adulterated or misbranded food product. It is sufficient to show that defendant knowingly did

KNOWLEDGE AND INTENT—Continued. Page

or committed the prohibited act. The question, therefore, is, did defendant ship the goods knowing that they were adulterated and misbranded? *United States* v. *Paraskevopolus*---------- 925

In a prosecution charging adulteration and misbranding of certain coloring substances for use in food preparations, *held* that it was not required to show that defendant consciously or wilfully adulterated or misbranded the articles. *United States* v. *W. B. Wood Manufacturing Co*---------- 1002

The act requires that a dealer furnishing food products to the public must know what they contain; he cannot hide behind ignorance; he cannot say that he did not know the product was adulterated.

In a prosecution charging sale by defendant of oysters alleged to be adulterated because they contained an excessive quantity of water, *held* that it was immaterial whether water was added by defendant or whether it was added with defendant's knowledge; and that it was sufficient to constitute an offense against the act if the oysters contained added water and if defendant sold them in that condition. *United States* v. *Golden & Co*---------- 1033

In a prosecution for misbranding a food product it is immaterial whether the false or misleading statement was placed on the label consciously or unconsciously; it is sufficient to constitute misbranding if such statement was there. *United States* v. *Sherer-Gillett Co*---------- 1093

In a prosecution charging defendant with shipping eggs which were alleged to be adulterated because they were decomposed, *held* that it was unnecessary to a conviction to show that defendant knew that the eggs were decomposed; and that under the act he was supposed to know and was held to know whether or not the eggs were adulterated. *United States* v. *Blazek*---------- 1074

Canned salmon held to be subject to forfeiture as adulterated within the meaning of the act if it is decomposed so as to be unfit for human food, regardless of how such adulteration was caused or came about and whether or not care was exercised in packing the salmon to prevent the adulteration. *United States* v. *1,974 Cases of Canned Salmon*---------- 1108

A shipment of canned salmon *held* not to be subject to condemnation as adulterated in that it consisted in whole or in part of decomposed or putrid animal substance unless it be shown that a percentage of adulteration existed throughout the shipment, and that a greater percentage existed than was inevitable in canning when ordinary and proper care is exercised. *United States* v. *243 Cases of Canned Salmon*---------- 1131

On a charge that defendant made shipments of butter which was misbranded because the weight of the contents of the packages was less than that stated on the label, there must be proof of an intent on the part of defendant to violate the law. An intent implies knowledge of the violation, but such intent need not be proved separately and apart from the other facts, necessarily, because intent is a state of mind and the intent of a party may be proved by his acts and conduct under any particular set of facts and circumstances, and everybody is presumed to intend the reasonable and probable consequences that may reasonably be anticipated and follow from his acts. Hence, if it is shown that defendant knew or should have known that the contents of the packages were short in weight, and that such shortage was the rule and not the exception in the shipments, the presumption is justified that he intended the shortage. No amount of care exercised or precautions taken will excuse the defendant, if it is shown that, after making allowances for honest or occasional mistakes and variations and tolerances permitted by the act and the regulations made pursuant thereto, the butter was under weight when shipped. Anyone engaged in the business of shipping butter in interstate commerce is conclusively presumed to know what the law is and must substantially comply with it at his peril. *United States* v. *Trinidad Creamery Co*---------- 1152

KNOWLEDGE AND INTENT—Continued.

Page

Where a food product is sold under a false or misleading label, the intention of the seller is immaterial. The question is, what would be the effect on the mind of persons purchasing the article—would they be deceived or misled into thinking they were getting something that it was not? *United States* v. *37 One-Pound Packages of Colors*---- 1165

It is no defense to a charge of shipping adulterated eggs that defendant made reasonable, proper, and careful inspection of the eggs before shipment to determine whether or not they were adulterated, and that he had no knowledge of their adulteration. Under the act the defendant is responsible regardless of what he may have done to ascertain whether or not the eggs were adulterated. *United States* v. *Smith*---- 1173

Whether or not an adulterated food product should be condemned is not dependent on the degree of care the manufacturer exercised in producing it. Canned cherries shipped in interstate commerce, containing worms and decomposed cherries, are subject to condemnation even though the manufacturer was unable to procure cherries free from worms or decomposition. *United States* v. *384 Cases of Canned Cherries*---- 1176

It is no defense in a prosecution charging adulteration and misbranding of an article of food, that defendant did not intend the article to be adulterated or misbranded. *United States* v. *Germack*- 1178

An article of food, such as apples or pears, which contains an added poison which might injure the health of the consumer, if shipped in interstate commerce, is adulterated and subject to forfeiture under the act, regardless of whether the shipper knew or did not know that the article containing the added poison might injure the health of the consumer. *United States* v. *3,192 Boxes of Apples et al*---- 1199

In prosecutions under the act for adulterating or misbranding of food products shipped in interstate commerce the knowledge or intent of the shipper is not an element of the offense. If a food product was adulterated or misbranded within the meaning of the act, and was shipped in interstate commerce by the defendant, it is immaterial whether defendant had knowledge that the article was adulterated or misbranded. *United States* v. *Morehouse*---- 1210

Defendant shipping canned salmon from its cannery in Alaska to Seattle, Wash., with the purpose of there labeling and finally shipping or delivering it in trade, would, if the product contained filthy, decomposed, or putrid animal substance as alleged, be guilty of violating the act, regardless of intent with relation to such condition of the product; but if, in fact, as contended by defendant, it so shipped such canned salmon for testing and approval by agents of the Department of Agriculture as to its fitness for human food before being further shipped or delivered to the trade for that purpose, and both advised such Department agents of such intent before the shipment and of the arrival of the shipment at Seattle for such testing, then defendant should not be deemed guilty of violating the act. *United States* v. *Gorman & Co*---- 1171

In a suit on a bond given by defendants for delivery of adulterated sardines forfeited in a proceeding under section 10 of the act, and conditioned that the sardines should not be sold before they had been inspected and the good segregated from the bad, it was no defense that such condition had been violated through misunderstanding on the part of defendants and in the belief that the sardines when delivered to them had been inspected. Whether defendants acted mistakenly or intentionally is immaterial; the fact that they took the sardines and sold them in their adulterated state is sufficient. *United States* v. *Seacoast Canning Co*---- 1209

A dairy company which shipped from its receiving plant in Illinois to Missouri milk which was adulterated by addition of water and which contained decomposed animal matter, cannot defeat a prosecution on the ground that the milk was to be treated in Missouri and was not an article of food until after treatment. *Union Dairy Co.* v. *United States*---- 869

KNOWLEDGE AND INTENT—Continued. Page

In a proceeding to condemn a shipment of apples allegedly adulterated by the addition thereto of arsenate of lead, a poison, as the result of spraying the trees with a solution of arsenate of lead, where claimant contended that the apples as shipped were not ready for sale or use as food, but that they were being shipped by him to his own warehouse there to have all possible arsenate of lead removed therefrom before being put on the market as food; *held* that the apples were not subject to condemnation, though when shipped there was sufficient poisonous material thereon that they might be deleterious to health when eaten, if claimant in good faith intended that they were not ready for marketing and that they should not go on the market in such condition. *United States* v. *630 Baskets of Apples* 1205

By the act of August 23, 1912, amending the Food and Drugs Act, section 8, Congress recognized that there was a wide field in which assertions as to the curative effect of drugs are in no sense honest expressions of opinion but constitute absolute falsehoods and in the nature of the case can be deemed to have been made only with fraudulent purpose. *Seven Cases of Eckman's Alterative* v. *United States* 707

That false and fraudulent representations may be made with respect to the curative effect of drugs is obvious. It is said that the owner has the right to give his views regarding the effect of his products. But state of mind is itself a fact, and may be a very material fact, and false and fraudulent representations may be made about it. *Seven Cases of Eckman's Alterative* v. *United States* 707
United States v. *Athlophoros Co* 732
United States v. *Dr. J. H. McLean Medicine Co* 850
United States v. *A. Skarzynski & Co* 860
United States v. *141 Bottles of Drug Products* 931
Chichester Chemical Co. et al. v. *United States* 1258
United States v. *17 Bottles, Etc., of An Article of Drugs Labeled in Part "B. & M."* 1287

By section 8 of the act, as amended by the act of August 23, 1912, Congress deliberately excluded the field where there are honest differences of opinion between schools of medicine and practitioners. It was plainly to leave no doubt upon this point that the words false and fraudulent were used. *Seven Cases of Eckman's Alterative* v. *United States* 707
United States v. *Pulmonol Chemical Co* 806

On trial of an information charging misbranding of shipments of drugs in that the labels contained false and fraudulent statements regarding their curative or therapeutic effects with respect to certain ailments, instructions that it was not proper to try rival well-established schools of medicine, and that, if defendant had only used homeopathic remedies, the verdict should be not guilty, *held* proper. *Kar-Ru Chemical Co.* v. *United States* 970

In a prosecution charging misbranding of a medicinal preparation in that statements regarding its curative or therapeutic effect with respect to certain diseases, appearing on the labels, etc., were false and fraudulent, *held* that if the jury find that there is a contrariety of views among medical practitioners and conflict between schools of medicine regarding the curative or therapeutic effect of the ingredients of defendant's preparation with reference to the diseases named, and that defendant in making the statements complained of based them upon an honest opinion arising out of such contrariety and conflict of medical views, then the jury should take such evidence into consideration as bearing upon defendant's good faith and honest belief and upon the question of fraudulent intent. *United*
United States v. *Athlophoros Co* 732
United States v. *17 Bottles, Etc., of An Article of Drugs Labeled in Part "B. & M."* 1287

That the weight of scientific medical opinion is against a claim of curative or therapeutic value, or that the claim is groundless in fact and unsupported by respectable professional opinion, will not

KNOWLEDGE AND INTENT—Continued. Page

suffice, in itself, to sustain a conviction under a charge of false and fraudulent branding of drugs as to their curative or therapeutic effect. *United States* v. *American Laboratories*---------- 641

One may not be convicted under the act as amended by act August 23, 1912, merely because he advocates a theory of medicine which at the time has not received the sanction of the medical profession; but one guilty of fraud may not escape conviction merely because someone may honestly believe in the theory which he fraudulently sets forth, and the essential difference is one of fact for the jury. *United States* v. *American Laboratories*---------- 641
United States v. *141 Bottles of Drug Products*---------- 931
United States v. *17 Bottles, Etc., of An Article of Drugs Labeled in Part "B. & M."*---------- 1287

In a prosecution for alleged misbranding of a medicine, under the act, section 8, paragraph 3, where it appeared that the defendant in making the curative or therapeutic statements on the label acted on the advice of licensed physicians and in good faith and in the belief that the statements were true, such statements were not fraudulent, even though false. *United States* v. *Tuberclecide Co*-- 729

In a prosecution for alleged misbranding of a certain medicine, under the act, section 8, as amended by act August 23, 1912, *held* that if defendant honestly believed from reports of doctors and patients who had taken the medicine, and had good reason to believe that the representations as to curative or therapeutic effects of the medicine were reasonably accurate and true, then such representations would not be fraudulent. *United States* v. *Bell & Co*-------- 828

In a prosecution charging a medicine misbranded by false and fraudulent statements regarding its curative or therapeutic effect with respect to diseases specified, where the Government introduced testimony of physicians that in their opinion the ingredients of the medicine would not be efficacious for the disorders for which it was stated on the label to be efficacious, and that in their opinion there was no single combination of drugs which would be effective as a remedy for all of the diseases enumerated, and where witnesses for defendant testified they had used the medicine and that it had proved effective in their cases as a remedy for the disorders with which they stated that they were afflicted, *held* that the question involved was peculiarly one of professional learning, and the jury, in arriving at a verdict, should consider the fact that not a single doctor had been called to testify on behalf of defendant. *United States* v. *Simpson*---------- 700

Under the act, section 8, as amended by act August 23, 1912, providing that drugs shall be deemed misbranded if the package or label shall bear or contain any statement, etc., regarding the curative or therapeutic effect of such article which is false and fraudulent, the statement, although found or determined to be false, may not properly be found or determined to be fraudulent—

(a) If there was reasonable ground for belief that the article had the curative or therapeutic value claimed in the statements.
United States v. *Matusow*---------- 664
United States v. *C. M. C. Stewart Sulphur Co*---------- 669
United States v. *Kellett*---------- 711
United States v. *A. Skarzynski & Co*---------- 860
United States v. *Kar-Ru Chemical Co*---------- 900
United States v. *One Gross Packages of "A Texas Wonder"*---- 910
United States v. *275 Cases of Mineral Water*---------- 920
United States v. *Gingerole Co*---------- 977
United States v. *Gandara*---------- 984
United States v. *60 Bottles of Dr. Hermance's Asthma and Hay Fever Medicine*---------- 1324

(b) If they were made by one who had an honest intention to make only such statements as he honestly believed to be true.
United States v. *Matusow*---------- 664
United States v. *Eleven Gross Packages of Dr. Williams' Pink Pills*---------- 680

Page

such statement or representation is absolutely and demonstrably false. *United States* v. *539 Boxes and 322 Cartons of Wm. Radam's Microbe Killer* ---- 511
United States v. *Eleven Packages of B. & M. External Remedy* -- 1059
United States v. *17 Bottles, Etc., of An Article of Drugs Labeled in Part "B. & M."* ---- 1287

In a prosecution charging misbranding of defendant's medicine by false and fraudulent statements regarding its curative effect, testimony of the president of defendant corporation as to statements made to him by various persons that they had taken its medicine and had experienced its curative effects, *held* competent as bearing upon the question whether defendant honestly believed that its medicine would be efficacious for the purposes claimed. *United States* v. *Abbott Bros. Co* ---- 722

In a libel proceeding under section 10 of the act, charging claimant's drug preparation misbranded in that the package and label contained statements regarding the curative or therapeutic effect of the article with respect to diseases specified which were false and fraudulent, where claimant's evidence was limited to testimony of witnesses that they had been benefited in their cases by the use of the preparation, and the nature of the diseases with which they were then afflicted did not appear any further than could be gathered from their testimony with regard to their symptoms, *held* that the jury might consider the circumstance that no physician had been presented who claimed to know what the diseases were from which the witnesses were then suffering. *United States* v. *539 Boxes and 322 Cartons of Wm. Radam's Microbe Killer* ---- 511

In concluding whether or not the maker or seller of a proprietary medicine alleged to be falsely and fraudulently misbranded as to its curative or therapeutic effect has done all that a reasonably prudent person, desiring to act in good faith, would have done to acquaint himself with the effect of the medicine, his education, training, and experience may properly be considered. *United States* v. *60 Bottles of Dr. Hermance's Asthma and Hay Fever Medicine* ---- 1324

Statements as to the curative and therapeutic effect of a drug, even though literally true, are false, if they convey a false impression or engender false inferences. *United States* v. *60 Bottles of Dr. Hermance's Asthma and Hay Fever Medicine* ---- 1324

In a proceeding to forfeit pills on the ground that the labels stating their curative properties were false and fraudulent, charges that the jury should determine whether the pills were sold with an honest belief that they were efficacious for the purposes stated on the labels, and that if the labels were written with intent to create an impression that the pills were efficacious for diseases which the sellers knew or must have known they were not, then the labels were false and fraudulent, were proper. *Eleven Gross Packages, More or Less, of Dr. Williams' Pink Pills* v. *United States* ---- 752

In proceedings charging drugs misbranded because the labels, etc., stating their therapeutic properties, were false and fraudulent, if the jury believe that the statement complained of was partly true, but was so artfully worded as to convey a meaning as to the therapeutic effect of the article which was wholly false, and that the label, etc., were so worded for the purpose of deceiving the public, then they should find such statement to be false and fraudulent. *United States* v. *Eleven Gross Packages of Dr. Williams' Pink Pills* ---- 680

KNOWLEDGE AND INTENT—Continued. Page

For the purpose of determining whether the labels on the bottles and the cartons, and the accompanying circulars contain statements that the use of the medicine would arrest or retard all of the diseases specified therein, the jury should take into consideration all of the language used therein, interpreting it as an ordinary intelligent man would, and determine whether it was the intention of defendant to lead persons who read them to believe that the medicine would do so, although the language does not in direct terms say so. *United States* v. *Dr. J. H. McLean Medicine Co*___ 850

Where packages of an article were so wrapped that the description of the article as "Bowman's Abortion Remedy", and directions for its use, would appear only after removal of the wrapper, *held* that such concealing of the labeling by the wrapping was a subterfuge, and clearly and patently an effort to circumvent the law, and was evidence relevant to a charge that the labeling was fraudulent. *United States* v. *100 Boxes of Bowman's Abortion Remedy*__ 1187

State of mind as reflected in advertising matter accompanying a drug could not have been influenced by events subsequent to publication of such matter. *United States* v. *Eleven Packages of B. & M. External Remedy*_____ 1059

Proof of a change from the word "cure" to the word "for" in a label is an evidentiary fact for consideration in concluding whether the change was designed for the purpose of leaving the label at best equivocal and to imply that the article was curative. *United States* v. *Bethesda Mineral Spring Co*_____ 841

On a libel to condemn drugs as misbranded by statements regarding the curative or therapeutic effect thereof, contained in a booklet inclosed in the package, which were alleged to be false and fraudulent, the exclusion of letters from the owner of the formula to his attorney, written long before the libel was instituted, tending to show libelee's good faith, was error. A manufacturer of patent drugs should, on the issue of his good faith, be permitted to show that he sought the advice of counsel, who had consulted proper Government officers in an effort to bring his advertising matter within the terms of the act. *Chichester Chemical Co. et al.* v. *United States*_____ 1258

On the issue whether drugs are misbranded by false and fraudulent statements regarding the curative or therapeutic effect of the article, testimony of witnesses that they have been cured of disease by use of the article is competent as bearing upon the question whether it was honestly believed that the statements were true. *United States* v. *Matusow*_____ 664
United States v. *C. M. C. Stewart Sulphur Co*_____ 669

KOCA NOLA SYRUP:

An article of food labeled "Koca Nola Syrup" *held* adulterated because it contained cocaine, an added poisonous or deleterious ingredient; and misbranded because the presence, quantity, or proportion of cocaine was not stated on the label. *United States* v. *Koca Nola Co* 59

LABEL:

The label referred to in sections 7 and 8 of the act is the label on the package which the ultimate consumer buys, and not alone the label on the package in which the retail package was shipped to the retailer. *United States* v. *Dr. J. L. Stephens Co* 305

Affirmed, *Dr. J. L. Stephens Co.* v. *United States* 471

McDermott et al. v. *Wisconsin* 473

LABEL—Continued. Page

The term "label", as used in the act, applies to any printed, pictorial, or other matter upon or attached to any package of a food product, or any container thereof, subject to the provisions of the act. *United States* v. *90 Boxes of Macaroni* ---------- 561

A label of a food product shipped in interstate commerce, if false or misleading, constitutes misbranding whether such false or misleading label appears on the boxes in which the product was shipped, or on the bottles of the product, or on the cartons inclosing the same, contained in the boxes. *United States* v. *300 Cases of Mapleine* ---------- 39

Where wheat was shipped by bulk by carload and bore no label, *held*, that the designation of the quality of the wheat in an invoice sheet, and by a certificate of inspection issued to the consignor by a State grain inspector, sent by the seller and consignor to the purchaser and consignee, constituted a label and brand within the meaning of the act. *United States* v. *Hall-Baker Grain Co* ---------- 291

Judgment Reversed, *Hall-Baker Grain Co.* v. *United States* ---------- 391

Section 8 of the act relating to misbranding embraces any statement, design, or device which appears on the outside of the package in which the article is offered for sale, whether such statement is printed upon or otherwise affixed to the package or impressed on a separate label affixed to the package, but does not include an advertising circular inclosed within an article inside the carton in which it is offered for sale. *United States* v. *American Druggists' Syndicate* ---------- 250

Misbranding within the definition of the act, including cases where the package or label "bears" false or misleading statement, *held* inapplicable to such statements in a booklet enclosed within a carton containing drugs. *United States* v. *17 Bottles, Etc., of An Article of Drugs Labeled in part "B. & M."* ---------- 1287

Where statements regarding the curative or therapeutic effect of a drug shipped in interstate commerce were contained on the labels on the bottles of the drug, on cartons inclosing the bottles, and in a circular and booklet inclosed in the carton with the bottle, *held* that such statements, if false and fraudulent, were equally within the meaning of the act as amended August 23, 1912, declaring drugs misbranded if the package or label contains any false or fraudulent statement regarding its curative or therapeutic effect, and it was immaterial whethery they appeared on the labels on the bottles, on the cartons, or in the circular or booklet, since they accompanied the shipment and were intended for perusal by prospective purchasers of the drug. *United States* v. *Eleven Packages of B. & M. External Remedy* ---------- 1059

Boxes or cartons containing a so-called remedy for contagious abortion in cattle consisted of two individual packages each wrapped in paper pasted to three sides thereof. Under the fourth and unpasted side, which would of necessity be torn open by the consumer, appeared directions for the use of the so-called abortion remedy, and under the flap at the top appeared the printed statement "Bowman's Abortion Remedy. This package contains one 9½ pounds treatment of Bowman's Abortion Remedy. Read the directions carefully before administering." A copy of a pamphlet designated "Bowman's Bulletin", sent to the dealer by the claimant who manufactured and shipped the article, contained the statement that directions for use of the so-called remedy would be found inside the package. *Held*, that the printing and labeling were a branding within the meaning of the act, section 8, paragraph 3, "if the package or label shall bear or contain any statement, etc." *United States* v. *100 Boxes of Bowman's Abortion Remedy* ---------- 1187

The act does not require any label on packages of foods or drugs shipped in interstate commerce, except by inference; but where a drug shipped in interstate commerce bears a label, such label should show the information required by section 8 of the act. *United States* v. *8 Packages and Casks of Drug Products* ---------- 149

LABEL—Continued.

Page

The act not only requires that drugs shipped in interstate commerce and labeled shall not be misbranded, but also requires that they shall be labeled with labels conforming to its requirements. *United States* v. *65 Casks of Liquid Extracts*_____ 47

The word "label" as used in the act, which requires packages of drugs shipped in interstate commerce to bear a statement on the label of the quantity or proportion of alcohol, etc., means a descriptive paper affixed to the packages, which must include the statement of how much alcohol, etc., is contained in the package. Id.

A label on a food product is to be given its ordinary and customary meaning as understood by the general public or the ordinary purchaser. *United States* v. *300 Cases of Mapleine*_____ 39

In determining the meaning of words used on the label, etc., of a drug, in a prosecution on a charge of misbranding, they are to be given their ordinary and customary meaning as understood by the general public, and not a technical or scientific meaning. *United States* v. *Harper*_____ 11

The act was passed to apply to the general public; and where, in a prosecution for alleged adulteration and misbranding of an article of food, the jury are called upon to determine the meaning of the label, the meaning referred to, the meaning which must be determinative, is that which is commonly accepted by the public generally. *United States* v. *F. B. Washburn & Co*_____ 434

In determining whether an article of food is misbranded, the words on the label are to be given their ordinary and customary meaning, as understood by the general public, and not their technical meaning. Id.

United States v. *McConnon & Co*_____ 496

Pure-food laws are intended for the protection of the general public as the ultimate purchasers, and where words in everyday use are found on the label of a food product, they are to be given their ordinary and popular meaning, rather than the commercial meaning which they have acquired among manufacturers and dealers. *Libby, McNeill & Libby* v. *United States*_____ 540

In a proceeding for the misbranding of a food product in violation of the act, the words of the offending label are to be construed in their ordinary or customary meaning so far as they have one. *United States* v. *150 Cases of Fruit Puddine*_____ 557

In judging the truth or falsity of statements on the label of an article of food, the language should be taken in the ordinary meaning and significance of the words used, that is, as they would be understood by a person of ordinary intelligence and familiar with the English language, purchasing the article. *United States* v. *Newton Tea & Spice Co*_____ 950

It is difficult to perceive how justice could be done in any case, or what practical efficiency the act would have or what protection it would afford, if the public were required to have scientific and technical knowledge as to the derivation and nomenclature of the various food and drug products. The ordinary purchaser, unless he could rely upon the common and generally understood signification of a label, could never be certain of what he is buying. Whether an article shipped under the label "Pure Pepper" was misbranded under the act, *held* to depend on the customary meaning of the words, and not on the technical meaning thereof. *United States* v. *75 Boxes of Alleged Pepper*_____ 340

Where sirup put up in bottles was labeled "Western Reserve Ohio Blended Maple Syrup", the word "Ohio" and "Maple Syrup" being in red, and between them the word "Blended", and then below that, in smaller type, the statement, "This syrup is made from the sugar maple tree and cane sugar", *held* that purchasers would ordinarily understand that the article contained in part maple sirup made from the boiled-down sap drawn from live maple trees. *United States* v. *Scanlon*_____ 28

LABEL—Continued. Page

Where certain cases containing bottles of maple sirup were branded and labeled "Western Reserve Ohio Blended Maple Syrup, guaranteed absolutely pure, shipped by Western Reserve Syrup Company, Cleveland, Ohio", and the bottles were labeled and branded "Western Reserve Ohio Blended Syrup, Western Syrup Company, Cleveland, Ohio, Blenders of Fancy Maple Syrup and Maple Sugar", *held* that, construing all the words of the bottle labels together, the same meaning was intended as in the labels on the cases, namely, that the bottles and the boxes contained blended maple sirup. *United States* v. *68 Cases of Syrup*---------- 62

The Act was designed to prevent the ordinary purchaser from being deceived and misled as to what he is buying, and therefore the test of misbranding is the effect of the label or statement upon the ordinary purchaser. *United States* v. *95 Barrels, More or Less, Alleged Apple Cider Vinegar*---------- 1047

In construing the language in labels, etc., of drugs, the meaning to be given to it is that which would ordinarily be conveyed by it to purchasers of the article. *United States* v. *17 Bottles, Etc., of An Article of Drugs Labeled in Part "B. & M."*---------- 1287

In determining whether an article of food is misbranded, it is a cursory examination of the label—the only examination made by the ordinary purchaser of the article—which is controlling. *United States* v. *Scanlon*---------- 28

If, as a matter of first impression, the label of a food product tends to convey a false or misleading impression, the article is misbranded even though a deliberate reading of the label might correct such impression. *United States* v. *10 Barrels of Vinegar*---------- 254

A statement in large and plain type on a label of a food product, which conveys a false and misleading impression, constitutes misbranding, even though the false and misleading impression created by such statement is corrected by another statement but in small and inconspicuous type. *Frank et al.* v. *United States*---------- 329

If an article of food is the identical thing indicated by the brand, it is not misbranded under the act, and the method of manufacture is immaterial. *95 Barrels, More or Less, Apple Cider Vinegar* v. *United States*---------- 1079

Judgment reversed, *United States* v. *95 Barrels, More or Less, Alleged Apple Cider Vinegar*---------- 1118

The statute is plain and direct. Its comprehensive terms condemn every statement, design, and device which may mislead or deceive. Deception may result from the use of statements not technically false or which may be literally true. The aim of the statute is to prevent that resulting from indirection and ambiguity, as well as from statements which are false. It is not difficult to choose statements, designs, and devices which will not deceive. Those which are ambiguous and liable to mislead should be read favorably to the accomplishment of the purpose of the act—to enable purchasers to buy food for what it really is. *United States* v. *95 Barrels, More or Less, Alleged Apple Cider Vinegar*---------- 1118

United States v. *McIlvaine Bros*---------- 1127

The general rule is that the act should be so read as to further its purposes, and that not only branding which is misleading or liable to mislead, but also any which is ambiguous, should be visited with the condemnation of the act. A branding which is misleading because of its ambiguity is as much within the inhibition of the statute as if it was misleading in statement. *United States* v. *McIlvaine Bros*---------- 1127

The statement on the label of a package of food, "Substitute for eggs in baking and cooking", was not one of opinion only, but one of fact, and, where false, constituted a violation of the act; it being otherwise expressed upon the label that the article could be otherwise used in place of eggs "in baking and cooking." *United States* v. *Newton Tea & Spice Co*---------- 950

LABEL—Continued.

Page

A statement on a label of an article of food that it is an excellent substitute for eggs, and is to be used for baking and cooking purposes, 1 teaspoonful in place of each egg called for in a recipe, is not a statement of opinion, but of fact, and is a representation to ordinary purchasers that 1 teaspoonful of the article is substantially equivalent to one egg for all purposes, including nutrition, involved in the use of eggs for baking and cooking. *Newton Tea & Spice Co.* v. *United States*---------- 1089

Where claimant shipped mineral water under a label representing that it possessed curative or alleviative qualities, he could not deny that it was a drug within the meaning of the act, section 8, as to misbranding of drugs. *Bradley* v. *United States*---------- 964

A label on mineral water stating that it was recommended in the treatment of certain diseases, and containing directions for its use, was susceptible of the construction that it meant that the use of the water in the treatment of such diseases would effect a cure or alleviation. Id.

Where a libel to condemn pills as misbranded was based on a booklet accompanying the pills, and which, among other things, recited that the pills were "a standard and reliable remedy for amenorrhea (suppression of the menses due to colds, ill health, and other morbid causes)", the language, "other morbid causes", may fairly be construed to mean "other *like* causes", that is to say, other irregularities of the menstrual function of the same general nature as those particularly specified. *Chichester Chemical Co. et al.* v. *United States*---------- 1258

In determining whether a drug product is misbranded within the act, section 8, as amended by act August 23, 1912, the language used on the label or package is to be given the meaning ordinarily conveyed by it to those to whom it is addressed. *Hall* v. *United States*---------- 978

On trial of an information charging misbranding of a drug in that the package and label contained false and fraudulent statements regarding the curative or therapeutic effects of the article with respect to specified diseases and ailments, *held*, that the test of the misbranding was what the statements charged meant to the ordinary person, that is to say, what the ordinary person reading the label, etc., would understand as to the curative or therapeutic effects claimed therein; and that the diseases and ailments named were to be understood to be such as the general public understand such terms, that is, such terms were to be given the meaning generally accepted by the public, and not to be restricted to their technical, medical, or scientific definitions. *United States* v. *C. M. C. Stewart Sulphur Co*---------- 669
United States v. *Athlophoros Co*---------- 732

In determining whether drugs are misbranded in that the label or package contains false and fraudulent statements regarding their curative or therapeutic effects, the words contained in the challenged statements should be given the meaning conveyed by such words in their common usage to the average person, as distinguished from that conveyed to the average physician or scientist. *United States* v. *Bell & Co*---------- 828

In a prosecution charging misbranding of bottled water in that the label falsely and fraudulently represented its curative or therapeutic effect as to certain diseases, *held*, that the jury should test the meaning of the label by giving to the language used the meaning of the words, singly and together, that would be conveyed to ordinary persons and not those who are skilled in medical, chemical, or pharmaceutical science and capable of making nice distinctions and discriminations, and examine the language in the light of the disposition of ordinary human kind to believe in the potency of remedial agents to relieve them from ills from which they are actually or conceivably suffering. *United States* v. *Bethesda Mineral Spring Co*---------- 841

LABEL—Continued. Page

In a prosecution charging misbranding of a drug product in that the labels falsely and fraudulently represented its curative or therapeutic effects, *held*, that the jury should determine the meaning of the representations complained of, taking the words in their ordinary sense and as understood by the general public or people in the ordinary walks of life, to whom the labels were addressed, and not by doctors, druggists, or chemists. *United States* v. *A. Skarzynski & Co*---------- 860

In a proceeding by libel for condemnation of drugs for misbranding under the act, section 8, as amended, *held* that the jury, in determining the meaning and import of the representations made on the label, etc., of the article, should regard such representations as made to the public, and read and interpret the language used in its ordinary and common acceptation. *United States* v. *17 Bottles, Etc., of An Article of Drugs Labeled in Part "B. & M."*---------- 1287

In a libel proceeding to condemn packages of pills on the ground that the label, etc., stating their curative or therapeutic effects with respect to various specified diseases and ailments were false and fraudulent, *held* that the jury, in determining whether the statements made on the label, etc., and set out in the libel, were false and fraudulent, should give to the language used in the statements its ordinary and common meaning and consider it to have the meaning and effect it would convey to an ordinarily intelligent person purchasing the pills; and should determine whether or not it was the intention of the language, so interpreted, to convey the impression that the pills would cure or act as a remedy for the diseases and ailments named even though it did not directly say so. *United States* v. *11 Gross Packages of Dr. Williams' Pink Pills*---------- 680

Affirmed, *Eleven Gross Packages of Dr. Williams' Pink Pills* v. *United States*---------- 752

On trial of an information charging misbranding of a medicinal preparation in that the packages and labels falsely and fraudulently stated the curative or therapeutic effects of the article with respect to various diseases *held*, that the jury should consider all of the language used in the labels, etc., interpreting it as would an ordinarily and reasonably intelligent person, and from it determine whether it was the intention of the defendant to lead such persons who read it to believe that the use of the preparation in the manner and doses prescribed would be efficacious in the treatment of the diseases named, although such language did not in direct terms so state. *United States* v. *Dr. J. H. McLean Medicine Co*---------- 850

In a proceeding to condemn concentrated mineral water for misbranding in that the labels describing it as "The world's greatest remedy for the following ailments in their most chronic forms", followed by a list of ailments and diseases, were false and fraudulent, *held*, that the jury, in construing the language used, should interpret it as would a person of ordinary intelligence purchasing the article, and give to the words the meaning they would convey to such person. *United States* v. *36 Bottles of Crab Orchard Mineral Water*---------- 1011

In a proceeding to condemn so-called concentrated mineral water for misbranding in that statements regarding its curative or therapeutic effect, appearing on the label, were false and fraudulent, *held*, that the jury, in determining the question of misbranding, should take the words of the statements on the label in their ordinary sense, as an ordinary purchaser of reasonable intelligence purchasing the article would take them. *United States* v. *22 Bottles of Crab Orchard Concentrated Mineral Water*---------- 1055

In a proceeding to condemn a drug for misbranding in that the package and label contained false and fraudulent statements regarding its curative or therapeutic effect with respect to various diseases and ailments, *held*, that the jury, in determining whether the article was misbranded, should give to the language of the statements complained of the meaning ordinarily conveyed by it

LABEL—Continued. Page

to those to whom it is addressed, i. e., to the general public and prospective purchasers of the article; that the question for the jury with reference to each such statement is, what would an ordinarily intelligent person suffering from any of such diseases or ailments named understand from such statement as to the curative or alleviating effects of the article on such disease; and that the jury should understand such diseases in accordance with the generally accepted meaning and as understood by the layman, and not apply the technical, medical definitions of the terms given to them by those learned in medicine. *United States* v. *11 Packages of B. and M. External Remedy* 1059

On trial of an information charging misbranding of a drug in that the label contained false and fraudulent statements regarding its curative or therapeutic effects, *held*, that the jury in determining whether the article is misbranded should give to the words on the label and set out in the information such meaning and purpose as they generally signify and the thoughts which they are generally intended to convey. *United States* v. *John Dobry Manufacturing Co* 1085

The mere fact that a label has been used on an article of food for a number of years and before the passage of the Food and Drugs Act does not legalize the use of such label if it is misleading. *United States* v. *F. B. Washburn & Co* 434

The fact that a label of a food product has been adopted and copyrighted and is entitled to full protection as such, is no defense in a proceeding under the act to condemn the product for misbranding, if the label is within the meaning and in violation of the act. *United States* v. *90 Boxes of Macaroni* 561

In case of a clear violation of the statute, there is no occasion for granting a respondent an opportunity to correct his label, but in a case where the violation is doubtful and where the respondent has acted in good faith in being willing to change his label to comply with the law, such an opportunity should be granted. *United States* v. *Schurman et al* 95

See Circulars, Pamphlets, Booklets, Etc.; Designs and Devices; Misbranding; Packages.

LA NOBLENZA:

A drug labeled "La Noblenza" *held* misbranded in that the label contained false and fraudulent statements regarding its curative and therapeutic effects. *United States* v. *Gandara* 984

LEE'S SAVE THE BABY:

A drug preparation labeled "Lee's Save The Baby", *held* not misbranded within the meaning of the act, section 8, as amended by the act of August 23, 1912, declaring drugs misbranded if the package or label shall bear or contain any statement regarding curative or therapeutic effect which is false or fraudulent. *United States* v. *23½ Dozen Bottles, Etc., of An Article of Drugs Labeled in Part "Lee's Save The Baby"* 1240

LEMON EXTRACT OR FLAVOR: Page

An article labeled "Extract of Lemon Peel" *held* misbranded because it was not a true extract of lemon peel, but a dilute extract containing no oil of lemon peel. *United States* v. *S. Gumpert et al*___ 182

Articles labeled "Pure Lemon Flavor" and "Flavor of Lemon" *held* adulterated and misbranded because not of the standard of strength recognized for lemon extract. The terms "flavor" and "extract" *held* to be synonymous. *United States* v. *Edward Westen Tea & Spice Co*_____ 69

Averment in an information that defendant intended that the label "Flavor of Lemon and Citral—A Pure Flavor" should be understood by the public and purchasers to mean a pure flavor or extract of lemon is futile, because the accepted and usual signification of the label is that the article is not pure flavor or extract of lemon but that it is a flavor of lemon and citral. *Nave-McCord Mercantile Co.* v. *United States*_____ 166

An article labeled "Extract Terpeneless Lemon" *held* to be adulterated and misbranded because it contained only 0.05 percent of citral derived from the oil of lemon, whereas, as recognized by the trade generally and by the standard of purity established by the Secretary of Agriculture under authority of act March 3, 1903, such extract should contain at least 0.2 percent by weight of such citral. *United States* v. *Frank et al*_____ 205

An article labeled "Special Lemon. Lemon, Terpene and Citral", *held* misbranded in that the label was false and misleading, and in that the article was labeled so as to deceive and mislead, and in that the article was an imitation of lemon oil and was offered for sale under the distinctive name of another article, because the statement on the label, "Special Lemon", would indicate that the article was a product derived from lemon, whereas, in fact, it was a product containing alcohol and citral derived from lemon grass, and was an imitation of lemon oil. *United States* v. *Weeks*_ 519

Reversed, *Weeks* v. *United States*_____ 646

Judgment C. C. A. affirmed, *Weeks* v. *United States*_____ 867

An article labeled "Special Lemon. Lemon, Terpene and Citral", but not derived from lemon, but a mixture containing alcohol and citral derived from lemon grass, and an imitation of lemon oil, was not misbranded. *Weeks* v. *United States*_____ 646

Reversing *United States* v. *Weeks*_____ 519

Affirmed, *Weeks* v. *United States*_____ 867

An article composed of alcohol and citral derived from lemon grass, and an imitation of lemon oil, and labeled "Special Lemon", and represented by the seller's agent to the buyer as pure lemon oil, was misbranded as offered for sale under the distinctive name of another article, though no label describing it as such other article is affixed to it. *Weeks* v. *United States*_____ 646

Affirmed, *Weeks* v. *United States*_____ 867

LEMON PIE FILLING.

See Pie Filling.

LIBEL:

Section 10 of the act, providing that proceedings in cases to forfeit adulterated food shall conform as near as may be to proceedings in admiralty, does not render such proceedings within the admiralty or maritime jurisdiction of Federal courts, the jurisdiction in such proceedings being conferred by the act itself. *United States* v. *Two Barrels of Desiccated Eggs*_____ 232

Under R. S., sec. 563, subdivision 8, giving United States district courts jurisdiction of all causes of admiralty and maritime jurisdiction, and of all seizures on land and on water not within the admiralty and maritime jurisdiction, the court, in seizures under section 10 of the Food and Drugs Act, and on land, proceeds, not as a court of admiralty, but as a court of common law jurisdiction on a trial by jury. *United States* v. *George Spraul & Co*_____ 217

LIBEL—Continued.

Page

The provision of the act, section 10, that proceedings thereunder for seizure of goods for confiscation shall be by libel and shall conform, as near as may be, to proceedings in admiralty, relates only to procedure and not to jurisdiction, and does not include appellate proceedings; the action of the district court on the libel can be reviewed only as at common law, that is, by writ of error and not by appeal. *443 Cans of Frozen Egg Product* v. *United States*_____ 416
United States v. *Hudson Manufacturing Co. et al*_____ 420
Goode v. *United States*_____ 698
Goodwin et al. v. *United States*_____ 1130

By the provision of the act, section 10, that proceedings in libel cases thereunder shall conform, as near as may be, to proceedings in admiralty, the libels in such proceedings under said section are subject to General Admiralty Rule No. 23 providing that "The libel shall also propound and articulate in distinct articles the various allegations of fact upon which the libelant relies in support of his suit, so that the defendant may be enabled to answer directly and separately the several matters contained in each article." *United States* v. *154 Cases of Tomatoes*_____ 967

Section 10 of the act, providing that seizure proceedings shall conform as near as may be to the proceedings in admiralty, does not adopt admiralty rule 22, that libels on seizures for breach of the revenue, navigation, or other laws of the United States shall state the place of seizure and the district within which the property is brought and where it then is, rather than rule 23, providing that the libel, if in rem, shall state that the property is within the district. Id.

A proceeding under section 10 of the act is a civil action as distinguished from a criminal action and is called a suit in rem; that is to say, it is a suit against property, and it does not become a suit against any person at any stage of the case. *United States* v. *300 Cases of Mapleine*_____ 39
United States v. *4½ Cases of Creme de Menthe*_____ 1191

Libels filed, under section 10 of the act, for seizure, condemnation, and forfeiture of adulterated or misbranded articles of food or drugs are not governed by the strict rules of the common law in regard to indictments and criminal informations. *United States* v. *Two Barrels of Desiccated Eggs*_____ 232

It is not essential to the condemnation and forfeiture of adulterated or misbranded drugs, under section 10 of the act, that the owner shall have been guilty of shipping or selling them in violation of section 2. *United States* v. *Five Boxes of Asafoetida*_____ 160
United States v. *Nine Boxes of Asafoetida*_____ 165

The purpose of the act is to conserve the public health by preventing interstate commerce in poisonous or deleterious food and drugs, and, in order that this may be effected, it is not only made a misdemeanor under the act, but the article of food or drug adulterated or misbranded is declared to be forfeited as an offending thing which threatens the health of the citizens, and therefore subject to seizure without regard to the acts or knowledge of the owners or claimants. Id.

Notice and opportunity to be heard, provided for by section 4 of the act, *held* necessary conditions precedent to the institution of proceedings in rem for forfeiture of goods, under section 10, where such proceedings are instituted at the instance of the Secretary of Agriculture. *United States* v. *74 Cases of Grape Juice*_____ 144
Affirmed, *United States* v. *74 Cases (or 20) of Grape Juice*_____ 256
United States v. *Certain Cans of Syrup*_____ 328

A preliminary examination and notice or opportunity to be heard, by the Department of Agriculture as to the adulteration or misbranding of a food or drug product, as provided for by section 4 of the act, are not necessary conditions precedent to the filing of a libel in rem for the condemnation of such product under section 10. *United States* v. *50 Barrels of Whisky*_____ 22
United States v. *65 Casks of Liquid Extracts*_____ 47
United States v. *Nine Barrels of Olives*_____ 128

LIBEL—Continued. Page

It was no defense to a proceeding for condemnation of an alleged adulterated and misbranded article of food, under section 10 of the act, that the Secretary of Agriculture had failed to give claimant the notice and to afford it an opportunity to be heard before the Department prior to the commencement of such proceeding, as provided in section 4. The notice that is required to be given of the seizure of adulterated or misbranded food and of the proceedings for its condemnation, affords ample opportunity to the owner to appear and defend; and if upon a final hearing the food is condemned and declared forfeited, he is not deprived of any property without due process of law. *United States* v. *75 Barrels of Vinegar* ---------- 332

The investigation provided for in section 4 of the act has reference to cases in which there is to be a prosecution under section 5 for the enforcement of penalties prescribed by section 2, and not to cases where forfeiture proceedings are contemplated for condemnation under section 10, so that it was no objection to a forfeiture proceeding that no prior proceedings had been instituted by the Secretary of Agriculture. *United States* v. *100 Barrels of Vinegar*_ 287

Seizure of drugs misbranded in violation of the act, is jurisdictional, and must precede filing of the libel for forfeiture under section 10, and be alleged in the libel, in view of sections 3, 4, and 5, and of the Judiciary Act. *United States* v. *8 Packages and Casks of Drugs*---------- 149

Section 4 of the act authorizes the Secretary of Agriculture to make investigations and to certify violations of the act to the United States district attorney. Section 5 requires such officers on being informed that the act has been violated to cause appropriate proceedings to be commenced in the proper court. Section 10 provides that proceedings to forfeit adulterated or misbranded food shall conform as near as may be to the proceedings in admiralty. *Held*, that neither the marshal nor any other person was authorized to seize food claimed to be subject to forfeiture prior to the commencement of proceedings for a forfeiture in court, and that proceedings for such forfeiture did not depend for jurisdiction on prior seizure. *United States* v. *Two Barrels of Desiccated Eggs*_ 232

The act, section 10, providing for proceedings against adulterated and misbranded food transported in interstate commerce for sale or in original unbroken packages, etc., does not declare the goods ipso facto forfeited by an infraction of the act, nor expressly authorize an executive seizure before proceedings for forfeiture are instituted, but on the contrary requires the district attorney on receiving a certificate of the facts from the Secretary of Agriculture to cause appropriate proceedings to be commenced and prosecuted without delay, for the enforcement of the penalties of the act; hence prior executive seizure was not required to sustain forfeiture proceedings by the provision that the proceedings shall conform as near as may be to the proceedings in admiralty. *United States* v. *George Spraul & Co*---------- 217

Section 10 of the act, providing that an article if adulterated or misbranded shall be proceeded against in any district court of the United States within the district where the same is found, and seized for confiscation by a process of libel for condemnation, indicates that the proceeding shall be commenced in the district court before the property is seized. Id.

It is not ground for dismissal of a libel to forfeit adulterated food under section 10 of the act that the property was not seized before the libel was filed. *United States* v. *100 Barrels of Vinegar*__ 287

It was no objection to a libel in a proceeding under section 10 of the act that it appeared therein that at the time of the filing thereof no seizure of the property therein described had been made by libellant, and that therefore the court had no jurisdiction over the property. *United States* v. *Two Barrels of Desiccated Eggs*__ 232

LIBEL—Continued.

Page

Where sugar alleged to have been adulterated and misbranded was not seized while in transportation, it was not subject to forfeiture under the clause of section 10 of the act, declaring that any article of food adulterated or misbranded, which is being transported from one State, etc., to another, for sale, shall be liable to seizure, condemnation, etc. *United States* v. *46 Packages and Bags of Sugar* 168

A drug is not adulterated or misbranded so as to be subject to condemnation under section 10 of the act unless adulterated or misbranded at the time of seizure, and hence, where asafoetida below the prescribed test and misbranded was received by claimants in interstate commerce and tested and correctly branded before seizure, it was not subject to forfeiture. *United States* v. *Five Boxes of Asafoetida* 160

United States v. *Nine Boxes of Asafoetida* 165

Shipments of a drug preparation in bulk to the owner from its manufacturing agent in another State *held* not subject to seizure and forfeiture under section 10 of the act, where before being offered for sale by the owner and consignee the preparation was bottled and properly labeled. *United States* v. *65 Casks Liquid Extracts* 47

Affirmed, *United States* v. *Knowlton Danderine Co* 89

The remedy in rem provided by section 10 of the act may be invoked where adulterated eggs have been shipped into a State, not for sale as eggs, but intended solely for use by the consignee in the bakery business. *United States* v. *50 Cans of Preserved Whole Eggs* 74

Affirmed, *Hipolite Egg Co.* v. *United States* 223

Section 10 of the act, authorizing proceedings to forfeit adulterated food transported from one State to another, is applicable to eggs shipped from one State to another, not for sale as eggs, but to be used solely as raw material in the manufacture of some other product. *United States* v. *Two Barrels of Desiccated Eggs* 232

Where adulterated vinegar was proceeded against under section 10 of the act, and it appeared that it had been the subject of interstate commerce and was seized while stored in the original unbroken packages, it was not material that the evidence did not show that the vinegar had been shipped in interstate commerce for sale in such original unbroken packages. *United States* v. *100 Barrels of Vinegar* 287

Under the Fourth Amendment of the Constitution, libels for forfeiture of goods for adulteration or misbranding under section 10 of the act, should be supported by affidavit made by someone cognizant of the facts showing probable cause. *United States* v. *8 Packages and Casks of Drugs* 149

Want of sufficient verification of a libel to forfeit food under section 10 of the act is not ground for exception or demurrer to the substance of the libel. Admiralty rule 1 provides that libels shall be verified except those filed on behalf of the United States. *United States* v. *Two Barrels of Desiccated Eggs* 232

In forfeiture proceedings under section 10 of the act, providing that the proceeding in such cases "shall conform as near as may be to the proceedings in admiralty", the court may order the issue of monitions and attachments on informations which are wholly unsupported by oath or affirmation, in view of admiralty rule 22 and sections 1–3 of the act, since the Fourth Amendment to the Constitution does not apply. *United States* v. *18 Cases of Tuna Fish* 1162

Where a libel for seizure and condemnation of certain cases of canned tomatoes upon the ground of adulteration and misbranding, was signed and filed by the district attorney, and the only affidavit attached thereto stated that the affiant "is an inspector of the Department of Agriculture, and that he has read the foregoing libel, and that the averments contained therein as to his own knowledge are true, except as to those matters and things stated to be of his information and belief, and as to those matters and

LIBEL—Continued. Page

things he verily believes them to be true"; *held* that there was such a lack of correlation between the affidavit and the libel that the court could not tell what averments in the latter were made upon affiant's knowledge and what upon his information and belief, and that there was therefore a lack of that certainty of allegation required in a libel for seizure of private property. *United States* v. *154 Cases of Tomatoes*_____ 967

A libel charging adulteration of a food product simply in the words of the act, that it "consists of a filthy, decomposed, or putrid animal and vegetable substance", *held* sufficient in this respect in law. It is often difficult to differentiate an ultimate fact from a conclusion of law. An offense consists in the commission of an act and ordinarily would not be sufficiently pleaded in the words of the statute defining the offense without the addition of a statement of the act which is charged to constitute the offense. Here, however, the act is the adulteration which is charged, and the words of the statute are as descriptive of what the adulteration consists of as any added description could be. If there be no information in the libel of the specific act of adulteration meant to be charged, this can be supplied, if need be, through a bill of particulars. *United States* v. *94 Dozen, More or Less, Half-Gallon Bottles of Capon Springs Water*_____ 1216

Averments in a libel charging misbranding of drugs under section 8 of the act, as amended by act August 23, 1912, should receive a sensible construction. They must definitely charge the statutory offense of misbranding, but if there is enough to apprise those interested in the goods of the charge that the drugs were misbranded because statements as to curative power accompanying the articles in interstate commerce were false and fraudulent as stating they would cure diseases which they could not cure, and were made with intent to deceive, they are sufficient to sustain the libel. *Seven Cases of Eckman's Alterative* v. *United States*_____ 707

A libel in a proceeding to condemn bottled water, based on the amendment of 1912 to section 8 of the act, which, after quoting from the label a long list of ailments for which the water was said to be beneficial, with "healing powers" and a "reliable remedy", denied that the water could produce the therapeutic effects so claimed, stated a case under the statute, and was not subject to demurrer or motion to quash. *Goodwin et al.* v. *United States*_____ 1130

A libel seeking to condemn cases of "Buffalo Lithia Water" as misbranded, which states in effect that the water is misbranded, labeled, and sold as lithia water, when in fact it is not lithia water, and by reason of such misbranding the public is deceived and misled, is sufficiently explicit without characterizing the water as a spring or mineral water. *Goode* v. *United States*_____ 698

A libel for forfeiture of frozen eggs was not defective for failure to negative that the eggs might have been intended for other than food uses, where it described the eggs as articles of food. *United States* v. *300 Cans of Frozen Eggs*_____ 283

It was not ground for the dismissal of a libel to forfeit adulterated and misbranded vinegar which had been the subject of interstate commerce and was seized while stored in the original unbroken packages, that it did not appear that the vinegar was shipped for sale in the original unbroken packages. *United States* v. *100 Barrels of Vinegar*_____ 287

The allegation in a libel that an article of food is adulterated in violation of the act for the reason that it consists in whole or in part of a filthy, decomposed, or putrid vegetable substance, states a complete and distinct offense under section 7 of the act, and the further allegation that such article was "unfit for food" may be regarded as surplusage. Even in an indictment such surplus language is not fatal. *United States* v. *275 Cases Tomato Catsup*__ 141

A libel for forfeiture of alleged adulterated and misbranded sugar under the provision of section 10 of the act providing that any article of food that is adulterated or misbranded, having been

LIBEL—Continued. Page

transported from one State to another and remaining unloaded, unsold, or in the original unbroken packages, shall be liable to be proceeded against by libel for condemnation, *held* fatally defective for failure to charge that the sugar seized had been transported for sale. *United States* v. *46 Packages and Bags of Sugar*-- 168

A libel for forfeiture of packages of drugs as misbranded under the act, on the ground that the drugs, having been transported from one State to another, remain unloaded, unsold, or in the original unbroken packages, *held* insufficient for failure to show the drugs subject to the act. *United States* v. *8 Packages and Casks of Drugs*---------- 149

It was not ground for dismissal of a libel against certain cans of adulterated eggs that they had been shipped into a State, not for sale as eggs, but intended for use of the consignee in the bakery business. *United States* v. *50 Cans of Preserved Whole Eggs*---------- 74

Affirmed, *Hipolite Egg Co.* v. *United States*---------- 223

It was not ground for the dismissal of a libel to forfeit a shipment of dessicated eggs for violation of the act that the libel did not allege that the eggs had been transported for sale. *United States* v. *Two Barrels of Dessicated Eggs*---------- 232

Where a libel alleges that certain frozen eggs had been transported in interstate commerce and were, at the time of the service of the libel, in whole or in part filthy, putrid, or decomposed, and remained in original unbroken packages in a warehouse in New York City, the libel was not fatally defective for failure to charge that the eggs had been transported for sale. *United States* v. *300 Cans of Frozen Eggs*---------- 283

A libel to forfeit a shipment of dessicated eggs for violation of the act was not fatally defective for failure to allege the date when they were shipped, on the theory that the shipment might have been made before the act took effect or because the property was not sufficiently identified; such objections being available by answer. *United States* v. *Two Barrels of Dessicated Eggs*---------- 232

A representation in a libel for seizure and condemnation of canned tomatoes that the article as analyzed by the Department of Agriculture is shown to be adulterated in violation of the act in that tomato pulp has been mixed and packed with and substituted in part for the article, does not constitute an averment of the fact of adulteration; and a representation in such libel that the article as so analyzed is shown to be misbranded in violation of the act in that the labels, containing the word "Tomatoes" and the picture of a ripe tomato, are false and misleading and deceive and mislead the purchaser, does not sufficiently charge misbranding. Such libel *held* insufficient in that it does not contain allegations of substantive facts clearly showing the right of the Government to seize and condemn the goods. *United States* v. *154 Cases of Tomatoes*---------- 967

Where a libel under the act, to condemn certain sirup as misbranded, stated that the boxes and bottles did not contain a blend of maple sirup, as stated on the labels, but alleged that the contents consisted of a mixture or compound of refined cane sugar flavored with an extract of maple wood, the negation of a blend of maple sirup was a conclusion of the pleader, which was not admitted by a demurrer to the libel. *United States* v. *68 Cases of Sirup*---------- 62

It is essential that a libel to condemn food for misbranding should set forth the branding and facts inconsistent therewith, and, if there is indefiniteness in statement, it must be removed by proof. Where a libel charging misbranding of catsup alleged that the label stated the catsup was made from choice ripe tomatoes, etc., when in fact it was made in part from tomato pulp screened from peelings and cores as the offal of tomato-canning factories, and not from choice ripe tomatoes, etc., it would not be assumed, from the fact that the peelings and cores were not used in a tomato-canning factory, that they were not suitable for making tomato catsup. *United States* v. *650 Cases of Tomato Catsup*---------- 31

LIBEL—Continued. Page

A proceeding by libel under section 10 of the act, to condemn food as adulterated is not a criminal prosecution, but an action in the nature of a civil action, and the Government, in order to obtain a verdict in its favor, is only required to sustain the allegations of the libel by a fair preponderance of the evidence, and it is not incumbent on it to show that they are true beyond a reasonable doubt. *United States* v. *625 Sacks of Flour*---------- 129

A proceeding under the act to condemn a shipment of food alleged to be adulterated, is not a criminal prosecution, and the Government is not required to establish its cause of action by evidence beyond a reasonable doubt; the burden is on the Government to establish each and every essential element of its case by a fair preponderance of the evidence, and by evidence which is clear and convincing. *United States* v. *1,367 Cases of Pork and Beans*------ 766

A proceeding to condemn a food product under section 10 of the act is a civil action, and, as such, is within the rule that the Government's case is established by the preponderance of the evidence, as distinguished from the rule in criminal cases where the doctrine of presumption of innocence and the doctrine of reasonable doubt control. *United States* v. *5,060 Cans of Tomato Pulp*---------- 780

A libel proceeding under section 10 of the act, to condemn food as adulterated, is not a criminal prosecution, and the Government is not required to make out its case by proof beyond a reasonable doubt; it is only required to make out its case by a fair preponderance of the evidence. *United States* v. *720 Cases of Tomato Catsup*---------- 877

A proceeding under section 10 of the act, to condemn bottled water as misbranded is not a criminal prosecution, and the Government is not required to make out its case beyond a reasonable doubt; it is sufficient to warrant a verdict for the Government if the evidence establishes its contentions to the satisfaction of the jury. *United States* v. *275 Cases of Mineral Water*---------- 920

A libel proceeding under section 10 of the act, to condemn a food product as adulterated and misbranded, is a civil suit and not a criminal action, and to be tried as a civil suit. The burden is on the Government to prove its contentions to the satisfaction of the jury by a preponderance or greater weight of the evidence, and not beyond a reasonable doubt as in criminal cases. *United States* v. *4½ Cases of Creme de Menthe*---------- 1191

In libel proceedings under section 10 of the act to forfeit alleged adulterated or misbranded food or drugs, the burden of proof is upon the Government to establish its case by a preponderance of the evidence. *United States* v. *175 Boxes of Macaroni*---------- 426

United States v. *539 Boxes and 322 Cartons of Wm. Radam's Microbe Killer*---------- 511

United States v. *1,000 Cases of Canned Tomato Puree*---------- 704

United States v. *11 Gross Packages of Dr. Williams Pink Pills*-- 680

United States v. *408 Bushels of Oysters*---------- 718

United States v. *350 Bags of Shell Peanuts*---------- 685

United States v. *60 Dozen Bottles of "A Texas Wonder"*-------- 888

United States v. *1,038 Cases of Tabasco Flavor Catsup*---------- 871

United States v. *One Gross of Packages of "A Texas Wonder"*--- 910

United States v. *9 Cases of Sparkling White Seal*---------- 1023

United States v. *1,600 Cases of Canned Salmon*---------- 1105

United States v. *1,000 Cases of Sardines*---------- 1113

United States v. *2,205 Cases of Canned Salmon*---------- 1133

United States v. *3,192 Boxes of Apples and 532 Boxes of Pears*---- 1199

United States v. *3,998 Cases of Canned Tomatoes*---------- 1213

On trial of a libel under section 10 of the act, to condemn a food product as misbranded, *held* that the burden of proof upon all issues of the case was upon the Government to satisfy the jury by a preponderance, or fair preponderance, of the evidence. *United States* v. *175 Boxes of Macaroni*---------- 426

A proceeding to condemn a food product under section 10 of the act is a civil case, and the Government, in order to obtain a verdict,

LIBEL—Continued.

Page

must establish its case by a preponderance of the evidence to the reasonable satisfaction of the jury, and not beyond a reasonable doubt. *United States* v. *1,500 Cases of Tomato Pulp*---------- 892

In a libel proceeding under section 10 of the act, against an alleged misbranded food product, *held* that the measure of persuasion is, as in civil cases, a fair preponderance of the evidence, and that the burden is on the Government to prove by a fair preponderance of the evidence the material allegations set up in the libel which are denied in claimant's answer, and the burden is on the claimant to prove by a fair preponderance of the evidence the material allegations set out and alleged affirmatively in his answer and denied by the Government. *United States* v. *90 Boxes of Macaroni*------ 561

In a proceeding under section 10 of the act, to condemn wine alleged to be adulterated and misbranded, *held* incumbent on the Government, in order to sustain a verdict in its favor, to establish the facts constituting the adulteration and misbranding by a fair preponderance of the evidence, to the satisfaction of the court. *United States* v. *60 Barrels of Wine*---------- 658

In a proceeding to condemn confectionery as adulterated because it contained talc, *held* that the burden was on the Government to establish by a fair preponderance of the evidence not only that the article contained talc, but that it contained an appreciable quantity thereof. *United States* v. *307 Cases of Confectionery*---- 353

A forfeiture proceeding under section 10 of the act is not a criminal prosecution, but is a suit to enfore a penalty, and while the degree of proof required of the Government in order to prevail is not that required in criminal cases—proof beyond a reasonable doubt—a higher degree of proof is required of the Government than a mere preponderance, a mere balance, of the evidence in its favor. The burden is on the Government to establish, by clear and satisfactory evidence, that its case has been made out. *United States* v. *One Barrel of Desiccated Egg Product*---------- 99

In a libel proceeding under section 10 of the act, to forfeit a food product alleged to be adulterated, *held* that the burden of proof rests upon the Government to establish the allegations of the libel by the weight of the evidence, and, as such proceeding involves the possible forfeiture of property, the evidence must be of a clear and convincing character. *United States* v. *443 Cans of Frozen Egg Product*---------- 197

In proceedings under section 10 of the act, for seizure and condemnation of bottled waters, as misbranded, *held* that the burden of proof is upon the Government to establish the misbranding charged by a preponderance of the evidence which is clear and convincing. *United States* v. *36 Bottles of Crab Orchard Mineral Water*---------- 1011

United States v. *22 Bottles of Crab Orchard Concentrated Mineral Water*---------- 1055

The proceeding for forfeiture of goods under section 10 of the act is a penalty, and, while it is not a criminal proceeding, it is not far removed in its nature from a criminal proceeding; therefore, a higher degree of proof is required of the Government in such a proceeding than would be required of it in an ordinary suit on an obligation to the United States. It is not only required that there should be a fair weight of evidence in favor of the Government, but also that the Government should make out its case by evidence that is of a higher quality—evidence that is clear, convincing, and satisfactory. *United States* v. *10 Barrels of Olives*---------- 125

United States v. *36 Bottles of London Dry Gin*---------- 489

A proceeding under section 10 of the act, to forfeit a food as adulterated and misbranded is in no sense a criminal prosecution, and the Government is not required, as in criminal cases, to prove the essential elements of its case beyond a reasonable doubt; but the rule is that in such cases, involving the possible forfeiture of property, the Government must establish its cause of action by a clear and satisfactory preponderance of the evidence. *United States* v. *1,246 Cases of Tomato Catsup*---------- 943

LIBEL—Continued. Page

A libel for condemnation of bottled water, for false and fraudulent statements, made on the label, regarding its curative or therapeutic effects, is sustained by sufficiently showing the false and fraudulent character of any one of such claims. *Goodwin et al.* v. *United States*---- 1130

The act provides that proceedings for condemnation shall conform as near as may be to proceedings in admiralty. Admiralty rule 29 declares that, upon the taking of a libel pro confesso, the court shall proceed to hear the cause ex parte and adjudge therein as to law and justice shall pertain. *Held*, that where a libel for condemnation of tomato catsup charged misbranding in that the label stated the catsup was made from choice ripe tomatoes, when in fact it was made in part from tomato pulp screened from peelings and cores as the offal of tomato canning factories, the claimant having neither answered nor contested the allegations of the libel, so that it was taken pro confesso, it was incumbent on the Government to prove that the label contained a statement which was substantially false and misleading. *United States* v. *650 Case of Tomato Catsup*---- 31

Where it was charged in a libel that flour was misbranded in that it was labeled as made of the first quality of hard wheat, whereas, in truth it was made in whole or in part of soft wheat, and the evidence adduced in support of the charge was that the flour was milled from No. 2 Turkey red wheat and was not of the first quality, but that no soft wheat entered into its composition, *held*, the trial court erred in submitting the charge of misbranding to the jury, since the charge tendered the issue of soft wheat as distinguished from hard wheat, and if it was permissible to specify a particular and, failing to support the specification, to prove falsity in another particular, then the specification served but to draw the attention of the libelee from the actual point of controversy and to mislead. *Lexington Mill & Elevator Co.* v. *United States*---- 443

On trial of a libel brought by the Government, under section 10 of the act, against alleged misbranded drugs shipped in interstate commerce, *held* that the Government was required to show that the goods described in the libel were the goods actually seized by the Government under the libel. *United States* v. *539 Boxes and 322 Cartons of Wm. Radam's Microbe Killer*---- 511

The Government is precluded from complaining of words omitted from a libel filed for condemnation of a drug preparation as misbranded under the act, section 8, as amended by act August 23, 1912. *United States* v. *23 7/12 Dozen Bottles, Etc., of An Article of Drugs Labeled "Lee's Save The Baby"*---- 1240

On a libel seeking condemnation of drugs for misbranding under the act, section 8, paragraph 3, a motion by the claimant for leave to withdraw its intervening petition and to permit a default decree to be entered, overruled on representation of the United States attorney that the Government was ready for trial and had procured a number of witnesses from different parts of the country at considerable expense, and that the Department of Agriculture was specially desirous of having the case heard on its merits. *United States* v. *100 Boxes of Bowman's Abortion Remedy*---- 1187

In a proceeding to forfeit sugar under section 10 of the act, where the court permitted the G. Co. to interplead and file a brief, and thereafter permitted the withdrawal of the answer and filing of exceptions, to which the district attorney assented, an objection by the district attorney to the G. Co.'s right to interplead and file a brief in the case unless further evidence was offered that it was a party in interest or the bona fide owner of the sugar seized, *held* too late. *United States* v. *46 Packages and Bags of Sugar*---- 168

In a proceeding to condemn lithia water as misbranded the finding of the court, on jury trial being waived, must be accepted as the verdict of the jury. *Goode* v. *United States*---- 698

LIBEL—Continued.

Page

A libel to condemn bottled water, charging misbranding in general terms, and there having been no motion for a bill of particulars, a general verdict for the Government must be sustained, there being substantial evidence that any one of the statements on the label was false and fraudulent. *Goodwin et al.* v. *United States*__ 1130

It was no objection to a proceeding under section 10 of the act, for condemnation of a large number of cases of canned salmon as adulterated, that the whole number of cases should not be destroyed because only one quarter of the same were found adulterated, since destruction does not follow condemnation as a matter of course under the act, and under the provision for delivery of condemned goods to the owner on payment of costs and giving sufficient bond to the effect that the articles shall not be sold or otherwise disposed of contrary to law, the claimant may be permitted to separate the good from the bad, but the burden of so doing should rest upon it and not on the Government or the ultimate consumer, and if it cannot do this it is its own misfortune and it must suffer the consequences. *A. O. Andersen & Co.* v. *Unted States*_____ 1053

In an action under section 10 of the act for condemnation and destruction of butter which was filthy and decomposed, the court, under the power conferred by the act, allowed redelivery of the butter to the claimant under bond to attempt to cleanse it by renovating, but not by ladling. *United States* v. *Nine Barrels of Butter*_____ 826

Motion of claimant of food products seized on libel to condemn as misbranded, for release of the products under bond pursuant to section 10 of the act, would, under the permissive language of the section, be denied, where, although the articles seized were not deleterious, they had a much lower market value than the articles which the false labels described, the misbranding was fraudulent and injurious to competitors in the trade, and claimant had been convicted of a similar offense before, and had numerous other proceedings pending against him. *United States* v. *Two Cans of Oil of Sweet Birch and Three Cans of Oil of Gaultheria*_____ 963

The provision of section 10 of the act that the court may by order direct that articles of food or drugs condemned as adulterated or misbranded in libel proceedings under said section, be delivered to the owner thereof upon payment of the costs of such proceedings and the giving of a bond as prescribed, is not mandatory, but confers a discretionary power upon the court. Id.

In admiralty practice costs are within the discretion of the court, from which no appeal lies unless perhaps in case of gross abuse of discretion. In no case can costs be assessed against the United States. *Charles* v. *United States*_____ 189

In a proceeding in rem under section 10 of the act the court has jurisdiction to render personal judgment for costs against the claimant, even upon the supposition that the principles of the admiralty law are made applicable to such proceedings by the provision of said section that they shall conform as near as may be to the proceedings in admiralty. *Hipolite Egg Co.* v. *United States*_____ 223

Under the act, on a libel proceeding against tomato pulp, intervening claimants who did not stipulate to pay costs and expenses, expense of custody having exceeded all money value involved, so that they acquiesced in the Government's securing decree of destruction, were not subject to decree in personam for costs, despite rule 26 of the Supreme Court. *United States* v. *1,590 Cases of Tomato Pulp*_____ 914

See Admiralty Proceedings; Admiralty Rules; Adulteration; Affidavits; Appeal and Error; Article; Bond; Burden of Proof; Civil Cases; Construction and Interpretation; Costs; Depositions and Interrogatories; Importation; Indictment; Information; Injunction; Interstate Commerce; Jurisdiction; Jury Trials; Misbranding; Notice and Opportunity to be Heard; Original Package; Package; Penalties; Release; Sale; Search Warrant; Seizure.

LIMITATIONS, STATUTE OF: Page

The general 3-year statute of limitations applicable to crimes was not repealed by the Food and Drugs Act containing no specific limitation on prosecutions thereunder, so as to require immediate prosecution on the theory that in case of delay the right to prosecute would be barred by laches. *United States* v. *J. L. Hopkins & Co*---- 401

LITHIA WATER:

The term "lithia water", as ordinarily understood, means a water containing a sufficient amount of lithium to give a therapeutic effect when drunk in reasonable quantities. *United States* v. *Seven Cases of Buffalo Lithia Water*---- 573

See Buffalo Lithia Water; Mineral Water; Water.

LONDON DRY GIN:

There is a distinct kind of gin known as "London Dry Gin", which need not necessarily be made in London, and the use of the name "London Dry Gin" on this particular kind of gin of domestic production did not constitute misbranding. *United States* v. *36 Bottles of London Dry Gin*---- 489

Judgment reversed *United States* v. *36 Bottles of London Dry Gin*---- 570

See Holland Gin; Hollands Geneva Gin.

LONG'S WORLD'S GREATEST KIDNEY AND BLADDER REMEDY:

An article labeled "World's Greatest Kidney and Bladder Remedy" *held* misbranded in that the label falsely and fraudulently represented the curative or therapeutic effect of the article. *United States* v. *Long*---- 989

MACARONI:

Macaroni to which a coal-tar dye known as "martius yellow" had been added solely as a coloring matter, *held* adulterated within the meaning of the act, section 7, in that it contained an added poisonous ingredient which might render it injurious to health. *United States* v. *1,950 Boxes of Macaroni et al*---- 112

Macaroni containing an unsubstantial amount of coloring matter the presence of which was inconspicuously declared on the label, and having on the label pictures alleged to represent scenes in Italy, held not misbranded. *United States* v. *175 Boxes of Macaroni*---- 426

Macaroni manufactured in the United States and contained in boxes bearing labels containing the words "Macaroni, Gragnano Style—Savoy Brand", the word "Gragnano" being in flaring type and the words "Savoy Brand" in large type, and containing a pictorial representation of an Italian scene, and the boxes being in style and dress similar to boxes used for macaroni made in the Gragnano district in Italy, and also having stamped thereon the words "artificially colored" by means of a rubber stamp in so indistinct a manner as to be almost imperceptible, although the macaroni was so artificially colored as to resemble in color macaroni produced in the Gragnano district in Italy; *held* misbranded. *United States* v. *90 Boxes of Macaroni*---- 561

Macaroni manufactured in the United States and bearing a label containing Italian words including the name of a town in Italy where macaroni is extensively manufactured, so that the general purchaser looking at the label would conclude that it represented an Italian product, *held* misbranded, though the letters "Mfg. U. S. A." appeared in small type within less than an inch of space on a very narrow white margin on the lower edge of the label. *United States* v. *267 Boxes of Macaroni*---- 630

Macaroni labeled "Macaroni Savoia Brand, Gragnano Style", *held* adulterated in that it was an inferior macaroni prepared in whole or in part from a flour other than semolina prepared from durum wheat, the material from which the best grade of macaroni is made, and was colored with a certain dye, to wit, naphthol yellow

MACARONI—Continued. Page

S., to simulate the natural appearance of macaroni made wholly from semolina prepared from durum wheat, and in a manner whereby the inferiority of said article was concealed. *United States* v. *Atlantic Macaroni Co*---------- 793

Since "macaroni" is defined as made from a paste from the flour of hard glutinous wheat, and "semolina" is defined as the hard grains retained in the bolting machine after the fine flour has passed through, an information charging an article labeled "macaroni" was adulterated and misbranded because made of flour, not of semolina, is not sufficinetly definite, even though macaroni must not contain the fine flour which passes through the bolting machine. *United States* v. *Krumm*---------- 993

MACAROONS:

Macaroons *held* adulterated in that glucose had been mixed and packed therewith so as to reduce, lower, or injuriously affect their quality and strength. *United States* v. *F. B. Washburn & Co*---- 434

Reversed, *F. B. Washburn & Co.* v. *United States*---------- 654

An article labeled "Macaroons" *held* misbranded where there was evidence that a macaroon, as commonly understood, was made of ground almonds, sugar, and white of eggs, and that the so-called macaroons were made of cocoanut, sugar, and white of eggs, and contained glucose in addition. *United States* v. *F. B. Washburn & Co*---------- 434

Affirmed, *F. B. Washburn & Co.* v. *United States*---------- 654

McLEAN'S LIVER AND KIDNEY BALM:

An article labeled "Dr. J. H. McLean's Liver and Kidney Balm" *held* misbranded in that the label on the bottle, the carton in which the bottle was contained, and circulars inclosed with the bottle, bore statements regarding the curative or therapeutic effect of the article which were false and fraudulent. *United States* v. *Dr. J. H. McLean Medicine Co*---------- 850

Judgment reversed, *Dr. J. H. McLean Medicine Co.* v. *United States*---------- 907

MAIL, SHIPMENT BY.

See Interstate Commerce; Search Warrant; Shipment.

MANDAMUS:

Where the Secretary of Agriculture has published a decision to the effect that flour bleached by a certain process was obnoxious to the provisions of the Food and Drugs Act, and announced his intention to recommend prosecution of those engaged in its manufacture and sale, a company manufacturing and selling machinery for bleaching flour under a patent process could not maintain a petition for mandamus to compel the Secretary to revoke his decision and not to circulate copies of it. *Alsop Process Co.* v. *Wilson, Secretary of Agriculture*---------- 37

Affirmed, *Alsop Process Co. v. Wilson, Secretary of Agriculture*_ 54

Where the Secretary of Agriculture, after investigation, rendered and promulgated a decision to the effect that flour bleached by a certain process is an adulterated product under the Food and Drugs Act, and announced his intention to recommend the prosecution of those engaged in its sale and manufacture, a company manufacturing machinery for bleaching flour under a patented process has no such interest in the subject matter of the Secretary's action as will entitle it to maintain a petition for mandamus to compel him to revoke his decision and not to circulate copies of it, although the indirect effect of such decision and its promulgation has been and will be to cause millers throughout the country to cease purchasing the relator's machinery. *Alsop Process Co.* v. *Wilson, Secretary of Agriculture*---------- 54

Affirming *Alsop Process Co.* v. *Wilson, Secretary of Agriculture*_ 37

See Injunction.

MAPLE FLAVO: Page

An article labeled "Maple Flavo", composed chiefly of cane sugar and glucose and artificially colored and flavored, *held* misbranded because the name represented the article to be a true maple product when it was not. The term "Maple Flavo" *held* not to be a distinctive name within the meaning of the act. *United States* v. *S. Gumpert et al*---------- 182

MAPLEINE:

The term "Mapleine" *held* not to be a distinctive name within the meaning of the act, and its use on the label of an article containing no maple product *held* to constitute misbranding of the article so labeled. *United States* v. *300 Cases of Mapleine*---------- 39

MAPLE SUGAR:

An article of food sold as maple sugar *held* adulterated in that cane sugar had been mixed and packed therewith so as to reduce and lower its quality and strength. *United States* v. *Huyler's*---------- 455

MAPLE SIRUP:

Maple sirup is popularly recognized as the sirup made by boiling down the sap that flows in the spring of the year from the live maple tree. *United States* v. *Scanlon*---------- 28

See Sirup.

MARASCHINO CHERRIES:

Maraschino is a liqueur or cordial, high in alcohol, produced from the fruit, leaves, and bark of the marasque cherry tree which grows indigenous in Dalmatia. Cherries packed in a weak sirup or sweet liquid containing no alcohol, artificially colored red and highly flavored with essence of bitter almonds, and not produced from the marasque cherry tree, and labeled "Maraschino Cherries", *held* misbranded. *United States* v. *Bettman-Johnson Co*---- 299

MEASURE.

See Weight, Measure, and Numerical Count.

MILK:

Milk *held* adulterated in that water had been mixed and packed therewith so as to reduce, lower, and injuriously affect its quality and strength. *United States* v. *Griebler*---------- 29

Milk *held* adulterated by the addition of water and because of the presence of filthy matter. *United States* v. *Taylor*---------- 839

Milk containing bacteria, including *Bacillus coli* and *B. streptococci* types, *held* adulterated in that it consisted in whole or in part of a filthy, decomposed, and putrid animal and vegetable substance. *Dade* v. *United States*---------- 465

A dairy company shipping from its receiving plant in Illinois to Missouri milk which was adulterated by addition of water and which contained decomposed animal matter, cannot defeat a prosecution on the ground that the milk was to be treated in Missouri, and was not an article of food until after treatment. *Union Dairy Co.* v. *United States*---------- 869

In view of section 7 of the act, declaring that an article shall be deemed to be adulterated if any substance has been mixed or packed with it so as to reduce or lower or injuriously affect its quality or strength, it is unnecessary, in a prosecution for the interstate shipment of milk adulterated with water, for the court to receive evidence that the addition of water injuriously affected the quality or strength of the milk. Id.

In a prosecution charging shipment of milk alleged to be adulterated in that water had been mixed and packed with it so as to reduce, lower, or injuriously affect its quality or strength, and in that water had been substituted in part for milk, *held* that, in order to convict, it must be shown that defendants intentionally added and mixed water with the milk, or that it was done with their knowledge or consent, and that the effect of adding the water to and mixing it with the milk was to reduce or lower or injuriously

MILK—Continued. Page

affect its quality or strength; or that by such substitution of water for milk they intended to deceive the purchaser of the product into buying an inferior for a superior product. *United States* v. *Tetz et al*---------- 917

See Milk, Condensed Skimmed.

MILK, CONDENSED SKIMMED:

An article labeled "Condensed Skimmed Milk" and containing about 42 per cent of cane sugar, the presence of which was not disclosed on the label, *held* adulterated and misbranded. *United States* v. *Libby, McNeill & Libby*---------- 442

Affirmed, *Libby, McNeil & Libby* v. *United States*---------- 540

MILK CHOCOLATE.

See Confectionery.

MINERAL SUBSTANCES.

See Confectionery; Ejusdem Generis.

MINERAL WATER:

Mineral water under a label representing that it possessed curative or alleviative properties, *held* to be a drug within the meaning of the act, and such representations being false and fraudulent, it therefore falls within the condemnation of section 8, subdivision 3, as to misbranding of drugs. *Bradley* v. *United States*---------- 964

Mineral water, not being in its original state, and processes of separation of constituent drug elements being carried to the extent that the water can no longer be used as a beverage, but only in small quantities as a drug, is to be classified as a "drug", and not a "food", within the meaning of the act as amended. *Goodwin et al.* v. *United States*---------- 1130

See Bethesda Natural Mineral Spring Water; Buffalo Lithia Water; Capon Springs Water; Crab Orchard Concentrated Mineral Water; Crab Orchard Mineral Water; Imperial Spring Water; Robinson Spring Water.

MISBRANDING:

The act not only requires that drugs shipped in interstate commerce and labeled shall not be misbranded, but also requires that they shall be labeled with labels conforming to its requirements. *United States* v. *65 Casks of Liquid Extracts*---------- 47

The purpose of the act was to protect consumers against impure and adulterated foods and drugs, and also against the use of food and drugs which do not show what they contain by the brands on the package. *United States* v. *Mayfield et al*---------- 90

The purpose of the act, section 8, providing that an article of food shall be deemed misbranded if labeled or branded so as to deceive or mislead the purchaser, or purport to be a foreign product when not so, is to protect the public from deception, and the intent of one charged with misbranding is immaterial. *United States* v. *267 Boxes of Macaroni*---------- 630

It is not necessary, in order to establish a charge that an article of food is misbranded by false or misleading statement on the label, that it be found that any person was actually deceived or misled by the statement on the label; it is sufficient if it be found that the statement was calculated to deceive or mislead in any particular. *United States* v. *300 Cases of Mapleine*---------- 39

United States v. *J. L. Hopkins & Co*---------- 366

The act, as against misbranding, was intended to make it possible that the consumer should know that an article purchased was what it purported to be; that it might be bought for what it really was and not upon misrepresentations as to character and quality. *United States* v. *Lexington Mill & Elevator Co*---------- 577

United States v. *Coca Cola Co*---------- 741

United States v. *Schider*---------- 875

United States v. *95 Barrels, More or Less, Alleged Apple Cider Vinegar*---------- 1118

United States v. *Ten Cases, More or Less, Bred Spred, Etc., et al*---------- 1262

MISBRANDING—Continued. Page

It is a misbranding of a food product to put a label upon the package which in any way misleads or will mislead the purchaser. The test is, would the ordinary layman, the purchaser, be misled by the label upon the package from a casual observation of the same; if he would, there is a misbranding; if he would not, there is not a misbranding. The act was passed for the protection of the consumers and purchasers. *United States* v. *Mohn Wine Co*_____ 316

The act, section 8, specifies and defines at least two kinds of "misbranding"—one where the article bears a false and misleading label, and the other where it is offered for sale under the distinctive name of another article. In either case, it is not the misbranding that is made unlawful, but the shipment or delivery for shipment from one State to another, of the misbranded article. *Weeks* v. *United States*_____ 867

It is not necessary, in order to constitute misbranding of a food product by reason of a misleading label, that the product should be injurious to health in any way; it is sufficient if the label describing the product is misleading as to something contained in the product. *United States* v. *Mohn Wine Co*_____ 316

It is not necessary that an article of food, in order to be unlawfully misbranded within the act, be dangereous to the health of the public. *United States* v. *Krumm*_____ 993

The prohibition of misbranding in the act is designed to prevent deceiving or misleading the purchasing public, even though the article sold is in itself equally good or not injurious to health. *United States* v. *95 Barrels, More or Less, Alleged Apple Cider Vinegar*__ 1047

The primary purpose of the act is to prevent injury to the public health, and while the test of misbranding of a food product, under the act, section 8, is whether it is true to name, there should not be over-strictness in applying this test in a case where the public health cannot possibly be jeopardized. *Ninety-five Barrels, More or Less, Apple Cider Vinegar* v. *United States*_____ 1079

In a proceeding under the act, section 10, for forfeiture of a food product for misbranding, the burden is on the Government to establish by the evidence not merely a technical, but a substantial violation of the act, which may render the article injurious to health, or mislead the public to its prejudice or harm, or induce the purchase of an article different from the article desired. Id

If an article of food is the identical thing indicated by the brand, it is not "misbranded", within the meaning of the act, section 8, and the method of manufacture is immaterial. Id.

The purpose of the act in forbidding misbranding is to prevent the use of misleading statements as well as those which are false. *United States* v. *95 Barrels, More or Less, Alleged Apple Cider Vinegar*_____ 1118

The statute as to misbranding, is plain and direct. Its comprehensive terms condemn every statement, design, and device which may mislead or deceive. Deception may result from the use of statements not technically false or which may be literally true. The aim of the statute is to prevent that resulting from indirection and ambiguity as well as from statements which are false. It is not difficult to choose statements, designs, and devices which will not deceive. Those which are ambiguous and liable to mislead should be read favorably to the accomplishment of the purpose of the act. Id.

United States v. *John J. Fulton Co*_____ 1229

The test of misbranding under the act, section 8, declaring that the term "misbranded" shall apply to all drugs, or articles of food, the package or label of which shall bear any statement, etc., which is false or misleading in any particular, is whether the statement on the package or label tended to deceive or mislead the ordinary person purchasing the article, giving the words used their ordinary and customary meaning as understood by the general public. *United States* v. *Harper*_____ 11

United States v. *300 Cases of Mapleine*_____ 39

MISBRANDING—Continued.

Page

Whether an article labeled "Pure Pepper" was misbranded under the act depended on the ordinary and customary meaning given to such words, and not on the technical meaning thereof. *United States* v. *75 Boxes of Alleged Pepper* ---- 340

In determining whether an article of food is misbranded as labeled or branded so as to deceive or mislead the purchaser, the terms used on the label must be given the meaning which is commonly accepted and understood by the general public. *United States* v. *F. B. Washburn & Co* ---- 434

In a proceeding for the misbranding of food in violation of the act the words of the offending label are to be construed in their ordinary or customary meaning so far as they have one. *United States* v. *150 Cases of Fruit Puddine* ---- 557

The act as to misbranding was designed to prevent the ordinary purchaser from being deceived and misled as to what he is buying, and therefore the test of misbranding is the effect of the label or statement upon the ordinary purchaser. *United States* v. *95 Barrels, More or Less, Alleged Apple Cider Vinegar* ---- 1047

In determining whether a drug product is misbranded within the act, section 8, as amended by act August 23, 1912, the language used on the label or package is to be given the meaning ordinarily conveyed by it to those to whom it is addressed. *Hall* v. *United States* ---- 978

In a libel proceeding for condemnation of drugs for misbranding under the act, section 8, as amended by act August 23, 1912, *held* that the jury should give to the language of the statements in the labels, etc., and set forth in the libel, its ordinary and common meaning and consider what the statements would mean to an ordinarily intelligent person purchasing the drugs. *United States* v. *Eleven Gross Packages of Dr. Williams' Pink Pills* ---- 680

The test of misbranding under the act, section 8, as amended by act August 23, 1912, declaring drugs misbranded if the package or label bears or contains any statement regarding the curative or therapeutic effect of the drug which is false and fraudulent, is what the statements appearing on the label or in a circular or pamphlet inclosed in the package, mean to the ordinary person, that is, what the ordinary person reading the statements would understand as to the curative or therapeutic effect of the article. *United States* v. *Athlophoros Co* ---- 732

In a prosecution charging misbranding of drugs by reason of the label, etc., containing allegedly false and fraudulent statements regarding the curative or therapeutic effect of the article, *held* that the jury, in determining whether the challenged statements were false and fraudulent, had the right to consider the ideas conveyed by the words in their common usage to the average person as distinguished from the ideas conveyed to the average physician or scientist. *United States* v. *Bell & Co* ---- 828

In a prosecution charging misbranding of bottled water in that the label falsely and fraudulently stated its curative or therapeutic effect, *held* that the jury, in determining whether the label constituted misbranding, should determine what the label meant, and, in doing so, should give to the words and language thereof the meaning they would convey to ordinary men, and not to men who are skilled in medical, chemical, or pharmaceutical science capable of making nice distinctions and discriminations. *United States* v. *Bethesda Mineral Spring Co* ---- 841

Upon a charge of misbranding by offering for sale an article of food under the distinctive name of another article, *held* that the trial court properly received evidence that the shipment was made to fill an order obtained by the defendant's agent by so misrepresenting the article, and properly declined to confine the jury's attention to the label borne by the article when it was shipped. *Weeks* v. *United States* ---- 867

MISBRANDING—Continued. Page

False representations regarding an article of food, in a circular enclosed within the package, cannot be considered as violations of the act as to misbranding. *United States* v. *Newton Tea & Spice Co*---- 950

The act, section 8, declaring that the term "misbranded" shall apply to drugs, the package or label of which shall bear any statement, design, or device regarding the article which shall be false or misleading in any particular, merely embraces any statement, etc., which appears on the outside of the package in which the article is offered for sale, whether such statement is printed on or otherwise affixed to the package, and does not include an advertising circular inclosed with an article inside the carton in which it is offered for sale. *United States* v. *American Druggists' Syndicate*---- 250

The provision of the act that drugs are misbranded if the package or label bears or contains any false and fraudulent statement regarding the curative or therapeutic effect of the article, embraces statements which are contained in the packages as well as those appearing on the label. *United States* v. *Abbott Bros. Co*---- 722

Statements regarding the curative or therapeutic effect of a drug preparation, if false and fraudulent, constitute misbranding under the act, whether such statements appear on the labels of the packages or are contained in a pamphlet or circular contained in the package. *United States* v. *Matusow*---- 664

United States v. *Eleven Gross Packages of Dr. Williams' Pink Pills*---- 680

Section 8 of the act as amended by act August 23, 1912, providing that drugs shall be deemed to be misbranded if the package or label shall bear or contain any statement regarding the curative or therapeutic effect of the article which is false and fraudulent, not only applies to statements which appear on the package or label but embraces as well statements in circulars or printed matter contained inside the package. *Seven Cases of Eckman's Alterative* v. *United States*---- 707

Simpson v. *United States*---- 832

Under the provision of the act that drugs shall be deemed to be misbranded if the package or label bears or contains any false and fraudulent statement regarding its curative or therapeutic effect, a statement as to the curative or therapeutic effect of drug preparations, if false and fraudulent, is misbranding thereof whether it is made on the labels of the bottles, on cartons inclosing the bottles, or in circulars or pamphlets contained in the cartons. *United States* v. *Kellett*---- 711

"Misbranding" within the definition of the act, section 8, as including cases where the package or label shall bear any statement regarding the article or the ingredients or substances contained therein which is false or misleading in any particular, is inapplicable to such statements in a booklet inclosed within a carton containing drugs. *United States* v. *17 Bottles, Etc., of An Article of Drugs Labeled in Part "B. & M."*---- 1287

The purpose of the act was to protect the public health against adulterated, poisonous, and deleterious food and drugs, and in view of such purpose, under section 8 which provides that the term "misbranded" shall apply to all drugs, or articles of food, the package or label of which shall bear any statement, etc., regarding such article, or the ingredients or substances contained therein which shall be false or misleading in any particular, a medicinal preparation cannot be said to be misbranded merely because of a representative on the label as to its curative effect. *United States* v. *Johnson*---- 85

Affirmed, *United States* v. *Johnson*---- 267

The term "misbranded" and the phrase defining what amounts to misbranding in section 8 of the act are aimed at false statements as to identity of the article, possibly including strength, quality, and purity, dealt with in section 7, and not at statements as to curative effect; and so *held* that a statement on the labels of

MISBRANDING—Continued.

Page

bottles of medicine as to the curative effect of the contents, even if misleading, is not covered by the act. *United States* v. *Johnson*__ 267

An information charging misbranding of an article of food should specifically charge the manner of misbranding as defined in section 8 of the act. *United States* v. *St. Louis Coffee & Spice Mills*____ 44

An information charging that defendant shipped in interstate commerce a liquid labeled "Flavor of Vanilla", which did not contain any extract of vanilla, *held*, did not state a case of misbranding of vanilla extract in violation of the act, section 2, the words "extract" and "flavor" not being synonymous terms. Id.

Where a libel to condemn food alleges misbranding under the act, section 8, it is essential that the libel should set forth the branding and facts inconsistent therewith, and, if there is indefiniteness in the statement, it must be removed by proof. *United States* v. *650 Cases of Tomato Catsup*_____ 31

Averments that a fluid was labeled "Flavor of Lemon and Citral—A Pure Flavor," and that it did not contain an appreciable quantity of lemon oil which was an essential ingredient of pure lemon flavor, do not state facts sufficient to show a misbranding under the act, because they fail to show that the fluid was labeled a pure flavor of lemon, or that lemon oil was an essential element of a pure flavor of lemon and citral. *Nave-McCord Mercantile Co.* v. *United States*_____ 166

An averment that one who branded an article with a label whose accepted and usual signification correctly describes it intended that the public or purchasers should understand that the label had an opposite and unusual signification fails to disclose any misbranding. An averment that the defendant intended that the label "Flavor of Lemon and Citral—A Pure Flavor" should be understood by the public and purchasers to mean a pure flavor or extract of lemon is futile, because the accepted and usual signification of the label is that the article is not a pure flavor or extract of lemon, but that it is a flavor of lemon and citral. Id.

Averments in a libel charging misbranding under the act, section 8, as amended by act August 23, 1912, should receive a sensible construction. They must definitely charge the statutory offense of misbranding, but if there is enough to apprise those interested in the goods that they were charged with misbranding because statements as to curative power accompanying the articles in interstate commerce were false and fraudulent, as stating they would cure diseases which they could not cure, and were made with intent to deceive, they are sufficient to sustain the libel. *Seven Cases of Eckman's Alterative* v. *United States*_____ 707

An information alleging that statements on the label of an article of food were false and misleading in that they represented to the purchaser that the article was a substitute for eggs and could be used in place of eggs for cooking and baking, whereas, in truth said article was not a substitute for eggs, and could not be used in place of eggs for baking and cooking, *held*, sufficiently charged facts constituting misbranding, as against an objection that it did not set forth why or in what manner the article could not be used as a substitute for eggs. *United States* v. *Newton Tea & Spice Co*_ 950

Newton Tea & Spice Co. v. *United States*_____ 1089

A libel for condemnation of certain canned tomatoes, representing that said article of food, labeled "Castle Haven Brand Tomatoes. Our first quality carefully selected," as analyzed by the Department of Agriculture is shown to be misbranded in violation of the Food and Drugs Act in that the labels contain the statement "Tomatoes" and the cut of a ripe tomato, which are false and misleading and deceive and mislead the purchaser, *held* insufficient, there being no allegation in the libel that the contents of the cans were not derived from tomatoes, whether ripe or unripe, or that they were not of the first quality available to the packer or that they had not been carefully selected; and the representation of

MISBRANDING—Continued. Page

the ripe tomato on the label merely indicated the source of the contents of the cans and did not tend to deceive. *United States* v. *154 Cases of Tomatoes* 967

An information alleging that packages of an article were misbranded in that the statements "butter" and "one pound net" were false and misleading in that they represented that the article was "butter," namely, a product which should contain not less than 80 per centum by weight of milk fat, and represented that each of such packages contained one pound net of the article, whereas in truth the article contained less than 80 per centum by weight of milk fat and the packages contained a less amount than one pound net of the article; and that the article was further misbranded in that it was labeled as stated so as to mislead and deceive the purchaser into the belief that it was butter as defined, and that each of such packages contained one pound net of the article, *held* sufficiently charged misbranding in view of section 8 of the act, and in view of act March 4, 1923, defining "butter" for the purpose of the Food and Drugs Act. *United States* v. *Centralia Dairy Co* 1336

The labeling of canned apples and canned blackberries to indicate that the fruit was grown in Michigan, when it was grown in Arkansas, there being evidence that Michigan apples and blackberries were better than those grown in Arkansas, *held*, constituted misbranding. *United States* v. *100 Cases of Tepee Apples et al* 20

A sirup, composed of 10 percent of maple sugar and 90 percent of white sugar, labeled "Gold Leaf Syrup", with a trade mark consisting of a gold leaf in the form of a maple leaf, and stalks projecting on each side apparently representing sugar cane, and bearing the words "Composed of Maple and White Sugar" distinctly, cannot be said to be misbranded within the meaning of the act because the proportion of white sugar in the sirup exceeded that of maple sugar. *In re Wilson* 33

"Salad Oil" prima facie means olive oil, and, in the absence of evidence that the term has recently acquired a more general meaning to include other oils, its use without further explanation on packages of cotton seed oil constitutes misbranding. *Brina* v. *United States* 104

Ordinary Croton water drawn from the pipes in New York City, filtered and bottled after the addition of a small quantity of mineral salts and carbonic acid gas, is not "spring water", as the term is generally understood, and the labeling of the bottle as "Imperial Spring Water" was misleading and constituted misbranding within the meaning of the act, section 8. *United States* v. *Morgan et al* 146

An article labeled "Orange Flavoring" is not misbranded merely because it is shown to contain no more than about 20 percent of orange extract. It must be shown that the words orange "flavoring" and orange "extract" have a trade meaning to the effect that such substances are identical in strength. *United States* v. *Union Pacific Tea Co* 196

An information alleging that an article of food labeled as "Extract Terpeneless Lemon" was misbranded in that the article did not contain 0.2 percent of citral derived from lemon, but contained only 0.05 percent of such citral, and that the article therefore was not terpeneless lemon extract as recognized by the trade generally and by the standard of purity established by the Secretary of Agriculture by authority of act March 3, 1903, *held*, stated facts which sustained a count for misbranding under the Food and Drugs Act. *United States* v. *Frank et al* 205

A bottle containing wine produced in California and labeled "Extra Dry Champagne", without any other qualifying or descriptive words, tends to mislead and deceive and is misbranded under the provisions of the act. *United States* v. *Schraubstadter et al* 237

A bottled wine produced in California and labeled "Champagne" without any other qualifying or descriptive words, is misbranded

MISBRANDING—Continued. Page

under the act. Such a wine having substantially the same qualities as the champagne manufactured in France and produced substantially in the same way, although originating in California, is not misbranded if it is labeled "California Champagne", or if by some other device conspicuously displayed in connection with the word champagne, purchasers are clearly advised that the bottles do not contain a product of France. Id.

A bottled domestic wine, artificially carbonated, and labeled "Extra Dry Champagne" and with a design and with words in French calculated to induce a purchaser to believe he was buying a foreign and not a domestic product, *held* misbranded. *Schraubstadter et al.* v. *United States* ---------- 398

An article described on the label as "Peroxide Cream", and containing some peroxide, *held* not misbranded though the quantity of peroxide contained in the article was so small as to be insignificant. *United States* v. *American Druggists' Syndicate* ---------- 250

Alleged pure cider vinegar *held* misbranded where samples showed only from 0.11 to 0.16 percent glycerin. *United States* v. *100 Barrels of Vinegar* ---------- 287

Where grape juice contained added cane sugar the label describing the same as "Pure unfermented grape juice" was misleading and constituted misbranding. *United States* v. *Mohn Wine Co* ---------- 316

Where there was no proof that the words "Hudson's Extract" had a well-known trade meaning, an imitation of vanilla marked "Hudson's Extract", without giving any indication of what the article was composed, constituted misbranding under the act. *Hudson Manufacturing Co.* v. *United States* ---------- 344

In view of undisputed testimony that the term "patent flour" does not connote flour containing any fixed or maximum percentage of the wheat berry, and that it may differ with different kinds of wheat, a misbranding within the meaning of the act, section 8, cannot be predicated alone on the percentage in a flour so branded. *Lexington Mill & Elevator Co.* v. *United States* ---------- 443

Judgment affirmed, *United States* v. *Lexington Mill & Elevator Co.* ---------- 577

A charge in a libel that flour was misbranded in that it was labeled as made of the first quality of hard wheat, whereas, in truth it was made in whole or in part of soft wheat, was not sustained by evidence that the flour was milled from No. 2 Turkey red wheat and was not of the first quality, and that no soft wheat entered into its composition. Id.

Wine consisting in whole or in part of a pomace wine *held* misbranded as "Ohio Claret Wine." *United States* v. *60 Barrels of Wine* ---------- 658

Where macaroni manufactured in the United States bore a label containing Italian words, including the name of a town in Italy where macaroni is extensively manufactured, and the general purchaser, looking at the label, would conclude that it represented an Italian product, the macaroni was misbranded within the meaning of the act, section 8, though the letters "Mfg. U. S. A." appeared in small type within less than an inch of space on a very narrow white margin on the lower edge of the label. *United States* v. *267 Boxes of Macaroni* ---------- 630

In a prosecution for misbranding so-called macaroons, under the act, section 8, providing that an article of food is misbranded if it be an imitation of or offered for sale under the name of another article, or if the package containing it, or its label, shall bear any statement regarding the article or the ingredients or substances contained therein which shall be false or misleading in any particular, if the jury found that a macaroon, as commonly understood, consists of ground cocoanut, sugar, and the white of eggs, then defendant's product containing glucose in addition, and branded "Macaroons", was misbranded within the meaning of the act. *F. B. Washburn & Co.* v. *United States* ---------- 654

MISBRANDING—Continued. Page

An article labeled "Special Lemon. Lemon Terpene and Citral", which was not derived from lemon, but was a mixture containing alcohol and citral derived from lemon grass, and an imitation of lemon oil, *held* not misbranded. *Weeks* v. *United States*_____ 646

An article composed of alcohol and citral derived from lemon grass and an imitation of lemon oil, and labeled "Special Lemon", and represented by the seller's agent to the buyer as pure lemon oil, was misbranded within the act, section 8, defining misbranding as offering an article for sale under the distinctive name of another article, though no label describing it as such other article was affixed to it. Id.

Affirmed, *Weeks* v. *United States*_____ 867

An information alleging misbranding of defendant's food product in that its designation on the label, "Cordial Non-Alcoholic Rock & Rey", was false and misleading in representing the article to be (a) a compound of rock candy and rye whisky, (b) a cordial, and (c) a cordial containing rock candy and rye whisky, when it was syrup containing sugar, commercial glucose, and artificial coloring matter, *held*, failed to charge misbranding, on the ground that such designation was an arbitrary and fanciful one, calculated to put the purchaser of the article upon inquiry as to its ingredients, and that the word "non-alcoholic" indicated that the product did not contain whisky and that it was not a cordial (the essential ingredient of which is alcohol). *United States* v. *Goodman*_____ 484

On a finding that there is a distinct kind of gin known as "London Dry Gin" which need not necessarily be made in London, *held* that the use of such name on the label of such particular kind of gin not made in London did not constitute misbranding. *United States* v. *36 Bottles of London Dry Gin*_____ 489

Judgment reversed, *United States* v. *36 Bottles of London Dry Gin*_____ 570

An article of domestic manufacture designated on the label as "Holland" gin, with the statement "Distilled by Baird Daniels Co., Warehouse Point, Conn.", *held* not misbranded as purporting to be a foreign product, since the term "Holland" in connection with the word gin is a geographical name which has become generic by usage, and represents a style, type, or brand of gin, and the label stated the State where the article was manufactured. *United States* v. *Five Cases of Hurdle Brand Holland Gin*_____ 549

Natural spring water taken from Buffalo Lithia Springs in Mecklenburg County, Va., and sold in bottles under the label "Buffalo Lithia Water—Springs No. 2, Buffalo Lithia Springs Water—Nature's Materia Medica, Buffalo Lithia Water Company, Buffalo Lithia Springs, Va.", *held* misbranded within the meaning of the act, section 8, first general paragraph, in that the water was not a lithia water and did not contain a sufficient amount of lithium to entitle it to be called lithia water. *United States* v. *Seven Cases of Buffalo Lithia Water*_____ 573

Affirmed, *Goode* v. *United States*_____ 698

Flour *held* misbranded in that it was offered for sale under the distinctive name of another article, to wit, "High Patent Flour", when it was a flour inferior to "Patent Flour" and was a mixed flour consisting of "Straight Flour" mixed with "Clear Flour"; and misbranded in that it was labeled and branded so as to deceive and mislead the purchaser, that is to say, it was described on the labels as "High Patent", when it was not "Patent Flour", but was a mixture of straight flour made from a mixture of hard and soft new winter wheat, and clear old wheat flour. *United States* v. *420 Sacks of Flour*_____ 96

Flour *held* misbranded in that it was labeled as "Patent" flour, when in fact it was not patent flour but was flour inferior to patent flour, and was sold under the distinctive name of another article and labeled so as to deceive and mislead the purchaser; and further misbranded in that the labels contained the statement,

MISBRANDING—Continued. Page

"This flour is made of first quality hard wheat", when in fact it was not made from first quality hard wheat, but was made in whole or in part from wheat inferior to first grade winter wheat, and was sold under the distincitve name of another article. *United States* v. *625 Sacks of Flour*---- 129
Reversed, *Lexington Mill and Elevator Co.* v. *United States*--- 443
Judgment C. C. A. affirmed, *United States* v. *Lexington Mill and Elevator Co*---- 577

Under a regulation adopted under the act, that "The use of a geographical name in connection with a food or drug product will not be deemed misbranding, when by reason of long usage it has come to represent a generic term, and is used to indicate a style, type, or brand, but in such cases the state or territory where any such article is manufactured or produced shall be stated upon the principal label", coffee shipped from the port of Aden, Arabia, whether produced in Arabia or Abyssinia, may properly be labeled "Mocha", but the label must state in which of the two countries it was produced. *United States* v. *Thomson & Taylor Spice Co*--- 390

The H. Co., at Kansas City, Mo., contracted to sell to the W. Co., at Fort Worth, Tex., a quantity of No. 2 red wheat, according to Missouri official state grades, and ordered the operator of a public elevator where it stored its grain to ship to the W. Co. in fulfillment of this contract No. 2 red wheat. The operator loaded and sent to the W. Co. a car of wheat. After the wheat was loaded, an official inspector of the State of Missouri at Kansas City inspected, adjudged, and certified this wheat to be No. 2 red wheat. An invoice of it was forwarded to the W. Co., showing that it was shipped under the contract and subject to Kansas City weights and grades. The wheat arrived in Texas without change. There, on inspection by a Texas inspector, a Federal inspector, and other witnesses, it was found to be wheat of another and less valuable grade. None of the officers or employees of the H. Co. had any knowledge of this fact, or anything to do with the grading or shipping, except to order the operator of the elevator to ship No. 2 red wheat. *Held*, the H. Co. was not guilty of misbranding within the meaning of section 8 of the act. *Hall-Baker Grain Co.* v. *United States*---- 391
Reversing *United States* v. *Hall-Baker Grain Co*---- 291

A food product labeled "Grenadine Syrup", composed of sugar, citric and tartaric acid, and juices of certain fruits, and in the manufacture of which no pomegranates were used, *held* not misbranded as labeled or branded so as to deceive or mislead the purchaser, since the word "grenadine" in its common acceptance does not mean a sirup made from pomegranates, but the term "grenadine syrup" is used in commerce to designate, not a sirup so made, but a sirup possessing a certain characteristic flavor and color, and a purchaser of sirup so labeled was not entitled to expect to receive a sirup actually made from pomegranates. *United States* v. *30 Cases Purporting to be Grenadine Syrup*---- 394

Cakes labeled "Macaroons" *held* misbranded in that they were labeled so as to deceive or mislead the purchaser, because they were not made of cocoanut, but of almonds, and because they contained glucose, when macaroons mean cakes made not of cocoanut, but of almonds, and containing sugar and not any glucose. *United States* v. *F. B. Washburn & Co.*---- 434
Affirmed, *F. B. Washburn & Co.* v. *United States*---- 654

A liquid made by distilling wood, for curing meats, *held* not misbranded by the label "Wright's Condensed Smoke. A Liquid Smoke", such name being a fanciful or descriptive one referring to the article and not tending to deceive or mislead the public into the belief that the article was actually smoke in condensed, liquid form. *United States* v. *Wright et al*---- 482

Hog feed was misbranded under the act where the labels upon the bags contained false and misleading statements as to the percentages of its ingredients. *United States* v. *426 Bags of Economy Special Hog Feed*---- 1001

MISBRANDING—Continued. Page

A coal-tar color labeled "Warranted. Complies with all requirements", containing salt in a percentage greater than the maximum prescribed for such coloring materials by the Department of Agriculture, *held* misbranded, where it appeared that it was known or understood in the trade that the "requirements" referred to the requirements of the department, and that the particular article was being purchased according to such requirements. *United States* v. *One Pound Can Coal-Tar Color*---------- 1019

Carbonated apple juice with capsicum added, contained in bottles labeled "Sparkling White Seal" and resembling in form and dress a distinctive bottle used for champagne sold and well-known under the same name, *held* misbranded within the meaning of the act, section 8, declaring an article of food misbranded if the package or its label bear any false or misleading statement, design, or device regarding the article. *United States* v. *9 Cases of Sparkling White Seal*---------- 1023

Affirmed, *Duffy-Mott Co.* v. *United States*---------- 1078

Where an artificial or intentional mixture of oats contained 23 percent of foreign material, a percentage of which was wild oats, which had been intentionally added, branding the mixture "Sample grade star oats" was a misbranding, subjecting it to forfeiture under the Food and Drugs Act, even assuming that the wild oat seed is a food, and that such brand was not deceptive, and not, withstanding that, under the regulations authorized by the Grain Standards Act, a natural mixture containing as high as 25 percent of foreign material could have been branded "Sample grade oats", and that the oats were graded by an authorized inspector as sample oats. *United States* v. *154 Sacks of Oats*---------- 1039

Claimant manufactured vinegar from sound, mature apples from which 80 percent of the water had been evaporated and an equal amount of pure water added before pressing. The liquid obtained by the pressing was similar in chemical test to apple cider made from fresh apples, and the product resulting after fermentation was similar in taste, appearance, and composition to vinegar made from unevaporated apples. Vinegar so made had been extensively sold in the market for many years. *Held* that such vinegar labeled and sold as "Apple Cider Vinegar Made from Selected Apples", was misbranded in that the label was false and misleading, and in that the vinegar was offered for sale under the distinctive name of another article. *United States* v. *95 Barrels, More or Less, Alleged Apple Cider Vinegar*---------- 1047

Reversed, Ninety-Five Barrels, More or Less, Apple Cider Vinegar v. *United States*---------- 1079

Judgment C. C. A. reversed, *United States* v. *95 Barrels, More or Less, Alleged Apple Cider Vinegar*---------- 1118

Claimant manufactured vinegar from sound and mature apples from which, for the purpose of preservation, 80 percent of the water had been evaporated and an equal amount of pure water added before pressing. The liquid obtained by the pressing was identical in taste, substance, and chemical test with cider pressed from unevaporated apples. If any constituent element of the apples was removed by the evaporating process, it was so small that its absence was not shown by chemical tests. Such vinegar was labeled and sold as "Apple Cider Vinegar." *Held*, that such name was not a misbranding. *Ninety-Five Barrels, More or Less, Apple Cider Vinegar* v. *United States*---------- 1079

Reversing *United States* v. *95 Barrels, More or Less, Alleged Apple Cider Vinegar*---------- 1047

Judgment C. C. A. reversed, *United States* v. *95 Barrels, More or Less, Alleged Apple Cider Vinegar*---------- 1118

Vinegar made from dried apples by adding water equivalent to that removed in the drying, and fermenting the resulting solution, even though it be similar to vinegar produced directly from fresh apple cider and equally wholesome, is not the same thing; and a label describing it as "Apple Cider Vinegar Made from Selected Apples"

MISBRANDING—Continued. Page

is misleading to the public, and a misbranding within the act. *United States* v. *95 Barrels, More or Less, Alleged Apple Cider Vinegar*---- 1118

Reversing *Ninety-Five Barrels, More or Less, Apple Cider Vinegar*---- 1079

Where, under the decisions of the Department of Agriculture, coloring material containing more than 5 percent of salt could not be certified, and a coloring material containing a greater percentage carried a label bearing the words "Warranted. Complies with all requirements", the article was misbranded within the act, section 8, as the label would tend to convey the belief that the color was warranted to comply with the decisions of the department. *W. B. Wood Manufacturing Co.* v. *United States*---- 1070

False representations on the labels of an article of food as to the results which may be obtained by the use of the article may constitute misbranding under the act, section 8, providing that the term misbranded shall apply to all articles of food the package or label of which shall bear any statement, etc., regarding such article which shall be false or misleading. Statement on the label of an article of food "Substitute for eggs in baking and cooking", was not one of opinion only, but one of fact, and, where false, constituted misbranding within the act; it being otherwise expressed upon the label that the article could be otherwise used in place of eggs "in baking and cooking." *United States* v. *Newton Tea & Spice Co*---- 950

Affirmed, *Newton Tea & Spice Co.* v. *United States*---- 1089

Canned salmon, labeled "Select Pink Salmon. Fresh Fish", when the pack was of inferior quality and not fresh, as the term is used in the trade, *held* misbranded. *United States* v. *200 Cases, More or Less, of Canned Salmon*---- 1095

A drug containing alcohol, used as an inhalant for the treatment of head colds, *held* subject to the provision of the act, section 8, par. 2, as to misbranding for failure of the package to bear a statement on the label of the quantity or proportion of alcohol, though the drug is harmless and not detrimental to health. *United States* v. *11 Cartons of Drug Labeled in Part "Vapex"*---- 1332

The act, section 8, subdivision 4, provides that an article of food which does not contain any added poisonous or deleterious ingredients shall not be deemed to be adulterated or misbranded in the case of mixtures or compounds known as articles of food under their own distinctive names and not an imitation of or offered for sale under the distinctive name of another article, etc. *Held*, that an article of food manufactured and sold under the distinctive name of "C. A. P.", and consisting of calcium acid phosphate and corn starch, and not containing any poisonous or deleterious ingredient, was not misbranded within the meaning of the act by reason of the presence of corn starch. *United States* v. *100 Barrels of Calcium Acid Phosphate*---- 58

The provision of the act, section 8, that a mixture or compound known as an article of food under its own distinctive name and not an imitation of or sold under the distinctive name of another article, if the name is accompanied by a statement of the place of manufacture, shall not be deemed adulterated or misbranded unless it contains some added poisonous or deleterious ingredient, protects such article from the charge of misbranding only insofar as any statement or suggestion contained in the name itself is concerned, and does not prevent its condemnation as misbranded, if, in addition to such distictive name, the label contains other misleading statements, designs, or devices. *United States* v. *40 Barrels and 20 Kegs of Coca-Cola*---- 239

Judgment affirmed, *United States* v. *40 Barrels and 20 Kegs of Coca Cola*---- 606

Under the provision of the act, section 8, that an article of food which does not contain any added poisonous or deleterious ingredients shall not be deemed to be misbranded in the case of

MISBRANDING—Continued. Page

mixtures or compounds known as articles of food under their own distinctive names, and not an imitation of or sold under the distinctive name of another article, if the name is accompanied by a statement of the place of manufacture, *held*, that a compound, being a syrup used in the preparation of beverages and long known and sold under its trade name of "Coca-Cola", and no other article of food or beverage has been manufactured or sold under such name, cannot be deemed misbranded within the meaning of the statute because it does not contain any material element derived from the leaves of the cola plant. *United States* v. *40 Barrels and 20 Kegs of Coca Cola*_____ 239

Under the provision of the act, section 8, that an article of food which does not contain any added poisonous or deleterious ingredients shall not be deemed to be misbranded in specified cases, a compound sold under the name of Coca Cola, which is the distinctive name of the product of the manufacturer thereof and of nothing else, is not misbranded, "Coca" being indicative of one article, "Cola" being indicative of another distinct article, and the combination not being descriptive of any substance or combination known until adopted by the manufacturer, and still unknown as an appellation for any other substance on the market. *United States* v. *40 Barrels and 20 Kegs of Coca Cola*_____ 606

Judgment reversed, *United States* v. *Coca Cola Co*_____ 741

Section 8 of the act provides that an article of food shall be deemed to be misbranded if the package containing it or its label shall bear any statement, etc., regarding the ingredients or substances contained therein which shall be false or misleading in any particular, provided that an article not containing any added poisonous or deleterious ingredients shall not be deemed to be misbranded in the case of mixtures or compounds known as articles of food, under their own distinctive names, and not an imitation of or offered for sale under the distinctive name of another article, etc. *Held* that while a distinctive name may be purely arbitrary, and may satisfy the statute, it must be one that distinguishes the article; and where more than one name, each descriptive of an article, are united, it does not constitute a "distinctive name" within the protection of the proviso, and amounts to misbranding, if the article sold does not contain any of the articles generally known individually by any of such names. *United States* v. *Coca Cola Co*_____ 741

Reversing judgment C. C. A., *United States* v. *40 Barrels and 20 Kegs of Coca Cola*_____ 606

The act, section 8, provides that an article of food shall be deemed to be misbranded if it be an imitation of or offered for sale under the distinctive name of another article, or if it be labeled or branded so as to deceive or mislead the purchaser, provided that an article which does not contain any added poisonous or deleterious ingredients shall not be deemed to be misbranded in the case of mixtures or compounds known as articles of food, under their own distinctive names, and not an imitation of or offered for sale under the distinctive name of another article, if the name be accompanied on the label or brand with a statement of the place where the article has been made or produced, and in the case of articles labeled to plainly indicate that they are compounds, imitations, or blends. A wholesale liquor dealer ordered from a dealer in another State five cases of champagne. The order was filled with cases, the outside of which were marked with designs to represent cases of champagne and contained bottles of the same shape and made to imitate an ordinary champagne bottle. The bottles were corked and dressed about the neck the same and in very close imitation of ordinary champagne bottles, having the same style of label and seal, both attached in the same manner, and on the label was the name "Special gold cabinet, superior quality", with a coat of arms on one side and the initials "H. H. S. & Co.", and on the other certain figures, but without the word "champagne." The contents of the bottles was

MISBRANDING—Continued. Page

a very cheap, ordinary, low grade of carbonated white wine. The boxes were also marked with the words "Extra Dry", when the contents were not extra dry. *Held* to constitute misbranding within the act. *United States* v. *5 Cases of Champagne*_____ 503

The first proviso of section 8 of the act that mixtures or compounds known as articles of food under their own distinctive names shall not be deemed misbranded when sold under such name, and not an imitation of or sold under the distinctive name of another article, does not apply to a case where the name used in its popular meaning is accurately descriptive of another well known food product. A food product sold under the name of "Condensed Skimmed Milk" *held* to be misbranded, where it contained 42 per cent of cane sugar, the presence of which was not indicated on the label; it being shown that condensed skimmed milk unsweetened is also made and sold. *Libby, McNeill & Libby* v. *United States*__ 540

Affirming *United States* v. *Libby, McNeill & Libby*_____ 442

The act, section 8, provides that the term "misbranded" shall apply to all articles of food the package or label of which shall bear any statement regarding the article or its ingredients which shall be false or misleading in any particular, and that an article shall be deemed to be misbranded (subdivision 4) if the package containing it or its label shall bear any statement regarding the ingredients which shall be false or misleading in any particular, provided that an article of food which does not contain any added poisonous or deleterious ingredients shall not be deemed to be adulterated or misbranded in the case of mixtures or compounds known as articles of food under their own distinctive names, and not an imitation of or offered for sale under the distinctive name of another article, if the name be accompanied on the same label or brand with a statement of the place where the article is manufactured or produced. *Held* that such proviso was limited to the distinctive name under which a proprietary food was sold, and as so limited the proviso applied to the first paragraph of section 8, and protected distinctive names from constituting misbranding; and hence, where an article of food was sold in cartons labeled "Puddine" or "Fruit Puddine", which was its own distinctive name, accompanied by the words "Fruit Flavored", which was not part of the name, when in fact the article was not fruit flavored, the article was misbranded. *United States* v. *150 Cases of Fruit Puddine*_____ 557

The act, section 8, subdivision 4, provides that an article shall be deemed misbranded if the package containing it or its label shall bear any statement regarding ingredients which shall be false or misleading in any particular, provided that an article of food which does not contain any added poisonous or deleterious ingredients shall not be deemed adulterated or misbranded in the case of mixtures or compounds known as articles of food under their own distinctive names, etc. Where a proprietary food made largely of cornstarch, labeled "Puddine", with the words "Cream Vanilla" and "Rose Vanilla" to designate the different colors, the product being flavored with vanillin or synthetic vanilla obtained from oil of cloves, *held*, that such words did not indicate that the food labeled "Cream Vanilla" was flavored with the highest quality of vegetable extract of the vanilla bean, and the food labeled "Rose Vanilla" was flavored with the highest quality of a compound of vegetable flavors of rose and vanilla, but that they were distinctive names, the use of which was protected by such proviso, and their use did not constitute misbranding. Id.

The proviso of the fourth subsection of section 8 of the act, providing that an article of food which does not contain any added poisonous or deleterious ingredients shall not be deemed adulterated or misbranded in case of mixtures or compounds known as articles of food under their own distinctive names, and not an imitation of or offered for sale under the distinctive name of another article, etc., goes only to the branding or the name of the

MISBRANDING—Continued. Page

article, and does not furnish a refuge for one who has on the label otherwise falsely stated the nature of the contents of the package. *United States* v. *Newton Tea & Spice Co*---- 950

The proviso of the act, section 8, that an article of food which does not contain any added poisonous or deleterious ingredients shall not be deemed adulterated or misbranded in certain cases, including the case of mixtures or compounds known as articles of food under their own distinctive names, and not an imitation of or offered for sale under the name of another article, etc., does not apply to a case where the charge is misbranding, and is not directed against the name, but against false statements on the label. *Newton Tea & Spice Co.* v. *United States*---- 1089

An article of food, contained in cases bearing principal labels describing the contents as a particular brand of molasses, but plainly stating in three separate places that the product was a compound of molasses and corn sirup, and also containing all the other information required by the act and the regulations thereunder, and which article was in fact a compound of molasses and commercial glucose, *held* not misbranded within the meaning of the act; it being shown that it contained nothing deleterious to health, and that under the rulings of the Department of Agriculture it was permissible to describe commercial glucose on labels or brands as made from corn sirup. *United States* v. *779 Cases of Molasses*---- 65

An article of food labeled "Compound: Pure Comb and Strained Honey and Corn Syrup", *held* not misbranded merely because the percentage of corn sirup largely excluded that of honey. *United States* v. *Boeckmann*---- 88

An indictment alleging misbranding of an article of food known as "Grant's Hygienic Crackers", *held* did not state an offense under section 8 of the act, on the ground that there was no averment that the article contained any poisonous or deleterious ingredient, and that under section 8, subdivision 4, such averment was necessary to charge an offense where the label upon the package containing an article of food states where it was manufactured or produced, and describes such article by its own distinctive name without stating the ingredients of which such article is composed. *United States* v. *Hygienic Health Food Co*---- 259

The act, section 8, declares an article of food misbranded if it be labeled or branded so as to deceive or mislead the purchaser, provided that such articles containing no poisonous or deleterious ingredients shall not be deemed to be misbranded if they are labeled or branded so as to plainly indicate that they are compounds, and the word "compound" is plainly stated on the package. The term "Compound White Pepper" does not so naturally imply to the average purchaser a mixture of white pepper with an ingredient other than pepper as to make it a proper branding, where the statement of its ingredients is so placed and in such type as not to be readily noticed by the purchaser, and as to be calculated and intended to deceive and mislead the purchaser. *Frank et al.* v. *United States*---- 329

An article labeled "Pure Pepper" and composed of a mixture of ground black pepper and long pepper, *held* misbranded, where there was evidence that "pure pepper", in the trade and according to ordinary usage meant black pepper and nothing else. *United States* v. *75 Boxes of Alleged Pepper*---- 340

An information stating that an article of food labeled "Fruit Wild Cherry Compound" consists chiefly of an imitation wild cherry essence artificially colored, *held* to state a case of misbranding under the act, since the name represents that the dominant element of the compound is genuine fruit wild cherry, and if it be shown that the dominant element of the compound is an imitation wild cherry essence and not the genuine fruit wild cherry, then the article is misbranded. *United States* v. *Weeks*---- 519

Judgment reversed, *Weeks* v. *United States*---- 646

MISBRANDING—Continued. Page

Under the act, section 8, declaring that an article of food shall be deemed "misbranded" where it is labeled so as to deceive or mislead the purchaser, and where the package or its label shall bear a false or misleading statement, provided that an article of food which does not contain any added poisonous or deleterious ingredients shall not be deemed to be misbranded in the case of compounds known as articles of food under their own distinctive names, and not an imitation of or offered for sale under the distinctive name of another article, and in case of articles labeled so as to plainly indicate that they are compounds, and the word "compound" is stated plainly on the package in which it is offered for sale, an article labeled "Fruit Wild Cherry Compound", but not containing any "Fruit Wild Cherry", nor any added poisonous or deleterious ingredients, is not misbranded. *Weeks* v. *United States* ---------- 646

An article labeled "Special Lemon. Lemon Terpene and Citral"—but not a product derived from lemon, but a mixture containing alcohol and citral derived from lemon grass and an imitation of lemon oil, is not misbranded. Although the article is not within the proviso of the act, section 8, because the word "compound" is not "plainly stated on the package in which it is offered for sale", the label plainly indicates that the contents of the package, so-called "Special Lemon", consists of a compound of lemon terpene and citral. Id.

Reversing judgment in *United States* v. *Weeks*---------- 519

A bottled article labeled "Compound Ess Grape", but which contains nothing from grapes and is a mere imitation, must, within the general terms of the act, section 8, be deemed misbranded, since the label carries a false and misleading statement; and in such case the mere use of the word "compound" is not a compliance with the proviso in paragraph 4 of section 8 of the act, since it does not give notice that the article is a mere imitation but suggests the contrary. *United States* v. *Schider*---------- 875

Under the act compounds known as articles of food can be sold under their own distinctive names, so long as no deleterious matter is put into the product and the label states where it is manufactured, and it is not an imitation sold under the distinctive name of another article. Since the term "oat feed" in its ordinary acceptation does not mean the whole oat grain, either crushed or ground, but instead means that part of the grain which remains after the miller subtracts the portions useful for human food, consisting of nubbins, middlings, hulls, and oat dust, a compound substance sold in packages under the name "Corno Horse and Mule Feed", and described on the package as a "mixture of ground alfalfa, oats, corn, alfalfa, oat and hominy feeds", with the name of the manufacturer and place of manufacture, followed by an analysis of the contents, was not misbranded under the act, because it contained an excess of oat hulls in compound and not the whole ground oats. *United States* v. *One Carload of Corno Horse and Mule feed*---------- 274

The provision of the act, section 8, that an article of food shall be deemed to be misbranded "If it be an imitation of or offered for sale under the distinctive name of another article", deals, first, with imitations, that is, articles patterned after, or a copy of, or made in simulation of another article, and, as such, offered or put out as the genuine; second, articles, whatever they may be, whether imitation or not, which are put out under the distinctive name of another article. The statute condemns the use of means which being used arouse the belief that one thing is really another. *United States* v. *24⅞ Gallons of Smack*---------- 1181

An article labeled "Smack" being a manufactured, synthetic concentrate containing certain ingredients also found in natural grape juice, used as a beverage imitative of grape juice and resembling grape juice in its fluid consistency, color, and taste, *held* to be a mixture or compound known under its own distinctive name, and therefore not misbranded within the meaning of the act. Id.

Where sirup made from cane sugar and flavored to represent maple sirup by the introduction of an extract from maple wood after it had been chopped down, was put up in bottles labeled "Western Reserve Ohio Blended Maple Syrup", the words "Ohio" and "Maple Syrup" being in red, and between them the word "Blended", and then below that, in smaller type, the statement, "This syrup is made from the sugar maple tree and cane sugar", *held* that the label was misleading in that purchasers would ordinarily understand that the article contained in part maple sirup made from boiled-down sap drawn from live maple trees, and the article was therefore misbranded. *United States* v. *Scanlon*---------- 28

The act, section 8, provides that an article of food which does not contain any added poisonous or deleterious ingredients shall not be deemed to be misbranded if labeled so as to plainly indicate that it is a compound, imitation, or blend, and the word "blend" is plainly stated on the package, which term shall be construed to mean a mixture of like substances, not excluding harmless coloring or flavoring ingredients used for coloring or flavoring only. *Held* that, where sirup consisting of refined cane sugar flavored with an extract of maple wood was labeled "Western Reserve Ohio Blended Maple Syrup", the word "blend" indicated that the article was a mixture and imitation and therefore the article was not misbranded within the meaning of the Act. *United States* v. *68 Cases of Syrup*---------- 62

The act, section 8, provides that the term "misbranded" shall apply to all articles of food, or articles which enter into the composition of food, the package or label of which shall bear any statement, etc., regarding such article, or the ingredients or substances contained therein which shall be false or misleading in any particular. Section 8, subdivision 4, paragraph 2, declares that an article of food which does not contain any added poisonous or deleterious ingredients shall not be deemed misbranded if labeled so as to plainly indicate that they are compounds, imitations, or blends, etc., provided that the term "blend" shall be construed to mean a mixture of like substances. *Held* that the proviso was not limited to cases where the blend was claimed without disclosing the ingredients, but applied as well to cases where the component parts of the blend were disclosed, and hence vinegar described on the label as "Saratoga Brand Vinegar, a blend of pure boiled apple cider and distilled vinegar", which was in part distilled vinegar to which boiled apple cider had been added for coloring, but containing no cider vinegar, was misbranded as misleading the public to believe that it was composed of apple cider vinegar and distilled vinegar. *United States* v. *10 Barrels of Vinegar*---------- 254

In a libel proceeding for condemnation and forfeiture of a quantity of distilled spirits alleged to be misbranded, it was no defense that the brand was placed upon the packages containing such liquor by the United States gauger upon information received from the distiller in accordance with the usual practice, or that the same kind of liquor had for a number of years been so branded and sold under such brand to the knowledge of the agents and officers of the United States. *United States* v. *50 Barrels of Whisky*---------- 22

Where a misbranded drug was received by claimants in interstate commerce and correctly branded before seizure, it was not subject to forfeiture. *United States* v. *Five Boxes of Asafoetida*---------- 160

United States v. *Nine Boxes of Asafoetida*---------- 165

It is no defense to a prosecution for misbranding as to measure of the contents of cans of sirup that the shortage in measure was caused by filling the cans while the sirup was hot and its shrinkage on cooling. If the sirup was short in measure at the time it was shipped, it was misbranded. *United States* v. *Scudder Syrup Co*-- 461

That there was a custom in the trade to label packages so as to state approximately the quantity in liquid or solid measure nearest the general size of the package, such packages being known as commercial quarts, half gallons, etc., or that a seller's circular and price lists, with reference to which sales were made to re-

MISBRANDING—Continued. Page

tailers, stated that the quantities specified were "commercial measure", did not excuse violations of the act which provides, in section 8, as amended by act March 3, 1913, that drugs or food are misbranded within the meaning of the act, if the package or label bears any false or misleading statement, or if, in case of food in package form, the quantity of the contents be not plainly and conspicuously marked on the outside of the package in terms of weight, measure, or numerical count. *United States* v. *Rigney & Co* ---------- 632

That a defendant ceased the use of labels on packages of a food product which were misleading as to quantity went only to the question of mitigation for a violation of the act. Id.

A manufacturer of drugs is entitled to express his own views as to their worth and merit, and he is not chargeable with any offense for so doing if his statements are not false or fraudulent. *United States* v. *Matusow*---------- 664

United States v. *Bell & Co*---------- 828

United States v. *Long*---------- 989

A drug product shipped in interstate commerce in bottles contained in cartons, the labels and cartons bearing statements representing that it was effective in the treatment of certain ailments named, whereas it contained no ingredient which could possibly have any remedial or beneficial effect in the treatment of such ailments, as was known to the shipper, who was the manufacturer, *held* misbranded within the act, section 8, as amended. *Hall* v. *United States* ---------- 978

The Government brought a libel seeking condemnation of packages of a so-called remedy for contagious abortion in cattle on the ground that it was misbranded under the act, section 8, paragraph 3, providing that drugs shall be deemed misbranded if the package or label shall bear or contain any statement, design, or device regarding the curative or therapeutic effect of such article or any of the ingredients or substances contained therein, which is false and fraudulent. The packages were so wrapped that a printed statement, "Bowman's Abortion Remedy. This package contains one 9½ pound treatment of Bowman's Abortion Remedy. Read the directions carefully before administering", and the printed directions for the use of the remedy, appeared only upon removal of the wrapping. There was uncontroverted evidence that the so-called remedy was composed of 85 percent brown sugar and 15 percent wheat, and contained no chemical or drug. Experts testifying for the Government were of the unanimous opinion that no possible combination of the two substances composing the article would have any effect upon the disease, and that all of a number of tests of the so-called remedy, made on Government-owned cattle, showed that it did not prevent the disease, or cure it after inception, or in any manner retard its effect. *Held* that the so-called remedy was misbranded within the act. *United States* v. *100 Boxes of Bowman's Abortion Remedy*---------- 1187

An article of drugs called "Lee's Save The Baby" *held* not misbranded, as charged, in that statements, on the label on the package and container and in an accompanying circular, falsely and fraudulently represented that the article was composed of ingredients or medicinal agents effective in diseases and conditions named therein, where the evidence showed that every ingredient of the article had some therapeutic value in connection with the treatment or mitigation of the ailments and diseases in which the use of the article was indicated or recommended on the label and in the circular. *United States* v. *23 7/12 Dozen Bottles, Etc., of An Article of Drugs Labeled in Part "Lee's Save The Baby"*---------- 1240

A libel averring that statements appearing on the label, etc., of an article of drugs were false and fraudulent in that they represented that the article "has cured" and "will cure" a disease specified, whereas in truth it would not cure such disease, and there was no medicinal substance or mixture of substance known that could be relied upon to effect a cure, *held*, sufficiently charged

MISBRANDING—Continued. Page

misbranding under the act, section 8, as amended by act August 23, 1912. *Seven Cases of Eckman's Alterative* v. *United States*---- 707

A libel in a proceeding to condemn bottled water as misbranded within the act, section 8, as amended August 23, 1912, which, after quoting from the label a long list of ailments for which the water was said to be beneficial, with "healing powers", and a "reliable remedy", denies that the water is capable of producing the therapeutic effects so claimed, states a case under the statute; and is sustained by sufficiently showing the false and fraudulent character of any one of the various claims recited. *Goodwin et al v. United States*---- 1130

Where a libel for condemnation of a shipment of flour alleged that the flour was misbranded in that it was labeled as patent flour, when it was not patent flour, but was a grade and quality of flour inferior to patent flour, and was therefore labeled under the distinctive name of another article, and was labeled so as to deceive and mislead the purchaser; and in that the flour was described on the label as made from first quality hard wheat, when it was made in whole or in part of inferior wheat, and therefore was sold under the distinctive name of another article; *held* that it was not necessary, in order to justify a finding that the flour was misbranded, that it be shown that the flour was misbranded in all of the respects or particulars alleged, and that it was sufficient if it be shown to be misbranded in any such respect or particular. *United States* v. *625 Sacks of Flour*---- 129

It is not necessary, in order to establish misbranding of articles of food because of false and misleading representations on the label, for the Government to prove or for the jury to find that the labels are false and misleading as a whole; it is sufficient if the jury find from the evidence that the labels are false and misleading in any particular. *United States* v. *Sherer-Gillett Co*---- 1093

In a prosecution under section 2 of the act, or in a libel proceeding for forfeiture under section 10, charging drugs misbranded under section 8, as amended by act August 23, 1912, in that the package or label bore or contained statements regarding the curative or therapeutic effect of the article which were false and fraudulent, it is not necessary for the Government to prove that all of such statements charged in the information or libel are false and fraudulent; it is sufficient to constitute misbranding if the jury find any one of such statements is false and fraudulent within the meaning of the act. *United States* v. *539 Boxes and 322 Cartons of Wm. Radam's Microbe Killer*---- 511

NOTARIES PUBLIC.

See Affidavits; Information.

NOTICE AND OPPORTUNITY TO BE HEARD:

Held necessary in all cases where criminal prosecutions for violation of the act are instigated by officers or agents of the Department of Agriculture that it be alleged in the indictment or information and established by proof that notice and opportunity to be heard, provided in section 4, were given to defendant prior to institution of the proceeding. *United States* v. *Mohn Wine Co*__ 316

An information charging violation of section 2 of the act *held* insufficient in that it failed to allege that defendant had been given notice and opportunity to be heard by the Department of Agriculture prior to instituting the proceeding. *United States* v. *J. L. Hopkins & Co*_____ 366

An information under the act will not be dismissed on appeal for the reason that it does not appear that there had been a notice and hearing, as provided by section 4, before the Secretary of Agriculture, where no motion to dismiss for this reason was made below, and the question was not raised by any pleading or assignment of error. *Frank et al.* v. *United States*_____ 329

Where proceedings for violation of the act by adulteration or misbranding are instituted at the instance of the Department of Agriculture, whether such proceedings are in personam or for a

NOTICE AND OPPORTUNITY TO BE HEARD—Continued. Page

forfeiture of goods under section 10, it would seem that the notice of examination and opportunity to be heard provided for by section 4 are necessary conditions precedent and must be alleged and proved; but under section 5 a district attorney may institute such a proceeding upon complaint of any State health officer, upon any adequate proof, without the action of the agents of the Department. *United States* v. *74 Cases of Grape Juice*_____ 144

Affirmed, *United States* v. *74 (or 20) Cases of Grape Juice*_____ 256

The provision of the act, section 5, making it the duty of the district attorney to commence appropriate proceedings for the enforcement of penalties for violation of the act, when such violation shall be reported by the Secretary of Agriculture, contemplates that the report of the Secretary shall be the one provided for by section 4, which is only to be made after an examination of samples, and a hearing on notice to the person from whom the samples were taken; and such a notice and hearing are conditions precedent to the institution of either a criminal prosecution under section 2 or a condemnation proceeding under section 10, where they are based on a report from the Secretary. *United States* v. *74 (or 20) Cases of Grape Juice*_____ 256

Affirming *United States* v. *74 Cases of Grape Juice*_____ 144

Although an indictment under the act is not demurrable because it contains no allegation of notice from the Department of Agriculture to the defendant of the result of examination of the article, and that he was given an opportunity to be heard, as required by section 4, since such prosecutions may be maintained by the district attorney without the intervention of the Department, under section 5, such allegations and proof thereof are necessary in all cases where the prosecution is instigated by officers or agents of the Department. *United States* v. *Morgan et al*_____ 146

Judgment reversed, *United States* v. *Morgan et al*_____ 335

It is not a condition precedent to prosecutions for violation of the act that an investigation or hearing be had in the Department of Agriculture. The act, section 4, declares that when, on examination in the Department of Agriculture, an article of food is found to be adulterated, notice shall be given to the party from whom the sample was obtained, and that any party so notified shall be given opportunity to be heard. If it then appears that he has violated the statute, the Secretary of Agriculture is required to certify the facts, together with a copy of the analysis, to the proper district attorney, who, under section 5, must, without delay, institute appropriate proceedings, by indictment or libel for condemnation, or both, as the facts may warrant. But section 5 also contemplates that complaints may be made to the district attorney by State health officials. In that class of cases, no doubt because the State agents investigate without giving a hearing, the district attorney is not obliged to prosecute unless such State officers shall present satisfactory evidence of such violation; but the very fact that he must do so in that event recognizes that he may begin proceedings against a defendant who has not been given a notice and an opportunity to be heard. In providing for notice in one case, and permitting prosecutions without it in another, the statute clearly shows that there was no intent to make notice jurisdictional. *United States* v. *Morgan et al*_____ 335

Reversing *United States* v. *Morgan et al*_____ 146

Section 4 of the act does not repeal R. S. secs. 771 or 1022 making it the duty of the district attorney to prosecute all delinquents for crimes and offenses cognizable under the authority of the United States, nor does it limit him to prosecute only those offenders who have had a hearing before the Department of Agriculture. Id.

In a prosecution by indictment charging violation of section 2 of the act it is not incumbent upon the Government either to charge or to prove compliance by the administrative officers with the provisions of section 4, whether the hearing therein prescribed has or has not taken place. *United States* v. *Schraubstadter et al*____ 237

Affirmed, *Schraubstadter et al.* v. *United States*_____ 398

NOTICE AND OPPORTUNITY TO BE HEARD—Continued. Page

An indictment for shipping misbranded champagne in violation of the act was not invalid for failure to allege preliminary investigation by an officer of the Department of Agriculture, a notice to defendants of their violation of the act, or that defendants were afforded an opportunity to present evidence and be heard. *Schraubstadter et al.* v. *United States* 398
Affirming *United States* v. *Schraubstadter et al* 237
The giving of notice provided for by section 4 of the act is not a condition precedent to a criminal prosecution for misbranding of a medicine because of false and misleading statements respecting its composition or false and fraudulent statements as to its curative properties. *United States* v. *American Laboratories* 641
In a libel proceeding for condemnation under section 10 of the act, *held* that the Government was required to allege in the libel and to prove that notice had been given to the party from whom the sample was obtained and that he had been given opportunity to be heard, as provided in section 4. *United States* v. *Three Barrels of Vanilla Tonka and Compound* 201
It is a condition precedent to the maintenance of a libel for condemnation for adulteration or misbranding, under section 10 of the act, when based on a report of the Secretary of Agriculture, that such report be made after an examination and hearing as provided for in section 4. *United States* v. *Certain Cans of Syrup* 328
In a libel proceeding against allegedly unwholesome spring water, failure, before instituting the proceeding, to notify interested persons and give opportunity to show cause why the matter should not be referred for prosecution under the act, *held* to require dismissal of the libel. *United States* v. *94 Dozen, More or Less, Half-Gallon Bottles Capon Springs Water* 1216
Reversed, *United States* v. *94 Dozen, More or Less, Half-Gallon Bottles Capon Springs Water* 1278
An executive regulation requiring notice and opportunity to be heard to be given before prosecution for adulteration or misbranding is inapplicable to proceedings in rem under section 10 of the act. *United States* v. *94 Dozen, More or Less, Half-Gallon Bottles Capon Springs Water* 1278
Reversing *United States* v. *94 Dozen, More or Less, Half-Gallon Bottles Capon Springs Water* 1216
The giving of notice and affording an opportunity to he heard to the person from whom the sample of a food found to be adulterated or misbranded, by the Department of Agriculture, as provided in section 4 of the act, is not prerequisite to the duty of the district attorney, under section 5, to proceed to enforce the penalties of the act. The notice that is required to be given of the seizure of the property and of the proceedings for its condemnation affords ample opportunity to the owner to appear and defend; and if upon a final hearing the food is condemned, he is not deprived of any property without due process of law. *United States* v. *75 Barrels of Vinegar* 332
Notice and opportunity to be heard, provided in section 4 of the act, *held* not jurisdictional and not a necessary condition precedent to the institution of a libel proceeding for forfeiture of misbranded drugs, under section 10. *United States* v. *W. T. Rawleigh Co.* 1322
In forfeiture proceedings under section 10 of the act, it is unnecessary that notice be given to the person from whom the sample was obtained, or that such person be given an opportunity to be heard, in accordance with the provisions of section 4. *United States* v. *75 Barrels of Vinegar* 332
United States v. *75 Boxes of Alleged Pepper* 340
United States v. *50 Barrels of Whisky* 22
United States v. *65 Casks of Liquid Extracts* 47
United States v. *Nine Barrels of Olives* 128

National Remedy Co. v. *Hyde, Secretary of Agriculture, et al*--- 1230
United States v. *W. T. Rawleigh Co*---- 1322

The notice and opportunity to be heard, provided for in the act, section 4, is not required preliminary to proceedings in rem under section 10, nor, in view of section 5, is it always a necessary condition precedent even to criminal proceedings under sections 1 and 2. *United States* v. *94 Dozen, More or Less, Bottles Capon Springs Water*---- 1278

See Examination; Investigation; Regulations.

NUMERICAL COUNT.

See Weight, Measure, and Numerical Count.

NUTS:

Nuts labeled "Fancy Mixed Nuts", alleged to consist of bad and inferior nuts, *held* not adulterated or misbranded, upon failure of the Government to show official standards of quality for nuts. *United States* v. *25 Bags of Nuts*---- 677

OATHS.

See Affidavits; Information.

OATS:

An article shipped in interstate commerce, consisting of 77 percent of cultivated oats and 23 percent of foreign material, a percentage of which was wild oats which had been intentionally added, *held* adulterated and misbranded and subject to forfeiture under the act, notwithstanding the article had been graded by an authorized inspector of the Department of Agriculture as "sample grade oats", and was so sold, and the Grain Standards Act August 11, 1916, and Service and Regulatory Announcements No. 46, authorizing shipment of oats in their natural state containing as high as 25 percent of foreign material. *United States* v. *154 Sacks of Oats*-- 1039

OBJECT OF THE ACT:

The object of the act is to keep adulterated articles out of the channels of interstate commerce, or, if they enter such commerce, to condemn them while in transit, or in original or unbroken packages after reaching destination. *Hipolite Egg Co.* v. *United States*---- 223

The act has two clearly separate objects: (1) To keep adulterated articles completely out of the channels of interstate commerce; and, (2) if they do enter such channels, to sanction their condemnation while being transported, or even after they have reached their destination, as long as they remain unsold, or in the original unbroken packages. These objects of the act are not changed or qualified by the purpose of the owner of the article. *Philadelphia Pickling Co.* v. *United States*---- 451

The object of the act is to prevent the misuse of the facilities of interstate commerce in conveying to and placing before the consumer misbranded and adulterated articles of medicine or food, and in order that its protection may be afforded to those who are intended to receive its benefits, the brands regulated must be on the packages, intended to reach the purchaser. *McDermott et al.* v. *Wisconsin*---- 473

The object of the act is to protect purchasers and consumers of food or drugs from articles which are adulterated or misbranded. *United States* v. *Excelsior Baking Co*---- 501

The plain and manifest object of the act is to protect the purchasers and consumers of drugs and foodstuffs from fraud and imposition in the purchase or consumption of such articles under false representations, and to insure that the commodities are such as they are represented to be. *United States* v. *68 Cases of Syrup*--- 62

The act is aimed to protect the consumer against adulterated and misbranded food. *United States* v. *Shucart*---- 693

OBJECT OF THE ACT—Continued. Page

The object of the act is to enable the consumer to know what it is in the way of food or drugs that he is putting into his stomach, and to punish anybody who, whether by willful design or carelessness or inadvertence, puts forth for human consumption as food or drug that which is not what it pretends to be. *United States* v. *Lehn & Fink* ---- 411

What the act aims at is to guarantee to the consumer that when he desires to purchase a certain article and goes to a manufacturer or vendor for that article and states what he wants, he shall know that he gets what he pays for. That is the object of the law. It is to protect the consumers against adulteration and misbranding of food and drugs, so that they may be able to rely on what an article is said to contain, and that they may rely on not being misled by the label. *United States* v. *Six Cases of Honey* ---- 543

The act was designed to prevent the ordinary purchaser from being deceived and misled as to what he is buying, and therefore the test of misbranding is the effect of the label or statement on the ordinary purchaser. The object of the act is to let the purchaser know just what he is buying and to let him decide whether he wants it or not. *United States* v. *95 Barrels, More or Less, Alleged Apple Cider Vinegar* ---- 1047

The object of the act is to protect the purchaser or consumer of food products that move in interstate commerce, and to that end Congress has enacted that the quantity of the contents of any food products in package form must be plainly and conspicuously marked on the label in terms of weight, measure, or numerical count, so that the purchaser thereof may rely upon them and get what he has the right to expect. *United States* v. *Trinidad Creamery Co* ---- 1152

The object of the law is apparent; that is, that the public shall be put distinctly on notice, and cocaine, among other things mentioned in the act, if it be in a preparation of food or drink, must be stated on the label, and it is immaterial also if it is a small quantity, if it is an appreciable quantity. *United States* v. *Koca Nola Co* ---- 59

The object of the act is not only to protect the public from unwholesome food and drink, but to require that any article of food, drink, or medicine sold shall be correctly described by its label. *United States* v. *Morgan et al* ---- 146

The act is designed and intended by Congress to protect the public by prohibiting the shipment in interstate commerce of unwholesome or deleterious food, and it should be enforced by courts and juries with that object in view. *United States* v. *1,600 Cases of Canned Salmon* ---- 1105

The main objects of the act, in respect to food products, are to protect the public from articles unfit for food, and from fraud. *United States* v. *1,974 Cases of Canned Salmon* ---- 1108

The object of the act is (1) to prevent deceit and false pretenses in food and drugs; and (2) to safeguard the public health. *French Silver Dragée Co.* v. *United States* ---- 121

The object of the law was evidently (1) to insure to the purchaser that the article purchased was what it purported to be; and (2) to safeguard the public health by prohibiting the inclusion of any foreign ingredient deleterious to health. *Hall-Baker Grain Co.* v. *United States* ---- 391

Lexington Mill & Elevator Co. v. *United States* ---- 443

The object of the act is twofold: (1) To prevent people who have articles to sell from placing in them ingredients that are injurious or deleterious to health of people, and causing them to buy without knowing that fact; (2) to prevent people from so labeling an article that the purchaser will think he is buying one thing when really he is buying another. *United States* v. *McConnon & Co* ---- 496

The object of Congress in enacting the act was to prevent the sale of commodities in interstate commerce that are harmful to the health of the people, and to prevent them from being defrauded

OBJECT OF THE ACT—Continued. Page

by adulterated foods, drugs, and liquids, also to prevent the misbranding or false labeling of such articles, so that the buyer should know that the article bought by him was what it purported to be. *United States* v. *A. Skarzynski & Co*---------- 860

It is the duty of the court to give the act a fair and reasonable construction for the accomplishment of its object. That object is the exclusion from interstate commerce of food products so adulterated as to endanger health. *United States* v. *1,950 Boxes of Macaroni et al*---------- 112

The object and purpose of Congress in the enactment of the act was the preservation of the health of the people. *United States* v. *630 Baskets of Apples*---------- 1205

The object of the act as amended by act August 23, 1912, is to prevent the carrying in interstate commerce of drugs which are worthless and injurious when they are transported with false and fraudulent statements as to their curative or therapeutic effects; the object being to protect the credulous and ignorant, and the public generally, from having imposed upon them as medicines, things to be used as medicines, drugs which will not perform the functions which it is claimed they will perform, and to prevent people being injured by the use of harmful drugs. *United States* v. *Eleven Gross Packages of Dr. Williams' Pink Pills*---------- 680

United States v. *Athlophoros Co*---------- 732

See Construction and Interpretation; Purpose of the Act.

OFFENSES:

The shipment in interstate commerce of an adulterated food or drug product, which was the subject of a single sale and single shipment, although consisting of numerous packages, constitutes a single offense under the act. *United States* v. *Watson-Durand-Kasper Grocery Co*---------- 837

Where an indictment in each of three separate counts charged defendants with shipping misbranded goods in interstate commerce, and the verdict was "guilty as alleged in the indictment", *held* that the verdict was tantamount to a conviction of each of the three offenses charged by the three counts of the indictment. *Schraubstadter et al.* v. *United States*---------- 398

Under section 2 of the act declaring that any person who shall ship in interstate commerce any article adulterated or misbranded shall be guilty of a misdemeanor and for the first offense fined not exceeding $200, and upon conviction for each subsequent offense not exceeding $300, the article is clearly specified as the unit of the offense, as distinguished from the shipment, and the shipment of seven different articles, each of which was both adulterated and misbranded, constituted 14 separate, distinct violations of the act, for which separate penalties might be imposed, though the aggregate exceeded $200. *United States* v. *Direct Sales Co*---------- 866

Under section 2 of the act a second offense is not a part of the crime, nor should a person be put on trial before the jury upon the issue of whether or not he is charged with a first or second offense. That question has entirely to do with the remedy, and if the accusation of the second offense is disputed it can be summarily heard by the court, or the court may have a doubt and impose sentence within the maximum of the first offense. The second-offense provision is not a mandatory change in the nature of the crime. *United States* v. *Atlantic Macaroni Co*---------- 793

Where an information charging defendant with violation of the act was based on two interstate shipments and consisted of four counts, one as to misbranding and one as to adulteration with respect to each shipment, and the two counts as to misbranding were disposed of by pleas of guilty and the two counts as to adulteration by verdict of guilty; and where it appeared from the record of the court, and the fact was not contested, that the defendant had previously been indicted and punished in the same court on a charge of misbranding with relation to the substantially similar form of label; *held* that the case before the court constituted two

OFFENSES—Continued. Page

offenses, one relating to one of the two interstate shipments, and the other to the other, and that it is possible to impose a fine for four separate violations and that on two of these a maximum of $200 could be imposed, and as to the other two, a maximum of $300. Id.

A prosecution under section 2 of the act, which provides for no imprisonment for the first offense, but merely for a fine not exceeding $200, is a "petty offense", and the trial of such a case under waiver of jury would amount to an arbitration as to the questions of fact involved, and the court's conclusions of fact could not be reviewed. *Frank et al.* v. *United States*---------- 329

See Appeal and Error; Article; Crime, Infamous; Jury Trial; Penalties; Petty Offense; Prior Conviction; Res Judicata; Shipment.

OIL CASSIA:

A drug labeled "Oil Cassia U. S. P.", which contained rosin, *held* adulterated and misbranded. *United States* v. *Lehn & Fink*------ 411

OIL OF EDEN:

An article labeled "Oil of Eden" *held* misbranded because the package and label contained and bore statements regarding the curative or therapeutic effect which were false and fraudulent. *United States* v. *Kellett*---------- 711

OIL, COTTONSEED.

See Oil, Olive; Oil, Salad.

OIL, OLIVE:

An article contained in cans and represented on the label to be olive oil, *held* adulterated and misbranded because it contained approximately 90 percent of cottonseed oil, and further misbranded because the weight of the contents of the cans was less than that stated on label. *United States* v. *Paraskevopolus*---------- 925

An article represented on the label as olive oil produced in Sicily, when in fact it consisted in part of corn oil, and was produced in the United States, *held* misbranded. *United States* v. *Gamanos et al*---------- 927

An article shipped as pure olive oil, *held* adulterated because it was composed principally of cottonseed oil, and misbranded in that it was branded as "Olive Oil" and represented on the label as produced in Italy, when in fact it was composed largely of cottonseed oil, and was manufactured in the United States. *United States* v. *Monahos*---------- 935

An article, contained in cans, *held* misbranded because the labels represented that it was olive oil, and that each of the cans contained one-half gallon net of the article, when the article was not olive oil, but was a mixture composed in large part of cottonseed oil, and each of the cans contained less than one-half gallon net of the article. *United States* v. *Scaduto*---------- 947

An article, contained in cans, *held* misbranded because the labels represented that it was olive oil, and that it was a foreign product, to wit, an olive oil produced in Sicily in the Kingdom of Italy, and that each of the cans contained one-fourth gallon net of the article, when the article was not olive oil, but was a mixture composed in large part of cottonseed oil, and the article was a domestic product, and each of the cans contained less than one-fourth gallon net of the article. Id.

An article labeled "Prodotti Italiani, Pure Olive Oil, Lucca, Italia", and with the representation of a woman draped in the Italian flag and holding an Italian shield, *held* adulterated in that cottonseed oil had been mixed with and substituted in part for pure olive oil which the article purported to be, and misbranded because the label represented that the article was pure olive oil and was produced in Italy, when in fact it was composed in part of cottonseed oil and was produced in the United States. *United States* v. *Alban*---------- 1014

OIL, OLIVE—Continued. Page

An article contained in a barrel bearing a tag containing the words "Pure Olive Oil", and alleged to consist in part of cottonseed oil, *held* not to be adulterated or misbranded. *United States* v. *Marmarelli et al* 1122

See Oil, Salad.

OIL, SALAD:

An article labeled in large type "Olio Sopraffino Savoia Brand Salad Oil", and in small type "compound winter pressed cottonseed oil flavored with pure Italian olive oil", *held* misbranded in that the label represented the article to be superfine olive oil, when in fact it contained 95 percent of cottonseed oil and 5 percent of olive oil. *United States* v. *Italian Importing Co* 187

An article labeled "Olio per Insalata Vival Brand Sopraffino Cotton Salad Oil Extra Quality", and composed of cottonseed oil, *held* misbranded in that the label was calculated to mislead the purchaser to believe the article was Italian olive oil. *Brina* v. *United States* 104

An article labeled "Imported Salad Oil Morel Brand" *held* misbranded because it was not composed of olive oil, but sesame oil. *United States* v. *Von Bremen et al* 193

Reversed, *Von Bremen et al.* v. *United States* 338

An article contained in cans labeled "Superior Quality Oil Greek Patriot Brand Winter Pressed Cotton Salad Oil Flavored with High Grade Oil a Compound", *held* adulterated in that a substance which contained no flavor of olive oil had been substituted for a product flavored with olive oil, which the article purported to be; and misbranded because it was not a product flavored with high-grade olive oil as represented on the label, but was a product containing no flavor of olive oil, and because the contents of the cans was less than that stated on the label. *United States* v. *Germack* 1178

The term "salad oil" prima facie means "olive oil." *Brina* v. *United States* 104

United States v. *Von Bremen et al* 193

United States v. *Italian Importing Co* 187

See Oil, Olive.

OLIVE OIL.

See Oil, Olive.

OLIVES:

Olives held adulterated in that they consisted in whole or in part of a filthy and decomposed vegetable substance. *United States* v. *10 Barrels of Olives* 125

OPINION.

See Evidence.

ORANGE EXTRACT OR FLAVORING:

An article labeled "Orange Flavoring" is not shown to be misbranded by an allegation in an information to the effect that it contained "only about 20 percent of the amount of orange oil that should be present in orange extract." If there is a trade meaning to the words "orange flavoring" and "orange extract" which is that they should be identical in strength, such trade meaning should be pleaded. *United States* v. *Union Pacific Tea Co* 196

See Lemon Extract or Flavor; Vanilla Extract or Flavor.

ORANGE PIE FILLING.

See Pie Filling.

ORANGES:

An interstate shipment of oranges, frozen before shipment, which were undergoing decomposition because of the freezing and would ultimately become unfit for food, are adulterated within the meaning of the act, and may be condemned, even though the oranges were not harmful, if eaten. *United States* v. *462 Boxes of Oranges* 816

ORANGES—Continued. Page

In a proceeding to forfeit a shipment of oranges as adulterated because of their decomposed condition resulting from damage by frost, evidence *held* insufficient to show that the consignment as a whole was so defective as to subject it to forfeiture. *United States* v. *315 Boxes of Oranges*---------- 1208

See Filthy, Decomposed, and Putrid.

ORIGINAL PACKAGE:

The doctrine of original packages was not intended to limit the right of Congress, when it chose to assert it, as it has done in the Food and Drugs Act, to keep the channels of interstate commerce free from the carriage of injurious or fraudulently branded articles and to choose appropriate means to that end. Legislative means provided in the Federal statute for its own enforcement may not be thwarted by State legislation having a direct effect to impair the effectual exercise of such means. *McDermott et al.* v. *Wisconsin*---------- 473

While the Government can seize only the original packages, yet it may open the package, and, if it finds anything wrong on the inside of the package which does not appear on the outside, that is, any misbranding or false statement, it has just as much right to proceed as it has when the label is on the outside of the package seized; but, if it does not seize the original package before it is opened, then it has no right whatever to do anything more than to prosecute any party who may deliver the goods or receive the goods, in a criminal case. *United States* v. *300 Cases of Mapleine*- 39

Where an adulterated or misbranded drug had been transported in interstate commerce and received by the consignee who was the owner, and the packages were opened and samples taken that the strength, quality, and purity might be tested, *held* that such opening for the purpose of testing did not constitute a breaking of the original package. *United States* v. *Five Boxes of Asafoetida*------ 160

United States v. *Nine Boxes of Asafoetida*---------- 165

Change of the original package might not constitute a change of identity of a food or drug guaranteed by the manufacturer under section 9 of the Act. *United States* v. *Mayfield et al*---------- 90

See Interstate Commerce; Jurisdiction; Original Unbroken Package; Package.

ORIGINAL UNBROKEN PACKAGE:

The words "original unbroken package", as used in the act, relate to the package in the form in which it is received by the vendee or consignee. *United States* v. *Dr. J. L. Stephens Co*---------- 305

Affirmed, *Dr. J. L. Stephens Co.* v. *United States*---------- 471

Where a product in casks is shipped in interstate commerce in carload lots, the cask and not the car is the "original package" within the meaning of section 10 of the act, which authorizes the seizure and forfeiture for adulteration or misbranding of articles so shipped while remaining in the "original unbroken packages." *United States* v. *65 Casks of Liquid Extracts*---------- 47

Under section 10 of the act, providing for seizure and condemnation of adulterated articles of food which have been transported from one State to another and remain unloaded, unsold, or in the original unbroken packages the jurisdiction of the Federal Government over interstate shipments of adulterated food continues while the food remains in the original unbroken packages at the point of destination even though mingled with the goods of the State. *United States* v. *Two Barrels of Desiccated Eggs*-- 232

Hipolite Egg Co. v. *United States*---------- 223

By the Food and Drugs Act adulterated articles are, while in interstate commerce, made culpable as well as their shipper; while in original unbroken packages they can be seized and they carry their own identification as contraband of law; they are subject to the power of Congress to regulate interstate commerce, and they are not beyond the jurisdiction of the National Government because within the borders of a State. *Hipolite Egg Co.* v. *United States*- 223

ORIGINAL UNBROKEN PACKAGE—Continued. Page

While the act prohibits shipping or delivering for shipment in interstate or foreign commerce any article of food which is adulterated or misbranded, it does not restrict the offense of shipping or delivering for shipment to articles in original unbroken packages; the restriction to original unbroken packages applying only to those who receive in interstate commerce and, having received, deliver in original unbroken packages any adulterated or misbranded articles. *United States* v. *Krumm*---------- 993

The restriction of the application of the act to original unbroken packages applies only to those who receive in interstate commerce and thereafter deliver adulterated or misbranded articles, not to those who ship or deliver for shipment, so that an information charging that defendant shipped misbranded food in interstate commerce need not allege that it was shipped in original unbroken packages. Id.

See Interstate Commerce; Jurisdiction; Original Package; Package.

OYSTERS.

Canned oysters containing approximately 90 percent oysters and 10 percent liquid, and labeled "First Quality Cove Oysters", *held* not adulterated or misbranded on account of the excessive quantity of liquor present. *United States* v. *Potter*---------- 409

Oysters *held* adulterated because they contained an excessive quantity of water. *United States* v. *Golden & Co*---------- 1033

Oysters although shipped unopened as taken from the water, may come within the prohibition of the act where by reason of the condition of the waters in which they were grown they contain harmful bacteria which render them "filthy, decomposed, or putrid" and adulterated within the meaning of the act. *United States* v. *Sprague et al*---------- 508

Oysters *held* adulterated because of the presence of filth. *United States* v. *408 Bushels of Oysters*---------- 718

PACKAGE:

The words "package" and "unbroken package" are both used in the act. The word "package" is not used in the same sense as "original unbroken package." The framers of the act manifestly had in mind the definition heretofore given by the courts to the term "original package", and in the second, third, and tenth sections have used that expression or its equivalent. The word "package" as used in the act without any modifying adjective or qualifying term is to be taken in a broad sense; as thus used it means the package made up by the manufacturer for sale to the ultimate consumer which goes into the possession of the person who will use the article of food or drugs. *United States* v. *Dr. J. L. Stephens Co*---------- 305

Affirmed, *Dr. J. L. Stephens Co.* v. *United States*---------- 471

That the word "package" or its equivalent expression, as used by Congress in sections 7 and 8 of the act, in defining what shall constitute adulteration and shall constitute misbranding within the meaning of the act, clearly refers to the immediate container of the article which is intended for consumption by the public, there can be no question. Limiting the requirements of the act as to adulteration and misbranding simply to the outside wrapping or box containing the packages intended to be purchased by the consumer, so that the importer, by removing and destroying such covering, could prevent the operation of the law on the imported article yet unsold, would render the act nugatory and its provisions wholly inadequate to accomplish the purposes for which it was passed. *McDermott et al.* v. *Wisconsin*---------- 473

See Article; Circulars, Pamphlets, Booklets, Etc.; Label; Original Package; Original Unbroken Package; Offenses; Shipment.

PACKED.

PARTNERSHIPS. Page

See Agents; Penalties.

PEANUTS:

In a proceeding to forfeit a shipment of numerous bags of peanuts as adulterated in that they consisted in whole or in part of a filthy, decomposed, or putrid vegetable substance by reason of the presence of moldy and wormy peanuts, *held* that 10 percent of the goods were so adulterated, on evidence that that proportion of the peanuts was moldy and wormy. *United States* v. *350 Bags of Shell Peanuts* ---------- 685

PEARS:

Pears *held* adulterated in that they contained added poisonous or added deleterious ingredients, to wit, a compound or compounds of arsenic and a compound or compounds of lead, which might have rendered them injurious to health. *United States* v. *3,192 Boxes of Apples et al*---------- 1199

Pears are food within the meaning of the act. Id.

PENALTIES:

Under the act, section 2, declaring that any person who shall ship in interstate commerce any article adulterated or misbranded shall be guilty of a misdemeanor, and for the first offense fined not exceeding $200, and upon conviction for each subsequent offense not exceeding $300, etc., the shipment of seven different articles, each of which was both adulterated and misbranded, constituted fourteen separate, distinct violations of the act, for which separate penalties might be imposed, though the aggregate exceeded $200. *United States* v. *Direct Sales Co*---------- 866

Where defendants, members of a firm, were indicted individually in separate courts for three separate violations of the act which provides $200 as the maximum fine for the first offense, and the court, after a verdict by the jury of "guilty as charged in the indictment", rendered judgment that "each of the defendants pay a fine of $100 on each count of the indictment, consisting of three counts, to wit, the sum of $300 each", *held* that the fine was not excessive, and that the statement of the aggregate thereof did not invalidate the judgment. *Schraubstadter et al.* v. *United States*---------- 398

The word "penalties" as used in section 5 of the act is enlightening as showing that the requirements of section 4 do not apply to proceedings under section 10 for condemnation and forfeiture of goods. *United States* v. *100 Barrels of Vinegar*---------- 287

See Article; Crime, Infamous; Offenses; Petty Offense; Prior Conviction.

PEPPER:

An article labeled "Perfection Mills Compound White Pepper", which consisted of 65 percent white pepper and 35 percent corn product, with the words "Composed of Ground White Pepper and Ground Cereals" in small and inconspicuous type and so placed on the label as not to be readily noticed by the purchaser, *held* adulterated and misbranded. *Frank et al.* v. *United States*---------- 329

An article composed of ground black pepper and ground long pepper, labeled "Pure Pepper", *held* misbranded. Such mixture constituted a compound or "blend" within the meaning of the act and should have been so marked. *United States* v. *75 Boxes of Alleged Pepper*_ 340

An article labeled "Pure Ground Black Pepper" *held* adulterated and misbranded on evidence of the addition to the ground natural berry, of foreign pepper shells. *United States* v. *Six Barrels of Ground Pepper*---------- 817

PEROXIDE CREAM:

An article labeled "Peroxide Cream", which contained only a very small and insignificant quantity of peroxide, *held* not misbranded within the meaning of the act, the quantity or proportion of peroxide contained in the article not being required to be stated on the label. *United States* v. *American Druggists' Syndicate*----- 250

PETTY OFFENSE: Page

A prosecution under section 2 of the act, which provides for no imprisonment for the first offense, but merely a fine not exceeding $200, is for a "petty offense", and the trial of such a case under waiver of jury would amount to an arbitration as to the questions of fact involved, and the court's conclusions of fact could not be reviewed. *Frank et al.* v. *United States* ---------- 329

See Appeal and Error; Crime, Infamous; Information; Jury Trials; Offenses.

PHARMACOPOEIA, UNITED STATES:

Congress, in providing that a drug shall be deemed to be adulterated if it fails to comply with the standard for such drug as determined by the test laid down in the United States Pharmacopoeia or National Formulary official at the time of investigation, did not delegate legislative power, but merely prescribed the method of ascertaining facts upon which the operation of the statute was to depend. *United States* v. *Lehn & Fink* ---------- 229

See Constitutionality of the Food and Drugs Act; Standards.

PHYSICIANS' PRESCRIPTIONS:

The act makes no exception in favor of the medicines or prescriptions of regularly licensed physicians, and the sending through the channels of interstate commerce of such a medicine or prescription containing morphine, without a statement on the label of the package of the proportion thereof, constitutes an offense against the act. *United States* v. *Dr. J. L. Stephens Co.* ---------- 305

Affirmed, *Dr. J. L. Stephens Co.* v. *United States* ---------- 471

PIE FILLING:

An article labeled "Lemon Pie Filling * * * contains in a concentrated form the same ingredients used by the housewife in making Lemon Pie", and an article labeled "Orange Pie Filling * * * contains in a concentrated form the same ingredients used by the housewife in making Orange Pie", *held* misbranded because the so-called "Lemon Pie Filling" was not lemon pie filling and did not contain in a concentrated form the same ingredients used by the housewife in making lemon pie, and the so-called "Orange Pie Filling" was not orange pie filling and did not contain in concentrated form the same ingredients used by the housewife in making orange pie. *United States* v. *Sherer-Gillett Co* ---------- 1093

PLEADING.

PRESERVED WHOLE EGG.

See Eggs and Egg Products.

PRESUMPTION OF INNOCENCE.

See Burden of Proof; Criminal Cases; Reasonable Doubt.

PRIOR CONVICTION:

An indictment charging the defendant with violation of the act contained allegations to the effect that the same defendant had, upon its plea of nolo contendere to a criminal information, been convicted and fined the sum of $50 and costs for a violation of the same act. Upon demurrer to the indictment that such allegations of prior conviction were impertinent, irrelevant, and had no relationship to, or connection with, the offense charged in the instant indictment, *held* that under the provisions of the act that for a first offense thereunder the punishment shall on conviction be a certain minimum in the act set forth, but that on conviction for a second or subsequent offense thereunder the punishment shall be increased in a certain definite manner prescribed, the fact of the former conviction was properly pleaded in the indictment, so that the court would have the formal charge thereof before it when fixing punishment, and because the question of the identity of the defendant upon trial with the person formerly convicted might well arise and become an issue. *United States* v. *St. Louis Dairy Co* 962

In a prosecution for offense under the act, *held* that the fact of a previous conviction of defendant for violation of the act goes only to the question of penalty if defendant is convicted, and must not in any way influence the verdict of the jury. *United States* v. *Trinidad Creamery Co* 1152

See Indictment; Offenses; Penalties; Res Judicata.

PROOF.

PURCHASER:

The word "purchaser" as used in section 8 of the act is without limitation or qualifying terms. If it is broad enough to include wholesale and retail purchases, it is also broad enough to include

PURCHASER—Continued.

Page

the ultimate consumer as a purchaser, and the labeling or branding of the particular package, box, bottle, or other container inclosing the article which he buys must be such as not to deceive or mislead him. It is the purchasing public, the ultimate consumer, whom the provisions of the statute are primarily designed to protect. *United States* v. *Dr. J. L. Stephens Co*---- 305
Dr. J. L. Stephens Co. v. *United States*---- 471
United States v. *90 Boxes of Macaroni*---- 561

By the words "the purchaser" used in the act is meant not only the wholesale dealer who might buy, or the retailer who might purchase, the article, but includes also the ultimate consumer who might purchase it for use. *United States* v. *Wedell*---- 771

See Label; Object of the Act; Package; Purpose of the Act.

PURITY.

See Standards.

PURPOSE OF THE ACT:

The purpose of the act is to keep adulterated or misbranded articles of food or drugs out of the channels of interstate commerce, or, if they enter such commerce, to condemn them while being transported or when they have reached their destination, provided they remain unloaded, unsold, or in original unbroken packages. *Hipolite Egg Co.* v. *United States*---- 223
Savage v. *Jones*---- 376

The act is intended to prevent adulterated and misbranded foods from being sold in interstate commerce. *United States* v. *Charles L. Heinle Specialty Co*---- 82

The act was passed for the purpose of preventing the transportation in interstate commerce of articles of food, or of drugs, which are adulterated or misbranded. *United States* v. *Eleven Gross Packages of Dr. Williams' Pink Pills*---- 680

The statute was enacted to remedy the great mischief resulting from the unrestricted sale of adulterated drugs and food, and ought to be given, where possible, a construction that will effect the general legislative intention. *United States* v. *Antikamnia Chemical Co*---- 260

The Food and Drugs Act was passed by Congress under its authority to exclude from interstate commerce impure and adulterated food and drugs and to prevent the facilities of such commerce being used to enable such articles to be transported throughout the country from their place of manufacture to the people who consume and use them, and it is in the light of the purpose and of the power exerted in its passage by Congress that this act must be considered and construed. *McDermott et al.* v. *State of Wisconsin*---- 473

The purpose of the act is to prevent the shipment in interstate commerce of food or drugs that have been adulterated or misbranded with the idea of protecting the public from being deceived or misled as to such articles. *United States* v. *Bethesda Mineral Spring Co*---- 841

One of the purposes of the enactment of the act was to keep adulterated drugs out of interstate commerce and to insure to the purchaser and user of the drug shipped in interstate commerce an article that was up to, and which complied with, the standard prescribed by law. *United States* v. *G. F. Harvey Co*---- 754

The purpose of the act was to protect consumers against impure and adulterated foods and drugs, and also against the use of foods or drugs which do not show what they contain by the brands on the package. *United States* v. *Mayfield et al*---- 90

The one purpose of the act was to prevent the sale of adulterated articles; the other purpose was to enable a purchaser to obtain what he called for and was willing to pay for. The statute was to protect consumers, and not producers. *United States* v. *100 Cases of Tepee Apples et al*---- 20

The purpose of the act is to secure the purity of food and drugs and to inform purchasers of what they are buying. Its provisions are

PURPOSE OF THE ACT—Continued. Page

directed to that purpose and must be construed to effect it. *United States* v. *Antikamnia Chemical Co* 552
United States v. *Schider* 875
United States v. *95 Barrels, More or Less, Alleged Apple Cider Vinegar* 1047
United States v. *95 Barrels, More or Less, Alleged Apple Cider Vinegar* 1118

The law requires the manufacturer to be honest in his statement of the contents of the package; it requires him to be honest in stating the truth upon the label put upon it. That is what the act is intended to accomplish, and, if properly enforced, it will accomplish. *United States* v. *Edward Westen Tea & Spice Co* 69

It is the purpose of the act to promote honest dealing between those who sell and those who buy, through the medium of interstate commerce, articles within the purview of the act. *United States* v. *22 Bottles of Crab Orchard Concentrated Mineral Water* 1055

Congress by the enactment of the statute intended to promote honesty and fair dealing in trade and to secure to the public pure and wholesome food and drugs. *United States* v. *Buffalo Cold Storage Co* 103

The act is for the purpose of enabling the consumer to get what he orders and to receive what he desires to receive. *United States* v. *Hall-Baker Grain Co* 291

The general purpose of the act is to prevent the sale under misleading terms of food and drugs. *United States* v. *Dunham Manufacturing Co* 440

The purpose of the act, section 8, is to protect the public from deception by misbranding. *United States* v. *267 Boxes of Macaroni* 630

The purpose of the act is to protect the people against impure food, where the quality or value of a food is so adulterated as to reduce the strength or the food value. The whole purpose of the law is to have the quality of an article as well as the quantity, just as described upon the label. *United States* v. *Potter* 409

The primary purpose of Congress in enacting the statute was to prevent injury to the public health by the sale and transportation in interstate commerce of misbranded and adulterated food. *United States* v. *Lexington Mill & Elevator Co* 577
United States v. *Coca Cola Co* 741
Ninety-five Barrels, More or Less, Apple Cider Vinegar v. *United States* 1079
United States v. *Ten Cases, More or Less, Bred Spred, Etc., et al* 1262

The statute, as against misbranding, was intended to make it possible that the consumer should know that an article of food purchased was what it purported to be; that it might be bought for what it really was and not upon misrepresentations as to character and quality. As against adulteration, the statute was intended to protect the public health from possible injury by adding to articles of food consumption poisonous or deleterious substances which might render such articles injurious to health of consumers. *United States* v. *Lexington Mill & Elevator Co* 577
United States v. *Coca Cola Co* 741
United States v. *Ten Cases, More or Less, Bred Spred, Etc., et al* 1262

The statute, as against misbranding, was intended to make it possible that the consumer should know that an article purchased was what it purported to be; that it might be purchased for what it really was and not upon misrepresentations as to character and quality. *United States* v. *Lexington Mill & Elevator Co* 577
United States v. *Coca Cola Co* 741
United States v. *Schider* 875
United States v. *95 Barrels, More or Less, Alleged Apple Cider Vinegar* 1047
United States v. *Ten Cases, More or Less, Bred Spred, Etc., et al* 1262

The aim of the act in forbidding misbranding is to prevent deception resulting from indirection and ambiguity as well as from statements which are false. Statements which are ambiguous and

PURPOSE OF THE ACT—Continued. Page

liable to mislead should be read favorably to the accomplishment of the purpose of the act. *United States* v. *95 Barrels, More or Less, Alleged Apple Cider Vinegar*---- 1118

The purpose of the act was to prevent deceit and false pretenses in the sale of food or drugs, and to protect the customer or buyer in his right to receive what he orders, what he buys, and what he desires to receive. It was also for the prevention of fraud and deception to the end that the purchaser should get the thing that he had a right to suppose he was getting. *United States* v. *W. B. Wood Manufacturing Co*---- 1002

The purpose of the act is to prevent deceit and false pretenses in the sale of food and drugs and to protect the public. It is aimed at imitations, shams, frauds, and pretenses of every character as regards food and drugs. Its purpose is to apprise people who buy and use drugs as to what they buy and use, and to check the use of drugs which lead to destructive habits. *United States* v. *Dr. J. L. Stephens Co*---- 305

The purpose of the act is the ever insistent consideration in its interpretation. The purpose of the act is to prevent the surreptitious sale of certain noxious drugs or their derivatives, the latter supposedly partaking of the quality of the parent article and as effective of evil consequences. *United States* v. *Antikamnia Chemical Co*---- 552

The act was passed for the protection of the people. It was intended that through the instrumentality of the act food and drugs that pass in interstate commerce should be as represented, and should be branded truthfully. The act was passed so as to prevent people from taking cocaine when they did not know there was cocaine in it, or chloroform when they did not know there was chloroform in it, or some other deleterious substance mentioned in the act. *United States* v. *Piso Co*---- 319

The purpose of the act is to insure the truthful and proper labeling of drugs; it is to prevent the false and fraudulent labeling of drugs; it is to protect the public against being misled as to the curative properties of drugs. *United States* v. *36 Bottles of Crab Orchard Mineral Water*---- 1011

The purpose of the act of August 23, 1912, amending the Food and Drugs Act, was, in the branding of drugs, to punish false and fraudulent statements regarding the curative or therapeutic effects of such drug or any of its ingredients. *Eleven Gross Packages, More or Less, of Dr. Williams' Pink Pills* v. *United States*---- 752

The act as amended by act of August 23, 1912, is intended to protect the people from the transportation and sale of misbranded medicines, experience having shown that men and women afflicted with disease are disposed to try a professed remedy, no difference how useless or even harmful it may be if it is strongly recommended; and it is to protect the sick and afflicted and people who are easily imposed upon from fraudulent practices of the unprincipled and avaricious. *United States* v. *Simpson*---- 700

The act, as indicated in its title, is an act to prevent not only the manufacture and sale, but the transportation of adulterated or misbranded foods and drugs. Transportation, as well as sale or manufacture, is, therefore, within the Congressional purpose in passing this enactment. *United States* v. *Philadelphia Pickling Co*---- 414

The purpose of the act is very manifest; it is to protect the public from the sale of impure food. Transportation with a view of putting into the hand of customers an adulterated article is within the beneficent purpose, and within the terms of this enactment. Id.

The purpose of the act is to protect the public from the manufacture, sale, or transportation of adulterated or misbranded foods and drugs or those below a certain standard. *United States* v. *Koshland*---- 777

The act is intended to protect the public against adulterated drugs transported from one State to another. *United States* v. *One Bale of Aletris Root*---- 1212

PURPOSE OF THE ACT—Continued. Page

The purpose of the act is to benefit, or help, the public. In the case of foods, the act is intended to do two things; one, to enable persons to get exactly what they think they are getting; and the other, to prevent their getting something that may do them harm or may defraud them by making them pay an additional price, or will cause them to be cheated in the various ways that are defined in the statute, by covering up the sale of one thing in place of that which the article purported to be. *United States* v. *Russian Monopol Co*---------- 784

The statute was enacted for the purpose of benefiting and protecting the consumer. *United States* v. *625 Sacks of Flour*---------- 129

The act was passed for the protection of consumers and purchasers. *United States* v. *Mohn Wine Co*---------- 316

The purpose of the act was to protect the public. *United States* v. *Paraskevopolus*---------- 925

The purpose of Congress in the enactment of the act was the better protection of the people of the United States from adulterated or deleterious foods, drugs, medicines, and liquors. *Wm. M. Galt & Co.* v. *United States*---------- 422

The act was designed to protect the public from the adulterations of foods and drugs, and from being deceived by misbranding of such articles or their labeling differently from what they are in fact. *United States* v. *S. Gumpert et al*---------- 182

The purpose of the act is to protect the public against deception in the purchase of drugs and food, by punishing adulteration and misbranding as therein defined. *United States* v. *American Druggists' Syndicate*---------- 250

The act is for the protection of the consumer, the public, in respect to both food products and drugs, for humans and animals, and is to be so regarded. *United States* v. *Joslin-Schmidt Co*---------- 881

The act is designed to protect the public against fraud, such as the sale and shipment of a mixture of cottonseed oil with olive oil as pure olive oil. *United States* v. *Marmarelli et al*---------- 1122

The act was passed not to protect experts especially, not to protect scientific men who know the meaning and the value of drugs, but for the purpose of protecting ordinary citizens. *United States* v. *Harper*---------- 11

The purpose of the act is not to protect experts or scientific men alone who know the nature and value of food products, but to protect ordinary people—people without scientific knowledge or experience. The real purpose of the act is to protect the public against imposition. *United States* v. *300 Cases of Mapleine*---------- 39

The act was not framed to protect only wholesalers and retailers and not the common people. Its primary purpose is the protection of the ultimate consumer. It is the purchasing public, the ultimate consumer, whom the provisions of the statute are primarily intended to protect. *United States* v. *Dr. J. L. Stephens Co*---------- 305

The act was enacted for the protection of the public, not private rights. The public, through Congress, has been given the benefit of this protective statute in order that they shall not have foisted upon them, under misleading labels and put up in misleading form, articles of food which are not what they are purported to be. *United States* v. *Alban*---------- 1014

The primary purpose of the act is to protect the purchasing public and the ultimate consumer. It was the purpose of Congress in enacting the act to put a stop to the transportation and sale in interstate commerce of adulterated and misbranded articles of food, drink, and drugs. It was intended to reach all forms of misrepresentations by misbranding by the use of words or by the use of designs or devices, pictures, etc., calculated to mislead or deceive, cheat, or defraud the purchasers. *United States* v. *5 Cases of Champagne*---------- 503

United States v. *90 Boxes of Macaroni*---------- 561

The general purpose and intent of the act is to prevent fraud and deception, so that the purchaser can obtain the thing he supposes

PURPOSE OF THE ACT—Continued. Page

he is obtaining, rather than the protection of the public health to the extent of preventing a purchaser from deliberately and intentionally buying a particular food which is what it purports to be, even though a jury may think it deleterious. *United States* v. *40 Barrels and 20 Kegs of Coca Cola* 606

A description of the purpose of the statute would be inadequate which failed to take account of the design to protect the public from lurking dangers caused by the introduction of harmful ingredients, or which assumed that this end was sought to be achieved by simply requiring certain disclosures. Congress in executing the purpose of the act has limited its prohibitions and has specifically defined what shall constitute adulteration or misbranding, but in determining the scope of specific provisions the purpose to protect the public health, as an important aim of the statute, must not be ignored. *United States* v. *Coca Cola Co* 741

The purpose of the act is to prevent deceit and false pretenses in the sale of foods and drugs, and to safeguard the public health. *United States* v. *Bettman-Johnson Co* 299

The act is intended to safeguard the people in their daily lives, and to the end that their health may be conserved. *United States* v. *Gidden* 360

The prohibition of misbranding in the act is designed to prevent deceiving or misleading the purchasing public, even though the article sold is in itself equally good or not injurious to health. *United States* v. *95 Barrels, More or Less, Alleged Apple Cider Vinegar* 1047

The title of the act and the act itself, when carefully read and considered, demonstrates the fact that the sole purpose of its enactment was (1) to protect purchasers from injurious deceits by the sale of inferior for superior articles; and (2) to protect the health of the people by preventing the sale of normally wholesome articles to which have been added substances poisonous or detrimental to health. *Hall-Baker Grain Co.* v. *United States* 391

United States v. *150 Cases of Fruit Puddine* 557

United States v. *Tetz et al* 917

The provisions of the act regarding misbranding of food are to prevent fraud on the public; but the provision that food shall be deemed to be adulterated if it consist in whole or in part of a filthy, decomposed, or putrid animal or vegetable substance, etc., was not to prevent fraud; it was to protect the public in the matter of its comfort and health. *United States* v. *1,459 Cases Canned Salmon* 995

The act, broadly speaking, deals with two general propositions. One is to safeguard the health of the public; the other is to prevent deception, where it might very well be that the article to be sold is in no manner deleterious. *United States* v. *350 Bags of Shell Peanuts* 685

The primary purpose of Congress in enacting the act was to prevent injury to the public health by the sale and transportation in interstate commerce of misbranded and adulterated food, and while the test of misbranding of a food product under section 8 of the act is whether it is true to name, there should not be overexactness in applying this test in a case where the public health cannot possibly be jeopardized. *Ninety-five Barrels, More or Less, Apple Cider Vinegar* 1079

The act is a police regulation enacted to conserve the public health. *Dade* v. *United States* 465

The underlying purpose of the act was to protect the public health against imposition upon the users of food, drugs, and medicines which are adulterated, misbranded, poisonous, or deleterious. *United States* v. *Johnson* 85

The purpose of the act is to conserve the public health by preventing interstate commerce in poisonous or deleterious foods and drugs, and, in order that this may be effected, it is not only made a misdemeanor under the act, but the article of food or drug adulterated

PURPOSE OF THE ACT—Continued. Page

or misbranded is declared to be forfeited as an offending thing which threatens the health of the citizen. *United States* v. *Five Boxes of Asafoetida* 160

The purpose of the act is to conserve the public health by preventing interstate commerce in food containing an added poison which may render the food injurious to health, and in order that this may be effected the offending food is subject to seizure. Congress acting upon the theory that the evil of adulterated food was of national concern enacted the statute to protect the public health and keep purchasers from being defrauded. *United States* v. *3,192 Boxes of Apples, et al* 1199

REGULATIONS:

Regulation 17 of the rules and regulations for the enforcement of the act *held* to have the force and effect of law. *United States* v. *779 Cases of Molasses* 65

REGULATIONS—Continued. Page

Regulations authorized by the act are binding on parties who deal in food products in interstate commerce. *United States* v. *37 One-Pound Packages of Colors* 1165

Regulation 19 (c) cited and upheld by the court. *United States* v. *Thomson & Taylor Spice Co* 390

Regulation 19 (c) *held* to have the force and effect of law. *United States* v. *Finlayson et al* 535

An article labeled "Genuine Hollands Geneva Gin Distilled by London Wine & Spirit Co. New York", *held* to comply with the regulation 19 (c) providing that "the use of a geographical name in connection with a food or drug product will not be deemed a misbranding when by reason of long usage it has come to represent a generic term, and is used to indicate the style, type, or brand, but in all such cases the State or Territory where any such article is manufactured or produced shall be stated upon the principal label", and not misbranded under the act. Id.

An article labeled "Holland Gin", which was manufactured in the United States, and the name of the manufacturer and the place of manufacture were stated on the label, *held* properly branded under regulation 19 (c). *United States* v. *Five Cases of Hurdle Brand Holland Gin* 549

So much of regulation 28, promulgated by the three Secretaries under section 3 of the act, as names the several derivatives of the drugs enumerated in section 8, and the several preparations containing them respectively, is valid, but that part of the regulation which requires a preparation containing a derivative of any such enumerated drug to be so labeled or branded as to show not only the quantity or proportion of the named derivative contained in the preparation as required by that section, but also the name of the drug from which the derivative is obtained, is invalid as an amendment of, or an addition to, the act itself. *United States* v. *Antikamnia Chemical Co* 260

Reversed, *United States* v. *Antikamnia Chemical Co* 552

The power given by section 3 of the act to the specified heads of departments to make rules and regulations for carrying out the provisions of the act is an administrative power and not one to alter, or add to, the act, and the extent of the power must be determined by the purpose of the act and the difficulties its execution might encounter. Regulation 28 requiring the labels of drugs containing any derivative or preparation of any of the substances enumerated in section 8 of the act, in stating the quantity or proportion of such derivative or preparation, but also the name of such specified substance from which such derivative is derived or from which it is a preparation, fulfills the purpose of the act, and does not alter, or add to, the act, and is within the delegated power of the act. *United States* v. *Antikamnia Chemical Co* 552

Regulation 28 (c) and (d) *held* not to be controlling on the court by way of construing the act, but as being a reasonable construction which the court might adopt if it saw proper. *United States* v. *Piso Co* 319

Congress did not, under the act, intend to confer upon executive officers the power to prescribe the constituent elements that shall enter into coloring materials used as the component parts of foods and drinks. *United States* v. *W. B. Wood Manufacturing Co* 1002

Certain rules by executive officers, prescribing the constituents of coloring materials used in food and drinks, offered as evidence by the Government, *held* inadmissible. Id.

Where the amount of morphine contained in a drug varies it is not sufficient compliance with regulation 28 (d) to state the maximum amount present in all the bottles "as less than 4 percent", since the variance might be too great in some bottles. *United States* v. *The Richie Co* 286

The regulations authorized by Congress for carrying out the act cannot add to or detract from the statute, but may aid in its enforcement and understanding. In a prosecution charging misbrand-

REGULATIONS—Continued. Page

ing of butter as to the weight of the contents of the package, *held*, that, under the provision of the act, section 8, that reasonable variations shall be permitted, and tolerances shall be established by rules and regulations made in accordance with section 3 of the act, the regulation that "Discrepancies due exclusively to errors in weighing, etc., which occur in packing conducted in compliance with good commercial practice", was applicable to the case. *United States* v. *Trinidad Creamery Co*---------- 1152

In the act, section 8, paragraph 3, as amended by act March 3, 1913, which provides that food shall be deemed misbranded if the quantity of the contents of the package be not plainly and conspicuously marked on the outside of the package in terms of weight, measure, or numerical count, and which further provides that reasonable variations shall be permitted and tolerances and also exemptions as to small packages shall be established by rules and regulations made in accordance with the act, the provision respecting variations, tolerances, and exemptions is merely direction as to exercise of administrative power and is not a part of the definition of the offense. *United States* v. *Centralia Dairy Co*---------- 1336

Regulation 5 (a) requiring notice and opportunity to be heard preliminary to criminal proceedings under sections 1 and 2 of the act, does not apply to proceedings in rem under section 10. *United States* v. *94 Dozen, More or Less, Half-Gallon Bottles Capon Springs Water*---------- 1278

See Constitutionality of the Food and Drugs Act; Executive Officers; Standards.

RELEASE:

Motion of claimant of food products seized on libel to condemn as misbranded, for release of the products, under bond pursuant to section 10 of the act, would, under the discretion conferred by the permissive language of that section, be denied, where, although the articles seized were not deleterious, they had a much lower market value than the articles which the false labels described, the misbranding was fraudulent and injurious to competitors in the trade, and claimant had been convicted of a similar offense before, and had numerous other proceedings pending against him. *United States* v. *Two Cans of Oil of Sweet Birch, Etc.*---------- 963

In an action for destruction of butter shipped in interstate commerce, which contained impurities, and a portion of which had become rancid, the claimant will be allowed, under bond, to attempt to cleanse it by renovating but not by ladling. *United States* v. *Nine Barrels of Butter*---------- 826

See Bond; Costs; Libel.

REMEDY.

See Curative and Therapeutic Effects of Drugs.

RES JUDICATA:

A prosecution charging misbranding of defendant's drug product, within the meaning and intendment of the Sherley amendment of the act, *held* not barred by a previous decree in a condemnation proceeding in a United States court, condemning a quantity of such product as misbranded in certain other respects under the act, and requiring the defendant to remove certain statements from the label. *United States* v. *A. Skarzynski & Co*---------- 860

The Government brought a libel for condemnation of a drug product charging misbranding under the act as amended by act August 23, 1912, in that the label stating the curative or therapeutic effect of the product was false and fraudulent. Respondent, who was the proprietor of the product, in his answer claiming the goods, pleaded res judicata by reason of a verdict and judgment of "not guilty" in a criminal prosecution previously instituted by the Government against him as defendant and tried, and involving such product and on such a charge. Said plea of former judgment denied, since an

RES JUDICATA—Continued. Page

essential element of the offense under the act in the respect involved—fraudulent intent as to representations regarding curative or therapeutic effect of drugs—is a state of mind, a factor necessarily subject to constant change; and to contend that a prosecution or proceeding that turned not as most offenses do on the commission of the overt act, but on the state of mind of the defendant, would constitute a bar to a proceeding based upon his state of mind at a later date, is essentially unsound. *United States* v. *141 Bottles of Drug Products* 931

Dismissal of successive informations for shipping drugs misbranded in violation of the act, as amended, section 8, paragraph 3, *held* not res judicata in subsequent proceedings to condemn other misbranded bottles of drugs; the record showing no trial on merits and acquittal. *United States* v. *23 7/12 Dozen Bottles, Etc., of An Article of Drugs Labeled in Part " Lee's Save The Baby"* 1240

A judgment adverse to the Government in a proceeding to condemn a quantity of a drug product as misbranded by false and fraudulent statements regarding its curative or therapeutic effect, *held* not a bar to the maintenance of a subsequent similar condemnation proceeding against a quantity of such product, brought and tried more than 10 years after the earlier case arose, since, by reason of developments and happenings in the course of that period, the issue of fraud or good faith on the part of the manufacturer with reference to the curative or therapeutic statements involved in the later proceeding, and the facts and circumstances relating to that issue, may differ vastly from those in the earlier proceeding. *United States* v. *17 Bottles, Etc., of An Article of Drugs Labeled in Part "B. & M."* 1287

See Injunction; Prior Conviction.

REVIEW.

RUSK:

Application to file an information alleging that an article labeled "Genuine Dutch Tea Rusk Made in Holland, Mich.", with the word "Holland" in type much larger than the word "Mich.", was misbranded because it purported to be a foreign product when not so, denied on the ground that the information presented a doubtful case of misbranding under the act. *United States* v. *Schurman et al* 95

SALE:

The sale and shipment of a misbranded drug from Ohio to the District of Columbia was interstate commerce and constituted an offense under section 2 of the act, whether the sale was made before or after shipment. *United States* v. *Tucker* 248

Libel for forfeiture of certain bags of sugar, under section 10 of the act, *held* fatally defective for failure to charge that the sugar seized had been transported in interstate commerce *for sale*, though the libel contained an averment that the sugar was owned by or in the possession of one "for the purpose of being used and manufactured, sold, and consumed as food." *United States* v. *46 Packages and Bags of Sugar* 168

SALE—Continued.

Page

Libel for condemnation of drugs for misbranding, under section 10 of the act, *held* insufficient on the ground that it did not charge that the packages had been transported in interstate commerce *for sale*. *United States* v. *8 Packages and Casks of Drugs*---------- 149

Shipments of a drug preparation in bulk to the owner from its manufacturing agent in another State *held* not subject to seizure and forfeiture for misbranding under section 10 of the act, where before being offered for sale by the owner it was bottled and properly labeled. *United States* v. *65 Casks of Liquid Extracts*---------- 47

Affirmed, *United States* v. *Knowlton Danderine Co*---------- 89

An article of food libeled and seized in a proceeding under section 10 of the act, shipped for the purpose of being used in the manufacture of another food product, and held for that purpose, *held* not to be subject to condemnation because it was not transported for sale. *United States* v. *Three Barrels of Vanilla Tonka and Compound*---------- 201

Where a libel alleged that certain frozen eggs had been transported in interstate commerce and were, at the time of service of the libel, in whole or in part filthy, putrid, or decomposed, and remained unsold in original unbroken packages in a warehouse in New York City, the libel was not fatally defective for failure to charge that the eggs had been transported for sale. *United States* v. *300 Cans of Frozen Eggs*---------- 283

Where adulterated vinegar, which had been shipped in interstate commerce, was seized while stored in the original unbroken packages, *held*, not material that the evidence did not show that it had been shipped in interstate commerce for sale in the original unbroken packages. *United States* v. *100 Barrels of Vinegar*---------- 287

Adulterated eggs which had been shipped from one State to the owners in another solely for use in their bakery business, and not for sale, *held* to be subject to condemnation under section 10 of the act. *United States* v. *50 Cans of Preserved Whole Eggs*---------- 74

Affirmed, *Hipolite Egg Co.* v. *United States*---------- 223

The object of the act is to keep adulterated articles out of the channels of interstate commerce or if they enter such commerce to condemn them while in transit, or in the original unbroken packages after reaching destination; and the provisions of section 10 apply not only to articles for sale, but also to articles to be used as raw material in the manufacture of some other product. In construing the act, all articles, compound or single, not intended for consumption by the producer, are regarded as designed for sale, and for that reason it is the concern of the law to have them pure. *Hipolite Egg Co.* v. *United States*---------- 223

Affirming *United States* v. *50 Cans of Preserved Whole Eggs*---- 74

A libel in a proceeding to forfeit adulterated eggs was not defective for failure to allege that the eggs had been transported for sale; nor was it material that the consignee did not intend to sell the eggs, but to use them for manufacturing purposes. *United States* v. *Two Barrels of Desiccated Eggs*---------- 232

Where decomposed canned eggs, which had not been denatured and therefore could have been used either for food or tanning purposes, were shipped in interstate commerce from one warehouse of the owner to another, they were "an adulterated article of food" within the definition and meaning of sections 2, 6, and 10 of the act, and it was no defense to a proceeding to condemn them that the owner intended them for sale for use in tanning and not for use or consumption as food. *United States* v. *13 Crates of Frozen Eggs*---------- 531

Affirmed, *United States* v. *13 Crates of Frozen Eggs*---------- 605

Misbranded hog feed, which had been reshipped to the manufacturer by a customer in another state, *held* to be subject to seizure and forfeiture under section 10 of the act, though the purpose of such transportation was not *for sale*. *United States* v. *426 Bags of Economy Special Hog Feed*---------- 1001

Where a creamery corporation made shipments of butter in regular course of business to a corporation in another state, and such shipments received by the consignee were by it commingled with shipments from other sources and sold upon the market, and payment by the consignee to the consignor for such shipments was made weekly and at schedule price, and, on the part of the consignee to the consignor, there was no accounting for any particular consignment and no report of sales or of receipts therefrom, and, on the part of the consignor to the consignee, there was no return of or accounting for any moneys received from the consignee; *held* that such a shipment was not by a principal to a mere agent, or by a mere agent to a principal, but constituted a *sale*. *United States* v. *Boise Valley Cooperative Creamery Co*---- 1203

The Government brought a proceeding to condemn a shipment of apples as adulterated by addition of arsenate of lead, a poison, as the result of spraying the trees with a solution of arsenate of lead. Claimant contended that the apples as shipped were not ready for sale or use as food, but were shipped by him to his own warehouse and there to have all possible arsenate of lead removed therefrom before being marketed. *Held:* that the apples were not subject to condemnation if, though there was sufficient poisonous material thereon that they might become deleterious to human health when eaten, claimant in good faith intended that they were not ready for marketing and that they should not go on the market in such condition. *United States* v. *630 Baskets of Apples*-- 1205

Where a physician furnished a drug as part of the treatment of a patient, shipping said drug in interstate commerce, and made no separate charge for the drug, *held* that the sale of the physician's services included a *sale* of the drug. *United States* v. *Dr. J. L. Stephens Co*---- 305

Affirmed, *Dr. J. L. Stephens Co.* v. *United States*---- 471

See Interstate Commerce; Knowledge and Intent; Libel; Original Unbroken Package; Seizure; Shipment.

SALMON, CANNED:

Shipments of canned salmon alleged to be adulterated under the provision of the act declaring food adulterated if it consists in whole or in part of a filthy, decomposed, or putrid animal substance, *held* not subject to condemnation and forfeiture, on the ground that it was not shown that the contents of all of the cans in the shipments were so adulterated. *United States* v. *1,459 Cases of Canned Salmon*---- 995

United States v. *200 Cases, More or Less, of Canned Salmon*---- 1095

United States v. *1,974 Cases of Canned Salmon*---- 1037

A shipment of canned salmon *held* to consist in part of a filthy, decomposed, and putrid animal substance to such a percentage of the cans in excess of reasonable and salutary requirements as to constitute the whole shipment adulterated within the prohibition of the act. *United States* v. *430 Cases of Canned Salmon*---- 1035

Canned salmon *held* adulterated in that it consisted in whole or in part of a filthy, decomposed, or putrid animal substance. *United States* v. *1,195 Cases of Canned Salmon*---- 1099

United States v. *1,600 Cases of Canned Salmon*---- 1105

United States v. *1,974 Cases of Canned Salmon*---- 1108

A. O. Anderson & Co. v. *United States*---- 1053

United States v. *2,995 Cases of Canned Salmon*---- 1136

United States v. *2,205 Cases of Canned Salmon*---- 1133

United States v. *Gorman & Co*---- 1171

Canned salmon *held* misbranded because it was labeled as "sockeye" salmon, when it was not. *United States* v. *1,459 Cases of Canned Salmon*---- 995

Canned salmon, labeled "select" and "fresh fish", when the pack was of inferior quality and not fresh, as the term is used in the trade, *held* misbranded. *United States* v. *200 Cases, More or Less, of Canned Salmon*---- 1095

SALMON, CANNED—Continued. Page

Canned salmon, labeled, "Select Pink" and "Alaska Salmon", when it was not select pink Alaska salmon, but was a poor pack of pink salmon of inferior and not of select grade, *held* misbranded. Id.

Canned salmon, labeled "Fresh Salmon", when it was not fresh fish in the sense of the term as used in the canning trade, *held* misbranded. *United States* v. *2,205 Cases of Canned Salmon*_____ 1133

See Article; Filthy, Decomposed, and Putrid; Samples.

SAMPLES:

In a prosecution for alleged misbranding of a shipment of syrup contained in a number of receptacles packed in two boxes, *held* that the jury was authorized to infer from proof as to the contents of the specific receptacles examined and analyzed that all of the other receptacles in the two boxes contained the same ingredients as the contents of the receptacles specifically examined and analyzed and were the same commodity. *United States* v. *John A. Tolman & Co*_____ 78

Where only a few sacks of flour, taken from different parts of a lot of several hundred sacks, were examined and found adulterated, *held* to be proper to assume, in the absence of evidence to the contrary, that other samples would show the same condition of adulteration as the samples examined, and that the samples examined were fairly representative of the whole number of sacks. *United States* v. *350 Sacks of "Princess" Flour and 50 Sacks of "Fancy Melba" Flour*_____ 351

Judgment affirmed, *Wm. M. Galt & Co.* v. *United States*_____ 422

A sample is that which is taken out of a large quantity as fairly representative of the whole. Whether a sample is so representative of the whole is a preliminary question for the trial court, whose ruling thereon will not be reviewed on appeal in the absence of evidence upon which it was based, and then only when error clearly appears. A finding of the trial court in a proceeding to condemn flour for violation of the act, that 2 sacks taken by the Government from each of two lots containing 350 sacks and 50 sacks, respectively, were fairly representative of the remaining, will not be disturbed on appeal where the evidence upon which it was based is not before the appellate court, and it appears that no evidence to the contrary was introduced in the lower court. *Wm. M. Galt & Co.* v. *United States*_____ 422

Affirming judgment in *United States* v. *350 Sacks of "Princess" Flour and 50 Sacks of "Fancy Melba" Flour*_____ 351

In a proceeding to condemn several hundred bushels of oysters on the ground that they contained filth, where the oysters actually examined were very few as compared with the whole quantity involved, *held* that if the jury find that the oysters actually examined were filthy to a substantial degree, then they should be condemned, and if the jury find from the proof that the oysters examined and found filthy to a substantial degree were fair samples of the rest, then the whole quantity of oysters involved should be condemned. *United States* v. *408 Bushels of Oysters*_____ 718

In a prosecution charging adulteration of oysters on the ground that they contained an excessive amount of water, *held* that the jury should determine whether the samples taken by the Government's agents were fair and representative, and that evidence as to the manner in which the samples were taken should be considered in determining the question. *United States* v. *Golden & Co*_____ 1033

Where the entire product is not inspected or tested, the proof must go far enough to satisfy the court or jury that the adulteration extends to the whole product sought to be condemned; and while a small percentage of adulteration, found only in a small percentage of the product, might not ordinarily satisfy the court or jury that the whole product is adulterated, yet in a case where a jury might properly infer or find that approximately one-fifth of the entire product was adulterated and that the adulteration extended to the entire product, no such question can arise. *A. O. Andersen & Co.* v. *United States*_____ 1053

SAMPLES—Continued. Page

While proof that the contents of 20 percent of cans in a shipment of salmon were adulterated, with nothing more, might authorize the inference that the whole product was bad, and therefore support a condemnation of the lot, where the same proof which establishes the adulteration of one-fifth establishes the lack of adulteration of the balance, the Government must fail, except as to the cans particularly identified as adulterated. *United States* v. *200 Cases, More or Less, of Canned Salmon*---------- 1095

A shipment of several hundred cases of canned salmon *held* adulterated where only a comparatively small number of cans from the shipment were examined, and, although it appeared that in the entire shipment there was a very large proportion of cans that were free from objection on the ground of decomposition or unfitness for food, there was an excessive percentage of cans in the shipment which were not within that exception. *United States* v. *430 Cases of Canned Salmon*---------- 1035

In a proceeding to condemn for adulteration a parcel of food, such as canned salmon, where the entire parcel is not tested, *held* essential to a verdict for the Government that a fair preponderance of the evidence show that the adulteration extended to the whole parcel. *United States* v. *1,974 Cases of Canned Salmon*---------- 1037

United States v. *2,995 Cases of Canned Salmon*---------- 1136

An inspection law of Kentucky properly provides for the taking of so much of an article covered by the law as is necessary for analysis in order to determine the true nature of the article. *Savage* v. *Scovell*---------- 18

Where packages of an article of food had been deposited in the mail for shipment in interstate commerce, the act of an inspector of the Department of Agriculture in opening the same and taking therefrom samples for testing, without a search warrant, though with the consent of the postmaster, was without the authority of law and in violation of the Fourth Amendment of the Constitution. *United States* v. *Myers*---------- 1159

A motion for an order directing the marshal to release samples of a product seized under the act, to claimant for examination, granted upon certain conditions, in the view that the Government is not required to submit such samples to claimant's counsel or experts for such purpose, such action being a privilege accorded the claimant by the United States attorney. *United States v. 1,500 Cases of Tomato Pulp*---------- 892

Where the Government had seized certain medicine under the act for adulteration and misbranding, and the goods were in the custody of the court in a condemnation action, the taking of samples by the Government for the purpose of making tests of the effect of the medicine on animals *held* not objectionable as compelling claimant to incriminate itself or subjecting it to unreasonable search and seizure, or as depriving claimant of property without due process. *United States* v. *B. & M. External Remedy*---------- 1235

The Government in a suit to condemn a medicine seized for adulteration and misbranding, should, on seeking to take small samples for the purpose of making actual tests, be required to pay the value of the samples in case the goods are not condemned, and to give claimant samples from the same containers, and he should be permitted to be present at the tests. Id.

See Analysis; Article; Examination; Search Warrant; Tests.

SARDINES, CANNED:

Canned sardines *held* adulterated in that they consisted in whole or in part of a filthy, decomposed, or putrid animal substance. *United States* v. *1,000 Cases of Sardines*---------- 1113

SEARCH WARRANT:

On motion to quash libel proceedings under the act, *held* that the court could not pass upon the question of the lawfulness of the issuance and return of a search warrant issued under a State law

SEARCH WARRANT—Continued. Page

by a justice of the peace and for the purpose of enabling representatives of the Department of Agriculture to get samples of claimant's goods in order to found such libel proceedings. The question of the admissibility of evidence unlawfully obtained may be determined when raised in the proper way and at the proper time in such libel proceedings. *United States* v. *94 Dozen, More or Less, Half-Gallon Bottles of Capon Spring Water* ---------- 1216

SEIZURE:

A drug is subject to forfeiture under section 10 of the act only when it is adulterated or misbranded at the time of seizure; it is not sufficient that it was adulterated or misbranded when it was being transported from one State to another and liable to forfeiture at that time, if it was not then seized. Where asafoetida below the prescribed test was received by claimants in interstate commerce and tested and correctly branded before seizure, it was not subject to forfeiture. *United States* v. *Five Boxes of Asafoetida* ---------- 160

United States v. *Nine Boxes of Asafoetida* ---------- 165

Sugar alleged to be adulterated and misbranded was not subject to forfeiture under the clause of section 10 of the act, declaring that any article of food adulterated or misbranded, which is being transported from one State, etc., to another for sale, shall be liable to seizure, condemnation, etc., where the goods were not seized while in transportation. *United States* v. *46 Packages and Bags of Sugar* ---------- 168

Seizure of alleged misbranded drugs is jurisdictional and must precede the filing of the libel for forfeiture under section 10 of the act, and be alleged in the libel. *United States* v. *8 Packages and Casks of Drugs* ---------- 149

Prior executive seizure of an article *held* to be unnecessary to confer jurisdiction of a libel proceeding for condemnation under section 10 of the act. The language of the act indicates that the procedure by libel should be commenced in the district courts before the property is seized. *United States* v. *Two Barrels of Desiccated Eggs* ---------- 232

United States v. *George Spraul & Co* ---------- 217

United States v. *100 Barrels of Vinegar* ---------- 287

United States v. *Seven Cases of Buffalo Lithia Water* ---------- 573

Under the act neither the marshal nor any other person is authorized to seize an article claimed to be subject to forfeiture prior to the commencement of proceedings for a forfeiture in court.

United States v. *George Spraul & Co* ---------- 217

United States v. *Two Barrels of Dessicated Eggs* ---------- 232

On a warrant for the seizure of 65 casks of a drug product a less number thereof may be taken. *United States* v. *65 Casks of Liquid Extracts* ---------- 47

In order to justify a verdict for the Government in a condemnation proceeding, it is necessary for the Government to show that the goods described in the libel and to which the proof adduced by the Government related were the goods actually seized under the libel. *United States* v. *539 Boxes and 322 Cartons of Wm. Radam's Microbe Killer* ---------- 511

SEIZURE—Continued. Page

The action of officials of the Department of Agriculture authorized to administer the act in certifying for seizure an article of food or drugs found by them to be adulterated or misbranded is not limited to one or any other number of shipments thereof, but, on the contrary, they are required and directed to make certification to the proper United States attorney of any and all shipments of any article found in interstate commerce, which after investigation they find to be adulterated or misbranded, and any such article or shipment thereof is liable to be proceeded against and seized whereever found, whether in single or multiple consignments. *National Remedy Co.* v. *Hyde, Secretary of Agriculture, et al*_____ 1230

Judgment reversed, *National Remedy Co.* v. *Hyde, Secretary of Agriculture, et al*_____ 1272

Action of the Department of Agriculture in causing libels to be brought against plaintiff's remedy and seizures thereof to be made under the act in numerous widely separated parts of the country, *held* to constitute an arbitrary exercise of power and denial of due process of law, and to be within the jurisdiction of a court of equity to restrain by injunction the institution of a multiplicity of suits under such circumstances. *National Remedy Co.* v. *Hyde, Secretary of Agriculture, et al*_____ 1272

Reversing judgment in *National Remedy Co.* v. *Hyde, Secretary of Agriculture, et al*_____ 1230

See Bond; Injunction; Jurisdiction; Libel; Notice and Opportunity to be Heard; Release; Search Warrant.

SENNA, ALEXANDRIA:

A drug product labeled "Alex. Senna Broken U. S. P." *held* not adulterated or misbranded by reason of containing stalks, seeds, pebbles, and other substances foreign to senna leaves, and through failure to comply with the standard prescribed for senna leaves in the United States Pharmacopoea. *United States* v. *J. L. Hopkins & Co*_____ 366

SHELLAC.

SHERLEY AMENDMENT:

See Circulars, Pamphlets, Booklets, Etc.; Constitutionality of the Food and Drugs Act; Curative and Therapeutic Effects of Drugs; False and Fraudulent; Knowledge and Intent; Misbranding.

SHIPMENT:

Shipment in interstate commerce of an adulterated food or drug product, which was the subject of a single sale and single shipment, although consisting of numerous packages, constituted a single offense under the act. *United States* v. *Watson-Durand-Kasper Grocery Co*_____ 837

Under section 2 of the act, declaring that any person who shall ship from any State to another any adulterated or misbranded article of food or drugs shall be guilty of a misdemeanor, the offender is guilty by the act of shipment, for the whole statute depends for validity on the interstate commerce clause of the Constitution. If he is not guilty when the shipment takes place and by reason of the shipment, he is not guilty at all. *United States* v. *Lehn & Fink*_ 229

In a prosecution charging shipment in interstate commerce of an adulterated drug in violation of section 2 of the act, *held* no conviction could be had unless it was shown by competent evidence that the drug was adulterated within the meaning of the act when it was shipped. Id.

It is not the misbranding itself of an article of food, but the shipment or delivery for shipment from one State to another of the misbranded article, that the act makes unlawful. *Weeks* v. *United States*_____ 867

In a prosecution charging defendant with shipping an adulterated drug product, *held*, that the jury, in order to convict, must be satisfied beyond a reasonable doubt that the product was adulterated before it was shipped. *United States* v. *Lorick & Lowrance*_____ 202

SHIPMENT—Continued.

Page

In a prosecution for shipping in interstate commerce sirup alleged to be misbranded as to the measure of the contents of the containers, *held* that the only question for determination was whether the sirup was short in measure at the time it was shipped. *United States* v. *Scudder Syrup Co*---- 461

In prosecutions charging defendants with shipping in interstate commerce decomposed and adulterated eggs, *held* that the jury, in order to convict, must find that the eggs were so decomposed at the time they were shipped. *United States* v. *Wilson & Co*---- 999

United States v. *Blazek*---- 1074

United States v. *Smith*---- 1173

On trial of an information charging defendant with shipping in interstate commerce milk adulterated in that it consisted in whole or in part of a filthy, decomposed, or putrid animal or vegetable substance, *held* that the jury, in order to convict, must find that the milk was adulterated as alleged, at the time it was delivered at the railway depot for shipment. *United States* v. *Hopkins*---- 585

In a prosecution charging shipping in interstate commerce butter containing less than 80 percent of butterfat, *held* that the jury, in order to convict, must be satisfied beyond a reasonable doubt that the butter was in such condition at the time it was delivered for shipment and while in transit to destination. *United States* v. *South Hero Creamery Association*---- 1142

In a prosecution charging shipment of butter alleged to be adulterated and misbranded, *held* that the jury, in order to convict, must be satisfied beyond a reasonable doubt that the butter was so adulterated or misbranded when it was shipped. *United States* v. *Barnet Creamery Association*---- 1149

In a prosecution charging defendant with violation of the act in shipping from one State into another butter containing less than 80 percent of milk fat, *held* that the jury, in order to convict, must find that the butter contained less than 80 percent of milk fat at the time it was shipped. *United States* v. *South Peacham Creamery Co*---- 1266

In a libel proceeding against apples and pears shipped in interstate commerce and seized as adulterated because they contained an added poisonous or other added deletrious ingredient which might render them injurious to health, *held* that under the act the time the apples and pears were adulterated, if so, was when they were introduced into interstate commerce, and that treatment of the growing fruit was immaterial. *United States* v. *3,192 Boxes of Apples et al*---- 1199

In a prosecution charging tomato paste shipped in interstate commerce was adulterated in that it consisted in whole or in part of a filthy, decomposed, or putrid vegetable substance, *held* that whether the process of nature in the tomato between the time it was ready for canning and the time it was actually put into the can may have been such as to cause the alleged condition of the product, was immaterial; the question was whether the product was in the alleged condition at the time of shipment. *United States* v. *Gidden*---- 360

In a prosecution for shipping in interstate commerce a product called "digester tankage" labeled to represent that it contained protein to the amount of 60 to 70 percent, where the evidence in support of the Government's charge that the product contained much less than said percentages of protein was the uncontradicted testimony of Government witnesses based on their analyses of samples of the product shipped, made 6 months after the shipment, *held* that the jury, in order to convict, must find that the amount of the protein found in the product on such analyses was fairly representative of the amount therein at the time the product was shipped. *United States* v. *Swift & Co*---- 717

In a proceeding against a quantity of aletris root transported in interstate commerce, and allegedly adulterated, *held* that the jury, in order to return a verdict for the Government, must find that the whole quantity of the article so transported was adul-

SHIPMENT—Continued. Page

terated, as alleged, at the time it was shipped and while in the course of transportation. *United States* v. *One Bale of Aletris Root* ---- 1212

In a condemnation proceeding against bottled spring water, *held*, that the issue of unwholesomeness under the act, section 7, clause 6, was restricted to the particular shipment and to the condition of the water at the time of shipment. *United States* v. *94 Dozen, More or Less, Half-Gallon Bottles of Capon Springs Water*---- 1216

That a shipper customarily stored bottled spring water to test its wholesomeness would not clear him of a charge of shipping unwholesome water, if at the time of shipment it was unwholesome, though the unwholesomeness were afterwards removed. Id.

The fact that frozen eggs, against which a libel for condemnation was instituted, had been shipped from one State to another and consigned by the shipper to itself, did not indicate that they had not been transported in interstate commerce. *United States* v. *300 Cans of Frozen Eggs*---- 283

The prohibition in the act against the interstate shipment of adulterated or misbranded food or drugs applies to shipments by warehousemen as well as manufacturers or dealers. *United States* v. *Buffalo Cold Storage Co*---- 103

The "shipment" referred to in the act, section 2, should not be construed to mean "shipment for sale." Its meaning in this connection covers any shipment for any purpose in the course of interstate commerce. *Philadelphia Pickling Co.* v. *United States*-- 451

It is not a defense to a prosecution under the act, section 2, for shipping adulterated tomato paste from one State to another that defendant shipped such article from its place of business to itself to its other place of business in another State for the purpose of testing before being sold. Such transaction is interstate commerce and constitutes an offense within said section. *United States* v. *Philadelphia Pickling Co*---- 414

Affirmed, *Philadelphia Pickling Co.* v. *United States*---- 451

It is not a defense to a prosecution under the act, section 2, for shipping an adulterated article of food from one State to another that the article was not shipped for sale, where the shipment was for a business purpose which constituted interstate commerce. Where defendant shipped adulterated tomato paste from its place of business to itself at its other place of business in another state for the purpose of having it there tested with a view to its export to a foreign country if it conformed to the standard of such country, which would have been lawful under the proviso of section 2 of the act, and where the article failed to meet the test and was destroyed, not being used or sold, *held* that its shipment was in interstate commerce and constituted an offense under said section. *Philadelphia Pickling Co.* v. *United States*---- 451

Affirming *United States* v. *Philadelphia Pickling Co*---- 414

Where a drug preparation was shipped in casks by car lots to the owner from its manufacturing agent in another State and the article when received was bottled and properly labeled before being offered for sale, *held* that the casks after receipt were not subject to forfeiture under the act, section 10, because the product was not shipped "for sale." *United States* v. *65 Casks of Liquid Extracts* ---- 47

Affirmed, *United States* v. *Knowlton Danderine Co*---- 89

Libel proceeding under section 10 of the act, for condemnation of a shipment of an article of food for adulteration and misbranding, dismissed on the ground that the evidence showed that the article was not shipped for sale but for use in the manufacture of another article of food. *United States* v. *Three Barrels of Vanilla Tonka and Compound*---- 201

Libel for forfeiture of certain bags of sugar, under section 10 of the act, *held* fatally defective for failure to allege that the sugar seized had been transported for sale. *United States* v. *46 Packages and Bags of Sugar*---- 168

SHIPMENT—Continued.

Page

Libel filed under section 10 of the act, against certain frozen eggs in a warehouse in the original unbroken packages after having been transported in interstate commerce, *held* not fatally defective for failure to charge that the eggs had been transported for sale. *United States* v. *300 Cans of Frozen Eggs*---------- 283

Where adulterated vinegar was proceeded against under the act, and it appeared that it had been the subject of interstate commerce and was seized in the original unbroken packages, it was not material that the evidence showed that it had not been shipped in interstate commerce for sale in such unbroken packages. *United States* v. *100 Barrels of Vinegar*---------- 287

Adulterated eggs which had been shipped from one State to the owners in another, *held* to be subject to seizure and condemnation under section 10 of the act, where the eggs were shipped solely for use by the owners in their bakery business, and not for sale as eggs. *United States* v. *50 Cans of Preserved Whole Eggs*---------- 74

Affirmed, *Hipolite Egg Co.* v. *United States*---------- 223

The provisions of section 10 of the act apply not only to articles of food which have been shipped for sale but also to such article which has been shipped for use as raw material in the manufacture of some other product. *Hipolite Egg Co.* v. *United States*-- 223

Affirming *United States* v. *50 Cans of Preserved Whole Eggs*-- 74

Adulterated eggs transported from one State to another are subject to seizure and condemnation under section 10 of the act, though the article was shipped, not for sale as eggs, but solely for use as raw material in the manufacture of some other product. *United States* v. *Two Barrels of Desiccated Eggs*---------- 232

Where decomposed canned eggs not denatured were shipped in interstate commerce from one warehouse of the owner to another, they constituted "an adulterated food" within sections 2, 6, and 10 of the act, and it was no defense to a proceeding to condemn them that the intention of the owner in so transporting them was to sell or dispose of them for tanning purposes only. *United States* v. *13 Crates of Frozen Eggs*---------- 531

Affirmed, *United States* v. *13 Crates of Frozen Eggs*---------- 605

Where misbranded hog feed was reshipped to the manufacturer by its customer in another State, for the purpose of being remanufactured or remixed and thus being made to conform with statements on the labels, *held* that the feed was subject to seizure and condemnation, though the shipment and transportation of the feed was not "for sale." *United States* v. *426 Bags of Economy Special Hog Feed*---------- 1001

The shipment in interstate commerce of an adulterated food or drug product, which was the subject of a single sale and single shipment, though consisting of numerous packages, constitutes a single offense under section 2 of the act. *United States* v. *Watson-Durand-Kasper Grocery Co*---------- 837

In a proceeding to condemn several shipments of canned salmon as being adulterated in that it consisted in whole or in part of decomposed salmon, each shipment consisting of numerous cases and each case containing 48 cans, *held* that the word "article" in section 7 of the act, relating to adulteration, referred to each lot or shipment, and not to the single separate can, or to the single, separate case. *United States* v. *2,205 Cases of Canned Salmon*---- 1133

The depositing in the mails at a point in Ohio for transmission to Washington, D. C., of a medicine containing cocaine without a label indicating its presence, was interstate commerce and constituted a shipment and delivery of such article for shipment within the act, section 2. The mere fact that the negotiations were carried on by mail and that the sale of the article was completed before it was placed in the mail did not give the transaction an intrastate character. *United States* v. *Tucker*---------- 248

On trial of an information charging defendant with shipping into another State misbranded drugs, *held* essential to a conviction

SHIPMENT—Continued. Page

that the Government establish that defendant shipped the drugs in interstate commerce; and that the sending or shipping of such article by mail from one State to another constitutes an interstate shipment. *United States* v. *Gandara*---------- 984

See Adulteration; Article; Entrapment; Export Articles; Interstate Commerce; Jurisdiction; Knowledge and Intent; Misbranding; Offenses; Original Package; Original Unbroken Package; Package; Penalties; Sale.

SHRED COCOANUT:

An article labeled and sold as "Shred Cocoanut" *held* misbranded by reason of its containing glycerine and sugar, the presence of which substances was not declared on the label. *United States* v. *Dunham Manufacturing Co*---------- 440

SILVER DRAGÉES.

See Confectionery.

SILVER, METALLIC.

See Confectionery.

SIMPSON'S CEREBRO-SPINAL NERVE COMPOUND:

A medicinal preparation labeled "Dr. C. M. Simpson's Cerebro-Spinal Nerve Compound" *held* misbranded in that statements regarding the curative or therapeutic effect of the preparation, appearing on cartons enclosing the bottles containing the article and in circulars enclosed in the cartons with the bottles, were false and fraudulent. *United States* v. *Simpson*---------- 700

Affirmed, *Simpson* v. *United States*---------- 832

SIN IGUAL:

A medicinal preparation labeled "Sin Igual" *held* misbranded in that the labels falsely and fraudulently represented the curative or therapeutic effect of the article with respect to certain diseases. *United States* v. *Gandara*---------- 984

SIRUP:

Food sirup is a saccharine solution of a superior quality, frequently called molasses, and it may be made of any of the various sugars of commerce, such as cane, beet, or maple. *United States* v. *68 Cases of Sirup*---------- 62

Sirup containing 90 percent of white sugar and not more than 10 percent of maple sugar, and labeled "Gold Leaf Syrup", with a design of a maple leaf and sugarcane stalks, and the words "Composed of Maple and White Sugar", together with the name of the maker, held not misbranded. *In re Wilson*---------- 33

Where sirup made from cane sugar and flavored to represent maple sirup by the introduction of an extract from maple wood after it had been chopped down, was labeled "Western Reserve Ohio Blended Maple Syrup", the words "Ohio" and "Maple Syrup" being in red, and between them the word "Blended", and below that, in smaller type, the statement, "This syrup is made from the sugar maple tree and cane sugar", *held* that the label was misleading and the sirup misbranded. *United States* v. *Scanlon*---------- 28

Where certain cases of sirup were labeled "Western Reserve Ohio Blended Maple Syrup. Guaranteed absolutely pure Shipped by Western Reserve Syrup Company, Cleveland, Ohio", and the bottles of sirup contained in the cases were labeled "Western Reserve Ohio Blended Syrup Western Reserve Syrup Company, Cleveland, Ohio, Blenders of Fancy Maple Syrup and Maple Sugar", *held* that, construing all of the words of the bottle label together, the same meaning was intended in the bottle labels as in the labels on the cases, namely, that the bottles and boxes contained blended maple sirup, and that the article was not misbranded although it was composed of cane sirup flavored with an extract made from maple wood. *United States* v. *68 Cases of Sirup*---------- 62

SIRUP—Continued. Page

A sirup consisting of refined cane sirup flavored with an extract of maple wood and described on the label as "Western Reserve Blended Maple Syrup", *held* to be within the provision of the act that an article which does not contain any added poisonous or deleterious ingredients shall not be deemed to be adulterated or misbranded if labeled so as to plainly indicate that it is a compound, imitation, or blend, and the word "blend" is plainly stated on the package, which term shall be construed to mean a mixture of like substances, not excluding harmless coloring or flavoring ingredients used for the purpose of coloring or flavoring only; and that there was therefore no violation of the act. Id.

An article labeled "Topmost Cane and Maple Sirup. This sirup is composed of the following ingredients, and none other: Cane Sirup 60 percent; Maple Sirup 40 percent", *held* misbranded because it contained little, if any, maple sirup. *United States* v. *John A. Tolman & Co* ---------- 78

Sirup which contained no maple sirup and the label of which had the word "Maple" in large letters, and the word "Etta" in smaller letters and underneath and to the right of the word "Maple" and without a hyphen, and the word "Syrup" in letters a little larger than the letters in the word "Maple", and below and in much smaller letters the words "Produced by the delicate blending of refined sugar syrup, cane and maple etta syrups", and farther below and in still smaller characters the words and figures "Over 90% pure", *held* misbranded. *United States* v. *Johnson et al* ---------- 847

A product contained in cans shipped in a case labeled "Two Doz. Purity Quarts Scudder's Canada Syrup, * * * Full Measure", *held* misbranded because each of the cans contained less than one quart of the product. *United States* v. *Scudder Syrup Co* ---------- 461

See Blend; Corn Sirup (Glucose); Maple Sirup; Molasses; Sugar.

SIRUP, GRENADINE:

The term "Grenadine Syrup" in the common acceptation does not necessarily mean a sirup actually made from pomegranates. A sirup labeled "Grenadine Syrup", composed of sugar, citric and tartaric acids, and the juices of certain fruits, *held* not misbranded. *United States* v. *30 Cases Purporting to be Grenadine Syrup* ---------- 394

SMACK:

A manufactured, synthetic concentrate intended for use as a base for a beverage imitative of grape juice, and resembling grape juice in consistency, color, and taste, but not shown to contain any natural grape juice, and labeled, "Smack", held to be an article sold under its own distinctive name and not misbranded. *United States* v. *24⅞ Gallons of Smack* ---------- 1181

SPARKLING WHITE SEAL.

See Champagne.

SPECIMENS.

See Samples.

STANDARDS:

The act is not void for uncertainty and indefiniteness in that no standard of grade, quality, or purity is prescribed, but the determination of standards is left to the courts. While the act is necessarily broad in its terms, the courts can well protect the rights of parties in each particular case by requiring specific and properly drawn pleadings. *United States* v. *420 Sacks of Flour* ---------- 96

There is no merit in the objection that so much of section 7 of the act as relates to food is void because no standard is fixed as to foods. *Shawnee Milling Co.* v. *Temple et al* ---------- 106

Section 8 of the act, prohibiting the misbranding of articles of food or drink so as to deceive or mislead the purchaser, is not invalid,

STANDARDS—Continued. Page

so far as domestic wine was concerned, for failure to establish a standard, as applied to a mixture of wine and fermented solution of dextrose represented to be Hochheimer Typo Rhine wine. *United States* v. *Sweet Valley Wine Co*_____ 468

Congress has the right in the interests of the general public and in the exercise of its control over interstate commerce to prescribe standards with which drugs when shipped in interstate commerce must comply, and has exercised this right in the provision of the Food and Drugs Act declaring that a drug shall be deemed to be adulterated if, when sold under or by a name recognized in the United States Pharmacopoeia or National Formulary, it differs from the standard of strength, quality, or purity as determined by the test laid down in the United States Pharmacopoeia or National Formulary official at the time of investigation. *United States* v. *G. F. Harvey Co*_____ 754

Circular no. 19 issued by the Secretary of Agriculture under authority of act of March 3, 1903, establishing standards of purity for food products and what are regarded as adulterations therein, cannot be considered in determining what constitutes the offense of adulteration in violation of the Food and Drugs Act of June 30, 1906. *United States* v. *St. Louis Coffee & Spice Mills*_____ 44

The standards for purity of food products established by the Secretary of Agriculture in circular no. 19 of the Department, issued by authority of act of March 3, 1903, governs in determining what constitutes adulterations of such products under the Food and Drugs Act of June 30, 1906. *United States* v. *Frank et al*_____ 205

In a libel proceeding for condemnation of vinegar for adulteration, *held* that the Government was not limited to tests for genuine vinegar mentioned in bulletin 65, or to the standards for vinegar established in circular 19 of the Department of Agriculture, or even to methods of analysis adopted under regulation no. 4, but may make use of any accurate test. *United States* v. *100 Barrels of Vinegar*_____ 287

There is no legal standard for 50 as the number of *B. coli* in oysters as determining the presence of filth in sufficient amount to constitute adulteration under the act, and the Department of Agriculture has no right or authority to accept such standard. *United States* v. *408 Bushels of Oysters*_____ 718

Where the quantity of salt in coloring material varied with each manufacturer, and even somewhat in the product of a single manufacturer, and it had the effect of increasing the quantity of coloring material, and, regardless of the percentage used, required great dilution by the user, the Secretary of Agriculture had no authority under the act to establish an arbitrary percentage beyond which manufacturers could not go without violating section 7, and in the absence of any deceptive labeling a coloring material containing a larger percentage of salt did not violate that section. *W. B. Wood Manufacturing Co.* v. *United States*__ 1070

On the issue of whether ice cream is adulterated because it contained only 7.09 percent of butterfat, *held* that, in the absence of any established standard under the act, with respect to ice cream, evidence of the custom or use of the trade was insufficient to warrant the fixing of 14 percent as the minimum amount of butterfat required in ice cream. *United States* v. *Rinchini*_____ 318

In the absence of a standard under the act, for lithia water, where the Government established by the testimony of chemists, pharmacologists, physicians, and druggists that natural lithia water is ordinarily understood to mean a water containing a sufficient amount of lithium to give a therapeutic effect when the water is consumed in reasonable quantities, water containing only 1 grain of lithium in 10,000 gallons of water, and labeled "lithia water", *held* misbranded. *United States* v. *Seven Cases of Buffalo Lithia Water*_____ 573

STANDARDS—Continued. Page

In a proceeding to condemn nuts on the ground that they were branded as "fancy mixed nuts" in violation of the act, *held* that, in the absence of a standard of quality for nuts to be so branded, established under authority of the act, the testimony of Government witnesses as to such a standard as understood in the trade was not competent. *United States* v. *25 Bags of Nuts*---------- 677

The standard set by the act as a test of adulteration of a food product is not what is customarily done by manufacturers, but what is properly done. *W. B. Wood Manufacturing Co.* v. *United States*-- 1098

It would be difficult, if not impossible, to fix any arbitrary standard for determining when a food product has reached such a stage of decomposition as to render it "filthy, decomposed, or putrid" within the meaning of the Act. In the absence of such a standard, each case must be determined on its own merits. Where it appears that an article of food is so far decomposed as to be unfit for food, it comes within the letter and spirit of the law. *United States* v. *200 Cases of Adulterated Tomato Catsup*---------- 583

The act has not established a precise standard whereby adulteration can be determined under the act, section 7, paragraph 6, providing that an article of food shall be deemed to be adulterated if it consists in whole or in part of a filthy, decomposed, or putrid animal or vegetable substance, and therefore the courts have uniformly permitted each case to be judged upon its own special facts. *United States* v. *384 Cases of Canned Cherries*---------- 1176

Provisions of the act prohibiting sale or shipment in interstate commerce of food defined as adulterated if it contain a "decomposed substance", *held* not invalid because the act fails to definitely specify the extent to which the decomposition must have progressed to bring an article within the prohibition. *A. O. Andersen & Co.* v. *United States*---------- 1053

On trial of an information charging shipment of milk adulterated in that it consisted in whole or in part of a filthy, decomposed, or putrid animal or vegetable substance, *held* that the jury, in determining whether or not the milk was old and impure at the time it was delivered for shipment, might use the standard prescribed in a statute of the State in which the trial was held providing that "milk containing more than 1,000,000 bacteria per cubic centimeter shall be considered impure milk." *United States* v. *Hopkins*---------- 585

It was no defense to a prosecution for selling adulterated milk in the District of Columbia that there is no standard fixing the limits between pure and impure milk. The dividing line in each instance is a question of fact. *Dade* v. *United States*---------- 465

In the absence of a fixed standard as to the percentage of the flour content of the wheat in flour that may be properly termed patent flour, flour containing 90 percent of the flour content of the wheat, *held* not to be adulterated or misbranded when labeled "Patent Flour." *Lexington Mill & Elevator Co.* v. *United States*---------- 443

An information alleging adulteration and misbranding of a shipment of butter because it was deficient in milk fat, did not charge a violation of the act, where at the time of the shipment there was no law, and no authority under law to make a regulation, prescribing the amount of milk fat in butter. *United States* v. *Swift & Co*---------- 1146

The court, in construing the phrase "added poisonous or added deleterious ingredient", in the act, section 7, declaring that an article of food shall be deemed to be adulterated if it contains any added poisonous or other added deleterious ingredient, must consider section 8, providing that an article of food which does not contain any added poisonous or deleterious ingredient shall not be deemed to be adulterated or misbranded, in specified cases, and, when so construed, the act requires a standard before there can be any added ingredient or adulteration. *United States* v. *40 Barrels and 20 Kegs of Coca Cola*---------- 606

STANDARDS—Continued. Page

The fact that a formula has been made up and followed and a distinctive name therefor adopted does not suffice to take an article from section 7, subdivision 5, of the act. In such a case the standard by which the combination is to be judged is not necessarily the combination itself. A poisonous or deleterious ingredient with the injurious effect stated by the statute may be an added ingredient in the statutory sense although it is covered by the formula and made a constituent of the article sold. *United States* v. *Coca Cola Co*---------- 741

A statement describing a drug as "antiseptic" is not a profession of standard of strength for the article, within the definition of adulteration in the act, section 7. *United States* v. *17 Bottles, Etc., of An Article of Drugs Labeled in Part "B. & M."*---------- 1287

STARCH.

See Confectionery.

STATE HEALTH OR FOOD OFFICERS:

Section 5 of the act authorizes prosecutions upon the complaint of any State health officer, and the district attorney can institute such a prosecution, upon any adequate proof, without action of agents of the Department of Agriculture. *United States* v. *74 Cases of Grape Juice*---------- 144

Section 5 of the act makes it the duty of the district attorney upon the presentation of "satisfactory evidence" of a violation of the act, by any State health or food officer, to cause appropriate proceedings to be instituted and prosecuted. A preliminary investigation including notice and hearing, provided for in section 4, applies only when the district attorney acts upon report of the Secretary of Agriculture; it is not required when he acts upon evidence furnished by any State health or food officer, or upon his own initiative. *United States* v. *74 (or 20) Cases of Grape Juice*---------- 256

United States v. *Morgan et al*---------- 335

See Examination; Investigation; Notice and Opportunity to be Heard.

STRENGTH.

See Standards.

SUBSEQUENT OFFENSE.

See Indictment; Information; Offenses; Penalties; Prior Conviction; Res Judicata.

SUBSTITUTION:

In a prosecution for adulteration of an article of food by substitution it is unnecessary for the Government to prove that the substituted substance is poisonous or deleterious or injurious to health. It is sufficient within the meaning of the act if any substance not a component part of the original substance has been substituted. *United States* v. *Libby, McNeill & Libby*---------- 442

On a charge of adulteration of an article of food by substitution of another substance, the question whether the substitution of the substance injuriously affects, or makes any difference in, the article of food is immaterial; it is sufficient to constitute adulteration of the article if the substance was substituted in whole or in part therefor. *United States* v. *Bowers*---------- 763

See Adulteration; Injurious to Health.

SUGAR:

All sugars are "like substances" and a mixture of two or more of them produce a "blend" within the meaning of the act. *United States* v. *68 Cases of Syrup*---------- 62

SUGAR—Continued. Page

The introduction of sugar into a frozen egg product did not constitute adulteration thereof within the meaning of the act, where the frozen egg product was prepared according to the directions of the purchaser, and it or a similar article was made under a patent. *United States* v. *443 Cans of Frozen Egg Product*_____ 197

Condensed skimmed milk, containing 42 percent of cane sugar, the presence of which was not declared on the label, *held* adulterated and misbranded. *United States* v. *Libby, McNeill & Libby*_____ 442

Affirmed, *Libby, McNeill & Libby* v. *United States*_____ 540

See Sirup.

SULPHURRO:

A drug product labeled "Sulphurro" *held* misbranded in that the label and a circular or pamphlet inclosed in the package as it was transported in interstate commerce contained false and fraudulent statements regarding the curative or therapeutic effect with respect to certain diseases. *United States* v. *C. M. C. Stewart Sulphur Co*_ 669

SWEET SPIRITS OF EDEN:

An article labeled "Sweet Spirits of Eden", *held* misbranded because the packages and label bore and contained statements regarding its curative or therapeutic effect which were false and fraudulent, and because the quality of alcohol contained in the article was misstated on the packages or label. *United States* v. *Kellett*_____ 711

TALC:

Talc is a mineral compound, not an article of food, and is known as hydrated silicate of magnesia. *United States* v. *R. C. Boeckel & Co. et al*_____ 637

See Confectionery.

TANKAGE.

See Digester Tankage.

TESTIMONIALS.

See Evidence.

TESTS:

The Government is not limited to the tests and standards for vinegar mentioned in Bulletin No. 65, Bureau of Chemistry, United States Department of Agriculture, and Circular 19, United States Department of Agriculture, nor to any other prescribed method of analysis, but may make use of any accurate test. *United States* v. *100 Barrels of Vinegar*_____ 287

Evidence *held* to establish the accuracy of the gylcerin test for the determination of pure cider vinegar. Id.

The use by the Government of the lypolytic decomposition or fatty acid test instead of the organoleptic tests to determine whether dried egg yolk is adulterated, that is, whether it consisted in whole or in part of a filthy, decomposed, or putrid animal substance, *held* not arbitrary or capricious. *Knapp et al.* v. *Callaway, et al*_____ 1276

See Examination; Notice and Opportunity to be Heard; Investigation; Samples; Standards.

TEXAS WONDER:

An article labeled "A Texas Wonder" *held* misbranded in that the label and package contained statements regarding the curative or therapeutic effect of the article with respect to certain diseases and ailments, which were false and fraudulent. *United States* v. *60 Dozen Bottles of "A Texas Wonder"*_____ 888

United States v. *One Gross Packages of "A Texas Wonder"*_____ 910

TOMATO CATSUP: Page

A libel alleging that tomato catsup labeled "Made from choice ripe tomatoes, granulated sugar, selected high-grade spices, grain vinegar was misbranded, because it was made in part from "tomato pulp screened from peelings and cores as the offal of tomato canning factories and not from choice ripe tomatoes", *held* not to set forth a prima facie case of misbranding, as it would not be assumed that, because the peelings and cores were not used in a tomato canning factory, they were not suitable for making tomato catsup. *United States* v. *650 Cases of Tomato Catsup*---------- 31

Tomato catsup, containing bacteria, yeasts, and molds in very large and unusual quantities, and shown to have been manufactured by insanitary methods, *held* adulterated in that it consisted in whole or in part of a filthy, decomposed, or putrid vegetable substance. *United States* v. *200 Cases of Adulterated Tomato Catsup*-------- 583

In a libel proceeding against certain cases of tomato catsup, of which claimant was the manufacturer, for alleged adulteration in that it consisted in whole or in part of a filthy and decomposed vegetable substance, where the Government adduced evidence tending to show that the tomatoes used in the manufacture of the catsup were partly or wholly decomposed or rotton, *held*, on the theory that in the manufacture of tomato catsup the exclusion of all decomposed tomato matter was impossible, that the burden was on the Government to show that in the selection of the tomatoes from which the catsup was manufactured such reasonable care and caution as a person of ordinary care and prudence would use were not exercised to exclude decomposed tomatoes, and that the catsup was decomposed and filthy to an unreasonable extent, or to an extent that a reasonably prudent, cautious, and diligent person engaged in the business of manufacturing such a product would not permit it to be consumed by his own family. *United States* v. *1,038 Cases of Tabasco Flavor Catsup*---------- 871

In a proceeding against a shipment of tomato catsup alleged to be adulterated in that it consisted in whole or in part of a filthy, decomposed, or putrid vegetable substance, *held*, on evidence of the presence of molds, yeasts and spores, and bacteria in the catsup, that the jury, in order to return a verdict in favor of the Government, must find that there was such a substantial presence of mold, yeasts or spores, or bacteria as to render the product filthy, decomposed, or putrid, in the common, ordinary, and practical sense of the words. *United States* v. *720 Cases of Tomato Catsup*- 877

Tomato catsup *held* adulterated in that it consisted in whole or in part of a filthy, decomposed, or putrid vegetable substance. *United States* v. *275 Cases Tomato Catsup*---------- 141

Tomato catsup *held* adulterated in that it consisted in whole or in part of a decomposed vegetable substance. *United States* v. *1,246 Cases of Tomato Catsup*---------- 943

Where pumpkin was added to tomato catsup, the fact that it was merely labeled "Compound" was not sufficient to constitute compliance with the act, which requires that such article be labeled, branded, or tagged so as to plainly indicate the substances composing the compound. *William Henning & Co.* v. *United States*---- 344

TOMATOES, CANNED:

A libel in a proceeding instituted for seizure and condemnation of canned tomatoes as adulterated and misbranded in violation of the act, representing that the article as analyzed in the Department of Agriculture was shown to be adulterated in that tomato pulp had been mixed and packed with, and substituted wholly or in part for, the article, and representing that the article as so analyzed was shown to be misbranded in that the labels contained the statement "Tomatoes" and a cut of a ripe tomato, which were false and misleading and deceived and misled the purchaser, *held* insufficient in that it did not contain allegations of substantive facts which clearly showed the right of the Government to seize and condemn the goods. *United States* v. *154 Cases of Tomatoes*- 967

TOMATOES, CANNED—Continued. Page

Canned tomatoes *held* not adulterated or misbranded by reason of alleged addition of water thereto. *United States* v. *3,998 Cases of Canned Tomatoes*---- 1213

TOMATO PASTE:

Tomato paste *held* adulterated in that it consisted in whole or in part of a filthy, decomposed, or putrid vegetable substance. *United States* v. *Gidden*---- 360

TOMATO PULP:

Tomato pulp *held* adulterated because it consisted in whole or in part of filthy or decomposed vegetable substance. *United States* v. *5,060 Cans of Tomato Pulp*---- 780

Tomato pulp *held* adulterated in that it was filthy or decomposed, on evidence that it contained mold indicating that decomposed tomatoes had entered into the manufacture of the product. *United States* v. *1,500 Cases of Tomato Pulp*---- 892

TOMATO PUREE:

In an action to condemn "tomato puree" as adulterated in that it consisted in whole or in part of a filthy or decomposed vegetable substance, *held*, on evidence of the presence of molds in the product, that the jury, in order to return a verdict for the Government, must find that there was such a substantial presence of molds as to render the product filthy or decomposed in the common and practical sense of the words. *United States* v. *1,000 Cases of Tomato Puree*---- 704

TRADE MARK:

The filing of a trade mark for an article of food or drug does not give the manufacturer the right to put a false statement upon the label of the manufactured article. The fact that the name of an article is a registered trade mark is no defense to a prosecution for misbranding by false or misleading statements on the label of the article. *United States* v. *American Chicle Co*---- 362

While it is true that the mere fact of trade mark does not take the product out of the operation of the act, nevertheless, where it appears that the product does not in any way violate any of the provisions of the statute, the rights of the owners of the trade mark must have consideration and they may not be deprived of their property rights in order to meet some untenable position taken by someone in authority to whom is delegated the power to invoke the aid of the statute. *United States* v. *23 7/12 Dozen Bottles, Etc., of An Article of Drugs Labeled "Lee's Save The Baby"*---- 1240

See Distinctive Name.

TRANSPORTATION.

See Interstate Commerce; Shipment.

TRATAMIENTO ZENDEJAS:

An article labeled "Tratamiento Zendejas" *held* misbranded in that the package and label contained statements regarding the curative or therapeutic effect of the article which were false and fraudulent. *United States* v. *186 Bottles of Tratamiento Zendejas*---- 998

TUBERCLECIDE:

In a prosecution for alleged misbranding of a medicine labeled "Tuberclecide" in that the labels falsely and fraudulently represented it as a remedy for tuberculosis, evidence *held* insufficient to show that statements appearing on the labels were false. *United States* v. *Tuberclecide Co*---- 729

TUNA FISH, CANNED:

Canned tuna, labeled "Tuna for pets. Not intended for human consumption", *held* to be subject to condemnation and forfeiture, where it appeared that the contents of practically one-third of the cans were decomposed or tainted. *United States* v. *620 Cases of Canned Tuna Fish*---- 1281

TURPENTINE, SPIRITS OF: Page

An article sold as spirits of turpentine *held* adulterated because it contained mineral oil. *United States* v. *Lorick & Lowrance*_____ 202

UNFIT FOR FOOD:

"Unfit for food", as used in the act, section 7, paragraph 6, means what is ordinarily understood by the expression. *United States* v. *1,974 Cases of Canned Salmon*_____ 1108

The expression "unfit for food", as used in the act, section 7, paragraph 6, means reasonably unfit for human food. *United States* v. *2,995 Cases of Canned Salmon*_____ 1136

It is a matter of common knowledge, in determining whether an article is fit or appropriate for human food, that it be taken into account whether the article is harmful; whether it has food value; whether it satisfies hunger; whether it builds up wasted tissues exhausted because of lack of food; and, to a certain extent, whether it pleases the taste. Id.

In a prosecution charging shipping eggs adulterated in that they coonsisted in whole or in part of a filthy, decomposed, and filthy animal substance, held, that the jury in order to convict, must find that the eggs were decomposed to such an extent that they were unfit for food at the time they were shipped. *United States* v. *Blazek*_____ 1074

In a libel proceeding to condemn a shipment of canned salmon as adulterated in that it consisted in whole or in part of a filthy, decomposed, or putrid animal substances, *held* that the jury, in order to find for the Government, must find that the salmon was so filthy, decomposed, or putrid as to make it "unfit for food" as that expression is ordinarily understood, and that such adulteration extended to the whole shipment. *United States* v. *1,974 Cases of Canned Salmon*_____ 1108

The expression "unfit for food", in the provision of the act, section 7, that an article of food shall be deemed to be adulterated "if it consists in whole or in part of a filthy, decomposed, or putrid animal substance, or any portion of an animal *unfit for food*, etc.", construed to qualify the first clause of the provision, that is, "if it consists in whole or in part of a filthy, decomposed, or putrid animal substance." Id.

United States v. *2,995 Cases of Canned Salmon*_____ 1136

In a proceeding for condemnation of canned salmon as adulterated within the provision of the act that an article of food shall be deemed adulterated if it consists in whole or in part of a filthy, decomposed, or putrid animal substance, *held* that in order to warrant condemnation the jury must find that the salmon was filthy or decomposed or putrid to an extent that rendered it reasonably unfit for human food. *United States* v. *1,974 Cases of Canned Salmon*_____ 1108

United States v. *2,995 Cases of Canned Salmon*_____ 1136

The act does not use the words "unfit for food", but when it describes an adulterated article of food as one which is "decomposed and filthy" it means undoubtedly unfit for food to the extent that it would be improper and unfit food for a person to indulge in. *United States* v. *3,000 Pounds of Frozen Eggs*_____ 198

Where it appears that an article of food is so far decomposed as to render it unfit for food, it comes within the letter and spirit of the law which condemns as adulterated foods which consist in whole or in part of a filthy, decomposed, or putrid animal or vegetable substance. *United States* v. *200 Cases of Adulterated Tomato Catsup*_____ 583

A. O. Andersen & Co. v. *United States*_____ 1053

A libel charging that an article of food is adulterated in that it consists in whole or in part of a filthy, decomposed, or putrid vegetable substance states completely and distinctly an offense under the act, section 7, and therefore an added allegation in the libel that the article "is unfit for food" may be rejected as surplusage; and, on a trial of the libel, it was unnecessary for the

UNFIT FOR FOOD—Continued. Page

Government to prove that the article was unfit for food. The test of adulteration in such case is not to be determined by the answer to the question whether the article is or is not fit for food. *United States* v. *275 Cases Tomato Catsup*---------- 141

If an article of food consists in whole or in part of a filthy or decomposed vegetable substance, it is not necessary, in order to come within the prohibition of the act, that it be so filthy or decomposed as to be unfit for food. *United States* v. *720 Cases of Tomato Catsup*---------- 877

Under section 7 of the act an article of food is adulterated and subject to condemnation and forfeiture if it consists in whole or in part of a filthy, decomposed, or putrid animal or vegetable substance, and it is unnecessary that it be shown to be unfit for food, or deleterious, if eaten. *United States* v. *200 Cases, More or Less, of Canned Salmon*---------- 1095

In a proceeding to forfeit canned pork and beans because the product consisted in whole or in part of a decomposed vegetable substance, *held* that whether or not the product was unfit for human food, or would be deleterious to health, if eaten, was irrelevant and the Government was not required to establish the affirmative as to either. *United States* v. *1,367 Cases of Pork and Beans*-- 766

United States v. *5,060 Cans of Tomato Pulp*---------- 780

On a charge in a libel to condemn canned salmon, that it was adulterated in that it consisted in whole or in part of a decomposed animal substance, *held* that any evidence tending to show the salmon to be fit or to be unfit for food was improper for consideration by the jury and was to be disregarded. The letter of the statute prohibits the transportation and sale in interstate commerce of any article of food which is decomposed. The words are clear and free from ambiguity. There is nothing in the statute itself which would make the state of healthfulness or edibleness of the article relevant to the inquiry. It makes no difference whether the salmon was fit for food and healthful or not. *United States* v. *2,205 Cases of Canned Salmon*---------- 1133

The condition of a product in the hands of a consumer is the place and time to test its fitness for food. *United States* v. *443 Cans of Frozen Egg Product*---------- 345

See Adulteration; Dangerous to Health; Filthy, Decomposed, and Putrid; Injurious to Health; Misbranding.

VANILLA EXTRACT OR FLAVOR:

An information charging that defendant shipped in interstate commerce a liquid labeled "Flavor of Vanilla", and that it did not contain any extract of vanilla, does not state a case of adulteration or misbranding of vanilla extract in violation of the act, the words "extract" and "flavor" not being synonymous terms. *United States* v. *St. Louis Coffee & Spice Mills*---------- 44

An article labeled "Prime Vanilla Extract, made from the extractive matter of prime vanilla beans, sweetened with cane sugar", which contained only 2 grains of the vanilla bean to each 100 cc of the extract, and which was artificially colored with caramel, and contained added vanillin, *held* adulterated and misbranded. *United States* v. *Hudson Manufacturing Co*---------- 462

A flavoring substance composed of vanillin, coumarin, and burnt sugar, labeled, "Extract of Vanillin and Coumarin, Burnt Sugar Color", *held* adulterated in that it was colored in a manner whereby its inferiority was concealed; and *held* misbranded in that it was an imitation of vanilla extract and was not labeled as an imitation; and further misbranded in that it was a compound, and was not labeled so as to plainly indicate that it was a compound, and the word "compound" was not stated on the label. *United States* v. *McConnon & Co*---------- 496

A product shipped in interstate commerce as vanilla extract, *held* adulterated and misbranded in that it was not in fact vanilla extract, but was a solution of coumarin artificially colored with caramel. *United States* v. *Lowenthal*---------- 626

VANILLA EXTRACT OR FLAVOR—Continued. Page

Articles labeled "Extract of Vanilla" and "Ext. Vanilla" *held* misbranded because they were not true extract of vanilla, but were compounds of vanillin and coumarin artificially flavored and colored. *United States* v. *S. Gumpert et al*---------- 182

See Hudson's Extract; Lemon Extract or Flavor; Orange Extract or Flavoring.

VANILLIN:

Vanillin added to vanilla extract as such constitutes adulteration, and the resultant product is misbranded if labeled "Prime Vanilla Extract, made from the extractive matter of prime vanilla beans." *United States* v. *Hudson Manufacturing Co*---------- 462

See Vanilla Extract or Flavor.

VAPEX:

An article designated "Vapex", used as an inhalant for the treatment of head colds, *held* to be a "drug" within the meaning of the act, and not exempt from the provision of the act defining drugs as misbranded if the packages fail to bear a statement on the label of the quantity or proportion of alcohol. *United States* v. *11 Cartons of Drug Labeled in Part "Vapex"*---------- 1332

VENUE.

See Affidavits; Jurisdiction.

VINEGAR:

Vinegar is a food product, as defined in the act, section 6. *United States* v. *95 Barrels, More or Less, Alleged Apple Cider Vinegar*-- 1047

Apple cider, as defined in the dictionaries and as commonly and popularly understood, is the expressed juice of fresh apples, and apple vinegar is commonly and popularly understood to be produced by the alcoholic and acetic fermentation of that kind of cider. Id.

It is a matter of common knowledge that cider vinegar is far superior to distilled vinegar. *United States* v. *10 Barrels of Vinegar*- 254

Distilled vinegar and boiled apple cider are unlike substances and a mixture of the two do not constitute a blend within the meaning of the act. *Held* that a substance labeled "Saratoga Brand Vinegar, A Blend of Pure Boiled Apple Cider and Distilled Vinegar", which was composed of distilled vinegar and a small quantity of pure boiled apple cider, and containing no cider vinegar, was misbranded, as leading the public to believe that the article was composed of pure boiled apple cider cinegar and distilled vinegar. Id.

Vinegar labeled "Apple Cider Vinegar Made from Selected Apples", which was manufactured from evaporated apples by adding before pressing an amount of water substantially equal to that removed by evaporation, and being similar in taste, composition, and chemical test to vinegar made from the expressed juice of fresh apples, *held* misbranded in that the label bore statements regarding the article and the ingredients or substances contained therein which were false and misleading, and in that it was offered for sale under the distinctive name of another article. *United States* v. *95 Barrels, More or Less, Alleged Apple Cider Vinegar*-- 1047

Reversed, *Ninety-five Barrels, More or Less, Apple Cider Vinegar* v. *United States*---------- 1079

Judgment C. C. A. reversed, *United States* v. *95 Barrels, More or Less, Alleged Apple Cider Vinegar*---------- 1118

Claimant manufactured vinegar from sound and mature apples, free from rot and ferment, from which, for the purpose of preservation 80 percent of the water had been evaporated and an equal amount of pure water added before pressing. The liquid obtained by the pressing was identical in taste, substance, and chemical test to cider pressed from unevaporated apples. If any constituent element of the apple was removed by the evaporating process it was

VINEGAR—Continued. Page

so small that its absence was not shown by chemical test. Vinegar so made had been extensively sold in the market for many years as "apple cider vinegar." *Held* that such name was not a misbrand. *Ninety-five Barrels, More or Less, Apple Cider Vinegar* v. *United States*---- 1079

Reversing judgment in *United States* v. *95 Barrels, More or Less, Alleged Apple Cider Vinegar*---- 1047

Vinegar made from dried apples by adding water equivalent to that removed in the drying and fermenting the resulting solution, even though it be similar to vinegar produced directly from fresh apple cider and equally wholesome, is not the same thing; and a label describing it as "Apple Cider Vinegar Made from Selected Apples" is misleading to the public, and a misbranding within the meaning of the act. *United States* v. *95 Barrels, More or Less, Alleged Apple Cider Vinegar*---- 1118

Reversing judgment C. C. A. in *Ninety-five Barrels, More or Less, Apple Cider Vinegar* v. *United States*---- 1079

In a libel proceeding for condemnation and forfeiture of vinegar alleged to be adulterated the Government, in its proof, is not limited to the standards mentioned in bulletin no. 65 and circular no. 19 of the Department of Agriculture, nor to the methods of analysis adopted under regulation 4, but may make use of any accurate test. *United States* v. *100 Barrels of Vinegar*---- 287

Where samples of alleged pure cider vinegar showed only from 0.11 to 0.16 glycerin, it was held not to be pure cider vinegar, but an adulterated article. Evidence *held* to establish the accuracy of the glycerin test for the determination of pure cider vinger. Id.

Evidence *held* insufficient to warrant condemnation of an article labeled "Pure Apple Cider Vinegar" as adulterated and misbranded. *United States* v. *1,300 Cases of Vinegar*---- 899

See Cider; Standards; Tests.

VODKA:

An article labeled "Vodka for Passover" *held* misbranded because statements on the label in the Russian and Hebrew languages represented that the article was imported vodka produced in the Empire of Russia, when in fact it was a domestic product and had been manufactured in the United States. *United States* v. *Russian Monopol Co*---- 784

WAREHOUSEMEN:

The act, prohibiting shipment, etc., of adulterated food and drugs, applies to warehousemen shipping such goods, as well as to manufacturers or dealers. *United States* v. *Buffalo Cold Storage Co*---- 103

WATER.

See Bethesda Natural Mineral Spring Water; Buffalo Lithia Water; Capon Springs Water; Crab Orchard Concentrated Mineral Water; Crab Orchard Mineral Water; Imperial Spring Water; Robinson Spring Water.

WATER-GROUND MEAL:

The term "water-ground" means ground by a mill using water as a motive force applied directly to a water wheel, and does not allude to meal ground by electric power generated originally by water. *United States.* v. *58 Sacks and 70 Sacks Corn Meal*---- 322

See Corn Meal.

WEIGHT, MEASURE, AND NUMERICAL COUNT:

The provision of the act, section 8, paragraph 3, as amended by act March 3, 1913, that an article of food shall be deemed misbranded if in package form, the quantity of the contents be not plainly and conspicuously marked on the outside thereof in terms of weight, measure, or numerical count, with the proviso that "reasonable variations shall be permitted, and tolerances and also exemptions as to small packages shall be established by rules and regulations

WEIGHT, MEASURE, AND NUMERICAL COUNT—Continued. Page

made in accordance with section 3 of the act", *held* unconstitutional as too indefinite, not setting up any ascertainable standard of guilt. *United States* v. *Shreveport Grain & Elevator Co*_____ 1239

Reversed, *United States* v. *Shreveport Grain & Elevator Co*____ 1339

The provision of the act, section 8, paragraph 3, as amended by act March 3, 1913, declaring food misbranded if in package form, the quantity of the contents thereof is not plainly and conspicuously marked on the outside thereof in terms of weight, measure, or numerical count, with the proviso that "reasonable variations shall be permitted, etc., by rules and regulations made in accordance with section 3 of the act", *held* unconstitutional in that the provision, and particularly the proviso as to "reasonable variations", constituted a fixing by Congress of an unascertainable standard of guilt, and was inadequate to inform persons accused of violations thereof, of the nature and cause of the accusation against them. *United States* v. *American Maid Flour Mills*_____ 1286

The act, section 8, paragraph 3, as amended by act March 3, 1913, declaring food misbranded if the quantity of the contents of the package be not plainly and conspicuously marked thereon in terms of weight, measure, or numerical count, and providing that "reasonable variations" shall be permitted, *held* not unconstitutional for uncertainty in describing the offense. *United States* v. *The Merchants Biscuit Co*_____ 1129

The provision of the act, section 8, subdivision 3, as amended by act March 3, 1913, declaring food misbranded if the quantity of the contents is not plainly marked on the outside of the package, provided that reasonable variations shall be permitted, etc., is very specific and there can be no doubt as to what is required of the producers or manufacturers in order to comply therewith. The provision is not made uncertain because a "reasonable variation" shall be permitted. It does not mean that such persons do not have to ascertain accurately and affix to the package a statement of the weight, measure, or numerical count of the contents at the time the product is put in the package, but it does mean that if, due to causes over which they have no control, an unavoidable variation occurs after the goods leave their possession, then the law is not violated, if the variation is a reasonable one. Id.

The act, section 8, as amended by the act of March 3, 1913, provides that food is misbranded if the quantity of the contents is not plainly marked on the outside of the package in terms of weight, measure, or numerical count, and further provides that reasonable variations shall be permitted and tolerances and also exemptions as to small packages shall be established by rules and regulations in accordance with the provisions of section 3. *Held* that the provision requiring quantity of contents to be plainly marked on the outside of the package describes the offense with reasonable certainty and is not invalid, and that the provision respecting variations, tolerances, and exemptions is no part of the definition of the offense, but is a direction as to the exercise of administrative power. *United States* v. *Centralia Dairy Co*_____ 1336

The act, section 8, declaring that an article of food in package form shall be deemed to be misbranded if the quantity of the contents be not plainly and conspicuously marked on the outside of the package in terms of weight, measure, or numerical count, with the proviso "That reasonable variations shall be permitted, and tolerances and also exemptions as to small packages shall be established by rules and regulations made in accordance with section three", is not, by reason of said proviso, open to the constitutional objection of uncertainty in defining the offense; nor is said proviso an unconstitutional delegation of legislative power. *United States* v. *Shreveport Grain & Elevator Co*_____ 1339

Reversing *United States* v. *Shreveport Grain & Elevator Co*____ 1239

It is no defense to a prosecution for misbranding as to the measure of the contents of cans of sirup that the short measure was caused by filling the cans while the sirup was hot and that the shortage

WEIGHT, MEASURE, AND NUMERICAL COUNT—Continued. Page

was due to shrinkage which occurred when the sirup cooled. If the sirup was short in measure when shipped, it was misbranded. *United States* v. *Scudder Syrup Co.*---- 461

That there was a custom in the trade to label packages so as to state approximately the quantity in liquid or solid measure nearest the general size of the package, such package being known as commercial quarts, half gallons, etc., or that a seller's circulars and price lists, with reference to which sales were made to retailers, stated that the quantities specified were "commercial measure", did not excuse violations of the act, which provides in section 8, as amended by act March 3, 1913, that food or drugs are misbranded if the package or label bears any false or misleading statement, or if, in case of food in package form, the quantity of the contents be not plainly and conspicuously marked on the outside of the package in terms of weight, measure, or numerical count. *United States* v. *Rigney & Co*---- 632

Since butter varies in its moisture content which cannot be absolutely controlled, and is liable to dry out and thereby lose weight after manufacture, and this fact is known to the trade, a company engaged in the manufacture and shipping of butter in interstate commerce is presumed conclusively to have full knowledge of that fact and the necessary results that follow therefrom, and in manufacturing and shipping its product in interstate commerce it must make reasonable allowance for this variation and see that each package contains, when shipped, the amount of butter stated thereon, with such reasonable variations permitted and such tolerances allowed as are established by regulations made in accordance with section 3 of the act. *United States* v. *Trinidad Creamery Co*---- 1152

In a prosecution on a charge of misbranding shipments of an article of food on the ground that the packages contained less than the quantity stated thereon, *held* that, in order to convict, the jury must be satisfied beyond a reasonable doubt that the packages did not contain the quantity stated thereon, at the time they were shipped. *United States* v. *Barnet Creamery Association*---- 1149

See Constitutionality of the Food and Drugs Act; Knowledge and Intent; Regulations.

WHEAT:

An article sold as "No. 2 Red Wheat" *held* adulterated because wheat of inferior grades and kinds had been substituted for the article and had been mixed and packed with it so as to reduce, lower, or injuriously affect its quality; and *held* misbranded in that said article was labeled and branded so as to deceive and mislead the purchaser, and in that it was sold under the distinctive name of another article, to wit, No. 2 Red Wheat. *United States* v. *Hall-Baker Grain Co*---- 291

Reversed, *Hall-Baker Grain Co.* v. *United States*---- 391

WHEAT MIDDLINGS:

Where it appeared that "wheat middlings with mill-run ground screenings not exceeding 8%" was generally known as any one of the byproducts of the milling of wheat flour, exclusive of bran, which resulted after the major flour-recovering processes, and consisted of wheat offal which would pass through a screen having 18 or more meshes per linear inch, to which was added ground mill-run screenings not exceeding 8 percent, an article labeled "Wheat Middlings with Mill-Run Ground Screenings", manufactured as described, but with the difference that the mixture of wheat offal passing through a screen having 18 meshes per linear inch, and the added mill-run screenings not exceeding 8 percent, was pulverized by passing it through a grinder, *held* not adulterated within the meaning of section 7 of the act, declaring any article of food adulterated if mixed or powdered in a manner whereby inferiority is concealed. *United States* v. *200 Sacks of Wheat Middlings*---- 1189

WHISKY: Page

The word "whisky", in its general acceptation, means a distillate made from grain. The term "Bourbon whisky", as generally understood, is confined to a distillate of a fermented mixture of grain of which corn forms the greater part, and to such liquor distilled in certain localities, particularly Kentucky. A product distilled at New Orleans, La., and from a mixture of molasses, sulphuric acid, and water, and labeled "Bourbon Whisky", *held* misbranded. *United States* v. *50 Barrels of Whisky*---------- 22

WILLIAMS' PINK PILLS:

An article labeled "Dr. Williams' Pink Pills" *held* misbranded in that the labels and packages bore and contained statements regarding the curative or therapeutic effect of the article with respect to specified diseases, which were false and fraudulent. *United States* v. *Eleven Gross Packages of Dr. Williams' Pink Pills* ---------- 680

Affirmed, *Eleven Gross Packages of Dr. Williams' Pink Pills* v. *United States*---------- 752

WINE:

The word "wine" is, by general acceptance and standard definition, understood to mean the fermented juice of the undried grape. *United States* v. *Sweet Valley Wine Co*---------- 468

Wine labeled "Ohio Claret Wine", but consisting wholly or partly of pomace wine, *held* adulterated and misbranded. *United States* v. *60 Barrels of Wine*---------- 658

See Champagne.

WITNESSES.

See Depositions and Interrogatories; Evidence.

WORLD'S GREATEST KIDNEY AND BLADDER REMEDY:

An article labeled "World's Greatest Kidney and Bladder Remedy", *held* misbranded in that the label contained representations as to the curative or therapeutic effect of the article with respect to certain diseases, which were false and fraudulent. *United States* v. *Long*---------- 989

WRIGHT'S CONDENSED SMOKE:

An article made by distilling wood, and sold for curing meat, *held* not misbranded by the label "Wright's Condensed Smoke. A Liquid Smoke", such name being a fanciful or descriptive name and not implying to the purchaser that the article was actually smoke in condensed liquid form. *United States* v. *Wright et al*-- 482
